Operating in a financially sustainable manner is essential if the City is to achieve its Mission of assuring that residents, businesses, students and visitors receive municipal services in a customer friendly and financially responsible manner. While the City continues to address an accumulated General Fund deficit, significant legacy costs, and a continuing structural deficit, progress continues to be made:

- The General Fund deficit continues to be reduced, and the City's financial position is stabilized at least for the near term. Preliminary projections show the deficit as of June 30, 2014 to be $9 million, a reduction from $12.9 million the previous year. The City's cash position is adequate.
- A plan to eliminate the General Fund deficit no later than FY19 and to accumulate an adequate level of financial reserves no later than FY24 has been approved by the State.
- Revenues and expenses for the first quarter of FY15, which ended September 30, are generally in line with expectations.
- The City is vigorously pursuing external funding and resources to implement important projects in areas such as blight elimination, housing, and park improvements. More than $3 million has been received so far this year from federal agencies, state entities and community foundations, and additional applications are pending.

However, the legal challenge to changes made to retiree health care as part of restoring financial solvency continues. The June 30 decision by the Federal Court to permit the City to modify health care for retirees should provide some financial relief to the City while the case is being litigated. Should the City not prevail, however, the $5 million additional cost added to the FY15 budget will be continued, and may result in Flint's return to financial solvency becoming exceedingly difficult if not impossible

Improving Internal Operations

Achieving the goals set forth in the Strategic Plan will require a city organization that is efficient and effective, and capable of operating in an environment of limited resources. Elected leaders, appointed officials, and employees must be highly trained and professional, and place high priority on excellent customer service. Its organizational structures and process must be efficient, modern, and focused on results. Much remains to be done, but progress is being made:

- The search for an experienced professional City Administrator is underway, and several charter amendments are being considered by the voters, which would further enhance the efficiency of the government.
- A badly needed update to the City's web site is underway; progress has been delayed from initial completion targets as the selected vendor was unable to perform necessary tasks.
- A comprehensive review of City Ordinances is underway, with revisions in business licensing and zoning ordinances nearly complete.
- The organizational structure of the City has been revised to assure that capacity exists to implement the Master Plan.
- Professional development opportunities have been defined and are being provided for city staff. Current focuses include supervision and use of technology.
- An in-depth evaluation of the structure of the police and fire departments is underway with the goal of identifying the most efficient and effective structure for the delivery of public safety services.
- Nearly all labor contracts and personnel policies have been revised to improved organizational efficiency while containing short and long term costs associated with employee compensation.
- Review of the City's capacity to provide capacity and leadership in economic development is underway, including the potential of collaborative efforts with other entities.
- Reorganization of current staff positions to enhance constituent services is underway.
- Internal reorganizations and policy/procedure updates within the Police and Fire Departments have been enacted.
- The City's Emergency Management Plan has been updated.
- Reorganizations within the Utilities Division are being implemented to increase capacity to respond to maintenance and other needs.
- The Transportation Division has increased its capacity and lowered its costs to perform right-of-way maintenance activities by assigning casual skilled labor to work with street Maintenance crews.
- Agreement executed with Genesee County Conservation District to compile an inventory of street trees in order to develop a sustainable plan for the care and preservation of the urban street tree forestry.
- Improved processes for grant administration and compliance monitoring are being implemented
- Planning is leading an effort to fully utilize GIS capabilities to serve all departments.

- Asset management tools for Transportation and Utilities, such as GPS units, web reporting, and a new work order system, are scheduled for installation in the coming months.
- A city wide program to recognize employees is being evaluated. Currently, recognition programs exist on a departmental basis, including the Police Department, and a new program is scheduled for introduction in Department of Public Works.
- The Community and Economic Development Division continues to enact corrective actions, refine and adopt policies and procedures and provide technical assistance to sub-recipients for federal and state funded programs that reduce the potential repayment from historical HUD OIG monitoring findings and current Field Office and MSHDA monitoring, reducing exposure to General Fund for repayment.

Transitioning Back to Home Rule

The City has been under the jurisdiction of the State this time since November, 2011, as its financial condition placed it on the brink of insolvency. Much progress has been made to address that, and the focus is now preparing for the transition back to Home Rule. Progress to date includes:

- A 7 Point Plan enacted by the Emergency Manager identifies specific objectives to be accomplished in order for the transition to proceed
- Target completion dates have been identified for many of the steps
- Specific objectives which have been accomplished include approval of a Deficit Elimination Plan, initiation of the search for a City Administrator, completion of a report by the Blue Ribbon Committee and the placement of 5 Charter Amendments plus the question of forming a Charter Review Commission on the November ballot.

Conclusion

Progress is being made in accordance with the expectations of the Strategic Plan and its specific objectives. Significant steps are being taken to improve its financial condition and to restructure the organization to improve efficiency and effectiveness. Steps are also being taken to prepare the City for return to traditional Home Rule governance.

Not surprisingly, because this is a first quarter report, not all objectives have been completed, and some have yet to start. In addition, many of the objectives require significant amounts of time and energy to achieve.

The positive progress outlined in this report must be read in the context of the current overall condition of the City of Flint. The level of services currently provided by the City is marginal as it struggles to regain financial solvency. Flint continues to be challenged by population loss, relatively low per capita income, aging infrastructure, and an insufficient revenue stream to support a desired level of services. It still has a significant General Fund deficit to be addressed, along with significant legacy costs. And it still faces the possibility of insolvency should the challenge to changes in retiree health care prevail.

CITY OF FLINT
STRATEGIC PLAN

2014 -2019

Setting a Sustainable Course for the City of Flint

Quarterly Report

July 1, 2014 - September 30, 2014

CITY OF FLINT STRATEGIC PLAN

2015 -2019

Setting a Sustainable Course for the City of Flint

The Vision for the City Government of Flint

A well managed, financially stable, and accountable government focused on creating and maintaining a vibrant and growing community which will attract and retain residents, businesses, students, and visitors and improve our quality of life

The Mission of the City Government

To assure that residents, businesses, students and visitors in the City of Flint receive municipal services in a customer friendly and financially responsible manner

The Goals

In order to realize our Mission, businesses, students and visitors can expect that:

- The City will provide a highly trained and professional staff of elected leaders, appointed officials and employees
- The City will provide for a safe, secure, and healthy environment in which to live, work, learn and play
- The City will provide access to dependable and affordable water, sewer, and waste collection
- The City will provide access to an adequate and well maintained transportation network serving motorized, non-motorized, and pedestrian needs
- The City will foster cooperation between business, non-profit, foundation partners and residents to create a climate that supports community and economic development

The City government will also:

- Seek partnerships with Local, State and Federal governmental partners and other private entities in order to maximize efficiencies and resources in meeting its Mission
- Provide municipal services consistent with the City's Master Plan and also work with residents, businesses, and others to foster development of the City and its infrastructure in a manner consistent with its Master Plan
- Encourage partnerships for recreation and access to open space across the City
- Enforce building and occupancy codes and to aggressively work with others to address blighted conditions
- Assure that City ordinances and regulatory activities are consistent with the Master plan and supportive of economic development
- Operate in an open and financially sustainable manner, including improving citizen access, focusing on measurable results, improving the City's financial position, and eliminating accumulated deficits

GOVERNANCE AND ADMINISTRATION

VISION Statement

The City of Flint's Governance will adapt to change and be a model of professionalism, transparency, and sustainability in order to provide effective government to each of our City's residents (as written in the Charter Preamble).

MISSION Statement

The Executive Management and Elected Leadership Directs and guides the City government in order operate in an open and financially responsible manner, including improving citizen access, focusing on measurable results, improving the City's financial position, and eliminating accumulated deficits within the context of the City of Flint Master Plan.

DIVISIONS	FUNCTIONS	GOALS	KEY OBJECTIVES FY15 & FY16	STATUS
EMERGENCY MANAGER		Promote vision, set priorities, and measure results	Formally assess City readiness for Transition Advisory Board and progress towards achievement of Seven-Point Plan	I
MAYOR & COUNCIL			Participate with MML and others on an ongoing basis in advocating for state reforms in municipal financing, including PP T and EVIP	C
	Management of City Government		Continue to participate with MML and partners with new legislative session in advocating for state reforms in municipal financing, including OPEB and Prop A	I
CITY ADMINISTRATOR	Chief Elected Official	Leadership: Provide direction, guidance and support to the leadership in the Departments of Public Safety, Planning & Development, Public Works, and Finance & Administration in order for the achievement of their goals and objectives	Reduce deficit by no less than $1.8 million by end of FY15, and each year thereafter in accord with City Deficit Elimination Plan; and continuing to accumulate an appropriate level of reserves	I
	Legislative Body of the City		Begin search for City Administrator	C
MAYOR			Formally assess dept head's progress on attaining objectives and then semi-annually thereafter	I
		Partnerships: Seek partnerships with local, state and federal governmental partners and other private entities in order to maximize efficiencies and resources in meeting the City's mission.	Conduct organizational review of all departments completing Public Safety in FY15 and Public Works in FY16	I
CITY COUNCIL			Resolve retiree healthcare lawsuit by December 31, 2015	I
			Conduct formal quarterly budget and strategic plan review with Council	I
HUMAN RELATIONS		Training: Prioritize attracting and retaining a highly trained and professional staff of elected leaders, appointed officials and employees by offering training opportunities, encouraging best practices, measuring performance and providing evaluations.	Complete assessment of Hurley's future as a community hospital	I
			Apply for 20 grants annually and receive $10 million in competitive/non-entitlement awards, beginning in FY15	I
CIVIL SERVICE/OMBUDSMAN			Secure ongoing financial and other support for public safety and blight, including city lock-up, for FY15-FY19	I
		Citizen Access: Manage municipal services in a customer friendly manner by providing public information, respond to constituent concerns	Develop proposals for 911 consolidation and courts consolidation	I
			Design citizen service system to process up to 500 requests each month	I
			All Council members and Mayor to attain MML Level Two certification	I
			Update the video capabilities of the City Council chambers to facilitate in-house recording, production and uploading of video	I
		Volunteer Service: Develop a culture of national service and community volunteering that demonstrates how the City and community priorities can be addressed through service solutions.	EM and Mayor to approve professional development training schedule for department heads	I
			EM and Mayor to approve professional development training schedule for employees, based on recommendations from department heads and Human Resources	I
			Updated web site to be implemented	I
		Climate for Growth: Foster cooperation among business, nonprofit, foundation partners and residents to create a climate that supports community and economic development	All appointments to City boards to be current	I
			Create 1,000 Volunteer opportunities annually	I
			Mayor/EM to implement policies and procedures for improving citizen access to City government	I
			Formally assess future city role in promoting economic and community development for consideration in FY16 budget	I

GOVERNANCE AND ADMINISTRATION

(cont)

DIVISIONS	FUNCTIONS	GOALS	KEY OBJECTIVES FY15 & FY16	STATUS
CITY ATTORNEY				
CITY ATTORNEY'S OFFICE	Provide legal advice to Mayor, Council, City Administrator and Department Heads on matters of City business	Update City ordinances	Revised Business Licensing ordinance to be in effect on July 1, 2014; revised Zoning ordinance by November, 2014; schedule of remaining ordinance revisions to be developed by July 1, 2015	I
	Prosecutes violations of City Ordinances		Develop strategy and timeline for renegotiating Cable Franchise agreement (agreement expires December, 2016)	I
	Responds to FOIA requests	Provide for most cost effective means of litigation	Handle 95% of litigation in-house	C
	Advises in labor relations and employment relations issues		Implement program for increasing amount of delinquent collections	I
	Represents City in lawsuits and other legal matters	Develop and implement administrative efficiencies	Define proposed process for handling paper and digital files, including time frame for implementation	I
			Define process and procedures for improving standardization of procedures for common legal matters, including time frame for implementation	I
		Improve staff skill sets and working environment	Program for improving skill sets of all staff to be scheduled/implemented	I
			Proposal for improving the appearance of City Attorney's Office to be presented to Facilities	C

CITY CLERK				
CITY CLERK'S OFFICE	Records proceeding of City Council and other bodies	Maintains all records of meetings of City Council and its committees. Publishes notices of meetings and records minutes.	Define ongoing training needs of City Council staff, including law changes affecting legislative bodies (such as public notices, open meetings) and the Legistar cataloging system and implement training	I
	Provides administrative and professional support to City Council and other bodies		Review and update City Council's constituent complaint referral process	I
RECORDS	Custodian of City Records	Manages custody and retention of city records, including minutes of official bodies.	Release a RFP by January 1, 2015 seeking comprehensive proposals for analyzing the state of all City current and historical records and providing recommendations for preserving, cataloging, and accessing records, utilizing a records retention schedule, with implementation to begin in FY16.	N
	Codifies city ordinances every ten years		Assure orderly transition of the Licensing Division to the Planning & Development Department	I
ELECTIONS	Oversight of elections	Conducts elections in accordance with state law	Continue ongoing training calendar for Election Inspectors and City staff involved with elections.	I
		Maintains current and historical voter registration lists and related documents.	Secure State grant for polling accessibility study to meet ADA requirements and continue to seek public and non-profit grants for election related activities.	I

POLICE DEPARTMENT

VISION Statement

The Flint Police Department will be the anchor resource in a collaborative effort with the community, businesses and visitors to the City of Flint. We will provide model law enforcement services with an emphasis on innovation and technology.

MISSION Statement

The City of Flint Police Department is committed to protecting and serving all the people of our community with respect, fairness, and compassion.

Acting in partnership with our community to protect life and property, we strive to prevent crime and preserve peace, order and safety.

We will seek just solutions with honesty and integrity.

We encourage, need, and expect community involvement to work toward a mutual goal of enhancing the quality of life within our city.

DIVISIONS	FUNCTIONS	GOALS	KEY OBJECTIVES FY15 & FY16	STATUS
POLICE				
ADMINISTRATION	Management & Planning	Utilize tangible departmental resources in an efficient and effective manner	Recommend vendor for Record Management System by October 1, 2014, and propose funding and implementation strategy for inclusion in FY16 budget	C

Partner with MSP, FFD, FANG on Arson squad. 3). Partner GCSO on Auto Theft Team (GAIN). Develop Area Crime Team with MSP and GCSO.	C
			Acquire and implement an online Crime Mapping capability that is accessible to community members	C
			Submit all requested materials from ICMA	C

VISION STATEMENT

The City of Flint 911 Department will be a fully functional Next Gen 911 system, accessible 24/7 from any device.

MISSION Statement

The City of Flint 911 Department is committed to serving our citizens, businesses and visitors with professional emergency services. We will continuously strive to improve our services in the most effective and efficient manner possible.

DIVISIONS	FUNCTIONS	GOALS	KEY OBJECTIVES FY15 & FY16	STATUS
911			Reduce use of 911 for non-emergency calls by 25%	I
TELEPHONE ANSWERING & DISPATCH	Receives call and dispatches resources	Provide the best possible emergency telephone answering and dispatch purpose with available resources	Develop plan for Next Gen 911 technology, including telephone upgrade and console upgrade	N
	Maintains records and consoles	Provide prompt, courteous, and efficient customer service	Improve Response to incoming 911 and 7-digit calls by 10% and improve coordination with EMS dispatch	I
RECORDS MANAGEMENT	Management of 911 Center	Improve community group relationships through community outreach	Automate billing for structure fires	N
			Develop plan for Consolidation with Genesee County Consortium	I
ADMINISTRATION			Work with Human Resources to create a new employment roster	N
			Working with Fire Department, create program and process for utilizing Fire Fighters on light duty at 911	C
			Complete state required training for all employees	I
			Complete Tower construction	I
			Eliminate Provisional Appointments/Fill vacancies permanently	N
			Strengthen relations with community groups by participating in 24 meetings each year	I
			Implement Quality Assurance program	C

FIRE DEPARTMENT

VISION Statement

A community educated on all matters related to fire safety and fire protection resulting in minimal damage and injury from fire incidents.

MISSION Statement

Utilizing available resources, the Flint Fire Department will respond quickly and effectively to fire calls; and will lead efforts to educate the community on all matters relating to fire safety and protection.

DIVISIONS	FUNCTIONS	GOALS	KEY OBJECTIVES FY15 & FY16	STATUS
FIRE	Department Management; coordination of emergency management activities within city		Maintain average fire response time under 9 minutes in FY2015 and develop plan to reduce response time in FY16 to less than 6 minutes	I
ADMINISTRATION & EMERGENCY MANAGEMENT		Provide the highest quality fire response/fire protection possible	Turnaround time for Fire Inspections to be 5 days or less	C
FIRE SUPPRESSION	Deployment of Fire Fighters to emergencies		Implement new organizational structure based on 75 full-time positions	C
FIRE INSPECTION & ARSON INVESTIGATION	Investigation of suspicious fires; conduct of commercial building inspections		100% Flint School children contacted and provided with fire safety and prevention program	N
		Engage children, students, and senior citizens in fire safety awareness and preparedness.	100% of Senior Centers provided with fire safety and prevention program	N
			100% of City Block Clubs provided fire safety and prevention program	N
COMMUNITY EDUCATION	Education of residents and businesses in fire prevention.		At least 4 times per year, the Fire Department will provide the community with information regarding fire safety and prevention	C
		Lead City wide emergency preparedness and response	Evaluate and define role of the Fire Department in Emergency Management, with report provided to EM	C
			Reduce energy in Fire Departments by 20%	I
			Continue progressive training once per week	I
			Continued training for Suppression Personnel as technology develops for today's high-tech environment	I
			Implement physical fitness program	I
			"Knock and Talk" Fire Suppression Crews and Prevention Staff to distribute Arson Reward literature to 100% of residents	I
			Educate juvenile firesetters by providing one-on-one discussion with 10 juveniles	I

68th DISTRICT COURT

VISION Statement

The 68th Judicial District Court will be a leader among Michigan Courts in the provision of quality service, equal access to a fair and effective system of justice, and protection of the public's safety.

MISSION Statement

The 68th Judicial District Court will provide timely, fair, and impartial justice in all matters properly presented to the Court.

DIVISIONS	FUNCTIONS	GOALS	KEY OBJECTIVES FY15 & FY16	STATUS
DISTRICT COURT				
ADMINISTRATION	Overall Court Management	Provides the most efficient processing possible within the net current appropriation from the City	To comply with all Trial Court Performance Standards Annually, as dictated by the State Court Administrative Office	C
JUDICIAL PROCESSING	Courtroom activities		Improve Court collections-Annual increases by way of Amnesty and Collections Agency, comparing results at the end of each fiscal year to the previous year	I
PROBATION	Provides oversight of probationers		Re-establish Probation Department with (1) Probation Officer	I

PUBLIC WORKS

VISION Statement

The vision of the Public Works Department is to be a well managed and well trained workforce that utilizes all available resources, technology, and collaborative means to maintain the City's above and underground infrastructure and facilities.

MISSION Statement

The Public Works Department is committed to the development of qualified managers and workers with consistent ongoing training, data driven decisions, and the creation of new job performance measurables.

The DPW will aggressively engage in strategic local and state level partnerships while continuously implementing new and improved technologies, procedures, and policies.

DIVISIONS	FUNCTIONS	GOALS	KEY OBJECTIVES FY15 & FY16	STATUS
UTILITIES	Water Treatment			
WATER TREATMENT PLANT	Water Distribution	Provide dependable and affordable water and sewer service to City residents and businesses.	Complete the electrical upgrades on Cedar Street Pumping Facility	I
WATER POLLUTION CONTROL	Distribution System Maintenance		Complete the engineering design work for the Hamilton Dam upgrades	I
WATER SERVICE CENTER	Sanitary Sewer Operation & Maintenance		Complete the rehabilitation of the Torrey Road Booster Station	I
	Storm Water Maintenance		Complete and implement a comprehensive pay scale evaluation for all WTP employees	I
	Dam Maintenance		Complete phase II (of III) of the WTP upgrade in preparation of transition to IUWA	I
	Water Turn On's/Off's	**Routine preventative maintenance program** - A program that includes written procedures, identification methods, scheduling, and measurable tracking.	Create GIS maps of utility assets (including base-layer)	N
	Cut & Plugs		Implement tracking program for main breaks and sink holes with monthly reporting	I
	Wastewater Treatment		Develop and implement a written and sustainable "water loss" program. Program is to target the identification of a "baseline" loss and create means to maintain a loss percentage of under 16%.	I
	Industrial Pretreatment Compliance		Replace 3,000 residential meters	I
			Develop and implement a written root control matrix to reduce infiltration into the sanitary sewer systems	I
			Develop a written pipe replacement matrix that uses multiple criteria to identify the priority pipes to replaced annually	I
		Long term Utilities planning - Continued implementation of objectives that increase the efficiency and sustainability of the Utility department, including the use of Blue/Green Infrastructure projects, right sizing neighborhood infrastructure, and shared services.	Identify a consultant to write the scope for a comprehensive energy audit of all Utility facilities and send RFP	I
			Develop list of shared service opportunities with Genesee County Drain Commissioner and setup a meeting schedule for talks	I
			Complete the de-commissioning of the incinerator and construction of a load out facility at the Wastewater Treatment Plant	I
			Complete the upgrade plan of turning methane gas from the digester into energy	I
		Increase community engagement, community input, and community awareness with Utility processes and procedures.	Complete the development and use of web site access for residents to report main breaks	I
			Complete Cut & Plug list for hardest hit demolitions	C
			Implement defined response time policy for WSC	N
			Develop capacity to effectuate 100% of non-pay water shut-off notices	C

PUBLIC WORKS

COMMUNITY DEVELOPMENT & ECONOMIC DEVELOPMENT	Neighborhood Planning	Create safe, healthy, and desirable neighborhoods near quality community services.	Comply with all HUD regulations and time submission requirements for all reports	I
	Small Neighborhood Projects		Implement a grants management system utilizing BS&A to better track performance	I
	Fair Housing		Provide ongoing technical assistance and training to all sub-recipients and sub-contractors to insure full compliance and timely processing of payments	I
	Historic Preservation		Process all requests for economic development support (tax abatements, etc.) within prescribed time frames, to be monitored quarterly	I
	Program Management (CDBG, HOME)		Complete Smith Village development	I
			Sell all Smith Village and NSP homes	I
			Define the ongoing role for city involvement in economic development and present budgetary request for consideration in FY16 budget	I
	Economic Development	Promote a growing and diverse economy that spurs innovation and small business development and prepares the workforce for today's jobs and those of the future.	Implement a formally defined CDBG allocation process that is transparent and advances the goals of the Master Plan	C
	Major Development Projects		Complete a formal written comprehensive housing investment strategy to include a housing program that provides rehabilitation and home buyer incentives to encourage residents to move to or remain in Flint	I
	Workforce Development		Secure other sources of grant funding for entire department to increase available revenue by 10% per year, beginning with FY15	I
	Small Business Development		Respond in a timely manner to requests for assistance in expanding existing or attracting new businesses, with particular focus on small businesses and brownfields	I
			Implement the EDC Deficit Elimination Plan	C
	Oak Business Center & EDC		Attract new businesses to Oak Business Center to reduce vacancy rate to less than 15%	I
			Secure a monitoring and compliance contractor to allow staff to focus on proactive community development	I
LONG RANGE PLANNING	Master Plan Implementation	Guide the update and implementation of the Master Plan and provide data-driven, technical expertise to city officials and the public on land use and development matters.	Develop a commercial investment framework based on the Master Plan	N
	Performance Management		In coordination with local, regional, and state economic development agencies, develop a formal long term strategy and role for the City government to help expand existing or attract new businesses, with particular focus on small businesses and brownfields; funding request to be presented for potential funding in FY16	I
	Transportation Planning		Create 8 subarea plans	I
	Public Safety Planning		Develop the City's first combined Capital Improvement Plan	I
	GIS Services		Hold annual engagement to discuss progress of Master Plan and solicit additional feedback on action plan	N
	Infrastructure Planning		Establish short-term (1-3 years) action plans for each chapter of the Master Plan	C
	Sustainability Planning		Develop between 10-15 neighborhood plans covering every residential area by 2020, at the rate of 20% per year	I
	Zone Changes		Develop a citywide sustainability plan	N
	Plan Amendments		Maintain on an ongoing basis updated demographic and housing data easily available to internal and external customers	I
			Develop a proposal for providing citywide Geographic Information Services to internal and external customers and implement plan	I
			Coordinate the implementation of at least 1 strategy in each chapter of the Master Plan every year, with progress measured annually	I
			Submit proposal to the EPA for a Brownfield Area wide Planning Grant or technical assistance grant to create a brownfield development for the area around the Chevy Commons	C
			Present blight elimination framework to the Planning Commission for adoption as part of the Master Plan implementation	I
			Begin update of the Master Plan	N
			Complete a formal written blight elimination framework for neighborhoods	C

			Implement structure within P&D which has responsibility for developing a plan for improving street lighting within the City for managing the lighting special assessment and payment of bills	

PLANNING AND DEVELOPMENT

DIVISIONS	FUNCTIONS	GOALS	KEY OBJECTIVES FY15 & FY16	STATUS
PARKS & OPEN SPACE	Parks Maintenance	Establish a new park management framework and secure resources necessary to maintain the City's parks and open spaces.	Refine the City's parks classification system and develop service standards that align with the MDNR and the needs and desires of the Flint community.	I
			Assure that all city parks are mowed at least twice per month based upon individual plan for land management; contractor performance to be reviewed on a quarterly basis.	C
	Parks Planning	Improve the ecological health of the City's parks and open spaces through responsible planning and development.	Complete a naturalization demonstration in Max Brandon Park and then 3 other parks	I
			Complete improvements to Riverbank Park and McKinley Park as specified in the MDNR grant	I
			Complete improvements to McKinley Park as specified in the MDNR grant	I
			Update the Parks and Recreation Master Plan with additional focus on park equity and enhancing recreational use of the Flint River and adjacent parks and open spaces	N
	Parks Partnership	Provide parks, open space, and recreation infrastructure that both meets the needs of the community and is maintainable by the City and its community partners.	Establish at least 3 "Adopt A Park" agreements every year; complete the establishment of the "Friends of Berston" group	I
			Work with the County to establish a joint maintenance agreement for at least one of the City's larger parks	C
	Parks Programming	Engage the Flint Community to support the programming and use of park and recreation facilities.	Develop a management plan for the City's 4 golf courses	I
			Develop the plan to adjust the CANUSA Games housing and field of play locations.	N
	Open Space		Submit at least one grant proposal each year for MDNR funding	C
	Trail Development		Complete construction of the Genesee Valley Trail	I

FINANCE AND ADMINISTRATION

VISION Statement

A robust division capable of meeting the external and internal needs of the City of Flint in the areas of finance, treasury, assessments, human resources, information technology, and fleet.

MISSION Statement

To manage the financial and administration division of the City of Flint through promoting fiscal responsibility and industry best practices in order to respond to the needs of the City of Flint with efficiency and timeliness.

DIVISIONS	FUNCTIONS	GOALS	KEY OBJECTIVES FY15 & FY16	STATUS
FINANCE				
ACCOUNTING	Payroll Production & Reporting	Provides for a financially secure organization with sound business practices providing for the purchase of goods and services and financial reporting. Provides professional and technical advice to departments regarding financial and purchasing needs and on grant administration processes.	Reduce the General Fund deficit by $1.8 million in FY15	C
			Reduce the General Fund deficit by $1.8 million in FY16	N
	Vendor Management and Payment		Convert to new fixed asset accounting and develop fixed asset policy	I
			Review rates and master fee schedule to ensure they are appropriately set	N
AUDITING	Monitoring Financial Performance		Implement Finance Department reorganization	I
	Preparation of Financial Reports		Audit completed and filed with state	I
BUDGETING	Monitoring Grant Performance		Schedule and conduct 4 city wide finance and accounting training sessions	I
	Accounting for Revenues and Expenses		Establish and implement internship program for Finance	I
RISK MANAGEMENT	Development of Long Term Financial Projections, Deficit Elimination Plans and Strategies for Financial Solvency		Establish a paperless process for procuring goods and services	I
			Prepare a RPF for copier services in FY15 in time to allow issuance of request before contract expires in FY16	N
PURCHASING	Administration of Property and Liability Insurances		Provide recommendations for updating procurement policies to be used during and after transition and to increase efficiencies	I
	Selection and Monitoring of Benefit Program vendors		Increase the usage of P-cards to boost the City's annual rebate by 15%, progress to be measured regularly	I
GRANT ADMIN			Establish management expectations of turn-around time on vendor payments, purchasing requests, position filling requests, and other areas, monitor performance, beginning with FY15 first quarter results to be evaluated and monitored monthly.	I
			Establish formal process for reviewing, processing, and making timely decisions for applications on tax abatements	I
			Adopt stabilization ordinance and fund balance policy	I
			Establish expectations of turn-around time on purchasing requests and monitor performance, beginning with FY15 and evaluated quarterly.	I
TREASURY				
CUSTOMER SERVICE		Provides for a customer friendly accountable entity managing receipts and collections. Monitors collections of property taxes, income taxes, water and sewer, and other receivables to assess budgetary compliance.	Identify additional $500,000.00 to $1,000,000.00 in unreported income tax, utilizing the 2011 State income tax data.	N
			Increase the collection of delinquent taxes by 15-20% through continued efforts to collect delinquent income tax and personal property taxes and by new efforts to collect delinquent Miscellaneous Receivables and Water bills	N
DELINQUENT COLLECTIONS			Reorganize Customer Service to assure that after that time, that all utility bills are mailed two weeks prior to the due date, that checks are processed within 10 days from the postmark date, and that customer wait time in the office and on the phone are reduced by 25%	I
			Replace the current vendor for processing electronic payments with Point and Pay in order to allow the City to accept water, property tax, miscellaneous receivables, special assessment and permit payments electronically	C
			Install a kiosk in the City Hall lobby in order to allow the City to accept water, property tax, miscellaneous receivables, special assessment and permit payments electronically	I
			Create description of City's efforts to manage delinquent water accounts while obtaining the City's financial goals and assisting those who are facing financial hardships	N
			Implement electronic income tax withholding	I
			Update City efforts to assist those unable to pay for utilities	N
			Re-examine efforts to assist individuals to pay utility bills	N

			Establish and implement an ongoing schedule of "Customer Service", "Team Work" and "How to deal with difficult customer" training for all Treasury staff.	

FINANCE AND ADMINISTRATION

DIVISIONS	FUNCTIONS	GOALS	KEY OBJECTIVES FY15 & FY16	STATUS
ASSESSING				
ASSESSORS OFFICE	Assessing of Properties	Assures the assessment of properties within the City in a professional and equitable manner in conformance with state law and professional practices; addresses appeals of values to Board of Review; represents City at state level appeals.	Determine schedule of staff training in Assessing net as necessary and for annual compliance with state requirements during course of FY15 and annually thereafter.	C
	Administration of Valuation Appeals		Conduct comprehensive site inspections of residential and commercial tracts between April and November of each year in sufficient number annually to canvas 12 tracts annually.	I
	Processing of Poverty exemption requests		Secure contract to achieve the conversion of remaining hard copy records and drawings to digital format utilizing APEX and/or digital scanning, with financial plan submitted for FY16 budget.	I
	Provision of property and tax information to businesses and residents		Provide for the timely process of MTT appeals, and split/combination applications. 2012 and 2013 appeals will be completed by end of FY15 and appeals filed in 2014 will be resolved by end of FY16. The processing of splits and combination requests is required to be completed and of each year to be incorporated in the following year's assessment roll.	I
			Working with Facilities, finalize plan for relocating Assessing from its temporary site	I
	Maintenance of Property descriptions and tax rolls		Analyze options for lessening the workload impact of processing poverty exemption applications	C
			Participate with Planning and Development, IT, and others to develop the ongoing process for establishing and maintaining of the parcel layer for City GIS, and for providing GIS services to internal and external customers.	C

HUMAN RESOURCES			Utilize a master position list for confirming the need to recruit, promote or reduce employees	C
EMPLOYMENT	Recruitment and Selection	Recruit and oversee hiring of qualified employees in compliance with laws and ordinances	Update personnel rules and procedures, including ordinances	I
	Testing		Update testing protocols for recruitment/selection	I
	Contract Negotiations	Recommend changes in personnel polices and labor contracts	Complete and implement 1600 contract	C
			Complete and implement FPDA contract	I
			Complete and implement updated 1799 contract	I
			Complete and implement updated IAFF contract	N
			Complete and implement updated Capt/Lt contract	I
			Complete and implement Sergeants contract	I
	Employment law allegations		Inform department heads and supervisors of contract changes prior to implementation	C
LABOR RELATIONS	Grievances and Arbitrations	Train and assist departments in managing employees and resolving disputes	Answer 100% of all new grievances within required time frames, measured with quarterly reports	I
ENROLLMENT	Benefit administration	Enroll employees in payroll and benefit systems.	Complete and implement changes to Exempt and Appointed benefit programs	I
	Payroll enrollment and changes		Develop and implement ongoing training curriculum and schedule in conjunction with Department Heads	C
	FMLA oversight	Assure that city FMLA and worker safety policies and practices are in accord with law and properly administered	Implement new FMLA process	I
	Worker's Compensation Administration		Implement new EAP program	C
	MIOSHA/OSHA Administration		Redesign Occupational Health and Safety Program for the City	N
WORKERS SAFETY	Employee Clinic		Administrative policies/procedures to be updated	I

RE: City of Flint Quarterly Financial Report
July 1, 2014 – September 30, 2014

The City of Flint's Strategic Plan envisions a "well managed financially stable, and accountable government focused on creating and maintaining a vibrant and growing community which will attract and retain residents, businesses, students and visitors and improve our quality of life."

Operating in a financially sustainable manner is a key component to achieving that vision. As part of this, a biennial budget has been adopted for fiscal years 2015 and 2016, and a commitment has been made to a regular and ongoing review of revenues and expenses. To this end, a quarterly report on the status of the City's budget will be provided to the Finance Committee on an ongoing basis.

Attached is a comparison of the City's budgeted revenues and expenses to actual revenues and expenses as of September 30, 2014.

In summary, at the end of the 1st quarter, the financial outlook for the remaining FY15 appears to be on track. In total, revenues and expenditures are generally meeting expectations. The City continues to make timely pension contributions and healthcare premium payment for both active employees and retirees.

Some further observations on the current budget status:

- In the General Fund, actual revenues are just above 20% of budgeted revenues. At the time of the report, however, the City had not received its portion of State Shared Revenues, and when those revenues are received (approximately $2.4 million), they will be accrued back to the 1st quarter.

- General Fund expenditures are reported at 22% of the budgeted expenditures, in line with expectations. However, it has been discovered that $13,000 in communications expenses was inadvertently deleted from the District Court budget. It will be necessary to consider an adjustment to the District Court budget to address this shortfall.

- Also, we continue to monitor the personnel expenses in the Police and Fire budgets to determine the budgetary impact that reducing staffing levels through attrition rather than layoffs at the beginning of the year will have. It appears that attrition is moving staffing levels down to the budgeted levels, with Fire already at its reduced level of 75, and Police currently at 121, with a target of 115. By the end of the second quarter we anticipate that the reduced levels will be met by then and in addition, we will have the results of the ICMA organizational and staffing study. We will also be beginning to receive a portion of the $1 million allocated for police and fire expenditures in the state budget. We presently anticipate that these funds will be sufficient to offset any shortfall in the personnel line items in these budgets. With the second quarter report, we will provide any necessary budget amendments in these areas.

- Special Revenue Funds, Major and Local Street Funds are operating below budgeted revenues and expenditures. Major Streets, Fund 202, revenues are down due to timing in which State revenues of the Gas and Weight Tax allocations have not been received as of the date of the report. Budgets in the Grant Funds, Funds 274, 295, and 296 reflect timing differences as well. The revenues in these funds have not been received as of the date of the report. In addition, it will be necessary to create a budget for Fund 297 to reflect the final expenditure of a COPS Hiring Grant, with funds carried over into the FY15 budget year.

- Revenues in the Building Safety and Inspections Fund (Fund 542) are coming in higher than anticipated for the first quarter of the year. This was due largely to the new construction of the paint shop on the General Motor's property expansion.

- Revenues in the Water and Sewer funds are coming in at 19% and 16% respectively in comparison to the budgeted totals. At the same time, expenditures are coming in a 13% and 11% of the budgeted totals. It appears that the trend of reduced water billings are continuing, and efforts are underway to increase compliance and to identify areas of water loss from leaks as well as from theft. Actual expenditures currently do not include many of the capital improvement projects that are budgeted this fiscal year. The DPW and the Finance Department will continue to closely monitor the Utilities revenues and expenditures to keep them in line.

- The June 30, 2014 ruling by the Federal Court which modified its injunction to allow the City to implement certain changes to retiree health care benefits should provide some financial relief to the City budget, at least for the time during which the matter is being litigated. However, at this time it is not possible to project the amount of relief from the $5 million which was added to the budget for retiree health care as a result of the Courts initial decision prohibiting any change to retiree health care. This is because implementing the approved changes will not be effective until November 1 because of the time necessary to incorporate the changes into the current plans. With the second quarter report, we anticipate being able to project the anticipated costs in comparison to the budgeted amounts.

Chicago Fed Letter

Understanding trends in state revenue sharing with local governments in Michigan

by Martin Lavelle, business economist

Over the past few years, discretionary cutbacks in state revenue sharing, as well as other related fiscal and economic factors, have led to budgetary challenges for local governments across the country, including those in Michigan. To study this issue in depth, the author looks at trends in revenue sharing between state and local governments in Michigan since the early 2000s.

Note to our valued subscribers: Starting in January 2015, *Chicago Fed Letter* will be printed on an occasional basis with additional issues published more frequently online. To sign up for email alerts about new articles, download the latest issues, or search our archives, please visit www.chicagofed.org/webpages/publications/chicago_fed_letter/index.cfm.

This *Chicago Fed Letter* examines the general role of state revenue sharing in local governments' budgets by focusing on the case of Michigan. Many observers have asserted that a major contributor to the financial difficulties of local governments in Michigan has been the significant drop in revenue sharing funds from the state government. To study this assertion, I examine the roots of the fiscal problems facing Michigan's local governments in recent years and the ways in which these governments have been dealing with diminished tax revenue bases.

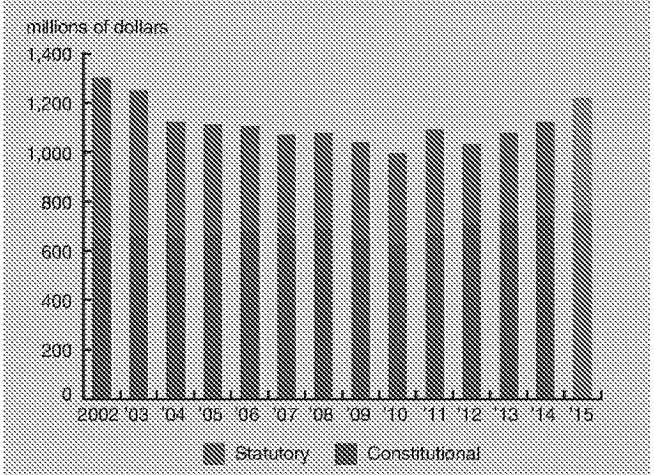
Michigan's local governments began to experience fiscal stress about a decade ago, when the state economy started to perform poorly. More recently, the financial conditions of many local governments in Michigan continued to deteriorate even as the state government saw surpluses following the Great Recession. Consequently, multiple units of local government—including the City of Detroit, the Detroit Public Schools, and the City of Flint—have been under the authority of state-appointed emergency managers (EMs), who have the task of returning these public entities to fiscal solvency. If an EM determines that fiscal solvency cannot be regained through cost-cutting, the selling of assets, and negotiations with creditors, that EM can ask for state approval to take the public entity into bankruptcy proceedings, which is what happened with the City of Detroit.[1]

Current trends

Revenue sharing programs can come under stress when economic activity slows, putting state budgets under pressure, which may in turn lead to decreases in revenue sharing with local governments.[2] To a large extent, declining revenue sharing in Michigan has been due to the state's weak economy. Michigan suffered a one-state recession, which began in late 2003 and lasted until mid-2009, when the nation's Great Recession also concluded. During the one-state recession, Michigan experienced decreases in its own-source revenues and population, which ultimately resulted in declining state revenue sharing with local governments. As seen in figure 1, since 2002, local governments in Michigan have generally received fewer revenue sharing funds from the state with each passing year.

The long decline in state funds available for revenue sharing with localities can best be understood by examining indicators of Michigan's economy. The 2010 U.S. Census revealed that Michigan was

1. Michigan's state revenue sharing with local governments



Note: The fiscal year 2015 value is a State of Michigan estimate.

Sources: Fiscal years 2002–05 data from the Michigan House of Representatives, House Fiscal Agency, available at www.house.mi.gov/hfa/PDF/GeneralGovernment/EVIP_Memo.pdf; and fiscal years 2006–15 data from the State of Michigan, available at www.michigan.gov/documents/ActualEstPayments_3018_7.pdf?20130801163626.

2. Michigan's state revenue sharing as share of state spending

Note: This figure displays state revenue sharing with local governments as a percentage of state spending from only state revenue resources for fiscal years 1980–2013.

Sources: Annual reports titled "Statement of the proportion of total state spending from state sources paid to units of local government (legal basis)" from the Library of Michigan.

the only state to lose population during the period 2000–10.[3] The population loss was brought on by a sharply declining job base and a jump in unemployment. Meanwhile, Michigan's residential real estate sector suffered a severe downturn. Michigan is not commonly identified with the mid-2000s housing price bubble. However, Michigan's drop in housing market activity during that time was comparable to what happened in those places that were hardest hit by the housing crisis. Today, new home construction in Michigan remains around 67% below its long-term trend—twice the gap that exists between overall U.S. new home construction and its long-term trend.[4] And with home prices having decreased sharply statewide over the 2006–12 period,[5] taxable home values are down significantly. Amid all these difficulties, retail sales on an annual basis were lower in 2009–10 than in 2002–08, which meant that the state had fewer sales tax collections—the primary basis of the state's revenue sharing program.[6]

As evident in figure 1, the state's revenue sharing with local governments in Michigan is composed of two parts: a portion that is determined by the formula set forth in the state constitution and a portion that is based on the formula set by the state statutory program in place at the time. Since 2002, revenue sharing funds as mandated in the state constitution have been fairly flat, while such funds from the statutory program have fallen sharply.

In Michigan, constitutionally mandated state revenue sharing with local governments began with the passage of an amendment to the state constitution in 1946;[7] under article IX, section 10 of the Michigan Constitution, the state government must share sales tax revenue with local governments.[8] In 1963, the amendment was modified to apportion 15% of the 4% statewide sales tax revenue to local governments on a per capita basis.[9] A locality's population count is determined by the U.S. Census Bureau and adjusted by subtracting 50% of the number of patients, wards, and convicts confined to public-tax-supported institutions within its borders.[10] Although certain individual units of local government might have gotten fewer funds from the state under this formulation in recent years, the overall levels of constitutionally mandated state revenue sharing have stayed fairly consistent over the past 13 years.

In contrast, there has been a clear trend in falling statutory revenue sharing. This pattern can be traced back to the early part of the last decade, when the State of Michigan started to face significant budgetary pressures. From then on, the state addressed its own fiscal problems partly through deep cuts to the existing statutory revenue sharing program. Over the period 1999–2010, statutory revenue sharing amounts were distributed according to a formula that was based generally on taxable home value per capita and population.[11] Hence, those communities most adversely affected by economic travails (i.e., those that were already experiencing dramatic home value declines and population flight) tended to have their fiscal stress magnified by the erosion of state revenue sharing funds under this distribution formula. Shortly after Governor Rick Snyder took office in 2011, the Economic Vitality Incentive Program (EVIP) became Michigan's statutory revenue sharing program. Local governments that received revenue sharing funds through the EVIP got significantly less than what they would have under the previous statutory revenue formula (e.g., in 2012 and 2013, local governments received a combined $173.5 million less than they would have).[12] For fiscal year 2015, the City, Village, and Township Revenue Sharing (CVTRS) program has replaced the EVIP.[13] Like the EVIP, the CVTRS program is likely to fall short of fully restoring statutory revenue sharing funds to levels before Michigan's one-state recession (see figure 1). Given these policy changes, it is easy to see why state revenue sharing in Michigan

3. Share of local government budgets from the state, 2010

A. Seventh District		B. Top five across United States	
Michigan	43.3	Vermont	66.2
Wisconsin	39.6	Arkansas	55.5
Indiana	36.7	New Mexico	48.9
Iowa	31.3	Delaware	47.1
Illinois	28.5	Michigan	43.3
		U.S.	33.1

Note: The U.S. value is the total dollar amount in state revenue sharing divided by the total dollar amount of local government budgets across all states.

Source: Author's calculations based on data from the U.S. Census Bureau, 2011 *Annual Survey of State & Local Government Finances*, available at http://www2.census.gov/govs/local/11slsstab1a.xls.

has fallen since the early 2000s. As shown in figure 2, state revenue sharing as a percentage of state spending from state resources fell to 56.3% in 2013 from its peak of 64.3% in 2002.

There is a wider context for understanding the impact of Michigan's declining state revenue sharing with localities since the early 2000s. In 1994, the state imposed a 2 percentage point increase in its sales tax (from 4% to 6%) to help fund a much-expanded local school aid system (as mandated by Proposal A, which I discuss in more detail later).[14] And so, for most of the 1990s and early 2000s, local governments in Michigan became more dependent on state revenue sharing than those in most other states—and this relatively high state dependence remains in place today. As seen in panel A of figure 3, among communities of states in the Seventh Federal Reserve District,[15] local governments in Michigan are the most reliant on state funding (with 43.3% of their budgets funded by the state); among all U.S. communities, Michigan localities rank fifth in this regard (see panel B of figure 3). In fiscal year 2012, state revenue sharing with local governments represented almost three-fifths (nearly $15 billion) of all state spending from state resources.[16] Figure 2 shows that the percentage of state resources dedicated to intergovernmental revenue sharing has fallen since the beginning of Michigan's one-state recession, but has remained above its constitutional mandate (of 48.97%).[17]

Local fiscal ability

Michigan's economic collapse during the past decade also directly impacted local governments' own-source revenue-raising abilities. More specifically, the deep drop in Michigan home values greatly stressed local budgets because local governments depend so highly on property taxes to fund their services. While local own-source revenues declined (along with revenue sharing funds from the state), local governments were hamstrung in raising new revenues themselves from their own communities. The 1978 Headlee Amendment to the Michigan Constitution explicitly forbids the use of some alternative revenue sources for local governments in Michigan that are employed in other states: Local governments are limited in their local income tax options; they may not institute taxes such as sales or motor fuel taxes; and their use of the local property tax is tightly constrained.[18] The vast majority of states place some limitations on the local property tax, but Michigan is among the very few with all four types of limitations (revenue, levy, rate, and assessment limits).[19] More specifically, local property and other local taxes may not be raised without local voter approval.[20] If Michigan's property tax revenue base is broadened, property tax rates must decrease. If property values (excluding those for new construction and improvements) increase at a rate greater than inflation, property tax rates must be adjusted in order to maintain the same gross revenue (changing strictly in line with inflation alone).[21] However, property tax rates are allowed to drop at a rate greater than the inflation rate.[22]

A related feature currently putting additional fiscal stress on local governments is the manner in which Michigan schools are funded. Michigan schools' operating expenditures are funded primarily through state tax revenues as a result of the passage of Proposal A in 1994.[23] While this program shifts the responsibility for funding education (equitably across school districts) to the state, it also exposes local education funding to any budget difficulties the state may experience. After Michigan's recession began in 2003, state revenue sharing to local school districts decreased. And despite Michigan's economic rebound since mid-2009, local school districts remain fiscally challenged, in part because of recent spikes in teacher retirement costs.[24]

Conclusion

While economic downturns clearly put pressure on state and local governments alike, in Michigan's case they have also added volatility and uncertainty into the revenue relationships between state and local governments. Because of changes to Michigan's statutory revenue sharing program and tax code, local government officials have become increasingly uncertain that statutory revenue sharing will reach pre-2003 levels. Local governments in Michigan may be forced to adjust what their services programs can deliver because of expected lower amounts of state aid over the medium term and possibly the long term. Meanwhile, Michigan localities' latitude to maintain their own programs with their own revenue sources is seemingly limited by law.

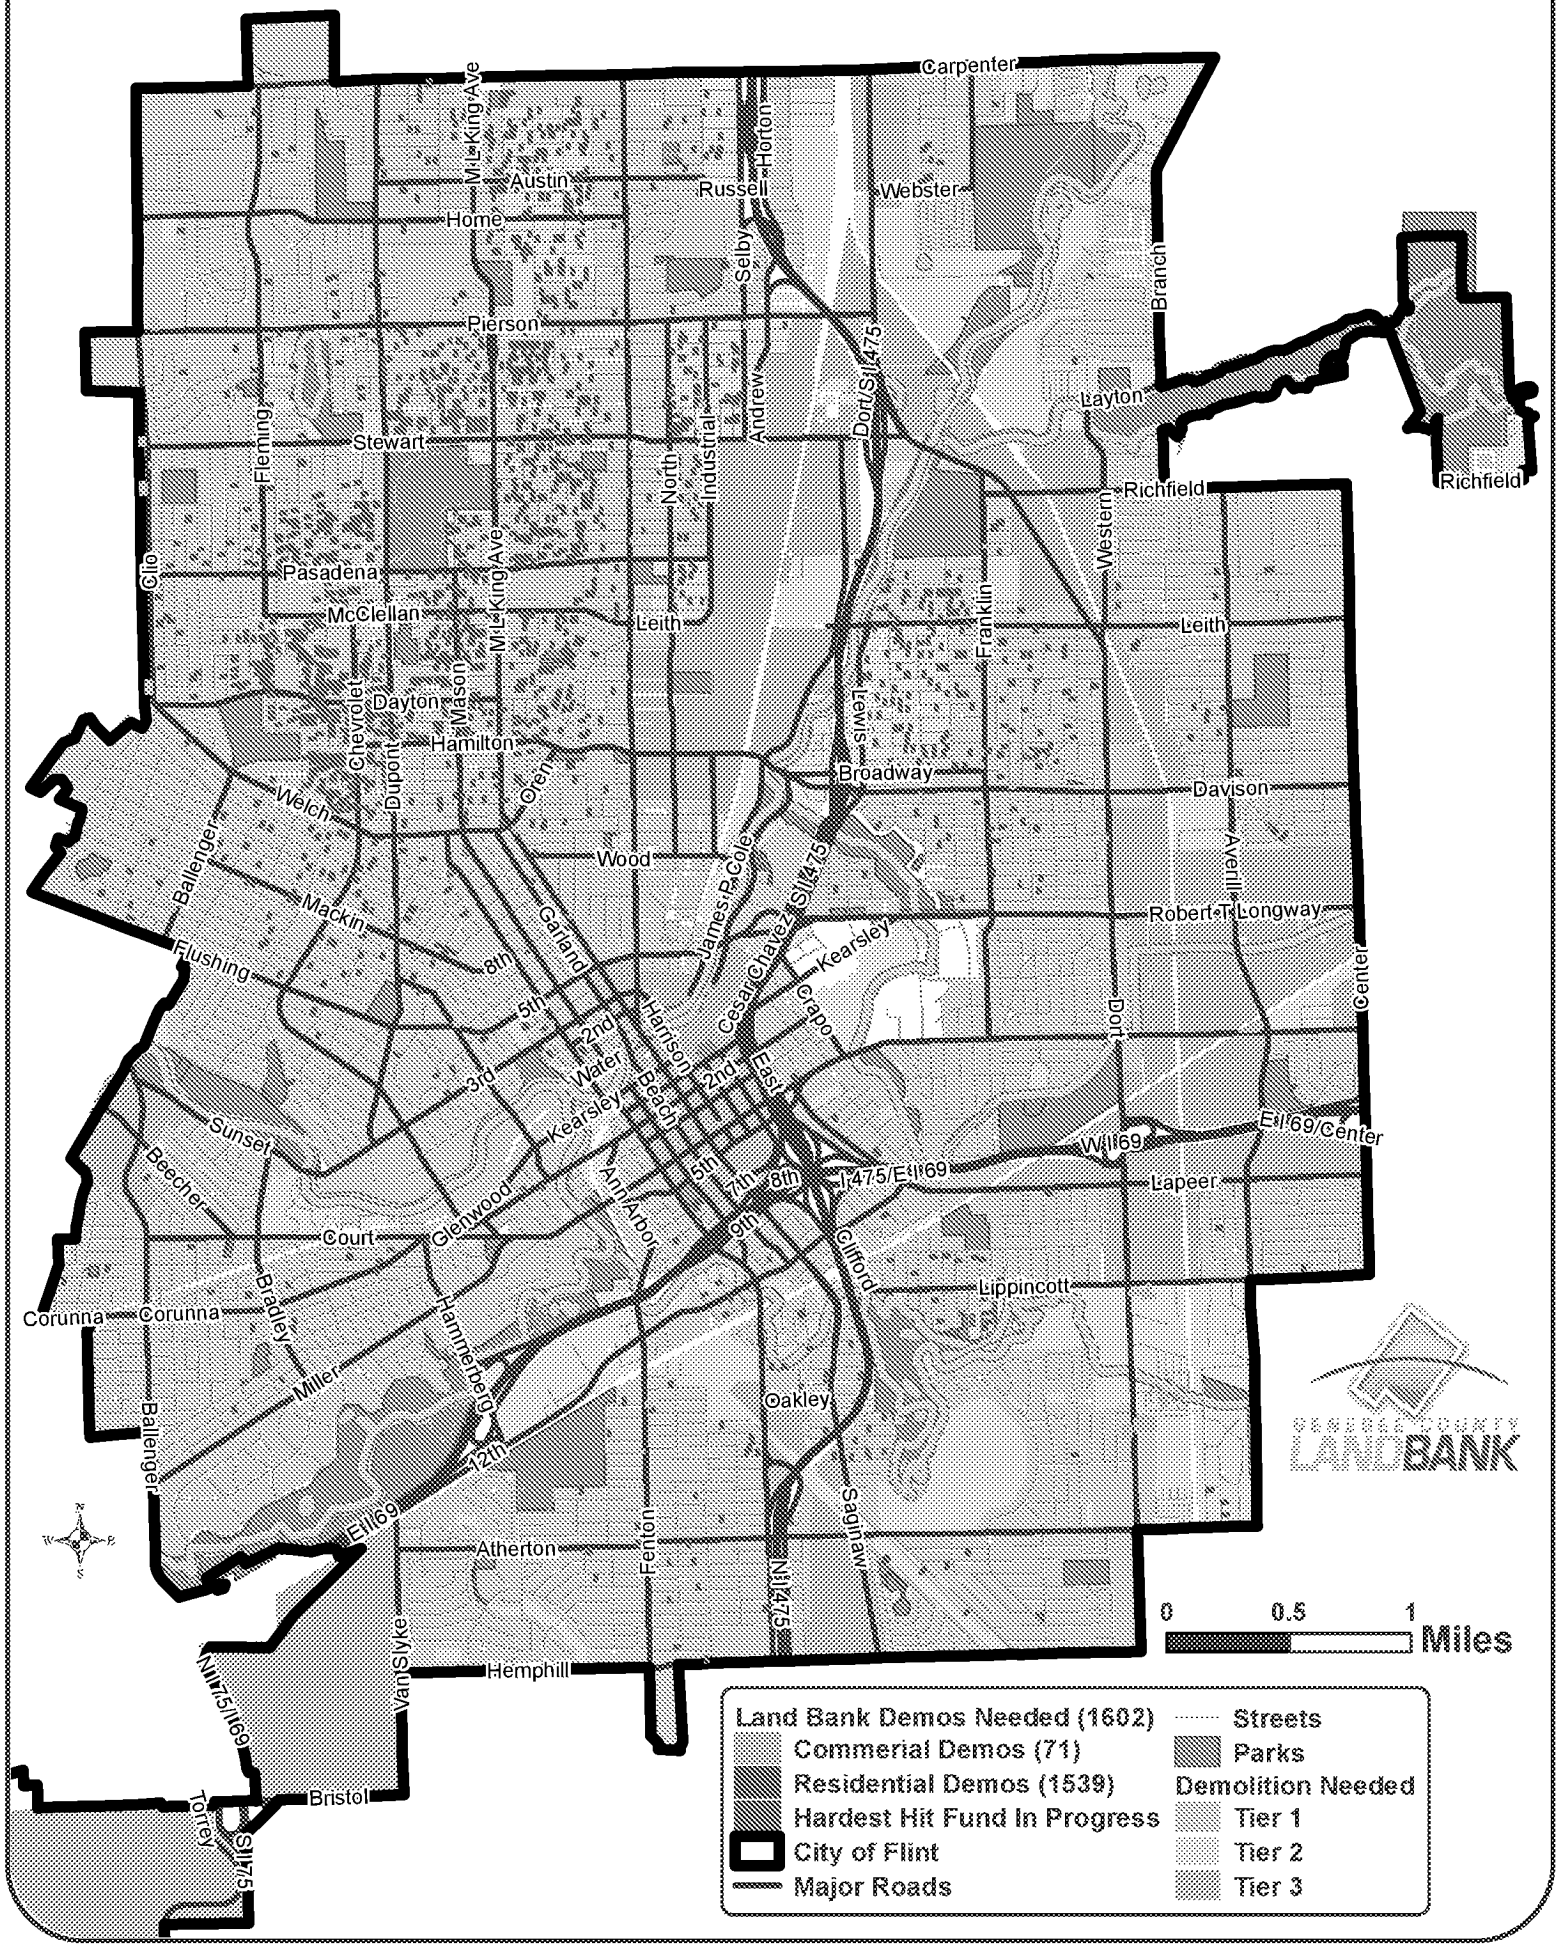
Demo Request of MSHDA: Flint Eligibility Status **Nov. 26, 2014**

Last October, the City of Flint adopted its first Master Plan since 1960. On the heels of the adoption, the City began development of a blight elimination framework, which prioritizes blight elimination activities based upon the new land use or "place types" in the Master Plan. This framework has gotten widespread community support with the goal of eliminating blight within the City in five years. Businesses, institutions, and residents are already pledging their support to help eliminate blight whether it is vacant lot maintenance or residential rehabilitation. Still the largest cost continues to be demolition and will require significant governmental resources.

Given the significant challenges Flint faces due to extreme population loss over several decades, we are **requesting that the City is considered for additional MSHDA resources for demolition**. Even after the Hardest Hit Fund and Michigan Blight Elimination Grant are expended completing a total of 2,037 demolitions, the City will have an additional 6,000 properties in need of demolition. Of these properties, 1610 properties will come to the Land Bank on January 1, 2015 (see map of properties attached). We are also working on code enforcement of privately held properties in need of demolition, which tend to impact our "tipping point" neighborhoods more dramatically. As we work through the code enforcement process, these properties are increasingly being transferred to the Land Bank. Thus, the 1610 properties in need of demolition will go up.

Current Demolition Needed by Place Type



Demolition Update for Flint, Michigan – November 2014

Flint's current administrative capacity and its data-driven blight elimination strategy leave it opportunistically poised for continuing to successfully removing blight through demolition.

The City of Flint and the Genesee County Land Bank (GCLBA) have led demolition in Flint over the last ten years through a strong partnership. Together, the two demolished more than 4,000 blighted structures in Flint through the year 2013. Over the last eighteen months this capacity for administering demolition has greatly increased. The GCLBA is successfully administering $26.41 million of funding for demolition in Flint, which will remove more than 2,000 blighted structures in record time.

In 2014 the City of Flint released *Beyond Blight: City of Flint Comprehensive Blight Elimination Framework.* This data-driven Framework quantifies the scale of blight in Flint today, identifies roles and responsibilities for a collaborative approach, and provides priorities and strategies for eliminating blight in Flint in alignment with the City's new Master Plan. The Framework includes a five-year demolition strategy. The Framework and its demolition strategy have been touted as models for approaching and prioritizing blight elimination broadly, and demolition specifically.

Figure 1: Place-Based Demolition in Flint, Michigan

Place Type	Structures in Need of Demolition			Cost of Needed Demolition		
	Residential	Commercial	Total	Residential	Commercial	Total
TIER 1						
Neighborhood Center	16	14	30	$160,000	$700,000	$860,000
Traditional Neighborhood	690	124	814	$6,900,000	$6,200,000	$13,100,000

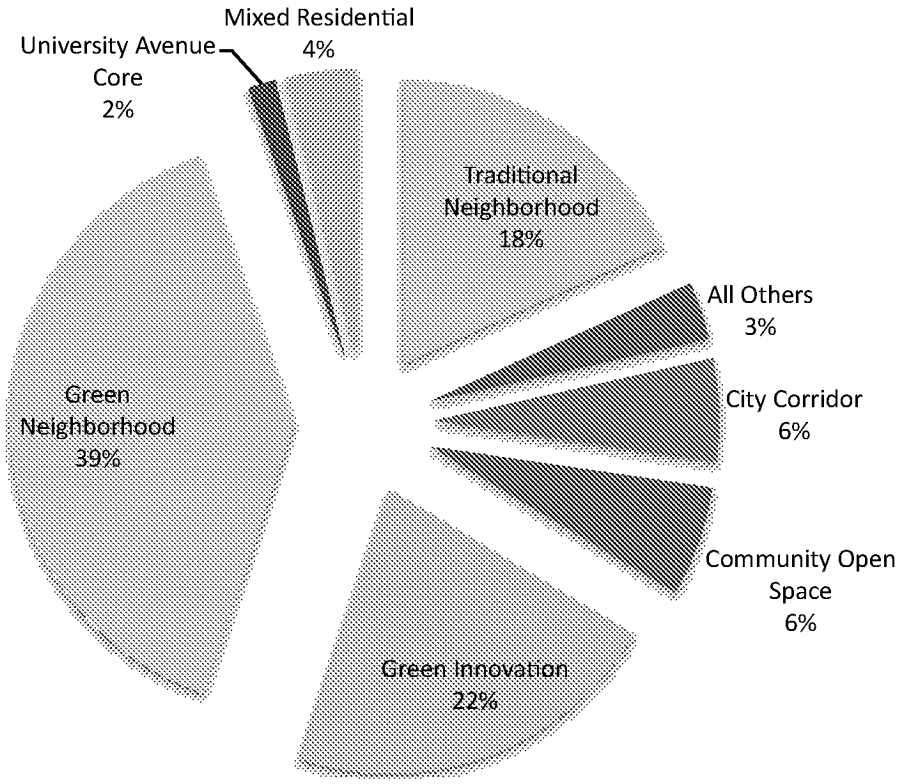
TIER 3						
Downtown	6	9	15	$60,000	$450,000	$510,000
Commerce & E	33	13	46	$330,000	$650,000	$980,000
Production	0	0	0	$0	$0	$0
TOTAL	**5028**	**432**	**5460**	**$50,280,000**	**$21,600,000**	**$71,880,000**

<u>Demolition in Hardest Hit Fund Areas</u>

- Demolition in the Hardest Hit Fund areas aligns with the top priorities of Flint's Blight Elimination Framework. These areas comprise a subset of the Tier 1 areas in the table above. More specifically, Hardest Hit Fund areas include Neighborhood Centers, the vast majority of Traditional Neighborhoods, Green Neighborhoods with greater occupancy, the majority of Mixed Residential areas, the University Avenue Core, and the majority of City Corridors.
- Given the recent large investment in the Hardest Hit Fund areas, remaining blighted structures in these areas are the first priority for demolition.
    - $30,720,000 needed to remove all blighted structures in Hardest Hit Fund areas.
    - $8,860,000 needed to demolish 662 (606 residential and 56 commercial) remaining blighted Land Bank structures in the Hardest Hit Fund areas, including structures the Land Bank will receive on January 1, 2015.
    - $21,850,000 needed to demolish 1,653 (1,520 residential and 133 commercial) remaining blighted structures, privately owned, in the Hardest Hit Fund areas.

DEMOLITION

Five-Year Demolition Needed by Place Type



4,000
residential structures demolished in the last 10 years

1,600
residential structures already funded and scheduled for demolition by spring 2015

17
commercial structures already funded and scheduled for demolition by spring 2015

$10,000 on average to demolish a residential structure

5,028
residential structures in need of demolition in the next five years

1 out of every 8 residential structures in Flint is in need of demolition in the next five years

$71.88 million
to demolish all blighted structures over the next five years

$69.38
gap in funding for demolition

$50,000 on average to demolish a residential structure

432
commercial structures in need of demolition in the next five years

1 out of every 6 commercial structures in Flint is in need of demolition in the next five years

DEMOLITION

Demolition of blighted and dangerous properties within Flint neighborhoods was identified as a top priority during Master Plan community engagement input sessions. In 2013 the Genesee County Land Bank Authority received two grants totaling roughly $23.8 million to demolish blighted residential and commercial structures, the vast majority of which are located in Flint. Accordingly, roughly 1,600 blighted structures will be demolished between the fall of 2013 and the spring of 2015, according to the guidelines and requirements of the two funding sources. Because the demolition of these properties is funded and under way they are not included in the calculation of needed demolition and are considered demolished moving forward in this framework. There are still approximately 5,028 houses and 432 commercial buildings that will need to be demolished over the next five years at a cost of roughly $71.88 million. Additional expected funding for demolition over the next five years totals only $2.5 million ($500,000 of City of Flint CDBG funding annually), leaving a $69.38 million gap for demolition. Thus, pursuing funding for demolition is a top priority for the next five years. Demolition accounts for 66% of the total cost of removing blight over the next five years. Furthermore, although government agencies will typically take the lead on demolition, partnerships between government and institutions should be created and solidified for a complementary demolition approach.

Collaboration Between Partners

Partner Roles

Residents
Residents should support demolition by reporting both properties in need of demolition and improperly completed demolition projects to local government.

Local Government
Because the vast majority of demolition in Flint is needed for blight removal and not redevelopment, government will lead demolition throughout the city.

Institutions
Institutions such as non-profit organizations, churches, and places of learning and higher education and should support demolition by purchasing and demolishing nearby blighted properties in coordination with government agencies.

Community Groups
Residents should support demolition by reporting both properties in need of demolition and improperly completed demolition projects to local government. Community groups should also share information about demolition efforts with other community members.

Businesses and Developers
Like institutions, businesses and developers can support demolition by purchasing and demolishing nearby blighted properties. While businesses and developers will lead demolition for redevelopment purposes, government will likely support demolition for redevelopment given property values and market conditions in Flint.

DEMOLITION

This chart directs citywide demolition for neighborhood stabilization in Flint by outlining priorities according to place type and depicting the connections between place types, methods, and partners. Place types are organized into three prioritized tiers and are listed in descending order on the left side. Yellow boxes provide descriptions of demolition methods for each tier and its place types. Blue boxes identify responsible partners for each tier and its place types.

Priority Chart for Neighborhood Stabilization

Tier 1: Neighborhood Demolition

Neighborhood Center
Traditional Neighborhood
Green Neighborhood
Mixed Residential
University Avenue Corridor
City Corridor

Demolition of blighted residential and commercial structures in and around Flint neighborhoods. Demolition eligibility depends on property condition, value, and place type location. Generally, properties in poor or structurally deficient condition are considered for demolition.

Local Government with Institutional support

Tier 2: Demolition for Green Reuse

Community Open Space
Green Innovation

Demolition of vacant residential and commercial structures for green re-use.

Local Government

Tier 3: Demolition for Redevelopment

Downtown District
Commerce & Employment Center
Production Center

Demolition of residential and commercial structures for redevelopment and re-use according to place type.

Businesses and Developers with Institutional and Local Government support

DEMOLITION

Action Steps and Potential Strategies

- Actively pursue funding for demolition to fill the gap between funding needed to demolish blighted structures over the next five years and funding currently available.
- Develop demolition plans in line with the priority chart and place type descriptions provided in this framework.
- Prioritize demolition within place types according to block-level occupancy. Prioritize demolishing blighted structures on blocks with higher occupancy. See vacancy by block maps for Traditional Neighborhoods on page 62 and Green Neighborhoods on page 66.
- Review and revise demolition infill specifications to reduce future maintenance and infrastructure costs.
- Refrain from boarding vacant properties planned and funded for demolition. Board vacant properties identified for demolition but not funded.
- Ensure collaboration between local government and University Avenue Core institutions. The demolition recently completed by the institutions in the University Ave Core is a leading example of a cross-sector demolition partnership. 93 properties are in need of demolition in this place type: 91 residential and 2 commercial structures costing approximately $1,010,000 total. Plans should be developed with University Avenue Core institutions to complete this demolition over the next five years.
- Direct any deconstruction projects to Green Innovation sites to precede Green Innovation pilot projects.
- Incorporate demolition into an online Problem Property portal (see page X for more details). Consider creating an online demolition-tracking tool.
- Consider establishing a matching fund for demolition whereby private parties (residents, businesses, community organizations, institutions, etc.) can contribute money towards demolition in a particular place type that will be matched by one or more local foundations. Consider a specific request to homeowners in Traditional Neighborhoods. If each homeowner in Traditional Neighborhoods contributed $300 to a matching fund, all residential structures in need of demolition could be demolished in Traditional Neighborhoods.

Five-Year Bench Marks for Blight Elimination

Years 1 and 2	Years 3 and 4	Year 5
• 1,400 blighted residential structures demolished, 25% of the total needed • 98 blighted commercial structures demolished, 25% of the total needed	• 2,800 additional blighted residential structures demolished, completing 75% of the total needed • 196 additional blighted commercial structures demolished, completing 75% of the total needed	• 1,445 additional blighted residential structures demolished, completing 100% of the total needed • 96 additional blighted commercial structures demolished, completing 100% of the total needed

Wayne and I discussed this further. I think it would be good if this group could meet early next week to have another discussion on Flint.

The purpose of the meeting would be to discuss and finalize Flint RTAB members, and also to discuss the potential ramifications of Rep. Kildee's recommendation that the state forgive Flint's $22M water loan: http://www.mlive.com/news/flint/index.ssf/2015/04/kildee_asks_feds_about_forgive.html

If you agree, perhaps Wendy (or Laura, in her absence) and Beth can help us find some time. Thanks much.

Ashley

It is timely to figure that out, because what they is not affordable and they are ignoring the new improvements announced today.

> > ***Flint, Michigan – February 27, 2015*** – The Michigan Department of Environmental Quality (MDEQ) Testing lab has provided results to the City of Flint showing that

test results for TTHM levels for the month of February are well within EPA guidelines for safe water. All eight testing sites showed levels of TTHM ranging between 14.9 and 28.5 micrograms per liter (µg/L), well below the Maximum Contamination Level of 80 (see chart below).

The testing results confirm the progress made by the City to address concerns regarding the safety of its water supply and corroborates findings by the City and independent tests by other organizations that the water today is safe. "Flint's water supply is meeting all safety guidelines set forth by the EPA," said DPW Director Howard Croft. "Today's findings by the MDEQ reinforce the progress we have made, and should help rebuild confidence in the safety of Flint's drinking water. We still have work to do to improve water quality and are committed to being vigilant to assure that water safety is maintained."

These results also show that the four month average for test results is now within EPA guidelines for five of the eight testing areas in the City. However, because EPA regulations require that the four month average for all testing sites be within guidelines, the City of Flint will still be considered to be out of compliance by MDEQ. The City expects to receive notice within the next few weeks indicating non-compliance, and system users can expect to receive official notice of non-compliance in the month of March.

Meanwhile, the City continues to work on maintaining water safety and improving water quality. While steps are being taken daily to improve quality, the City is expecting a formal set of recommendations from its water quality experts within the next few weeks.

The detail of the study results, a report of the progress being made and preliminary recommendations from Veolia will be shared with the newly formed Water Advisory Committee and Water Technical Committee, whose first meetings are scheduled for next week.

Subject: Flint Water Meeting

Greetings All,

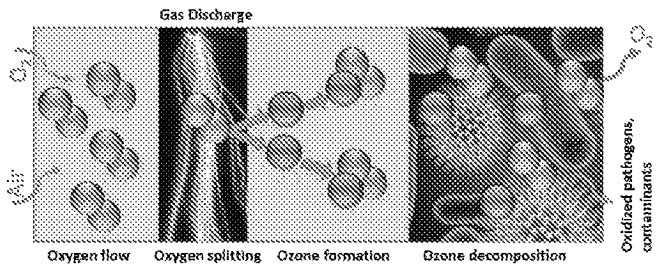
Attached is a brief overview of the information to be presented on Monday at the 1:00pm meeting with Steve Linder of the Sterling Corporation regarding Flint Water. The meeting will be held at the Sterling Corporation's offices on 106 W. Allegan, Ste. 2 in Lansing. I have sent the appointment and here are the list of attendees:

Harvey Hollins, Director, Governor's Office of Urban and Metropolitan Initiatives
Gerald Ambrose, Flint Emergency Manager
Natasha Henderson, Flint, City Manager
Liane Shekter Smith, Chief, Office of Drinking Water and Municipal Assistance (DEQ)
Stephen Busch, Office of Drinking Water and Municipal Assistance (DEQ)
Brad Wurfel, Director of Communications (DEQ)

Chemical Free Water Disinfection by Ozone

Today about 98% of water treatment facilities in the U.S. use some form of chlorine to disinfect drinking water supplies. It is a cost effective method for destroying potentially harmful bacteria and viruses. However, chlorine's ability to interact with organic compounds in water leads to trihalomethanes (THMs) formation. Especially, river or lake water with high level of organic matter require heavy chlorination to combat high level of bacteria, resulting in dangerous levels of THMs and bad smell. THMs, when ingested can encourage the growth of free radicals that can destroy or damage vital cells in the body. Besides cancer, exposure to THMs has been linked to other health issues including asthma, eczema, heart disease and higher miscarriage and birth defect rates. Further, high level of chlorine also poses serious risk to the aging infrastructure.

Chemical free water disinfection technologies such as UV light and ozone have long been recognized to be much safer than chlorination, however, their high cost has prevented wider adoption. The basic mechanism of ozone generation and disinfection is shown in the picture. Ozone has a high oxidation potential (much higher than chlorine) and a superior response time compared to other sanitizing products. Its high oxidizing potential enables ozone to break down organic matters that chlorine cannot. Some pollutants can only be oxidized by ozone. For example, ***Cryptosporidium Parvum***, a drinking water pollutant, is resistant to most disinfectants, but is effectively destroyed by ozone. Most importantly, the emission from ozone is pure oxygen and it leaves no residues.



UV light is a competing non-chemical sterilization technique. Intense UV rays break down the sensitive RNA and/or DNA of microorganisms, thus preventing the organism from reproducing. Ozone, on the other hand, oxidizes the microorganisms, thus destroying their cells completely. UV sterilization being a line of sight process, to be effective, one needs to remove most of the suspended matter prior to the treatment. In contrast, ozone oxidizes the soil or particulate matter, changing or destroying the chemistry of the soiling materials such as organic compounds.

Despite the great benefits of ozone, its widespread adoption is limited due to the high total ownership cost of current commercial ozone generators. Somnio's $AiR_2O_3^{TM}$ ozone generator is a paradigm shift in ozone generation technology. The first and only commercial barrier less ozone generator eliminates the requirement of dielectric barriers and highly filtered dried oxygen (pure or enriched) supplies, which restrain current commercial ozone generators. This groundbreaking technology brings a market-competitive, robust, energy efficient, and scalable modular device that offers a financially attractive alternative with the capability of producing varying levels of ozone depending on the application at hand.

Producing ozone cost effectively is only part of the greater story of the far reaching benefits of ozone. Applying ozone effectively for a given application requires careful and intelligent design, sensing and monitoring. In addition to its revolutionary $AiR_2O_3^{TM}$ ozone generator, Somnio

collaborates with end users to provide complete and economical turnkey solutions. Somnio's current in-house test plant incorporates all necessary safety features and automation.

FYI, Wanted to make sure you saw this.

From: Jason Lorenz [mailto:jlorenz@cityofflint.com]
Sent: Thursday, March 19, 2015 12:16 PM
Subject: PRESS RELEASE: EM Authorizes DWRF Bond Restructuring

Flint Emergency Manager Authorizes Bond Restructuring to Afford Additional $2.24 Million toward Capital Improvements in Water

Flint, Michigan – March 19, 2015 – Flint Emergency Manager Jerry Ambrose today authorized a restructuring of four outstanding Drinking Water Revolving Fund (DWRF) bonds to allow postponing current principal payments in the total amount of $2.24 million. This action will allow the $2.24 million budgeted for debt service to be utilized for expenses associated with maintaining safety and improving quality of the Flint water supply. Approval of the State Treasurer is required before the restructuring can occur.

Flint has recently received a final report from Veolia, its water expert advisor, making a series of recommendations to maintain and improve the Flint water supply. These recommendations, and other items identified in the City's current capital improvements plan, will be considered as the City develops and implements its action plan to maintain and improve the Flint water supply. Discussion on the development of the action plan will begin today, March 19, 2015 at the Water Advisory Committee meeting, scheduled to begin at 2:00 pm at the Flint Public Library.

The State of Michigan was instrumental in allowing the restructuring, as approvals are required by both the State Treasurer and the Director of the Michigan Department of Environmental Quality. "At all levels, the State of Michigan has been most cooperative in assisting the City of Flint as it addresses the many issues confronting the Flint water system", said Ambrose. "Access to $2.24 million at this time will be very helpful in moving forward with our action plan."

The proposed restructuring will free up funds to enable the City to more quickly begin implementing recommended improvements to its water treatment and distribution system. Several recommendations for

improvement are currently unbudgeted and the $2.24 million will help assure that the most important can be performed.

Recommendations to be considered include the addition of a Granulated Activated Carbon Filter, estimated at as much as $1.5 million; acceleration of the repair and replacement of values, estimated at an additional $120,000 annually; additional pipeline replacement, estimated at $1 million per mile; and acceleration of the project to automate plant operations, estimated at $450,000. $1.315 million will become available in the City's current fiscal year, and the remaining $925,000 will be available in the next fiscal year.

The bonds are currently financed at a rate of 2.5%, and postponement of the principal payment will incur some additional interest expense over the life of the issue. While the interest rate will not increase, the total interest cost will increase by approximately 2% ($228,000) over the 20 year life of the issues.

Daily Briefing and Situation Report

Date: November 30, 2015

Surveillance Indicators: People Tested since 10/1/2015: 1,361;

- Children less than 6 years old ≥ 5 µg/dl since 10/1/2015: 15
- Children 6 to 17 years old ≥ 5 µg/dl since 10/1/2015: 6
- Adults 18 years and older ≥ 5 µg/dl since 10/1/2015: 9

Severity Indicators: Hospitalized/Discharged-1/1; Deaths- 0

DAILY ACTIVITY SUMMARY

Elevated Blood Level (EBL) Environmental Investigations – Wes Priem, Courtney Wisinski

- **Contractor (ETC) has 8 investigations scheduled.**
- **The high EBLL home is scheduled for Friday 12/4/15.**
- DEH-Finalized residential tap water sampling protocol used to evaluate lead concentrations in households
- Contractor (ETC) has completed 1 EBL investigation, but will have to return for water sampling.

MDHHS/Genesee County Health Department (GCHD) Case Management (CM) Services

- No additional updates for 11/30/15
- Week Ending 11/20/15:
    - Number of contacts attempted: 58
    - Contacted and offered case management: 13
- DEH staff developing case management and EBL investigation database
    - compiles blood test results, case management services, and environmental sampling data for each Flint child with elevated blood lead level

Epidemiology/Surveillance – Patti McKane, Martha Stanbury

- **Completed re-evaluation of blood lead testing data from 1/1/2010 to current per the request of the Governor's office. Counts for 10/10/2015 will vary slightly from previously reported because of the change in de-duplication procedures to accommodate yearly counts.**
- **Draft Blood Lead Data report completed and conveyed to Eden Wells, Corinne Miller and Angela Minicuci.**
- Some problems were experienced in accessing all the laboratory electronic data files going back to last week's submissions over the holiday. Most were resolved with help from DTMB, and the

rest should be resolved tomorrow morning. As a result, no daily report was created of newly reported individuals with BLL>20files but we will have this tomorrow.

- 1 child hospitalized PHI <2 yo, identified by lab who contacted primary provider with elevated blood lead level of 52 mcg/dl; hospitalized at Children's PHI follow-up tests decreased without need for chelation- discharged to home PHI
    - GCHD follow-up PHI case management and investigation in process- possible history of lead paint ingestion
    - Child with history of anemia.
    - Other children in household tested, also followed by PCP.

Communications/Information Sharing

- MDHHS/GCHD weekly call Nov 24 3PM- reviewed progress on case management and EBL testing
- Technical Advisory Committee meeting originally scheduled for December 9th- , then postponed by City of Flint, may actually take place: awaiting word from City.

Health Education Resources Updates - Kory Groetsch (stand-in for Michelle Bruneau)

- Bathing-specific fact sheet under development.
- DEH has drafted a phosphate fact sheet, reviewing/revising with DEQ Drinking Water Staff
- DEH working with CLPPP and GCHD to revise parent resources package to reduce reading level.

Toxicology - Kory Groetsch, Jennifer Gray

- Developing Access database to track services provided to EBL children. Meeting held with other DEH staff to begin design.

WIC

- No additional updates for 11/30/15
- Letter sent 11/24 to GCHD about Ready-to-feed formula availability from WIC program
- Talking points for WIC staff and for providers shared

Healthcare/Providers

- No additional updates for 11/30/15
- Forum for primary care providers in Flint by public health being planned- 2nd – 3rd week December
- WIC information to be shared by GCHD to providers

DEQ Information - Linda Dykema as Liaison

- **MDEQ would like to issue school drinking water testing results in coordination with MDHHS release of the blood lead test reporting.**

Flint Water Lead Project

Michigan Department of Health and Human Services
Situation Report for December 1, 2015

****NOTE: Contains potentially Identifiable Information- REDACT AS INDICATED****
New items for the day listed first and in bold print.

Daily Briefing and Situation Report prepared by Linda Dykema

Surveillance Indicators: People Tested since 10/1/2015: 1,361;

Children less than 6 years old ≥ 5 µg/dl since 10/1/2015: 15

Children 6 to 17 years old ≥ 5 µg/dl since 10/1/2015: 6

Adults 18 years and older ≥ 5 µg/dl since 10/1/2015: 9

Severity Indicators: Hospitalized/Discharged-1/1; Deaths- 0

DAILY ACTIVITY SUMMARY

Elevated Blood Level (EBL) Environmental Investigations – ETC Contractors, Wes Priem, Courtney Wisinski

- **2 EBL investigations completed.**
- 8 investigations scheduled.
- The high EBLL home is scheduled for Friday 12/4/15.

MDHHS/Genesee County Health Department (GCHD) Case Management (CM) Services – Nancy Peeler

- **CM report through 11/25/15:**
  - **# of contacts attempted: 136**
  - **# offered CM: 46**
  - **# CM started: 5**
  - **# of children receiving CM who live in Flint: 5**
  - **# billed to Medicaid: 5**
  - **# Other disposition: 2 (2 children moved to Oakland County)**

- **Held call with GCHD staff to clarify and resolve questions about the CM budget. The revised budget will be submitted in eGrams on or about 12/7/15.**

- **Held weekly status call with CM staff at GCHD:**
  - **Need to include developmental screening as part of the CM protocol, and need to share screening results with Early On when a referral is made;**

Epidemiology/Surveillance – Patti McKane, Martha Stanbury, Bob Scott, Jessica Cooper

- Completed re-evaluation of blood lead testing data from 1/1/2010 to current per the request of the Governor's office.
- Revised Draft Blood Lead Data report completed.
- 1 child hospitalized PHI <2 years old, identified by lab who contacted primary provider with elevated blood lead level of 52 µg/dl; hospitalized at Children's PHI follow-up tests decreased without need for chelation- discharged to home PHI

- GCHD follow-up PHI case management and investigation in process- possible history of lead paint ingestion
- Child with history of anemia.
- Other children in household tested, also followed by PCP.

Communications/Information Sharing – Linda Dykema, Eden Wells

- **Weekly (Tues. 8:00 am) coordination call with DEQ/LARA/HHS. Discussed need for informational materials for schools/residents regarding lead free plumbing replacements.**
- MDHHS/GCHD weekly call Nov 24 3PM- reviewed progress on case management and EBL testing
- Technical Advisory Committee meeting originally scheduled for December 9th- , then postponed by City of Flint, may actually take place: awaiting word from City.

Health Education Resources Updates - Michelle Bruneau, Emily Houk

- **Revising Phosphate fact sheet. Will discuss with DEQ Drinking Water staff on 12/2/15**
- Bathing-specific fact sheet under development.
- DEH working with CLPPP and GCHD to revise parent resources package to reduce reading level.
- Working with Healthy Homes Section staff to revise EBL report for Flint Residents.

Toxicology - Kory Groetsch, Jennifer Gray, Lisa Quiggle

- **Working with GCHD and DEQ to address questions concerning impact of phosphate treatment on drinking water filters.**
- **Working with Healthy Homes Section staff to revise EBL report for Flint Residents.**

WIC

- No additional updates for 12/1/15
- Letter sent 11/24 to GCHD about Ready-to-feed formula availability from WIC program
- Talking points for WIC staff and for providers shared

Healthcare/Providers

- **Forum for primary care providers in Flint POSTPONED pending coordination with local providers**
- WIC information to be shared by GCHD to providers

DEQ Information - Linda Dykema as Liaison

- MDEQ would like to issue school drinking water testing results in coordination with MDHHS release of the blood lead test reporting.

DAILY ACTIVITY SUMMARY

Elevated Blood Level (EBL) Environmental Investigations – ETC Contractors, Wes Priem, Courtney Wisinski

- **EBL investigation for high EBLL home completed on Friday 12/4/15.**
- 3 EBL investigations completed.
- 8 investigations scheduled.

MDHHS/Genesee County Health Department (GCHD) Case Management (CM) Services – Nancy Peeler

- **Child with EBLL of 52 µg/dl: blood level has decreased to 28 µg/dl per confirmed lab report.**
- CM report through 11/25/15:
  - # of contacts attempted: 136
  - # offered CM: 46
  - # CM started: 5
  - # of children receiving CM who live in Flint: 5
  - # billed to Medicaid: 5
  - # Other disposition: 2 (2 children moved to Oakland County)

Epidemiology/Surveillance – Patti McKane, Martha Stanbury, Bob Scott, Jessica Cooper, Karen Lishinski

- **EPA, CDC, MDHHS, local health department call scheduled for later this week to discuss Legionellosis.**

Filter Distribution Sheryl Thompson

- November Distribution
  - 778 Filters
  - 63 Pitchers
  - 924 Replacement Filters
- Total Distribution since October 1, 2015
  - 10,951 Filters
  - 184 Pitchers
  - 924 Replacement Filters

Communications/Information Sharing – Linda Dykema, Eden Wells

- **EPA drinking water experts will present to Technical Advisory Committee meeting on December 9th. Topics will include water treatment/corrosion, the status of Flint's water and next steps.**

Health Education Resources Updates - Michelle Bruneau, Emily Houk

- **Finalized Phosphates fact sheet with GCHD; sent final version to MDHHS Communication office to be finalized and posted on the website.**
- **Bath time poster finalized and forwarded to HHS Communications/PIO for review and approval.**
- **Per Emily Houk, mailed 1000 Keep Your Child Lead-Safe booklets (English), 500 Keep Your Child Lead-Safe booklets (Spanish), and 4 boxes of Fight Lead Poisoning with a Healthy Diet to GCHD.**
- **Finalized time/date of technical meeting with GCHD to discuss phosphate dosing and health (Wednesday, 12/9; 9:30-11a).**
- Pending: Aerator/Filter Maintenance Fact Sheet; Flint Parent Letter re-do in partnership with Emily Houk.

Toxicology - Kory Groetsch, Jennifer Gray, Junaid Maqsood, Veronica Tijerina

- **Collaborating with Surveillance, CM, and EBL response staff to develop a Data Dictionary and Database to track services provided to EBL children/families.**
- Working with GCHD and DEQ to address questions concerning impact of phosphate treatment on drinking water filters.
- Working with Healthy Homes Section staff to revise EBL report for Flint Residents.

WIC

- Letter sent 11/24 to GCHD about Ready-to-feed formula availability from WIC program
- Talking points for WIC staff and for providers shared

Healthcare/Providers

- **Drafted HAN to Flint healthcare providers for review by the project communications team and GCHD. The HAN encourages enhanced BLL testing for children less than six, particularly outside of the 1 and 2 years of age that are required by Medicaid.**
- Moran, Wells and Miller met with Medicaid health plan staff 2 to discuss increased promotion by health plans of EBL testing of Flint children < 6 years of age. Status update on Flint provided. Medicaid put this issue on its agenda for discussion at its December 3 meeting with Medicaid health plan CEOs and suggested inviting Dr. Wells to speak to Medicaid health plan medical directors.
- Medicaid identified three individuals to partner with epidemiology staff to develop methodology to measure/report progress on the percentage of Flint children enrolled in Medicaid who receive EBL testing.

DEQ Information - Linda Dykema as Liaison

- No updates for 12/4/2015.

Subject: Attorney Client Work Product (Draft), Privileged and Confidential

Team:

Today Harvey and I met with the Flint Water Task Force. It was a good meeting. People were pleased with the G's statement from the prior day. Captain Kelenske joined us and we had a very good discussion about moving forward with the creation of the Flint Water Crisis Agency Coordinating Committee (FIACC). Tim Becker and Captain Kelenske provided me with a fair amount of input. I also read the City of Flint Incident Action Plan for a State of Emergency which Chris received today (enclosed for those who wish to read it as well). I have distilled all of this into a two page plan that I want your edits and comments on and a one page organizational chart (now presented in the "governor's colors" according to our fine people in Communications). Spoiler alert—I made Captain Kelenske Vice Chair of the whole shebang (with the Colonel's blessing) so Harvey wouldn't get lonely.

Here is my ask of you:

1) Within 24 (sooner if you can) hours give me your comments and input
2) Tomorrow I will turn around a final document for Jarrod to review with the Governor either New Year's Day or Saturday
3) Ideally, Governor will approve Harvey sending it to Mayor Weaver Saturday (Sunday latest)
4) Mayor needs to know that this is what the Governor wishes to discuss at the meeting January 7 along with financial resources that we still need some estimates on cost from DHHS for
5) Meegan and Dave need to noodle how best to get out front with this and change the narrative focus on Monday's Genesee County declaration of emergency

I know we are all working way too hard for what should be a rest and recharge period but I do appreciate everyone's efforts and I know the Boss really does as well.

Regards,

Rich

A Proposal to Create the Flint Water Inter-Agency Coordinating Committee (FIACC)

In collaboration with the Flint After-Action Task Force, MSP Captain Chris Kelenske, DHHS Chief Deputy Tim Becker and DHHS Director Nick Lyon, Harvey Hollins and Rich Baird are recommending the immediate creation of the above referenced entity, with its sustained role and responsibility enabled under the Governor's Executive Order.

Statement of Need

Due to a combination of resource constraints, inexperienced personnel, "silo" bureaucratic processes and reactionary approaches to immediate problems, there is a ~~nearly complete~~ lack of coordination, communication, and connected management amongst all the departments and stakeholders who must work together to ensure Flint's return to clean, safe water and to coordinate mid and long term efforts to mitigate and address future health and behavioral consequences from lead ingestion. This group MUST be stood up regardless of whether (or when) the conditions required for a declaration of emergency are met by the City, County, State or Federal authorizers. This coordinating body must include:

- The creation of a routine information process between all parties.
- Pursuit of other avenues of funding including federal grants and legislative appropriations.
- While the Emergency Management Act or the Stafford Disaster Relief and Emergency Assistance Act may not be mechanisms to fix all the issues in Flint, portions of the Emergency Management Act outlining management of emergencies or disasters ~~events~~ are applicable and should be implemented without delay (e.g. Local emergency operations plans/emergency operations guides as well as emergency operations support plans).

Action Plan and Establishing the FIACCC

It appears that a request for a Governor's declaration may be from the county as soon as January 4, 2016. The state's Deputy State Director of Emergency ~~Coordinator~~ Management and Homeland Security (Capt. Kelenske) will evaluate the request and provide a recommendation whether to issue a declaration, following established protocol and due diligence. But immediately, we will:

1. Establish an interagency workgroup Chaired and Vice-Chaired by Harvey Hollins and Chris Kelenske, respectively, and be comprised of DHHS, MDEQ, MSP, Treasury, Genesee County, City of Flint, MDE, LARA and external Subject Matter Experts (SMEs). Civil Rights may be added at a later time. If additional agencies/stakeholders who can assist with accomplishing the action plan are needed, they will be added. Personnel must be goal oriented, transparent with findings and measures of progress, and able to work toward accomplishing the Incident Action Plan created by the state in a timely manner. A draft Organization Chart is attached under separate cover. Staff will be needed that is familiar with disaster/emergency planning, operations, logistics, and finance as outlined by the National Incident Management System (NIMS). These management components would report to the chair/vice chair and ensure resource requests are tracked and the incident action plan objectives are created, documented, and completed.
2. This body should be created by Executive Order and it must complement and not replace the current system under the Emergency Management Act. In fact, it should demonstrate how to best leverage support where existing laws fall short under a man-made emergency.
3. Utilize the National Incident Management System and Unified/Incident Command as appropriate.
4. Establish routine communications protocols at the operational, executive, and legislative levels as determined appropriate.

5. Establish interagency workgroup objectives using the following as a starting point.

Interagency Workgroup Objectives

1. Determine and convey acceptable standards for potable water.
   - Identify needed remediation.
   - Convey the remediation plan objectives to all stakeholders and interested parties.
   - Logistics plan for distribution and serving homebound citizens with water and filtration
   - Implement the plan.
2. Determine health impacts for the impacted population.
   - Identify treatment methods.
   - Nutrition education and support
   - Coping with lead exposure (care, monitoring, neurodevelopmental screening, access to DBP specialists, psychologists/psychiatrists, expanded county services, etc.)
   - Convey the treatment plan objectives to interested parties.
   - Implement the plan.
3. Establish a public information protocol to effectively inform the community of the situation and actions taken.
   - Identify existing Public Information outlets within the city, county, and state.
   - Establish a Joint Information Center
   - Provide for Emergency Alerts and Updates
   - Leverage public and private education schools
   - Determine official information flow and approval of information.
   - Convey to interested parties.
4. Assess the status of the infrastructure and determine feasible actions to upgrade the water system.
   - Determine current state of the infrastructure.
   - Develop priorities, costs, and potential funding sources for infrastructure upgrades as part of a long term recovery plan.
   - Seek partners to assist (NGOs, Foundations, Business, etc.)
   - Implement the plan.

Final Thoughts

After the team provides input to this document, I would ask that Governor Snyder review and approve the approach, authorize Harvey Hollins to get the plan to Mayor Weaver no later than this weekend, and then proactively communicate the plan regardless of whether we get an Emergency declaration or not.

Also, we do not believe ~~setting up~~activating ~~an Emergency Command~~the State Emergency Operations Center (SEOC) ~~which requires 24/7 staffing~~ is sensible until AFTER Genesee County has demonstrated they did all they could, utilized all available resources to include contracts and mutual aid, and couldn't solve the problem. Additionally, this incident is more in the recovery phase where other types of coordination center are utilized. That is what is required under the ~~law~~Emergency Management Act.

Comment [CK1]: We do not always have 24 our staffing. It is dependent upon the incident.

For Immediate Release

Emergency Manager Darnell Earley Committed to Increased Transparency and Detailed Information on Water Rates

Flint, Michigan – October 18, 2013 –Flint Emergency Manager Darnell Earley has today announced that the City of Flint's water issues will be one of his key concerns in his new role and a top priority for his team. With the major decision to join the Karegnondi Water Authority made and the beginning of construction on the water intake and pipeline approaching, Mr. Earley expressed his commitment to thoroughly reviewing and assessing the scope of the issues in the following statement:

"Good management can only be accomplished with a careful examination of the facts; I want my efforts to reflect data driven decisions made with the most accurate information obtainable. As I said when I arrived, I will be making the areas of most concern to Flint residents my top priorities; the future of Flint's water supply, water system and the cost of operation and maintenance are as important to Flint residents as public safety or any other major obligations of a full service city such as Flint.

–CONTINUE–

CITY OF FLINT
OFFICE OF EMERGENCY MANAGER
DARNELL EARLEY

I also want to be transparent in what we glean from this exercise; through this initiative I will keep the public as informed on the process as I am as we go forth. It is for that reason that I plan to examine this issue with the help of an independent, third party consultant in order make a fair and impartial assessment. The goal of this assessment is to ensure that the long term costs of the KWA decision are accurately and openly reflected in the water rates charged to residents and businesses.

Water prices are a key concern to Flint water users, so as we look forward we want to provide them with an understanding of how they are set and to inform residents of available assistance. We currently have a poverty exemption for a portion of water and sewer charges available to low income homeowners and a lowered water deposit for low income renters. The City of Flint has done all that it can in the short term to ease the burden of water increases. Now is the time to look to the future; we want to ensure that our residents get the best possible service at the best cost through a sustainable system and a process that is self supporting for decades to come."

-Darnell Earley
Flint Emergency Manager

City Of Flint Water History Facts

Current Treatment Plant was put into service in 1954.

Current 72" main pipeline was completed in 1970.

Flint signed a 30 year contract with Detroit water and Sewer Department in the mid 1960's.

The contract with DWSD has expired and we are currently operating on a yearly extension.

In 2006 Flint completed a $48,000,000 upgrade of the existing Water Plant. (Required by the MDEQ & for backup only).

Flint's Water & Sewer System is approximately a 300,000,000 Enterprise.

Flint's Water & Sewer System is designed to deliver water to over 200,000 people with over 1,500 miles of infrastructure.

Flint's most recent census count shows a population of approximately 102,000 in 2010.

Flint's census population in 2000 was approximately 124,000.

The water system had over 45,000 customers in June of 1999.

The water system had just over 36,000 customers by June 2011.

The "Fixed Costs" that must be covered to maintain the system and deliver quality water have increased over time.

CITY OF FLINT
WATER NON-PAYMENT TURN-OFF POLICY

1. Water services to any customer may be shut off if the account is not paid until after 30 days after the due date. (City ordinance 46-52 (h))

2. Non-payment turn-offs are done only Monday through Thursday. The Customer Service Center does not schedule non-payment turn-offs on Fridays, Saturdays, Sundays, or most recognized holidays.

3. Illegal usage, broken payment arrangements and NSF (non-sufficient funds) turn-offs are done at any time without additional notice.

4. Turn-off notices are mailed to delinquent customers fifteen (15) days before actual turn-off.

5. The water customer is responsible for maintenance of all plumbing in the premises including connection to City water mains or sewer lines.

6. If a customer disputes a water bill and is unable to resolve the issue with Customer Service personnel, the customer may request an administrative review. Further information on any water account may be obtained by calling (810) 766-7015 or visiting the Customer Service Center at 1st Floor, City Hall, 1101 S. Saginaw St.

Preliminary Options for Future City of Flint Water Sources

Consider a New Negotiated Contract with Detroit Water and Sewer Department

PRO'S	CON'S
No upfront capital costs	Lack of control over new / fixed changes
Possibility to negotiate a lower rate	Past practices
Ability to "Blend" water sources to further control costs	

Consider a Contract with the Karegnondi Water Authority

PRO'S	CON'S
Voting member of KWA board	Capital cost (debt service)
Ability to "Blend" water sources to further control costs	Uncertainty of final costs
Raw water is an asset for attracting new buisnesses	

Blended Use of the Flint River

PRO'S	CON'S
Helps control cost of water	

*** CURRENTLY NO DECISIONS HAVE BEEN MADE REGARDING THE FUTURE WATER SOURCE

Improvements for City of Flint Water System

Reduce Leakage

▪**Finalize a Preventative Maintenance Plan**
- (Planning started in January 2012, requires funding, … part of Operational Costs)
- Will help identify repair area's

▪**Reduce water theft**

▪**Replace water meters**
- We currently have an eighteen month plan to replace all meters with more efficient *"Smart Meters"*

▪**Encourage routine household checks**
- "Faulty" toilets are a significant reason for household water loss. and unexpected larger bills.

Other Leakage concerns

✓Transmission Loss

✓Fire Hydrants

✓Incorrect water bills

✓Non-Payment

RE: Cost Comparison, KWA v DWSD

Mr. Kurtz:

The City of Flint is considering whether joining the Karegnondi Water Authority (KWA) is a better alternative for the residents and businesses of Flint than continuing to purchase water from the Detroit Water and Sewer District (DWSD).

An important part of this consideration is the relative cost of the alternatives. We have compared the current projected costs of continuing to purchase water from DWSD to the projected costs of purchasing water from KWA.

The projected costs of purchasing water from DWSD come from our current and past experience, as well as statements from DWSD about their future costs. The costs of purchasing water from KWA are based on the KWA Lake Huron Water Supply Study, as updated by its October 2012 Preliminary Engineering Report Update, Appendix 20, dated October 4, 2012.

Based on the current contract with DWSD, the FY13 cost of purchasing water for the City of Flint only (excluding the sale of water to Genesee County) is budgeted at $14.4 million. Past experience indicates that it is reasonable to assume a 10% increase annually in the capacity charge from DWSD and a 5% increase in the commodity cost. It is also reasonable to assume a 5% increase in operational costs for the Flint Water Treatment Plant. Consequently, it appears that the costs for continuing to purchase water from DWSD will increase to $22.7 million by FY20.

Conversely, joining KWA and participating in the construction of infrastructure to receive water will require an up-front cost to the City of $2.3 million, to be paid over the first three years of joining. This would be paid by the City during the construction period while the City continues to purchase its water from DWSD. However, once the construction is complete and water delivery commences, the City's capacity charge will be fixed, based on the debt service necessary to finance construction. Operational costs for KWA water delivery and the Flint WTP are projected to increase by 5% annually.

Based on the assumptions in this comparison, the annual projected cost of purchasing water for the City of Flint is 15% or $2.6 million LESS using the KWA option in the first year of operation, increasing to 27% or $6.1 million LESS in the fifth year of operation. The only caveat is that in order to achieve this, the City will need to upfront KWA $3.25 million over 3 years prior to KWA beginning water delivery.

Concerns have been raised about the potential of cost overruns and delays in construction. These are reasonable concerns. An additional analysis, assuming a 15% cost overrun, and a one-year delay in construction, indicates that the gain to be achieved from participating in KWA is lessened (from $2.6 million in the first year to $2.3 million) and the City's upfront contribution is increased to $10.4 million if the City is required to make its first year's debt service payment before operations begin. The City's gain from participating in KWA is delayed, but once operations begin, the City's annual costs are less than continuing with DWSD, becoming net positive in FY20. However, given the City's precarious financial position, it is likely that the City would need to find some source of capital if such an up-front payment were necessary.

Finally, we have also analyzed what constraints DWSD would need to impose on its contract with the City of Flint in order to be a positive financial option. It would appear that if the capacity costs to Flint were to be fixed at the FY13 level and if annual operating cost increases were capped at 2.25%, then the cost to the City of Flint could be less than KWA.

Attached are the three projections summarized above. First is the "Original Projection" utilizing the KWA Study. Second is the "Worse Case Projection" with cost increases and construction delays. Third is the reduced DWSD costs associated with fixed capacity costs and capped increases in operational costs.

Please contact me if you have any questions.

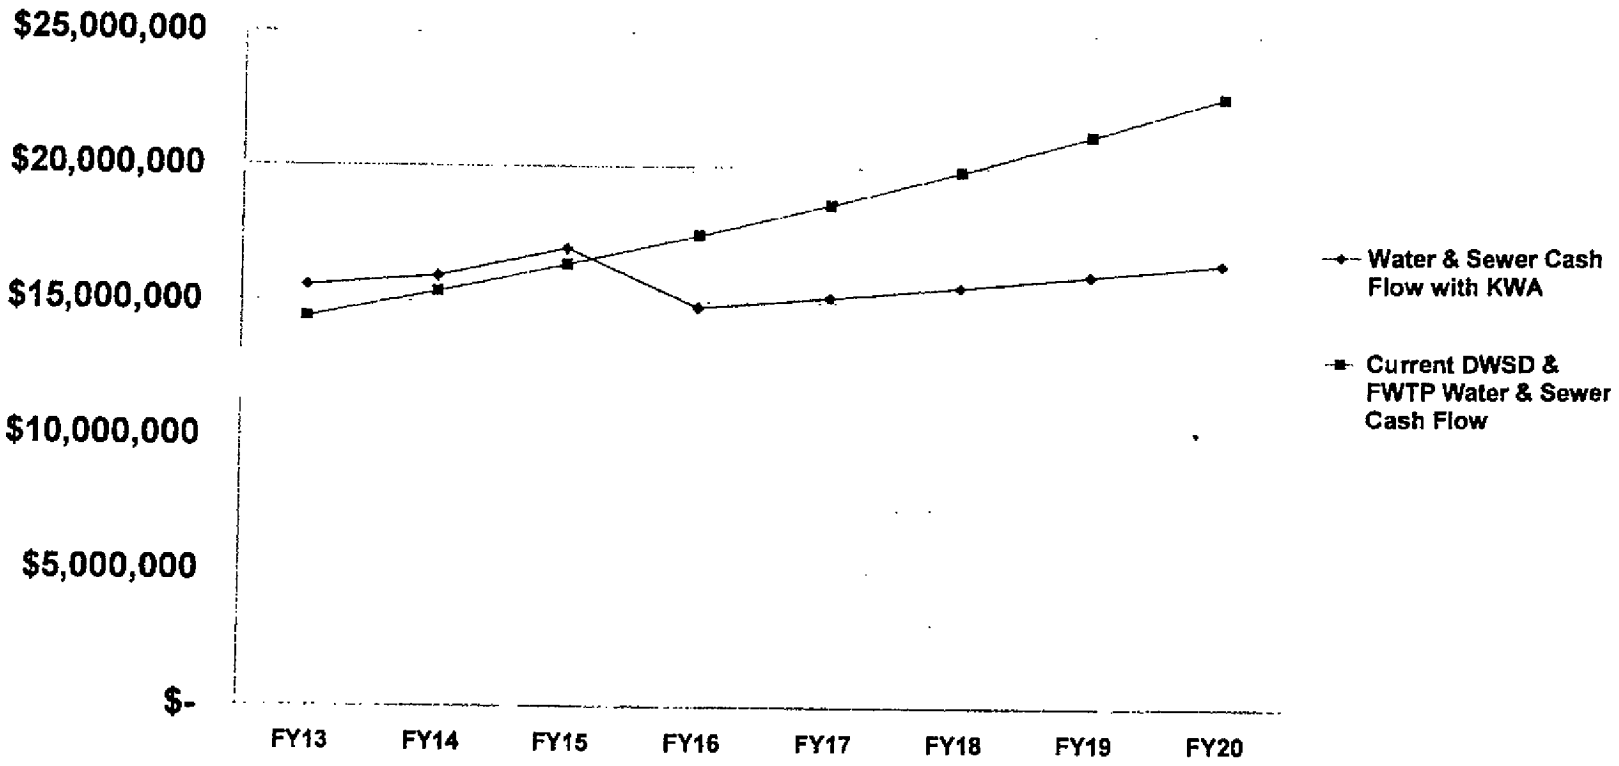
Original Projection - Summary Comparison: KWA vs DWSD



FINAL 10/31/2012

ORIGINAL PROJECTION
SUMMARY COMPARISON: KWA V DWSD

Water and Sewer Cash Flow with KWA

	Year 1 FY13	Year 2 FY14	Year 3 FY15	Year 4 FY16	Year 5 FY17	Year 6 FY18	Year 7 FY19	Year 8 FY20
Current DWSD & FWTP Costs	$ 14,413,858	$ 15,355,135	$ 16,365,534	$ -	$ -	$ -	$ -	$ -
KWA Entry Fee	$ 1,162,800	$ 581,400	$ 581,400	$ -	$ -	$ -	$ -	$ -
KWA Debt Service	$ -	$ -	$ -	$ 6,593,155	$ 6,593,155	$ 6,593,155	$ 6,593,155	$ 6,593,155
FWTP Debt Service	$ -	$ -	$ -	$ 572,781	$ 572,781	$ 572,781	$ 572,781	$ 572,781
KWA operations	$ -	$ -	$ -	$ 878,869	$ 922,812	$ 968,953	$ 1,017,401	$ 1,068,271
FWTP operations w KWA	$ -	$ -	$ -	$ 6,843,344	$ 7,185,511	$ 7,544,787	$ 7,922,026	$ 8,318,128
Total Costs	$ 15,576,658	$ 15,936,535	$ 16,946,934	$ 14,888,149	$ 15,274,260	$ 15,679,676	$ 16,105,363	$ 16,552,334

Water and Sewer Cash Flow with DWSD

	Year 1 FY13	Year 2 FY14	Year 3 FY15	Year 4 FY16	Year 5 FY17	Year 6 FY18	Year 7 FY19	Year 8 FY20
Current DWSD & FWTP Costs	$ 14,413,858	$ 15,355,135	$ 16,365,534	$ 17,450,717	$ 18,616,851	$ 19,870,650	$ 21,219,435	$ 22,671,185

Cash Flow Difference: KWA and DWSD

	Year 1 FY13	Year 2 FY14	Year 3 FY15	Year 4 FY16	Year 5 FY17	Year 6 FY18	Year 7 FY19	Year 8 FY20
Annual Cost: DWSD - KWA	$ (1,162,800)	$ (581,400)	$ (581,400)	$ 2,562,568	$ 3,342,591	$ 4,190,974	$ 5,114,072	$ 6,118,851
Cumulative Gain with KWA	$ (1,162,800)	$ (1,744,200)	$ (2,325,600)	$ 236,968	$ 3,579,559	$ 7,770,533	$ 12,884,605	$ 19,003,456

(1) This projection assumes that KWA begins delivery of water to Flint starting in July, 2016. Any interest on the bonds will be capitalized until that period. The City will be obligated to begin paying its $2,325,600 entry fee in FY13 - 2 payments of $581,400 in FY13, 1 payment in FY14 and 1 payment in FY15.

(2) The cost of the KWA option is projected to be $2,562,568 or 15% LESS than DWSD in the first year of operation (Year 4). This gain offsets the upfront costs of $2,325,600 by $236,968.

(3) The cost of the KWA option is projected to be $6.1 million or 27% LESS than DWSD in the 5th year of operation (Year 8)

(4) The cumulative savings by the 8th year from the beginning of the project are projected to be $19 million.

Detail of Original Cost Projections

FINAL 10/31/2012

Cost Comparisons: Water Supply to City of Flint from DWSD and proposed KWA project

Cost of water to City of Flint (excluding Genesee) using continued service from DWSD

	FY13	FY14	FY15	FY16	FY17	FY18	FY19	FY20
Fixed Cost (1)	$ 4,411,680	$ 4,852,848	$ 5,338,133	$ 5,871,946	$ 6,459,141	$ 7,105,055	$ 7,815,560	$ 8,597,116
Escalator	1.10	1.10	1.10	1.10	1.10	1.10	1.10	
Commodity Cost (2)	$ 7,276,640	$ 7,640,472	$ 8,022,496	$ 8,423,620	$ 8,844,801	$ 9,287,041	$ 9,751,394	$ 10,238,963
Escalator	1.05	1.05	1.05	1.05	1.05	1.05	1.05	
Flint WTP Operating Cost (3)	$ 2,725,538	$ 2,861,815	$ 3,004,906	$ 3,155,151	$ 3,312,908	$ 3,478,554	$ 3,652,482	$ 3,835,106
Escalator	1.05	1.05	1.05	1.05	1.05	1.05	1.05	
TOTAL	$ 14,413,858	$ 15,355,135	$ 16,365,534	$ 17,450,717	$ 18,616,851	$ 19,870,650	$ 21,219,435	$ 22,671,185

(1) Per FY13 Budget and DWSD Contract, fixed charge from DWSD for FY13 is $707,000 per month or $8.5 million total. Flint's cost is 52% or $4.4 million total.

(2) Per FY13 Budget and DWSD Contract, and based on 12 million gallons per day (mgd), cost is $7 3 million, based on $12.46/unit ($12.46x1600unitsx365).

(3) Per FY13 Budget, annual cost of WTP is $4.1 million. Genesee County pays $1,386,000 for emergency back up service.

Cost of water to City of Flint using proposed KWA project for water supply to Flint WTP

	FY13	FY14	FY15	FY16	FY17	FY18	FY19	FY20
KWA Entry Costs (1)	$ 1,162,800	$ 581,400	$ 581,400		$ -	$ -	$ -	$ -
Fixed KWA Construction Cost (2)				$ 6,593,155	$ 6,593,155	$ 6,593,155	$ 6,593,155	$ 6,593,155
Escalator				1.00	1.00	1.00	1.00	
Fixed Flint WTP Construction Cost (3)				$ 572,781	$ 572,781	$ 572,781	$ 572,781	$ 572,781
Escalator				1.00	1.00	1.00	1.00	
Flint WTP Operating Cost (4)	$ 5,911,538	$ 6,207,115	$ 6,517,471	$ 6,843,344	$ 7,185,511	$ 7,544,787	$ 7,922,026	$ 8,318,128
Escalator	1.05	1.05	1.05	1.05	1.05	1.05	1.05	
KWA Commodity Charge (5)	$ 759,200	$ 797,160	$ 837,018	$ 878,869	$ 922,812	$ 968,953	$ 1,017,401	$ 1,068,271
Escalator	1.05	1.05	1.05	1.05	1.05	1.05	1.05	
TOTAL	KWA NOT AVAILABLE			$ 14,888,149	$ 15,274,260	$ 15,679,676	$ 16,105,363	$ 16,552,334

(1) The City will, upon joining, be required to pay an initial fee of $32,300 per MGD plus the same amount for each year until bonding for the project is obtained. At 18MGD, the City's cost is $581,400 annually. Since it is projected that fee will be assessed for 3 years, the City's upfront cost is projected at $2,325,600.

(2) Per KWA proposal, project cost is $272 million. City's fixed cost would be 30% of debt service, based on capacity design of 60mgd, of which 18MGD is for Flint. Debt service is based on 5% interest rate @ 25 years; 5% added to principal for capitalized interest for FY13, FY14, and FY15. ($272,421,588 plus $13,621,078 for 3 years = $313,284,792)

(3) Per KWA proposal, the cost of upgrading the Flint is $7.1 million. City's fixed cost would be100% of debt service based on 5% interest rate @ 25 years), with 5% added to cover capitalized interest for FY13, FY14, and FY15. (total principal = $8.165 million)

(4) Per FY13 Budget annual cost of WTP is $4,111,538. $1.6 million for electricity and chemicals & 2 FTE's are added. 100% City cost. 100%

(5) Per KWA proposal, initial commodity charge would be based on $1.30/unit or 7,500 gallons. Charge is based on 12MGD.

Worst Case Scenario - Summary Comparison KWA vs DWSD (15% Cost Overrun; One year delay in Water Supply delivery)

Water and Sewer Cash Flow with DWSD

	Year 1 FY13	Year 2 FY14	Year 3 FY15	Year 4 FY16	Year 5 FY17	Year 6 FY18	Year 7 FY19	Year 8 FY20
Current DWSD & FWTP Costs	$ 14,413,858	$ 15,355,135	$ 16,365,534	$ 17,450,717	$ 18,616,861	$ 19,870,660	$ 21,219,436	$ 22,671,185

Cash Flow Difference: KWA and DWSD

	Year 1 FY13	Year 2 FY14	Year 3 FY15	Year 4 FY16	Year 5 FY17	Year 6 FY18	Year 7 FY19	Year 8 FY20
Annual KWA - DWSD	$ (1,162,800)	$ (581,400)	$ (581,400)	$ (8,240,826)	$ 2,267,700	$ 3,116,094	$ 4,039,182	$ 5,043,960
Cumulative	$ (1,162,800)	$ (1,744,200)	$ (2,325,600)	$ (10,566,426)	$ (8,298,726)	$ (5,182,642)	$ (1,143,460)	$ 3,900,500

"Worse Case" scenario differs from Original in these respects:

(1) Delivery of water to Flint from KWA is delayed by one year and construction costs are 15% above the original projection. Consequently, the City is required to begin paying for debt service one year before KWA begins delivery of water. This is in addition to its obligation to pay its initial entry fee of $581,400 plus $581,400 annually for the first 3 years.

(2) Once KWA begins delivering water in year 5, the annual operating costs are less than DWSD by 12%. Considering $10.6 million in upfront costs in the first 4 years prior to KWA operation, the cumulative cost of KWA exceeds the cost of DWSD until year 8.

(3) Cumulative savings by Year 8 are projected to be $3.9 million, compared to $19 million in the original projection.

Detail of Worse Case Cost Projections

FINAL 10/31/2012

Worse Case Scenerio

Cost Comparisons: Water Supply to City of Flint from DWSD and proposed KWA project

Cost of water to City of Flint (excluding Genesee) using continued service from DWSD

	FY13	FY14	FY15	FY16	FY17	FY18	FY19	FY20
Fixed Cost (1)	$ 4,411,680	$ 4,852,848	$ 5,338,133	$ 5,871,946	$ 6,459,141	$ 7,105,055	$ 7,815,560	$ 8,597,116
Escalator	1.10	1.10	1.10	1.10	1.10	1.10	1.10	
Commodity Cost (2)	$ 7,276,640	$ 7,640,472	$ 8,022,496	$ 8,423,620	$ 8,844,801	$ 9,287,041	$ 9,751,394	$ 10,238,963
Escalator	1.05	1.05	1.05	1.05	1.05	1.05	1.05	
Flint WTP Operating Cost (3)	$ 2,725,538	$ 2,861,815	$ 3,004,906	$ 3,155,151	$ 3,312,908	$ 3,478,554	$ 3,652,482	$ 3,835,106
Escalator	1.05	1.05	1.05	1.05	1.05	1.05	1.05	
TOTAL	$ 14,413,858	$ 15,355,135	$ 16,365,534	$ 17,450,717	$ 18,616,851	$ 19,870,650	$ 21,219,436	$ 22,671,185

(1) Per FY13 Budget and DWSD Contract, fixed charge from DWSD for FY13 is $707,000 per month or $8.5 million total Flint's cost is 52% or $4.4 million total.

(2) Per FY13 Budget and DWSD Contract, and based on 12 million gallons per day (mgd), cost is $7.3 million, based on $12.46/unit ($12.46x1600unitsx365)

(3) Per FY13 Budget, annual cost of WTP is $4.1 million. Genesee County pays $1,386,000 for emergency back up service

Cost of water to City of Flint using proposed KWA project for water supply to Flint WTP

	FY13	FY14	FY15	FY16	FY17	FY18	FY19	FY20
KWA Entry Costs (1)	$ 1,162,800	$ 581,400	$ 581,400	$ -	$ -	$ -	$ -	$ -
Fixed KWA Construction Cost (2)				$ 7,582,128	$ 7,582,128	$ 7,582,128	$ 7,582,128	$ 7,582,126
Escalator						1.00	1.00	
Fixed Flint WTP Construction Cost (3)				$ 658,698	$ 658,698	$ 658,698	$ 658,698	$ 658,698
Escalator								
Flint WTP Operating Cost (4)	$ 5,911,538	$ 6,207,115	$ 6,517,471	$ 6,843,344	$ 7,185,511	$ 7,544,787	$ 7,922,026	$ 8,318,128
Escalator	1.05	1.05	1.05	1.05	1.05	1.05	1.05	
KWA Commodity Charge (5)	$ 759,200	$ 797,160	$ 837,018	$ 878,869	$ 922,812	$ 968,953	$ 1,017,401	$ 1,068,271
Escalator	1.05	1.05	1.05	1.05	1.05	1.05	1.05	
TOTAL	KWA NOT AVAILABLE				$ 16,349,150	$ 16,754,566	$ 17,180,263	$ 17,627,225

(1) The City will, upon joining, be required to pay a, initial fee of $32,300 per MGD plus the same amount for each year until bonding for the project is obtained. At 18MGD, the City's cost is $581,000, for a total of $2,325,600..

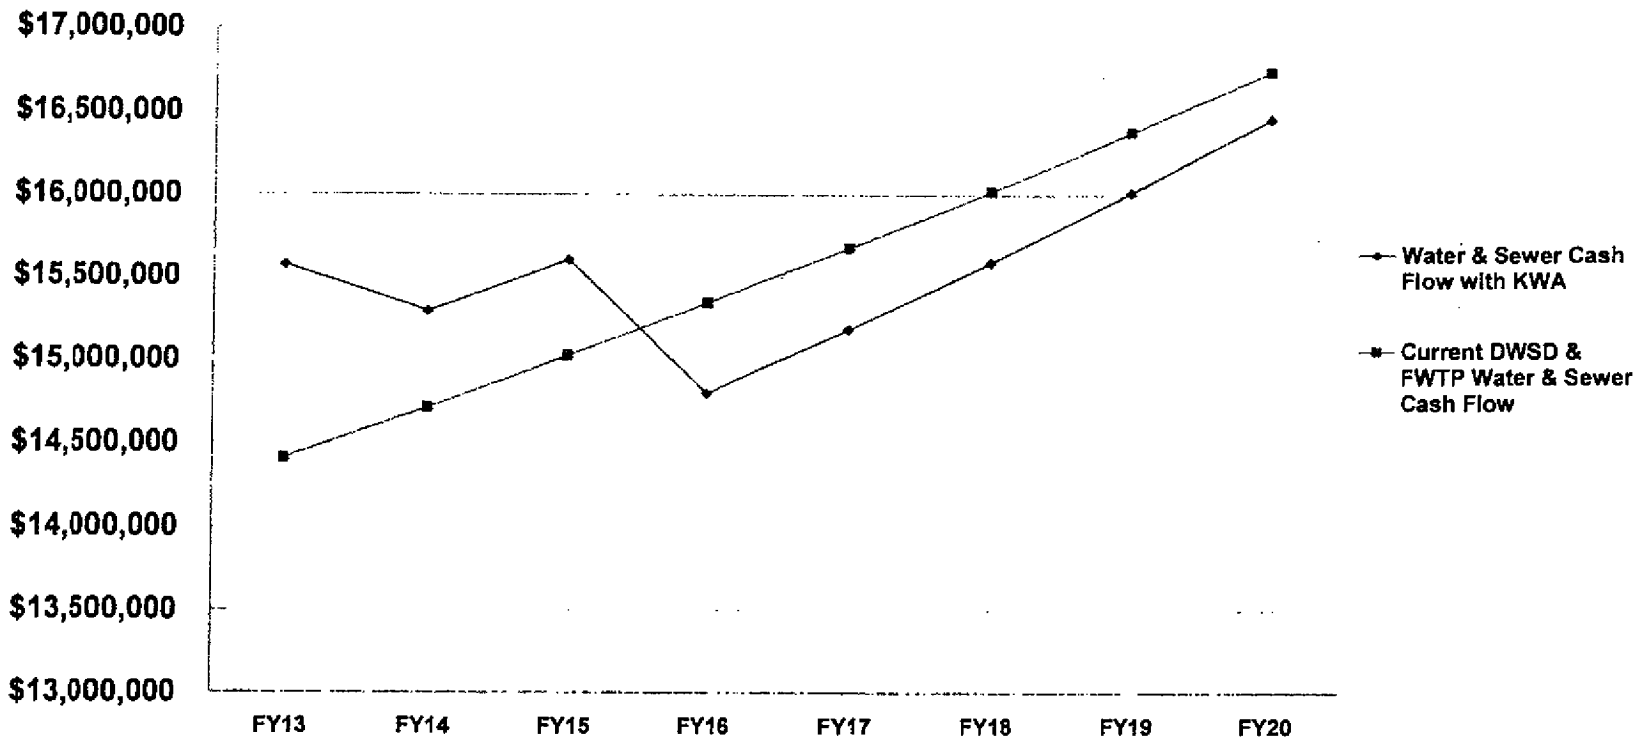
(2) Per KWA proposal, original project cost is $272 million. City's fixed cost would be 30% of debt service, based on capacity design of 60mgd, of which 18MGD is for Flint. Debt service is based on 5% interest rate @ 25 years; 5% added to principal for capitalized interest for FY13, FY14, and FY15. ($272,421,588 plus $13,621,078 for 3 years = $313,284,792). **The costs here are increased by 15%; debt service starts in FY16 but water is not available until FY17.**

(3) Per KWA proposal, the cost of upgrading the Flint is $7.1 million. City's fixed cost would be100% of debt service based on 5% interest rate @ 25 years), with 5% added to cover capitalized interest for FY13, FY14, and FY15. (total principal = $8.165 million). **Again, costs here are increased by 15%; debt service starts in FY16 but water is not available until FY17. Debt service is now on $9.4 million.**

(4) Per FY13 Budget annual cost of WTP is $4,111,538. $1.6 million for electricity and chemicals & 2 FTE's are added. 100% City cost.

(5) Per KWA proposal, initial commodity charge would be based on $1.30/unit or 7,500 gallons. Charge is based on 12MGD.

ALTERNATE PROJECTION - SUMMARY COMPARISON: KWA V DWSD WITH DWSD COSTS REDUCED (Fixed Costs held constant; Commodity Costs Increased by 2.25% Annually)



FINAL 10/31/2012

ALTERNATE PROJECTION
SUMMARY COMPARISON: KWA V DWSD WITH DWSD COSTS REDUCED
(FIXED COSTS HELD CONSTANT; COMMODITY COSTS INCREASED BY 2.25% ANNUALLY)

Water and Sewer Cash Flow with KWA

	Year 1 FY13	Year 2 FY14	Year 3 FY15	Year 4 FY16	Year 5 FY17	Year 6 FY18	Year 7 FY19	Year 8 FY20
Current DWSD & FWTP Costs	$ 14,413,858	$ 14,713,859	$ 15,024,358	$ -	$ -	$ -	$ -	$ -
KWA Entry Fee	$ 1,162,800	$ 581,400	$ 581,400	$ -	$ -	$ -	$ -	$ -

KWA operations	$ -	$ -	$ -	$ 878,869	$ 922,812	$ 968,953	$ 1,017,401	$ 1,068,271
FWTP operations w KWA	$ -	$ -	$ -	$ 6,843,344	$ 7,185,511	$ 7,544,787	$ 7,922,026	$ 8,318,128
Total Costs	$ 15,576,658	$ 15,295,259	$ 15,605,758	$ 14,888,149	$ 15,274,260	$ 15,679,676	$16,105,363	$ 16,552,334

Water and Sewer Cash Flow with DWSD

	Year 1 FY13	Year 2 FY14	Year 3 FY15	Year 4 FY16	Year 5 FY17	Year 6 FY18	Year 7 FY19	Year 8 FY20
Current DWSD & FWTP Costs	$ 14,413,858	$ 14,713,859	$ 15,024,358	$ 15,345,778	$ 15,678,562	$ 16,023,172	$16,380,091	$ 16,749,823

Cash Flow Difference: KWA and DWSD

	Year 1 FY13	Year 2 FY14	Year 3 FY15	Year 4 FY16	Year 5 FY17	Year 6 FY18	Year 7 FY19	Year 8 FY20
Annual Cost: DWSD - KWA	$ (1,162,800)	$ (581,400)	$ (581,400)	$ 457,629	$ 404,302	$ 343,496	$ 274,728	$ 197,489
Cumulative Gain with KWA	$ (1,162,800)	$ (1,744,200)	$ (2,325,600)	$ (1,867,971)	$ (1,463,669)	$ (1,120,173)	$ (845,445)	$ (647,956)

(1) This projection assumes that DWSD fixed costs remain at 2013 levels and that operating costs increase by 2.25% annually

(2) KWA costs are as in the Original Projection.

(3) In this comparison, KWA costs are still less once operations begin (by 2.9%), and cumulative gain does not occur until after year 8. Over time, DWDS costs could be less with these limitations on cost increases.

Subject:	Meeting with Dr. Mona Hanna-Attisha and Flint Water
Location:	Governor's Conference Room, 2nd Floor Romney Building, 111 S. Capitol Ave., Lansing, MI 48933
Start:	Mon 12/14/2015 11:00 AM
End:	Mon 12/14/2015 12:00 PM
Recurrence:	(none)
Meeting Status:	Meeting organizer
Organizer:	Baird, Richard (GOV)
Required Attendees:	Laurence Reynolds; Matthew M. Davis; Chris Kolb; Ken Sikkema; Chris De Witt; 'Eric Rothstein'; Lyon, Nick (DHHS); Grijalva, Nancy (DHHS); mhanna1@hurleymc.com; Baird, Richard (GOV)

Good Morning,

This is to confirm the meeting with Rich Baird on **Monday, December 14** at **11:00 a.m.** in the Governor's Conference room, second floor Romney Building, 111 S. Capitol Ave. Lansing, MI 48933.

We are located at the George W. Romney Building, 111 S. Capitol Avenue, Lansing. The Romney Building is located directly across the street (Capitol Avenue) from the Capitol Building. There is some metered parking around the building. The closest parking facility is one block south at the corner of Capitol Avenue and Allegan Street (enter the parking facility from Capitol Avenue). https://www.parkme.com/lot/93032/tower-parking-ramp-lansing-mi

You will also want to have a picture I.D. handy for security in the Romney Building. Please let security know who you have a meeting with, they will call me and then send you up to the second floor.

Please let me know if you have any questions.

Thank you!

Virginia Manolakoudis
Executive Assistant for Richard Baird
Executive Office of Governor Rick Snyder

Good Morning Director Wyant:

I wanted to take just a moment to thank you and your team for travelling to Flint Wednesday to meet with me, the Mayor, and the Utilities Department staff.

Everyone on our end appreciated the opportunity to meet directly with you and your key staff at the DEQ. We all felt it was a very productive discussion of the many difficult issues facing the City of Flint not only during this transition, but as its own long-term, sustainable water supply and distribution system, leading towards full implementation of the KWA project. As you know Flint is slated to convert to the KWA water source well within the next 18 month timeline. Until that happens however, I think you would agree that we have an excellent opportunity here to send a good, positive message about how the City is managing its water services, and working very closely with your office in the process.

As we discussed, an initial media hit from your office fairly soon would also help us build public confidence through stronger communication on how we are responding to the challenges we encounter, your department's support of our efforts to resolve them, and the resultant potability of the current water source. If there are other next steps you need from us regarding such a media release, please don't hesitate to contact me.

We look forward to our continued partnership in addressing these and other matters critical to environmental quality in the City of Flint and the State of Michigan!

Sincerely,

Darnell Earley, ICMA-CM, MPA

The Honorable Joshua M. Freeman, Councilmember
City of Flint, Michigan
1101 S. Saginaw Street
Flint, Michigan 48502

Dear Councilman Freeman:

Regarding: Your letter of February 3, 2015

Thank you for your letter of February 3, 2015 in which you seek additional information related to the Detroit Water and Sewerage Department's ("DWSD") offer to resume supplying drinking water to the City of Flint. Specifically, you have asked several follow-up questions related to the nature of the long-term arrangement I referenced within my letter, as well as some technical questions regarding rates and the method for reconnection in light of changes Flint has made to its system in the interim timeframe.

I will attempt to provide as much clarity as possible through this response. For starters, the rate quoted in my January 12, 2015 letter is related to the current rate year ending June 30, 2015. As new rates are adopted each year, the relative methodology as is applied to current DWSD wholesale customers would also be applied to Flint (and Genesee County) and will impact your rates, accordingly. In other words, rates will change in accordance with DWSD revenue requirements each year that Flint (and Genesee County) receives water from DWSD. That is why my prior letter only quoted a specific rate through June 30, 2015. Our Board of Water Commissioners has not yet adopted rates for the 2015-2016 rate year.

Secondly, you have asked if the rates described in the January 12, 2015 letter are exclusive to Flint or if they also would cover the Genesee County Drain Commissioner ("GCDC"). I certainly envision that the rates associated with Flint would also be available to the GCDC, as the two entities have utilized service pursuant to a single contractual arrangement in the past. To that end, DWSD is open to the possibility for a contract to be entered into by either Flint or GCDC on behalf of both customers, depending on the intricacies of the connections that you referenced with respect to Flint's recent sale of pipeline to GCDC. As noted previously, entering into a contract is not required to reinstitute service to Flint during the current emergency situation, in anticipation of further discussions toward a future service relationship.

Additionally, you have asked about short-term as compared to a long-term contractual relationship in light of Flint and GCDC's combined intent to utilize KWA for long-term service as early as 2016. DWSD operates pursuant to long-term contracts with its customers. As you may be aware, our model contracts are for a period of thirty years.

However, in light of the work already done by Flint and GCDC in preparation to receive raw water from KWA, DWSD is open to exploring a long-term contractual arrangement in which DWSD provides full service to Flint (and GCDC) until such time as KWA is operational, and then a back-up service arrangement, thereafter. The specific terms of that back-up service arrangement would require some further negotiation, but I would assume that such an arrangement would be mutually beneficial in light of the concerns with utilization of the Flint River as a primary or secondary water source.

You have also asked a technical question about the steps necessary in order for Flint to convert back to DWSD for receipt of water service. While I agree that it is not as simple as flipping a switch, I do not believe that this conversion would be a significant obstacle for Flint and GCDC to overcome. In fact, there should not be any actions required of DWSD in order to resume service, since we are currently providing full service to GCDC through the GN-01 meter (formerly the FL-01 meter).

Finally, you have asked if the anticipated assumption of DWSD's wholesale operations by the Great Lakes Water Authority ("GLWA") will impact the proposal that has been made. In short, the answer to your question is that it would not, depending on the timing of the signing of a new contract between the parties. Under the terms of the GLWA Memorandum of Understanding and Articles of Incorporation, it is envisioned that the GLWA would assume all wholesale contracts of DWSD. Therefore, the GLWA would be bound by the contractual terms that are agreed upon between DWSD and the City of Flint and/or GCDC. Nevertheless, as the GLWA Board has now been seated and has a regular schedule of meetings, I would certainly anticipate advising the GLWA Board of the terms of any proposed contract between the parties, and to seek their input or listen to any concerns or suggestions that they might have. In any event, resumption of service in the short term to address Flint's current needs, remains available immediately under existing published rates, and requires no action by either Board.

I look forward to the continued discussions, and hope that there is a viable solution that can be reached for the benefit of all parties.

Sincerely yours,

Sue F. McCormick

OK, with your edit. I will send to Sara and Terry

The decision for Flint to join the Karegnondi Water Authority and to leave the Detroit Water and Sewerage System was made under the authority of previous Flint Emergency Managers prior to my appointment in October 2013. And, while the deal to sell the pipeline had been in process as I assumed my position, it was finalized after thorough review and with the health and well-being of all citizens -- from small children to senior citizens and everyone in between -- taken into consideration. An even bigger concern that we must all be paying attention to is the aging infrastructure and water distribution systems in all of our urban communities -- many of which are more than 100 years old. Where the focus should be placed moving forward is not on what we do in the interim between now and when the new system is complete, but what is done in the long-term to replace the crumbling water distribution system that exits throughout Flint and Genesee County. Iam confident that the city of Flint is following the standards of the State of Michigan's Department of Environmental Quality for safe water compliance, as it should.

Frequently Asked Questions:
Water Lead Levels in the City of Flint
September 2015

How can lead get into drinking water?
Lead detections in Flint drinking water exist at the home level. Sampling at the Flint Water Treatment Plant has shown no lead in its treated water. However, this contaminant leaches into water from a home's lead service lines, lead solder, and leaded plumbing materials including fixtures, faucets, and fittings.

Does the city meet federal drinking water standards for lead and copper?
Yes, the city is meeting state and federal guidelines for lead and copper.

The City of Flint has regularly monitored for lead and copper since federal law began requiring it in 1991.

When the City changed water sources in May 2014, state and federal law required the city to sample for lead and copper for a full year to determine how the water may be interacting with residential lead plumbing to increase lead levels. While the city's results show residential lead levels below the federal threshold for immediate response activities, Flint is moving quickly to optimize corrosion control measures in its water system.

Some individual homes showed high numbers for lead. Isn't that a concern?
For the homeowner, yes it is. There is no "safe" level for lead, and while the leading cause of lead poisoning around the country is lead paint, any source of lead ingestion is worthy of concern.

But the State and federal guidelines for lead and copper acknowledge an important reality: Any home that has a lead service connection or lead plumbing will impart some varying amount of lead into the home's water. The only way to eliminate lead in a home water system is to remove lead plumbing or replace lead service connections to the city system.

The lead and copper rule requires the local operator to sample dozens, sometimes hundreds of homes in the service area to get a general sense of how the water supply is interacting with lead plumbing and service connections. The tests are done specifically at homes with lead service connections. Individual results vary and all participants are

Are there other ways the city monitors for lead exposure?
The County Health Department, overseen statewide by the Michigan Department of Health and Human Services, regularly monitors blood levels in children throughout Michigan communities. The leading cause of lead poisoning is exposure to lead paint.

Blood lead level testing results for the 12-month period just after the City of Flint changed its water source (May 2014 – April 2015) showed no significant change in the pattern of blood lead levels in Flint, compared to the previous three years. This data suggests the recent change in water source by the City of Flint has not contributed to an increase in lead exposure throughout the community.

How does the state decide if the water is creating a lead problem?
Compliance with the federal lead rule is based on a 90th percentile calculation. If more than 10 percent of samples report lead above the federal action level of **15 parts per billion**, a water supply has an "action level exceedance." An exceedance is not a violation. It triggers other requirements which could include public notification, additional water quality sampling, and possibly further treatment.

While some of Flint's individual samples exceeded the 15 parts-per-billion lead action level, compliance is based on **the 90th percentile of samples**. The City of Flint's 90th percentile level has ranged between 0 parts per billion in 2008 and 2011, and 15 parts per billion in 1992, but never exceeded the action level.

The two most recent sampling periods, in 2014 and 2015, were 6 parts per billion and 11 parts per billion, respectively.

Did the city use <u>every</u> sample they got back?
Sampling requirements for lead and copper are designed to target the most common pathways to lead ingestion in homes with the least protection. The sample must be collected from a commonly used kitchen or bathroom tap, and in accordance with the provided sampling instructions. Homes that employ filtration or additional treatment cannot be included. Samples must also be collected within the established monitoring period.

I have a lead service connection or lead plumbing. What should I do?
Replacement is the only way to eliminate lead exposure. However, here are some interim steps homeowners can take to reduce it:

Flush pipes before drinking, and only use cold water for consumption.

The more time water has been sitting in your home's pipes, the more lead it may contain. When water in a particular faucet has not been used for six hours or longer, "flush" cold-water pipes by running the water until it becomes as cold as it will get. This could take five to 30 seconds if there has been recent water use elsewhere in the home, such as showering or flushing toilets. Otherwise, it could take two minutes or longer.

Use only water from the cold-water tap for drinking, cooking, and especially for making baby formula. Hot water is likely to contain higher levels of lead.

Who is responsible for replacement of leaded materials?

Replacement of service pipes on private property and any leaded plumbing materials within the home is a **homeowner's responsibility**. The City of Flint owns the service pipe from the water main to the curb stop valve, and that is **the City's responsibility**. This valve is normally located two feet in from the street curb. From there to the house is private property and the responsibility of the homeowner.

Why doesn't the city at least replace its portion of lead service lines?

Partial lead service line replacement has been shown to mobilize more lead and make the situation worse. Only full lead service line replacement has been demonstrated effective in achieving long-term reductions in drinking water lead levels.

What is the City's timeline for installation of corrosion control treatment?

The federal government allows the steps to complete the installation of optimal corrosion control treatment and follow-up monitoring to take up to five years.

However, the City of Flint has committed to completing installation of Optimized Corrosion Control Treatment in **less than six months**.

What will happen when Flint joins the Karegnondi Water Authority next year?

The City has committed to having Optimized Corrosion Control Treatment in place prior to its connection with the Karegnondi Water Authority (KWA). The water provided by KWA will come from a new source, Lake Huron. The city will continue its lead and copper sampling every six months. Additionally, the city's water treatment plant will continue to operate with uninterrupted Optimized Corrosion Control Treatment.

How long would it take to replace lead service lines throughout Flint?

The city has about 32,900 service connections in total. **More than 15,000** of these connections are considered lead service lines. Even if many crews were contracted, it would likely take up to 15 years to complete this work.

What would it cost to replace the lead service line at my house?

Average costs to replace a lead service line at an individual home range from $2,000 to $8,000. Costs vary depending on the length and size of service line that is needed, as well as the ground cover and soil conditions encountered.

With more than 15,000 lead service lines at an estimated average cost of $4,000 for each replacement, total cost could **be $60 million or more**.

Blood Lead Levels in Flint background information
September 24, 2015

- Promoting the health of our residents is a statewide priority – a priority that includes ensuring clean, safe drinking water for all residents and especially children.
- The results of the Hurley Children's Hospital are under review by the Michigan Department of Health and Human Services.
- The analysis that Hurley conducted is different from the way MDHHS has analyzed data regarding blood lead levels in Flint.
- MDHHS is looking to see if we can replicate the results of the Hurley study to see how they achieved their results.

MDHHS Blood Lead Testing Results in Flint

- MDDHS data shows a comprehensive look at the data since 2010, years before the change in Flint's water source occurred in April 2014.
- Each year shows a seasonal increase in childhood lead poisoning in the summer months, the highest seasonal increase of which occurred in 2010.
- If elevated blood lead levels were being driven by the change in water, we would expect to see the elevated levels remain high after the change in water source, rather than follow the seasonal pattern as they did by decreasing in the fall months.
- All data included in the MDHHS analysis were reported by laboratories directly to MDHHS, in accordance with State Law.

Differences in Analysis

- MDHHS data provides a much more robust picture of the entire blood lead levels for the Flint area, and specifically, accounts for data over the full course of the past five years.
- Looking at the past five years as a whole provides a much more accurate look at the seasonal trends of lead in the area.
- Seasonal exposure is higher in the summer for a variety of reasons including children playing outside in the soil, and when windows are open and lead paint is more likely to be in the air. This seasonal increase would be unrelated to the water system.
- Our data includes children from the entire city, including all medical facilities, rather than just Hurley, has a larger age group of children, and includes a much larger sample size.
- The MDHHS analysis looks specifically at the first elevated blood lead level for each child, which provides an accurate picture of when first exposure occurred.
- The Hurley data includes a smaller sample size, much more limited time period (January-September of 2013 and 2015 only), and a smaller age group of children.

WIC Children

- In homes with infants on WIC, if the household has documentation from an official source of unsanitary water supply issues, that family may be eligible to receive ready-to-feed formula. Families should contact WIC to see if they are eligible.
- Each household would have to be looked at on an individual basis.
- WIC cannot cover bottled water.

Frank:

We have a situation in Flint, Michigan that is beginning to get national attention and could be an opportunity for Home Depot. 18 months ago, Flint switched its water supply from Detroit Water (the distance and pumping costs of going uphill made it quite expensive) to the Flint River as a temporary answer, until they could finish the construction to get their water from Lake Huron (Karagondi Water System). The corrosive attributes of the River water have exacerbated the lead deposit leaching into homeowner pipes and there is concern around lead poisoning, especially for infants.

The corporate community is rallying to address the problem. Meijer donated 1500 water filters to low income residents and GM is about to announce a donation of between 5,000 and 10,000 filters. I do not yet know where GM is getting the filters from, but I was thinking that Home Depot might want to join the effort with a donation, supply chain discounting assistance, or some combination of activity that could help Flint residents. Harvey Hollins is our point person for this effort, since he is the Director of Urban Initiatives for Governor Snyder. I have copied him here.

If you could get this into the hands of the right people and see if there is interest in speaking with Harvey, I would be very appreciative. Thanks and take care.

Regards,

Rich

Dennis - in response to your earlier email; Wayne's guys came up with a ballpark estimate for reconnecting to DWSD. Let me emphasize 'ballpark'. They used your assumptions & they talked to Natasha H. after 5:00. Bottom line... the estimated cost is approx $10.5mm to reconnect until June '16.

These numbers on their surface seem much improved over previous DWSD $offers. [Is Daddow in the loop on this ?] We need to give some more thought as to whether this is all inclusive. e.g., there might be some costs from turning down operations at the plant

I am being told this can happen in a relatively short time i.e., less than a week. Which seems aggressive. Obviously that does not mean the lead concerns nor discolored water, etc goes away in a week. The pipe section they sold to the county won't be an impediment to this deal.

There apparently are no 'upfront' costs we need to worry about. In theory, it seems like it can be paid over the 9-10 months (vs a lump sum). But I am not clear Dennis on those couple ideas/sources the Mayor & Senator mentioned i.e., at this point I am not sure where the $10.5mm comes from.

My guess is we will keep refining this estimate. Let us know if you need anything else. Again, "credit " Wayne's guys for pulling this together quickly.

Frank:

We have a situation in Flint, Michigan that is beginning to get national attention and could be an opportunity for Home Depot. 18 months ago, Flint switched its water supply from Detroit Water (the distance and pumping costs of going uphill made it quite expensive) to the Flint River as a temporary answer, until they could finish the construction to get their water from Lake Huron (Karagondi Water System). The corrosive attributes of the River water have exacerbated the lead deposit leaching into homeowner pipes and there is concern around lead poisoning, especially for infants.

The corporate community is rallying to address the problem. Meijer donated 1500 water filters to low income residents and GM is about to announce a donation of between 5,000 and 10,000 filters. I do not yet know where GM is getting the filters from, but I was thinking that Home Depot might want to join the effort with a donation, supply chain discounting assistance, or some combination of activity that could help Flint residents. Harvey Hollins is our point person for this effort, since he is the Director of Urban Initiatives for Governor Snyder. I have copied him here.

If you could get this into the hands of the right people and see if there is interest in speaking with Harvey, I would be very appreciative. Thanks and take care.

Regards,

Rich

Hi Rich,

These are two documents that I think are helpful addressing the questions about lead and Flint water overall, prepared by DEQ and DHHS. These were intended for internal use, so please ask our partners to not share them beyond the people on their teams making the decisions.

Please let me know if you need anything else.

Dave

DEQ

(DRAFT)
FLINT WATER ADVISORY TASK FORCE
AFTER-ACTION REVIEW

The Flint Water Task Force is an independent advisory panel appointed by Governor Rick Snyder charged with reviewing actions regarding water use and testing in Flint and with offering recommendations for future guidelines to protect the health and safety of all state residents.

The task force expects to summarize its work in a report to be presented to Governor Rick Snyder within ninety (90) days.

GOALS

The Flint Water Task Force's goals are as follows:

- Complete a thorough review of all steps taken by state and local officials regarding the decision to switch the City of Flint's water source to the Flint River from the Detroit Water and Sewerage Department's system (DWSD).
  - Produce a timeline of actions
  - Establish why each action was taken

- Review the roles of the federal, state, and local officials in the decision-making process
  - Identify best practices for federal, state, and local officials to work together in future similar situations
  - Evaluate where coordination between these entities could have been better, and how it could be improved

- Review federal, state, and local actions and protocols
  - Determine whether the proper procedures were followed
  - Identify which procedures should be changed

- Monitor and review the process, procedures, and protocols being followed as the City of Flint returns to the DWSD system
  - Ensure that proper corrosion controls and testing are in place
  - Highlight the appropriate actions that the City of Flint should follow when the future switch is made to the Karegnondi Water Authority's system

- Assess future practices
  - Highlight practices that should change for communities in similar situations
  - Recommend changes in law, procedure, or practice to ensure all Michiganders are drinking safe water

STATE OF MICHIGAN
DEPARTMENT OF ENVIRONMENTAL QUALITY
LANSING

RICK SNYDER
GOVERNOR

DAN WYANT
DIRECTOR

Backgrounder on City of Flint Water

After a change in the water source for Flint residents, there have been concerns related to the water quality, in particular lead in the water, and its impact of the community. As a result, Department of Health and Human Services (DHHS) and the Department of Environmental Quality (DEQ), working with local public health departments and the City of Flint (City), have put together an Action Plan to address public health concerns in the City.

While Flint water is meeting all state and federal drinking water standards, there is an increasing level of concern that the Flint River is not the best water source. The City's Technical Advisory Committee recommended the City switch back to DWSD. In addition, recent studies by Hurley Children's Hospital, and confirmed by DHHS, have indicated a rise in blood lead levels in some Flint children. Sample screening completed last week by the DEQ indicated that some Flint Public Schools have detectable lead levels in their water.

Action Plan:
Immediately, the City and State announced the following steps:

- Governor named Dr. Eden Wells as Flint Public Health Advisor
- Advisories issued recommending residents flush their cold water pipes before use, as well as only use water from the cold water tap for drinking, cooking and especially making baby formula.
- Schools are advised to not use the drinking water fountains and are using bottled water.
- Free filters are available to all households in Flint, along with replacement filters.
- Flint Public Schools were screened for lead exposure.

For the near term, the City and State are asking for/ doing the following:

- Switch the drinking water source from the Flint River to DWSD.
- Test and inspect all schools in Flint, including charter and parochial schools.
- Free water testing for all homes.
- Expand exposure testing to additional households in Flint.

For the long term health of all Flint residents, the City and State have committed to:

- Switching to the Karegnondi Water Authority in the summer of 2016 as the permanent water supply for the City of Flint
- Allow for Drinking Water Revolving Loan funds to be used to expedite the replacement of private residential lead service lines.
- Lead exposure campaigns for homes, schools and communities.

Budget Request:
To facilitate the action plan outlined above, the State is requesting $10.6 million ($8.2 million GF). The funding will address 4 priority areas:

1. Provision of filters for residential service ($2,016,000)

Filters will be provided to all Flint households, including replacement filters until the system is fully optimized. Each filter cost is $20.

2. 50% of the estimated cost to reconnect temporarily to the DWSD ($6,000,000)

The City has estimated it will cost an additional $1.3 million per month to use DWSD instead of the Flint River. The State and City have agreed to split the cost through July 2016 when the new Karegnondi Water Authority will be completed and Flint will switch to that water source.

3. Funding for testing water samples ($1,000,000)

New testing protocols for schools will require each faucet in the school be tested and evaluated at the State's lab. In addition, lead exposure testing in homes will result in thousands of additional samples that will need to be evaluated. Each sample cost $26 to process.

4. Lead exposure testing and inspections ($1,600,000)

DHHS, DEQ and LARA are pulling together a team to go into schools and high risk homes to test and evaluate lead exposure.

Flint Drinking Water Events Timeline

- Pre-1967 Flint Water Treatment Plant in operation using Flint River
- Post-1967 Flint switched to DWSD for drinking water
- Mid-2000s Discussions began regarding Karegnondi Water Authority
- April 2013 Flint notifies DWSD of contract discontinuation and joins the Karegnondi Water Authority
- April 2013 DWSD sets termination of Flint water service contract to April 17, 2014
- June 2013 Karegnondi Water Authority groundbreaking
- June 2013 Flint notifies DEQ of intent to use of Flint Water Treatment Plant full time with Flint Water
- May 2014 Flint stops purchasing DWSD water. Starts using the City of Flint WTP and Flint River
- Aug 2014 Flint E.Coli Bacteria violation, Partial System Boil Water Advisory
- Aug 2014 Disinfection Byproducts, DEQ requests preemptive Operational Evaluation
- Sept 2014 Flint Total Coliform Bacteria violation, Partial System Boil Water Advisory
- Oct 2014 General Motors announces decision to stop using Flint water
- Nov 2014 Disinfection Byproducts violation begins
- Jan 2015 1st 6-month lead and copper sampling completed 100 samples, 90th% = 6 ppb
- July 2015 2nd 6-month lead and copper sampling completed 69 samples, 90th% = 11 ppb
- Aug 2015 Disinfection Byproducts return to compliance
- Aug 2015 Flint required by DEQ to recommend and install Optimized Corrosion Control Treatment
- Sept 24, 2015 Hurley Children's Hospital data reveals high lead levels in Flint children
- October 8, 2015 State screening results show elevated lead levels in Flint schools

- October 15, 2015 State Legislature authorizes a $9 million to assist the City of Flint to pay for the return to the Detroit water system and to fund staff at schools to gauge lead exposure

- October 16, 2015 First weekly coordination meeting held with the City of Flint and state agencies

- October 16, 2015 DEQ meets with Flint Schools Superintendent and Genesee County Health Department

- October 16, 2015 Flint switches back to DWSD for water

- October 21, 2015 Governor Snyder announces formation of Flint Water Task Force to complete an After-Action Review

- July 2016 Planned connection to Karegnondi Water Authority (Lake Huron water to Flint WTP)

TAKING ACTION ON FLINT WATER

www.mi.gov/FlintWater

- The Action Plan -

- Testing in Flint public schools immediately to ensure that **drinking water is safe**, with testing also available at no cost to any other school in Flint.
- **Offering free water testing** to Flint residents to assure their drinking water is safe.
- **Providing free water filters** to residents with concerns or who are included in state assistance programs.
- **Expanding health exposure testing** of individual homes.
- **Accelerating corrosion controls** in the Flint drinking water system.
- **Accelerating water system improvements** to address replacing lead service lines.
- Expediting the completion of the **Karegnondi Water Authority** pipeline.
- **Expanding a Safe Drinking Water Technical Advisory Committee** to ensure the best technology, practices and science are being followed by adding an expert from the Environmental Protection Agency's Office of Research and Development to the group.
- Naming Dr. Eden Wells, chief medical executive for the Michigan Department of Health and Human Services, as the **Flint drinking water public health adviser**.
- Boosting a **comprehensive lead education program** to make sure residents have detailed information about how to protect themselves and their homes.

To get your water tested for free, please call the city of Flint Water Plant at (810) 787-6537 and then press 1.

The Quarterly Water Quality Report provides important information about your drinking water. This report includes information about the water source, current drinking water issues, lead information, water filters, 3rd quarter work accomplished, and a water timeline of events. The City of Flint Department of Utilities is dedicated to providing quality drinking water to the residents of the community. The Flint Water Plant operates and maintains a certified drinking water laboratory to assure compliance with all state and federal regulations, and is committed to prompt and thorough notification to the consumers if there is any reason for concern about the quality of the drinking water. Information about your drinking water is available on the City of Flint web page at www.cityofflint.com or by calling the City of Flint Water Plant at **(810) 787-6537**. The Safe Drinking Water Hotline at **(800) 426-4791** is a resource for health related questions and water quality issues. General drinking water information can also be found on the U.S. Environmental Protection Agency (EPA) web site at www.epa.gov/safewater/.

Water Source

The City of Flint began using the Flint River as a water source in May of 2014. After 16 months of treating water from the Flint River, the City became aware that the level of corrosiveness found in Flint River water could result in more lead leaching from service lines and household plumbing. Reports of elevated blood lead levels in children and expert analysis resulted in the City's Technical Advisory Committee making a recommendation to return to the previous source of water while waiting for the KWA to provide water from Lake Huron.

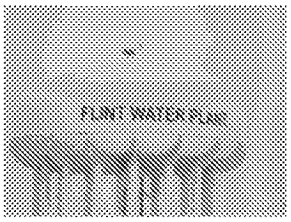
On Friday October 16th, 2015, with the consent of Governor Snyder, the City returned to Detroit as the primary source of drinking water. The decision, along with the Technical Advisory Committee's recommendation followed two consecutive lead and copper test periods that exceeded 5ug/L which calls for additional action. In addition to the switch, the City has submitted a final corrosion control design to the DEQ for comments and approval. The City has requested to use the corrosion control as an additive to treated water it will be required when the city begins treating raw water from the Karegnondi Water Authority which is anticipated to begin in the summer of 2016.

In order to make the transition possible, the City contributed $2 Million dollars, the Mott Foundation contributed $4 Million dollars, and the State of Michigan contributed $ 6 Million dollars.

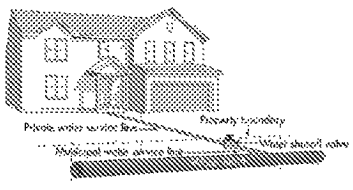
Current Drinking Water Issues & Lead Information

There has been a heightened awareness of lead leaching into drinking water through service lines and household plumbing. The City's Technical Advisory Committee has enlisted the support of EPA lead experts and is working with State of Michigan representatives to increase testing, rebuild public confidence, and implement long-term solutions to lead. It is recommended that everyone get their water tested, obtain a water filter, and check with a plumber to evaluate the type and condition of your household plumbing. The City is currently mapping all of its lead service lines and working to develop a program to get lines changed over time.

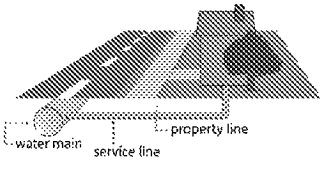
If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. The City of Flint is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 5 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at http://www.epa.gov/safewater/lead.



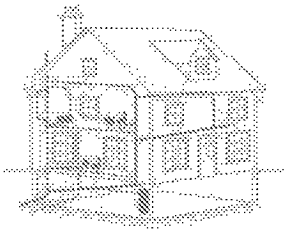
No lead in water leaving the Treatment Plant.



Little or no lead in water in the transmission mains.



Lead can leach into water through service lines.



Lead can leach into water through household plumbing.

Water Filters & Testing

Free water filters have been made available to current Flint residents at several locations. The MDHHS and the Genesee County Community Action Resource Department (GCCARD) are providing Free National Sanitation Foundation certified water filters at the following locations.

Residents receiving MDHHS assistance are encouraged to visit either the **125 E. Union St.** or **4809 Clio Rd. MDHHS** office location to obtain a free, certified home water filter. Residents who are not currently enrolled in MDHHS assistance programs should visit the (GCCARD) offices located at **2727 Lippincott** and **601 N. Saginaw** in Flint.

Staff will be onsite at all four locations from **9 a.m. to 4 p.m., Monday through Friday**, to distribute filters and assist residents who have questions about proper installation.

If you want more information on obtaining a water filter, please call 211.

Other suggestions related to water safety and testing:

- We recommend that everyone get their water tested. Call us at (810)-787-6537.
- Contact the Health Department about having your child's blood tested (810)-257-3612.
- It is advisable to have a plumber check your household plumbing.
- Check your faucet aerator (large lead solder particles can occasionally get lodged in here).

Temporary issues to be aware of when Changing Water Sources

Changing water sources back to Detroit will not fully eliminate the lead concerns. The potential for lead to leach off of certain water service lines or household plumbing will continue to exist regardless of the water source. The City is committed to increased testing, better communication, and developing a lead service line map to identify all of the City owned lead service lines.
As the city changes water sources you can expect the following:

- It could take up to three weeks for the switch in water source to reach all taps in the City.
- Over the next several weeks, we will be winterizing our hydrants which will result in discoloration of the water but will also help accelerate the water flowing through the system.
- Lead will continue to leach off of certain service lines and household plumbing.
- Main breaks could result as a change in source water occurs.
- Water could have discoloration or cloudiness, if this happens, run your faucet until the water clears, if this lasts longer than 20 minutes please report it to our water service center at (810)-766-7202.

Water Timeline

A timeline of events, beginning with signing the KWA contract leading up to the current status of switching back to our previous source of water is available on the City website and can be found by visiting the "water" page located under "residents". Please email flintwater@cityofflint.com with your questions or to request a water test or, call the Water Plant at (810)-787-6537.

3rd Quarter Events

July

- Completed the evaluation of over 8000 valves in the system and identified over 2300 that are currently inoperable. The repair of these valves will be budgeted and worked into our multi-year Capital Improvement Plan.

August

- Successfully completed the installation of Granulated Activated Carbon at the water treatment plant which reduced the TTHM level in the water and helped bring the City back into compliance with the Safe Drinking Water Act.

September

- Leak Detection on all 600 miles of the distribution system has started and is over halfway complete. Several dozen leaks have been identified and repairs continue as more leaks are found. This has decreased the amount of water loss existing in the system.
- Construction of a load out facility at our wastewater plant is on target for completion by November and will allow the City to eliminate the use of the incinerator resulting in significant annual savings.
- Over 3500 new water meters have been installed this year creating better accuracy, accountability, and decreasing the number of estimated reads on water & sewer bills.

2015 3rd Quarter Regulated Detected Contaminants – **Flint River as Source**

Inorganic & Organic Chemicals, Metals, and Pesticides – Monitored at treatment plant						
Regulated Contaminant	Unit of Measure	MCLG	MCL	Highest Level Detected	Range of Detection	Violation
Inorganic Chemicals						
Fluoride	mg/L	4	4	0.84	0.64 – 0.84	No
Nitrate	mg/L	10	10	N.D.	N/A	No
Metals						
Barium	mg/L	2	2	0.02	N/A	No

More than 100 other chemicals were monitored from July through September that were not detected.

The various classification groups of these chemicals include metals, carbamates, herbicides, pesticides, organics, and radiologicals.

Total Organic Carbon, TOC - Monitored at treatment plant			
Regulated Contaminant	Required Monthly % Removal	Minimum Monthly % Removal	Monthly % Removal Ranges
Total Organic Carbon	50	60	60 - 87

Turbidity - Monitored at treatment plant		
Highest Single Measurement (Cannot exceed 1NTU)	Lowest Monthly % of Samples Meeting Turbidity Limit (0.3 NTU in 95% of samples)	Violation
0.18	100 %	No

Disinfectant Residuals – Monitored in the distribution system						
Regulated Contaminant	Unit of Measure	MCLG	MCL	Highest Level Detected	Range of Detection	Violation
Total Chlorine Residual	mg/L	4.0	4.0	4.0	0.2 – 4.0	No

Microbiological Contaminants - Monitored in the distribution system				
Regulated Contaminant	MCLG	MCL	Highest Number detected (in 1 month)	Violation
Total Coliform bacteria	0	The presence of coliform bacteria in > 5% of monthly samples	1	No
E. coli Bacteria	0	0	0	No

Lead & Copper – Monitored from consumers tap					
Regulated Contaminant	Unit of Measure	MCLG	Action Level AL	Number of samples over AL	Total # of Samples Tested from January - September
Lead	ug/L	0	15	16	189
Copper	mg/L	1.3	1.3	0	189

Disinfection By-Products - Monitored in the distribution system and from treatment plant						
Regulated Contaminant	Unit of Measure	MCLG	MCL	Highest Level Detected	Range of Detection	Violation
Total Trihalomethanes (TTHM)	ug/L	n/a	80	90.3	42.6 – 90.3	N/A*
Haloacetic Acids (HAA)	ug/L	n/a	60	15.0	2.0 – 15.0	N/A*
Bromate	ug/L	10	10	N.D.	N/A	N/A*

*Violation based on locational running annual average for TTHM & HAA5, violation for bromate based on yearly average.

Key to the Detected Contaminant Tables		
Symbol	**Abbreviation for**	**Definition/Explanation**
>	Greater than	
AL	Action Level	The concentration of a contaminant, which, if exceeded, triggers treatment or other requirements which a water system must follow.
HAA5	Haloacetic Acids	HAA5 is the total of bromoacetic, chloroacetic, dibromoacetic, dichoroacetic, and trichloroacetic acids. Compliance is based on the total .
LRAA	Locational Running Annual Average	
MCL	Maximum Contaminant Level	The highest level of a contaminant that is allowed in water. MCLs are set as close to the MCLG's as feasible using the best available treatment technology.
MCLG	Maximum Contaminant Level Goal	The level of contaminant in drinking water below which there is no known or expected risk to health.
mg/L	Milligrams per Liter	A milligram = 1/1000 gram 1 milligram per liter is equal to 1ppm
MRDL	Maximum Residual Disinfectant Level	The highest level of disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.
MRDLG	Maximum Residual Disinfectant Level Goal	The level of a drinking water disinfectant below which there is no known or expected risk to health. MRLDG's do not reflect the benefits of the use of disinfectants to control microbial contaminants.
n/a	Not Applicable	
ND	Not Detected	
NTU	Nephelometric Turbidity Units	Measures the cloudiness of water.
pCi/L	Picocuries per Liter	A measure of radioactivity. Picocurie (pCi) means the quantity of radioactive material producing 2.22 nuclear transformations per minute.
ppb	Parts Per Billion (one in one billion)	The ppb is equivalent to micrograms per liter. A microgram = 1/1000 milligram.
ppm	Parts Per Million (one in one million)	The ppm is equivalent to milligrams per liter. A milligram = 1/1000 gram.
RAA	Running Annual Average	
TT	Treatment Technique	A required process intended to reduce the level of a contaminant in drinking water.
TTHM	Total Trihalomethanes	Total Trihalomethanes is the sum of chloroform, bromodichloromethane, dibromoochloromethane and bromoform. Compliance is based on total.
ug/L	Micrograms per Liter	A microgram = 1/1,000,000 gram 1 microgram per liter is equal to 1ppb

Frequently Asked Questions About
Lead in Flint Water

- Lead is hard to avoid completely. It can be found in old paint, water pipes and brass water faucets, in dirt, at some job sites, and in metal used for some hobbies.
- The amount of lead found in some Flint homes' drinking water could affect kids' health.
  - Even small amounts of lead can harm kids' health because they are little and still growing.
  - Adults are less likely to be harmed by the levels found in the water.
- Filter your drinking water using an NSF-approved filter. Find an approved filter at http://www.gchd.us/docs/lead_filter_information.pdf.
- Some filters can remove up to 99% of the lead in water when used properly. To be sure your filter is removing as much lead as it can, carefully follow the instructions that came with it.
  - Change the filter cartridge as often as you should.
  - Run only cold water through the filter.
- Even after changes to the water system, it may take a while before lead levels in your home's water drop. Use the tips below to know when it's best to use filtered water:

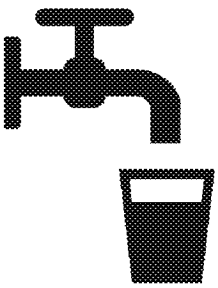
Lead in Water

Although your water may be a different color sometimes, it is not caused by lead. It's important to remember:

- **You can't see, smell, or taste lead in water.**
- **Lead won't change the color of your water.**
- **The only way to know what your home's lead levels are is by having your water tested in a lab.**

Please call the Flint Water Dept. at 810-787-6537 to request a free or low-cost water test.

In The Kitchen



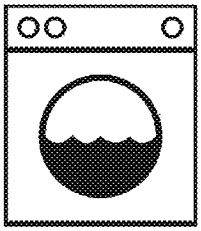
Use filtered tap water for:

- Drinking (including making coffee, drink mixes, juice, baby formula)
- Cooking (even if you boil the water, the lead will stay in the water and food)
- Washing fruits and vegetables

You can use unfiltered tap water for:

- Washing your hands
- Washing dishes
- Wiping down countertops

Cleaning



You can use unfiltered tap water for:

- Mopping floors
- Washing clothes

Your washing machine and dryer won't put lead from the water into the air of your home.

In the Bathroom

Use <u>filtered</u> tap water for:

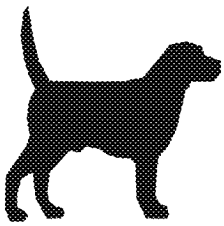
- Brushing kids' teeth

You can use <u>unfiltered</u> tap water for:

- Showers
- Baths (don't let kids drink the water as they play in the tub)
- Brushing your teeth (if you are an adult)

Lead will not cause rashes or other skin problems. However, if chlorine levels or other cleaners are high in the water, it may cause itchy or dry skin (similar to what can happen when you swim in a pool).

Caring for Pets



Use <u>filtered</u> tap water for:

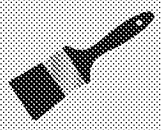
- Pets' water bowls

You can use <u>unfiltered</u> tap water for:

- Baths

If you notice your pet acting differently than normal, please contact your vet.

Other Sources of Lead in Your Home

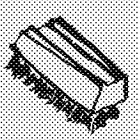


Lead Paint

- Homes built before 1978 likely have lead paint, both inside and outside.
- Old paint is the most common way that kids are exposed to lead.

Dirt

- If you live in the city, there may be lead in the dirt outside your home.
- Before 1996, gas and the exhaust from cars contained lead. More lead will be found in dirt in busy traffic areas.



Dust

- The dust in your home can contain tiny amounts of both the paint and the dirt that contain lead.

Hobbies & Jobs

- Solder, fishing sinkers, bullets, and stained glass framing materials are some of the items in your home that may contain lead. You could also track home lead dust from your job site.

Have Questions?

For more information about protecting yourself and your family from lead, please visit:

TAKING ACTION ON FLINT WATER

www.mi.gov/FlintWater

- Tips for Flint Residents -

Lead plumbing is common in homes built prior to 1986, and anyone in the state with lead pipes in their home can take some extra precautions to minimize lead in their drinking water.

1. Get your water tested at no cost to ensure water is safe. **To get your water tested**, please call the city of Flint Water Plant at (810) 787-6537 and then press 1.

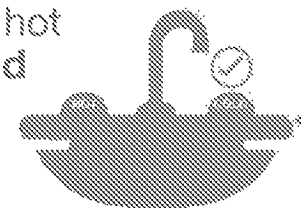
2. To ensure safe drinking water, you can also get a free filter. Please visit **mi.gov/FlintWater** to find where you can get a free filter.

3. If testing finds lead or other pollutants in drinking water from plumbing, then **flushing your pipes prior to using them** can significantly reduce your exposure.

To flush your pipes, run the water until it gets as cold as it will get. This can take as little as 5 to 30 seconds if you have recently flushed the toilet or otherwise used water in your home, or as long as 2 to 3 minutes if you have not used any water in hours.

If the City of Flint, **running the water for 5 minutes costs between 3 and 15 cents.**

4. Additionally, more lead gets into hot water than cold water. **Use only cold water for drinking, cooking and making baby formula.**



To get your water tested for free, please call the city of Flint Water Plant at (810) 787-6537 and then press 1.

IS YOUR CHILD SAFE FROM LEAD POISONING?

LEARN HOW TO PROTECT YOUR FAMILY:

CREATE A LEAD SAFE HOME

What causes lead poisoning?

There are many places in a home that can put babies and children in danger of lead poisoning.

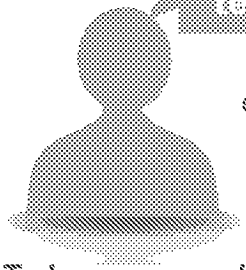
Lead paint is the #1 cause of lead poisoning in Michigan and is often found in homes built before 1978. The older the home, the more likely that painted surfaces like windows, cupboards, doors and porches will contain lead paint.

Lead poisoning occurs most often when children come in contact with lead in the air, in dust particles and in lead paint. Lead can also be found in soil, drinking water if supplied by lead pipes, certain home remedies and is used in some hobbies and occupations.

Exposure to lead particles is a serious health threat. Carefully consider where your child spends time (childcare, relatives, your home) when thinking about lead poisoning hazards.

How can I tell if my child has lead poisoning?

Talk to your doctor about testing your child's blood for lead poisoning.



When should my child be tested for lead poisoning?

Children should be tested at one and two years of age or if you think your child has been exposed to a lead hazard.

To learn more about lead poisoning prevention and blood lead testing, call the Childhood Lead Poisoning Prevention Project:

(517) 335-8885

(888) 322-4453

Take this quiz to see if your child may have lead poisoning:

Symptoms of lead poisoning can be silent—and hard to recognize. Preventing lead poisoning before it happens is the best way to keep your family safe. Take this quiz to see if your child may be at risk.

Does your child currently live in a home built before 1950 or have they lived in a home built before 1950 in the recent past? Do they spend time at or often visit a home built before 1950?

Yes No Don't know

Does your child currently live in a home built before 1978 that was recently remodeled? Have they lived in or often visited a home built before 1978 that was recently remodeled?

Yes No Don't know

Does your child have a brother, sister or playmate with lead poisoning?

Yes No Don't know

Does your child live with an adult whose job or hobby involves lead?

Yes No Don't know

Does you or your child's caregiver use home remedies that may contain lead?

Yes No Don't know

If you answered NO to all of these questions, your child is probably not at risk for lead poisoning.

If you answered YES or DON'T KNOW to any of these questions, talk to your doctor about testing your child for lead poisoning.

MAKE EVERY DAY LEAD SAFE

Safe Cleaning. Use these steps to help keep your home clean and reduce your child's risk of exposure. Use these tips to clean your windows, doors, floors, porches, stairs and child pay areas.

Put on gloves. If you do not have rubber gloves, wash your hands well after cleaning.

Use the right cleaners and disposable supplies. Use soapy cleaners or products made to remove lead dust.

Remove paint chips first. Window areas and porches often have peeling paint and lead dust. Pick up visible chips and dispose of them in a plastic bag.

Always wet-mop floors and window sills. Do not broom lead dust. Dispose of cloths after wiping each area. If using a mop, replace water frequently.

Don't use a vacuum unless it is a HEPA vacuum. It will spread lead dust into the air you breathe. Some health departments have HEPA vacuums available to borrow

Rinse after cleaning. Use clean water and a new mop head or fresh paper towels to wipe away suds.

Always empty wash water down a toilet.

Repeat these steps often when dirt and dust appear on floors, porches, window wells, window sills, stairs and children's play areas.

For Homes with Lead Pipes

If you use a water filter, be sure it meets NSF/ANSI 53 standards for lead reduction.

✓**Flush your pipes before drinking**, and only use cold water for cooking and mixing formula. Flush pipes by running the water for approximately 5 minutes.

✓**Test.** Consider contacting your local water authority to have your water tested.

Daily Lead Safe Practices

- Wash hands, bottles, pacifiers and toys often
- Always take off shoes before going into the house.
- Watch your child's diet. Foods high in calcium and iron help keep lead from being absorbed by a child's body.
- Avoid using power sanders, open-flame torches, heat guns, dry scrapers and dry sandpaper o painted surfaces.
- Fix peeling or chipping paint.
- Use a certified Repair and Remodeling Professional when making updates to your home
- Practice safe cleaning methods.

Thinking about remodeling your home? Need advice about identifying and removing lead paint? Call the Lead and Healthy Homes Section: 866-691-LEAD.

Media Alert received via e-mail on March 19, 2013, from the American Institute of Architects (AIA), re: The Flint Public Art Project and the Flint Chapter of the AIA will announce the winner of the $25,000.00 grand prize in the inaugural Flat Lot competition to design and build a temporary summer pavilion on Flint's central downtown parking lot at 9:30 a.m. Thursday, March 21, 2013, at the John Gazall & Associates, Mott Building, 503 S. Saginaw Street, Flint.

This matter was Placed on File. The motion carried.

130207 Damage Claims

MAYFIELD, LINDA, 2518 Walter Street, Flint, MI (WARD 2)
LANE, WILLIE C., 3130 Concord Street, Flint, MI (WARD 6)

This matter was Placed on File. The motion carried.

COMMUNICATIONS FROM CITY OFFICIALS

130194 Press Release/City of Flint/Hiring of New Police Officers/Recruitment of Others

Press Release dated March 11, 2013, from Jason Lorenz, City of Flint Public

Information Officer, re: The City of Flint has seven new police officers on the job from the public safety millage passed last November by voters. The city's next step is to hold a recruitment drive by working with a local college, which will set up a Police Academy when the city has gathered sufficient interest from its efforts.

This matter was Placed on File. The motion carried.

130195 Press Release/City of Flint/Sunday Sales of Alcohol Before Noon Not Permitted on St. Patrick's Day

Press Release dated March 12, 2013, from Jason Lorenz, City of Flint Public Information Officer, re: The City of Flint will not be able to permit Sunday alcohol sales before noon this Sunday, March 17, St. Patrick's Day. While the city adopted a resolution to allow a one-time exception to the Sunday morning alcohol ban, the Michigan Liquor Control Commission has taken the position that the city cannot create a one-day exemption.

This matter was Placed on File. The motion carried.

130196 Flint City Council/Public Notice/Special City Council Meeting/March 18, 2013

Public Notice posted March 14, 2013, re: The Flint City Council will hold a Special City Council Meeting, followed by a Finance Committee Meeting, at 5:30 p.m. Monday, March 18, 2013, in the City Council Chambers, 3rd Floor, City Hall, to consider a contract with the Karegnondi Water Authority (KWA).

This matter was Placed on File. The motion carried.

130201 Emergency Financial Manager (EFM) Order #10/Grant Applications

Order #10 issued by Emergency Financial Manager on March 15, 2013, "Grant Applications," re: "all city officials, department heads, division heads and employees shall adhere to ...requirements regarding the approval of any and all grant applications on behalf of the City of Flint or grant applications submitted by others which in any way involves the financial, programmatic or personnel support by the City of Flint." The five requirements, including the stipulation that only the Emergency Financial Manager or City Administrator are authorized to accept grants on behalf of the city, are included in the order.

This matter was Placed on File. The motion carried.

130203 Press Release/City of Flint/Flint Lifelines/Meeting Announcement

Press Release dated March 16, 2013, from Jason Lorenz, City of Flint Public Information Officer, re: Flint Lifelines, formerly CeaseFire Flint, will hold community meetings on the fourth Thursday of each month, beginning at 1 p.m. Thursday, March 28, 2013 at Flint Northwestern High School. The meetings are open to the public.

This matter was Placed on File. The motion carried.

130206 Flint City Council/Public Notice/Finance Committee Meeting/March 20, 2013

Public Notice posted March 19, 2013, re: The Flint City Council will hold a Finance Committee Meeting at 5:30 p.m. Wednesday, March 20, 2013, in the City Council Committee Room, 3rd Floor, City Hall.

This matter was Placed on File. The motion carried.

130208 Flint City Council/Public Notice/Special Affairs Committee Meeting/March 25, 2013

Public Notice posted March 22, 2013, re: The Flint City Council will hold a Special Affairs Committee Meeting at 5 p.m. Monday, March 25, 2013, in the City Council Committee Room, 3rd Floor, City Hall. A regular City Council meeting will immediately follow in the Council Chambers.

This matter was Placed on File. The motion carried.

130209 Traffic Engineering/Note for Bulletin/Street-Sidewalk-Lane Closures

Notes for Bulletin (3) dated February/March 2013, for street, sidewalk, or lane closures, re: (1) Harrison Street, Saginaw Street and Second Avenue (cable failure-March 11-March 20); (2) First Street, Harrison Street, Wallenberg, Kearsley, Crapo, Horrigan, and Harrison (St. Patrick's Day Pot O' Gold 4-Mil Run/Walk-March 17); and (3) Chevrolet Avenue (University Corner Grand Opening-March 22).

This matter was Placed on File. The motion carried.

Passed The Consent Agenda

A motion was made. The motion carried.

PUBLIC SPEAKERS

ROLL CALL

Councilperson Dale Weighill left at approximately 7 p.m.

Present: Councilperson: Councilperson Poplar, Vice President Nolden, Councilperson Freeman, Councilperson Lawler, Councilperson Neeley, Councilperson Sarginson, Kincaid and Councilperson Croom

Absent: Councilperson: Councilperson Weighill

APPOINTMENTS

130169.1 Amendment/Reappointment/Zoning Board of Appeals/Christine Monk (Ward 6)

Amended resolution resolving that the Flint City Council recommends the reappointment of Christine Monk (821 Frank Street, Flint MI 48504 - Ward 6), to the Zoning Board of Appeals for a three-year term, commencing September

1, 2011, and expiring September 1, 2014. [By way of background, Ms. Monk's term on the Zoning Board of Appeals expired in September 2011, but she has continued since that time to serve.] [Resolution amended to fix typographical error in first paragraph of resolution from "Board of Review" to "Zoning Board of Appeals."]

Sponsors: Sheldon A. Neeley

A motion was made by Councilperson Neeley, seconded by Councilperson Freeman, that this matter be Approved. The motion carried by the following vote:

Aye: 8 - Councilperson Poplar, Vice President Nolden, Councilperson Freeman, Councilperson Lawler, Councilperson Neeley, Councilperson Sarginson, President Kincaid and Councilperson Croom

Absent: 1 - Councilperson Weighill

130211 Appointment/Zoning Board of Appeals/Chris Zuwala (Ward 4)

Resolution resolving that the Flint City Council recommends the appointment of Chris Zuwala (3510 Whittier Avenue, Flint MI 48506 - Ward 4) to the Zoning Board of Appeals for a three-year term, expiring September 1, 2013. [NOTE: By way of background, Gloria Kelly's term as the 4th Ward representative expired in September 2007, but she continued to serve until resigning in January 2013.]

Sponsors: Joshua M. Freeman

A motion was made by Councilperson Freeman, seconded by Councilperson Poplar, that this matter be Approved. The motion carried by the following vote:

Aye: 8 - Councilperson Poplar, Vice President Nolden, Councilperson Freeman, Councilperson Lawler, Councilperson Neeley, Councilperson Sarginson, President Kincaid and Councilperson Croom

Absent: 1 - Councilperson Weighill

130212 Reappointment/Zoning Board of Appeals/Birdie V. Brooks (Ward 5)

Resolution resolving that the Flint City Council recommends the reappointment of Birdie V. Brooks (1307 Columbia Lane, Flint MI 48503 - Ward 5), to the Zoning Board of Appeals for the remainder of a three-year term, expiring September 1, 2014. [By way of background, Ms. Brook's term on the Zoning Board of Appeals expired in September 2011, but she has continued since that time to serve.]

Sponsors: Bernard Lawler

A motion was made by Councilperson Lawler, seconded by Councilperson Neeley, that this matter be Approved. The motion carried by the following vote:

Aye: 8 - Councilperson Poplar, Vice President Nolden, Councilperson Freeman, Councilperson Lawler, Councilperson Neeley, Councilperson Sarginson, President Kincaid and Councilperson Croom

Absent: 1 - Councilperson Weighill

130213

Resolution resolving that the Flint City Council recommends the reappointment of Marcia Braden (984 Barney Avenue, Flint MI 48503 - Ward 8), to the Zoning Board of Appeals for the remainder of a three-year term, expiring September 1, 2014. [By way of background, Ms. Braden's term on the Zoning Board of Appeals expired in September 2011, but she has continued since that time to serve.]

Sponsors: Michael J. Sarginson

A motion was made by Councilperson Sarginson, seconded by Councilperson Freeman, that this matter be Approved. The motion carried by the following vote:

Aye: 8 - Councilperson Poplar, Vice President Nolden, Councilperson Freeman, Councilperson Lawler, Councilperson Neeley, Councilperson Sarginson, President Kincaid and Councilperson Croom

Absent: 1 - Councilperson Weighill

130214 Reappointment/Zoning Board of Appeals/David C. Veasley (Ward 9)

Resolution resolving that the Flint City Council recommends the reappointment of David C. Veasley (2618 Pinetree Drive, Flint MI 48507 - Ward 9), to the Zoning Board of Appeals for the remainder of a three-year term, expiring September 1, 2015. [By way of background, Mr. Veasley's term on the Zoning Board of Appeals expired in September 2009, but he has continued since that time to serve.]

Sponsors: Scott Kincaid

A motion was made by Councilperson Freeman, seconded by Vice President Nolden, that this matter be Approved. The motion carried by the following vote:

Aye: 8 - Councilperson Poplar, Vice President Nolden, Councilperson Freeman, Councilperson Lawler, Councilperson Neeley, Councilperson Sarginson, President Kincaid and Councilperson Croom

Absent: 1 - Councilperson Weighill

130215 Appointment/Genesee County Land Bank Citizens' Advisory Council/Anthony Tucker (Ward 4)

Resolution resolving that the Flint City Council recommends the appointment of Anthony Tucker (2960 Henry Street, Flint MI 48506 - Ward 4) to the Genesee County Land Bank Citizens' Advisory Council for the remainder of a three-year term, expiring in January 2016. [NOTE: By way of background, Dan Anderson's term as the 4th Ward representative expired in January 2013.]

Sponsors: Joshua M. Freeman

A motion was made by Councilperson Freeman, seconded by Councilperson Poplar, that this matter be Approved. The motion carried by the following vote:

Aye: 8 - Councilperson Poplar, Vice President Nolden, Councilperson Freeman, Councilperson Lawler, Councilperson Neeley, Councilperson Sarginson, President Kincaid and Councilperson Croom

Absent: 1 - Councilperson Weighill

130218 Reappointment/Hurley Board of Hospital Managers/Philip W. Shaltz

Resolution resolving that the Flint City Council approves the reappointment of Philip W. Shaltz (14144 Moffet Drive, Fenton, MI 48430) to an additional five-year term on the (Hurley) Board of Hospital Managers, with such term to commence May 1, 2013, and expire April 30, 2018.

A motion was made by Councilperson Freeman, seconded by Vice President Nolden, that this matter be Approved. The motion carried by the following vote:

Aye: 8 - Councilperson Poplar, Vice President Nolden, Councilperson Freeman, Councilperson Lawler, Councilperson Neeley, Councilperson Sarginson, President Kincaid and Councilperson Croom

Absent: 1 - Councilperson Weighill

130219 Appointment/Hurley Board of Hospital Managers/Delrico Loyd

Resolution resolving that the Flint City Council approves the appointment of Delrico Loyd (2641 Westwood Parkway, Flint, MI 48507) to a five-year term on the (Hurley) Board of Hospital Managers, with such term to commence May 1, 2013, and expire April 30, 2018. [By way of background, Carl E. Mason was appointed in June 2008; his term expires April 30, 2013.]

Approved

Substituted

A motion was made by Councilperson Neeley, seconded by Councilperson Lawler, that this matter be POSTPONED for March 27, 2013. The motion failed by the following vote:

Aye: 3 - Councilperson Lawler, Councilperson Neeley and Councilperson Sarginson

No: 5 - Councilperson Poplar, Vice President Nolden, Councilperson Freeman, President Kincaid and Councilperson Croom

Absent: 1 - Councilperson Weighill

Substituted

A motion was made by Vice President Nolden, seconded by Councilperson Freeman, that this matter be Approved. The motion carried by the following vote:

Aye: 5 - Councilperson Poplar, Vice President Nolden, Councilperson Freeman, President Kincaid and Councilperson Croom

No: 3 - Councilperson Lawler, Councilperson Neeley and Councilperson Sarginson

Absent: 1 - Councilperson Weighill

130220 Appointment/Hurley Board of Hospital Managers/Donna Poplar

Resolution resolving that the Flint City Council approves the appointment of Donna Poplar (5277 Kimberly Woods Circle, Flint, MI 48504) to a five-year term

on the (Hurley) Board of Hospital Managers, with such term to commence May 1, 2013, and expire April 30, 2018. [By way of background, Frances Gilcreast was appointed in August 2008; her term expires April 30, 2013.]

Approved

Substituted

A motion was made by Councilperson Lawler, seconded by Councilperson Neeley, that this matter be POSTPONED for March 26, 2013. The motion carried by the following vote:

Aye: 7 - Councilperson Poplar, Vice President Nolden, Councilperson Lawler, Councilperson Neeley, Councilperson Sarginson, President Kincaid and Councilperson Croom

No: 1 - Councilperson Freeman

Absent: 1 - Councilperson Weighill

RESOLUTIONS

130165.1 Amended Resolution/Contract/City of Flint/Karegnondi Water Authority (KWA)

Amended resolution resolving that city officials are authorized to enter into a contract with Karegnondi Water Authority (KWA) to purchase fifteen (15) units of capacity, AND, resolving that the City Administrator is authorized to provide KWA information needed to administer the contract, and, with approval of the Chief Legal Officer, to make minor (non-material) modifications to the contract. [NOTE: For each unit of capacity that a member purchases, the buyer shall pay to the KWA a one-time fee of $32,300. Additionally, the buyer shall pay to the KWA not less than $32,300.00 per unit per year until such time as water is made available to the buyer. After water is made available, the buyer shall pay to the KWA an estimated amount NOT-TO-EXCEED $355,300.00 per unit per year until such time that the bonds are paid in full. If it is determined that the costs per unit will exceed $355,300.00, the buyer has a right to cancel the contract. Over the next 25 years, it is expected that continuing with Detroit will cost the region $2.1 billion, compared to $1.9 billion with a pipeline.] [NOTE: Contract not included.] [NOTE: Resolution amended from 18 to 15 units of capacity.]

A motion was made by Councilperson Neeley, seconded by Councilperson Freeman, that this matter be Amended. The motion carried by the following vote:

Aye: 5 - Vice President Nolden, Councilperson Freeman, Councilperson Lawler, Councilperson Neeley and Councilperson Sarginson

No: 3 - Councilperson Poplar, President Kincaid and Councilperson Croom

Absent: 1 - Councilperson Weighill

130165.2 Amended Resolution/Contract/City of Flint/Karegnondi Water Authority (KWA)

Amended resolution resolving that city officials are authorized to enter into a contract with Karegnondi Water Authority (KWA) to purchase sixteen (16) units

of capacity, AND, resolving that the City Administrator is authorized to provide KWA information needed to administer the contract, and, with approval of the Chief Legal Officer, to make minor (non-material) modifications to the contract. [NOTE: For each unit of capacity that a member purchases, the buyer shall pay to the KWA a one-time fee of $32,300. Additionally, the buyer shall pay to the KWA not less than $32,300.00 per unit per year until such time as water is made available to the buyer. After water is made available, the buyer shall pay to the KWA an estimated amount NOT-TO-EXCEED $355,300.00 per unit per year until such time that the bonds are paid in full. If it is determined that the costs per unit will exceed $355,300.00, the buyer has a right to cancel the contract. Over the next 25 years, it is expected that continuing with Detroit will cost the region $2.1 billion, compared to $1.9 billion with a pipeline.] [NOTE: Contract not included.] [NOTE: Resolution amended from 15 to 16 units of capacity.]

A motion was made by Councilperson Neeley, seconded by Councilperson Freeman, that this matter be Adopted. The motion carried by the following vote:

Aye: 7 - Councilperson Poplar, Councilperson Freeman, Councilperson Lawler, Councilperson Neeley, Councilperson Sarginson, President Kincaid and Councilperson Croom

No: 1 - Vice President Nolden

Absent: 1 - Councilperson Weighill

130216 Approval/The First Amendment & Restated Rules Governing the Downtown Development Authority (DDA) of the City of Flint

Resolution that the City of Flint hereby approves and The First Amendment & Restated Rules Governing the Downtown Development Authority (DDA) of the City of Flint, attached hereto. [NOTE: The City of Flint created the DDA, in accordance with Public Act 197 of 1975, as amended, and approved The Rules Governing the DDA in 1977. Public Act 197 has been amended and revised at various times since then, which required the proposed changes.] [NOTE: The First Amendment & Restated Rules Governing the Downtown Development Authority (DDA) of the City of Flint is attached.]

A motion was made by Councilperson Freeman, seconded by Vice President Nolden, that this matter be Amended. The motion carried by the following vote:

Aye: 8 - Councilperson Poplar, Vice President Nolden, Councilperson Freeman, Councilperson Lawler, Councilperson Neeley, Councilperson Sarginson, President Kincaid and Councilperson Croom

Absent: 1 - Councilperson Weighill

130216.1 Amended Resolution/Approval/The First Amendment & Restated Rules Governing the Downtown Development Authority (DDA) of the City of Flint

Amended resolution that the City of Flint hereby approves and The First Amendment & Restated Rules Governing the Downtown Development Authority (DDA) of the City of Flint, attached hereto. [NOTE: The City of Flint created the DDA, in accordance with Public Act 197 of 1975, as amended, and approved The Rules Governing the DDA in 1977. Public Act 197 has been

amended and revised at various times since then, which required the proposed changes.] [NOTE: The First Amendment & Restated Rules Governing the Downtown Development Authority (DDA) of the City of Flint is attached.] [Resolution amended for changes to rules.]

A motion was made by Councilperson Freeman, seconded by Vice President Nolden, that this matter be Adopted. The motion carried by the following vote:

Aye: 8 - Councilperson Poplar, Vice President Nolden, Councilperson Freeman, Councilperson Lawler, Councilperson Neeley, Councilperson Sarginson, President Kincaid and Councilperson Croom

Absent: 1 - Councilperson Weighill

RESOLUTIONS - MAY BE REFERRED FROM S.A.

130210 Resolution/City Council/Mayor Dayne Walling/Request for Appointment of Transition Advisory Board

Resolution resolving that Mayor Dayne Walling and the Flint City Council request and recommend to Gov. Rick Snyder that a receivership transition advisory board be appointed for the City of Flint under Public Act 436 no later than July 1, 2013. [NOTE: On December 1, 2011, Gov. Snyder appointed Michael K. Brown as Emergency Manager under Public Act 4 for the City of Flint, due in part to a consistent deficit in the general fund, the decline in pooled cash, budget issues and unfunded liabilities for post-employment benefits. Due to the suspension and subsequent repeal of Public Act 4, Gov. Snyder appointed Edward J. Kurtz as Emergency Financial Manager under Public Act 72 for the City of Flint, effective August 9, 2012. Both the Emergency Manager and the subsequently appointed Emergency Financial Manager were authorized by virtue of their appointment to "act for and in the place and stead of the governing body and the office of chief administrative officer of the City of Flint." On March 28, 2013, Public Act 436 will become effective and provides that an emergency financial manager appointed and serving under state law immediately prior to the effective date shall continue to serve as an emergency manager under Public Act 436. As an alternative to continuation of an emergency manager, and if the financial emergency has been rectified, Public Act 436 authorizes the governor to appoint a receivership transition advisory board, which serves at the pleasure of the governor and monitors the affairs of the local government until the receivership is terminated.]

No vote was taken on this amendment.

Amended

130210.1 Amended Resolution/City Council/Mayor Dayne Walling/Request for Appointment of Transition Advisory Board

Amended resolution resolving that Mayor Dayne Walling and the Flint City Council request and recommend to Gov. Rick Snyder that a receivership transition advisory board be appointed for the City of Flint under Public Act 436 no later than July 1, 2013. [NOTE: On December 1, 2011, Gov. Snyder appointed Michael K. Brown as Emergency Manager under Public Act 4 for the

City of Flint, due in part to a consistent deficit in the general fund, the decline in pooled cash, budget issues and unfunded liabilities for post-employment benefits. Due to the suspension and subsequent repeal of Public Act 4, Gov. Snyder appointed Edward J. Kurtz as Emergency Financial Manager under Public Act 72 for the City of Flint, effective August 9, 2012. Both the Emergency Manager and the subsequently appointed Emergency Financial Manager were authorized by virtue of their appointment to "act for and in the place and stead of the governing body and the office of chief administrative officer of the City of Flint." As an alternative to continuation of an emergency manager, and if the financial emergency has been rectified, Public Act 436 authorizes the governor to appoint a receivership transition advisory board, which serves at the pleasure of the governor and monitors the affairs of the local government until the receivership is terminated.] [Six-page resolution amended for changes proposed by City Council, City Clerk and Mayor Dayne Walling.]

A motion was made by Councilperson Freeman, seconded by Councilperson Poplar, that this matter be Adopted. The motion carried by the following vote:

Aye: 8 - Councilperson Poplar, Vice President Nolden, Councilperson Freeman, Councilperson Lawler, Councilperson Neeley, Councilperson Sarginson, President Kincaid and Councilperson Croom

Absent: 1 - Councilperson Weighill

MEETING SCHEDULE

ADDITIONAL COUNCIL DISCUSSION

ADJOURNMENT

Having no further business, Council President Scott Kincaid adjourned the meeting at 8:59 p.m.

Respectfully transcribed and submitted,

Janell Johnson, Administrative Secretary to City Council

EM SUBMISSION NO.: 2013EM041

PRESENTED: 3-28-13

ADOPTED: 3-29-13

BY THE EMERGENCY MANAGER:

RESOLUTION TO PURCHASE CAPACITY FROM KAREGNONDI WATER AUTHORITY

The Karegnondi Water Authority (KWA) is a governmental consortium of cities and counties in southeastern Michigan that was created to build a water pipeline that will provide water from Lake Huron to interested communities in Sanilac, Lapeer, and Genesee counties. The incorporating bodies that created the KWA are Sanilac County, Lapeer County, Genesee County, the City of Flint, and the City of Lapeer.

The City of Flint is currently in a year to year contract with the City of Detroit for the purchase of water. A study was conducted that projected that staying with Detroit will cost the region $2.1 billion over the next 25 years. In contrast, if the region builds its own pipeline, the projected costs are $1.9 billion over the same period. After the initial 25 year period, the projected costs would be less then 25% of the projected water costs from Detroit.

In order to build the pipeline, the KWA needs commitment from its members regarding the capacity that each member will purchase in the pipeline. The KWA is allowed to withdraw 85 million gallons of water per day. Capacity is available to members in increments of 1 million gallons per day known as units. For each unit of capacity that a member purchases, the buyer shall pay to the KWA a one time fee of $32,300.00. Additionally, the buyer shall pay to the KWA not less then $32,300.00 per unit per year until such time as water is made available to the buyer. After water is made available, the buyer shall pay to the KWA an estimated amount not to exceed $355.300.00 per unit per year until such time that the bonds are paid in full. If it is determined that the costs per unit will exceed $355,300.00 the buyer has a right to cancel the contract.

The purchase of capacity along with the payment of other costs necessary to operate the pipeline gives the member a right to water for sale to its customers. The buyer has a right to resell capacity and water rights. Each party entering into a capacity contract shall also be entitled to appoint additional board members equal to the party's percentage share of the total capacity under contract.

It is in the long term best interests of the City of Flint to enter into a contract with the KWA to purchase up to eighteen (18) units of capacity.

IT IS RESOLVED that City officials are authorized to enter into a contract with KWA to purchase up to eighteen (18) units of capacity.

IT IS FURTHER RESOLVED that the City Administrator is authorized to provide KWA information needed to administer the contract and, with approval of the Chief Legal Officer, to make minor (non-material) modifications to the contract.

Flint City Council approves resolution to buy water from Karegnondi, state approval still needed

[http://connect.mlive.com/staff/dadams1/index.html] By Dominic Adams | dadams5@mlive.com [http://connect.mlive.com/staff/dadams1/posts.html]
Follow on Twitter [http://www.twitter.com/dominicadams]
on March 25, 2013 at 10:46 PM, updated March 26, 2013 at 1:28 AM

FLINT, MI – Flint is one step closer to getting its water from Lake Huron as part of the Karegnondi Water Authority.

The vote, **approved 7-1 at the Flint City Council meeting Monday, March 25 [http://www.mlive.com/news/flint/index.ssf/2013/03/flint_city_council_again_delay.html]** , may have set in motion the end to Flint paying to get its water from Detroit.

Under the proposal, Flint would get 16 million gallons per day of raw water from Lake Huron, pipe it to Flint for treatment and then sell it to customers throughout the city. Another 2 million gallons per day would come from the Flint River and will be treated in Flint.

Mayor Dayne Walling said the Department of Environmental Quality must approve Flint's getting 2 million gallons per day from the Flint River.

Tuesday's meeting followed weeks of discussions and special meetings surrounding the resolution.

"We got there," Councilman Joshua Freeman said. "That's the important thing."

There were more than 50 people at Monday's meeting.

"Going with Karegnondi is the best decision. We have no opinion on the economics of the decision," said Rebecca Fedewa, Flint River Watershed Coalition executive director. "If we start drawing water out of the Flint River, we are at risk of having to start releasing water from our reservoirs."

Genesee County Drain Commissioner Jeff Wright said the decision must still be approved by a county water and waste advisory board. The KWA board will then be reconvened for final approval.

Wright said construction could start in May.

State treasury officials still must approve the city council's move because Flint has an emergency financial manager. All expenditures over $50,000 must be approved.

Genesee County Drain Commissioner Jeff Wright has said that Flint would pay roughly $6.4 million annually for water service if it joined the pipeline – a nearly $4 million savings on what it pays Detroit for water.

Walling previously said the **city would save $19 million over eight years [http://www.mlive.com/news/flint/index.ssf/2013/03/flint_city_council_delays_deci.html]** by getting water from the KWA.

"It's a historic night in the City of Flint," Walling said. "The savings will be less with the capacity level approved by city council because there will be increased treatment cost for the river water."

He said the DEQ told the city it needed to get 18 million gallons per day or there would have to be additional work done at Flint's water plant.

Flint's water plant and the Flint River is currently the backup for Flint and Genesee County, however, the plant only operates four times per year.

Councilman Bryant Nolden was the lone dissenting vote.

"It was a protest vote," Nolden said. "I knew they had enough votes. I just feel like the Flint River is our best option."

Karengnondi is the regional water authority that includes Genesee, Lapeer and Sanilac counties and the cities of Flint and Lapeer.

Flint is the second municipality, behind Genesee County, to officially decide to purchase raw water through the KWA. Lapeer city officials said they intend to purchase water, but an agreement has been finalized.

810-287-1925

What: Jeff Wright Statement on Flint City Council Approving Resolution to Join KWA.

When: March 26, 2013

Additional Info: Jeff Wright, CEO of the KWA, today praised the Flint City Council for voting to approve a resolution to officially have the City of Flint join the KWA and its' water line.

"I have said from the beginning that this decision must be made by Flint's City Council and Mayor," said Wright. "I appreciate the council voting the way they did, but even more than that, I am glad the residents of Flint were able to have their voices heard via their elected officials." The next step in the process will come with the KWA Board executing the contract for the City.

"The most important aspect from the vote is the fact that we as an Authority can move forward knowing Flint's intentions," said Wright.

Despite Emergency Manager Ed Kurtz publicly supporting the project, Wright had made a vote by council a condition of Flint joining the KWA so the residents would have their say.

"There is a basic tenet that government is best when it has local control. We saw that with the council vote. Nobody, whether they live in Flint, Grand Blanc, Davison, Fenton, or anywhere in Genesee County, should have these types of decisions made by people who live outside of their community," said Wright.

At the next Water and Waste Advisory Board meeting a vote will be taken to award a contract for construction of the intake portion of the water line. All bids were submitted to the board at their last meeting for review.

STATE OF MICHIGAN
DEPARTMENT OF TREASURY
LANSING

RICK SNYDER
GOVERNOR

ANDY DILLON
STATE TREASURER

Mr. Edward Kurtz
Emergency Manager
City of Flint
1101 South Saginaw Street
Flint, MI 48502

April 11, 2013

Dear Mr. Kurtz:

Thank you for your March 29, 2013 letter, which is attached for reference. As the Emergency Manager for the City of Flint ("Flint" or "City"), you have asked for my concurrence, pursuant to Public Act 436 of 2012, the Local Financial Stability and Choice Act, to authorize a contract in excess of $50,000.00 not subject to competitive bidding. This request was related to the City entering into an agreement with the Karegnondi Water Authority (KWA) for provision of raw water for the City.

In considering your request, I took note of the following facts in support of Flint joining KWA. First, there is widespread support in the City for this move, including the support of the Mayor, the City Council, and the Emergency Manager. Second, this move will provide a unique opportunity for the City and County to partner on an important project, which will hopefully lead to future regional collaboration. Third, the Department of Environmental Quality is supportive of the City participating in the KWA project. Finally, your representations that this deal will lead to substantial savings for the City over the coming decades, savings that are desperately needed to help with the turnaround of the City of Flint.

It is my understanding that the Detroit Water and Sewer Department is making a final best offer to Genesee County and the City of Flint next Monday, April 15, 2013. As such, this approval will be effective at 5 pm on April 16, 2013 after receiving written notice from the City that either no such offer was presented to the county and the City or that an offer was received and was rejected in good faith based upon specified objections.

For the reasons described above and subject to the conditions set forth herein, pursuant to Section 12 (3) of PA 436 of 2012, I am authorizing you to proceed with adopting the resolution and entering into a contract with KWA.

Sincerely,

Andy Dillon
State Treasurer

FLINT, MI -- Flint residents may soon get their water from Lake Huron.

The Flint City Council voted 7-1 to get 16 million gallons per day from the Karegnondi Water Authority.

"This is about compromise," said Councilman Sheldon Neeley.

Neeley got support from Councilman Joshua Freeman, after the two were previously at odds about the amount the city should withdraw from Lake Huron.

Councilman Bryant Nolden was the lone "no" vote.

"It was a protest vote," Nolden said. "I just feel like the Flint River is our best option."

Genesee County Drain Commissioner said construction of the pipeline could start in May.

The city currently pays to get its water from Detroit.

State treasury officials still must approve the city council's move because Flint has an emergency financial manager. All expenditures over $50,000 must be approved.

Resolution: 130165.2

Presented: 3-11-13

Adopted: 3-25-13

AMENDED RESOLUTION TO PURCHASE CAPACITY FROM KAREGNONDI WATER AUTHORITY

BY THE MAYOR:

The Karegnondi Water Authority (KWA) is a governmental consortium of cities and counties in southeastern Michigan that was created to build a water pipeline that will provide water from Lake Huron to interested communities in Sanilac, Lapeer, and Genesee counties. The incorporating bodies that created the KWA are Sanilac County, Lapeer County, Genesee County, the City of Flint, and the City of Lapeer.

The City of Flint is currently in a year to year contract with the City of Detroit for the purchase of water. A study was conducted that projected that staying with Detroit will cost the region $2.1 billion over the next 25 years. In contrast, if the region builds its own pipeline, the projected costs are $1.9 billion over the same period. After the initial 25 year period, the projected costs would be less then 25% of the projected water costs from Detroit.

In order to build the pipeline, the KWA needs commitment from its members regarding the capacity that each member will purchase in the pipeline. The KWA is allowed to withdraw 85 million gallons of water per day. Capacity is available to members in increments of 1 million gallons per day known as units. For each unit of capacity that a member purchases, the buyer shall pay to the KWA a one time fee of $32,300.00. Additionally, the buyer shall pay to the KWA not less then $32,300.00 per unit per year until such time as water is made available to the buyer. After water is made available, the buyer shall pay to the KWA an estimated amount not to exceed $355,300.00 per unit per year until such time that the bonds are paid in full. If it is determined that the costs per unit will exceed $355,300.00 the buyer has a right to cancel the contract.

The purchase of capacity along with the payment of other costs necessary to operate the pipeline gives the member a right to water for sale to its customers. The buyer has a right to resell capacity and water rights. Each party entering into a capacity contract shall also be entitled to appoint additional board members equal to the party's percentage share of the total capacity under contract.

The City of Flint has decided that it is in its long term best interests to enter into a contract with the KWA to purchase SIXTEEN (16) units of capacity, plus TWO (2) units from the Flint River.

IT IS RESOLVED that City officials are authorized to enter into a contract with KWA to purchase SIXTEEN (16) units of capacity, plus TWO (2) units from the Flint River.

IT IS FURTHER RESOLVED that the City Administrator is authorized to provide KWA information needed to administer the contract and, with approval of the Chief Legal Officer, to make minor (non-material) modifications to the contract.

EPA Establishes Safe Drinking Water Task Force to Provide Technical Expertise to MDEQ and City of Flint

Task Force providing technical assistance on reconnecting the Flint drinking water system to a new source

CHICAGO (October 16, 2015) - Today U.S. Environmental Protection Agency Region 5 Administrator Susan Hedman established the Flint Safe Drinking Water Task Force to provide the Agency's technical expertise through regular conversations with designated officials from Michigan Department of Environmental Quality (MDEQ) and the City of Flint. The Task Force will be led by the Region 5 Deputy Regional Administrator and will assist with developing and implementing a plan to secure water quality, including measures to optimize corrosion control. Task Force members will be available to consult with MDEQ and the City of Flint on site in Flint. The Task Force will also coordinate as necessary with federal, state and local public health agencies to assist with protection of public health.

Specifically, the Task Force will provide technical assistance to the MDEQ and the City of Flint to reconnect the Flint system to a new source of drinking water (to be supplied by the Great Lakes Water Authority) and to optimize corrosion control for the Flint system, starting in October 2015. The Task Force will also provide technical assistance to the MDEQ and the City of Flint, as needed, in advance of and following connection of the Flint water system to a new source of drinking water (to be supplied by the Karegnondi Water Authority) and to optimize corrosion control for the Flint system, starting in 2016.

"EPA is committed to working with our state and local partners to ensure a safe and reliable drinking water supply for the residents of Flint, Michigan," Hedman said. "The formation of this task force continues our commitment to providing technical assistance to the City of Flint and the State of Michigan."

The Task Force will be comprised of scientists and technical experts from the EPA Region 5 office in Chicago, the National Risk Management Research Lab in Cincinnati and the EPA drinking water program. In addition, EPA will ask the Governor to designate a MDEQ official and the Mayor of Flint to designate a city official, to serve as points of contact for the Task Force.

Project: Flint Water Advisory Task Force
Company: Flint Water

Larry Reynolds posted a new message:
notes to timeline

Friday,Sept 11.Dr. Mona Hanna -Attisha contacted Dr. Lawrence Reynolds with concerns about children's blood levels in light of Mark Edwards, PhD findings. Dr. Mona convened the Hurley Medical Center Research Team. Dr. Reynolds contacted the MDCH Childhood Lead Prevention Program by phone and left data request for Flint EBLLs. Dr. Reynolds also contacted MDEQ staffer who stated MDEQ was waiting for a letter from MDCH ,REGARDING HEALTH ISSUES AND ACTION.

Wednesday ,September 15-DHHS graph for 0-16 yoa children with Flint mailing addresses and ELLs to Dr. Reynolds was discussed with two GCHD Board of Health (GCBOH)members (chair Kay Doer and member Dr. Laura Carravallah)and management staff ~~Mark Valacak--Director , Dr. Gary Johnson~~ Medical Director , and John Henry – Environmental Hygiene- in an informal meeting. The GCBOH chair read the mission of the GCHD aloud.

GCHD Director's response was that staff and resources to access MCIR data registry for lead levels were not available. A new software had been installed and the PDF format required manual extraction for a report to get ELLs ,ages, and addresses. Also, he said it was the City of Flint Department of Public Works's responsibility to issue a health advisory , not the GCHD.

Monday ,September 21- Greater Flint Health Coalition VIEWED PRESENTATION BY Dr. Mona H-A and passed a resolution to requesting a health advisory for the city of Flint. At noon , members of the GFHC met with the mayor-Walling , administrator-Henderson , and the DPW director-Crump , requesting action on the resolutions , the HMC research , and the Virginia Tech research. The response by the administrator was

Flint could not change water sources because of cost .Also, the water leaving the plant meets MDEQ standards

Tuesday ,September 22- Genesee County Medical Society (GCMS) passed a resolution for the same.

Thursday , September 24-In the absence of a response by the City Administration or the Genesee County Health Department, a press conference was called by HMC and GFHC members to advise the community of a health emergency with a presentation of the HMC research by Dr. Mona H-A , followed by remarks by the GCHD Director , Mark Valacak. The city administrator attended. The state continued to dispute the findings.

Subject: Call with Matt Davis

We had a great call with Matt, overall seemed very supportive of our recent efforts and intends to modify the letter to the Governor based on actions taken by MDHHS.

Highlights from our discussion:

- VERY PLEASED with today's release of information regarding lead testing
- Matt supportive of our ICS-like structure (with project managed by Division of Environmental Health) – very much in line with centralized coordination and communication
- Agrees with our proposal to use Medicaid population denominator as proxy for measuring progress in accelerating lead testing efforts
- VERY pleased with the efforts to partner with, engage Medicaid Health Plans in the public health response
- Had some suggestions for using MCIR as a tool to link children and their school districts to determine potential lead exposure
- Agrees there is lack of consensus among community providers about testing infants, but Eden/Sue/Matt agree that there must be a risk assessment for lead exposure from water, infants are at highest risk for adverse effects.

Please let me know if you have questions.

Hello Steve and Mike. As you are aware, the City has undergone extensive upgrades to our Water Treatment Plant and it's associated facilities. Our intentions and efforts have been to operate our facility as the primary drinking water source for the City of Flint. Through consultation with your office and our engineering firm we've developed a system of redundant electrical systems, treatment processes and adequate finished water storage to negate the need for a signed back up agreement with DWSD due to their termination of our contract. Upon inspection of these facilities would you convey your concurrence that there is no regulatory requirement for us to sign a back up agreement with DWSD.

Thank you

Adam,

Good afternoon, I am contacting you in regards to possible changes in our monitoring for our change to full time operation out of the Flint river. I am expecting changes to our Water Quality Monitoring parameters, and possibly our DBP and lead & copper monitoring plan. Also, I am wondering about our MOR required testing. I know you have probably been in contact with Howard Croft, however I have not seen anything except the notes you or Prysby made on the last page of our 2014 monitoring schedule "that things were subject to change". Any information would be greatly appreciated, because it looks as if we will be starting the plant up tomorrow and are being pushed to start distributing water as soon as possible. As the acting F-1, I would like to make sure we are monitoring, reporting and meeting our requirements before I give the O.K to start distributing water.

Thanks,

Mike Glasgow

Adam,

Thank you for the quick response. I assumed there would be dramatic changes to our monitoring. I have people above me making plans to distribute water ASAP. I was reluctant before, but after looking at the monitoring schedule and our current staffing, I do not anticipate giving the OK to begin sending water out anytime soon. If water is distributed from this plant in the next couple weeks, it will be against my direction. I need time to adequately train additional staff and to update our monitoring plans before I will feel we are ready. I will reiterate this to management above me, but they seem to have their own agenda.

Thank you,

Mike Glasgow

2014 Monitoring Schedule

FLINT, CITY OF

WSSN: 02310

Collect samples early in the monitoring period. This schedule reflects your expected routine monitoring and is subject to change. To receive credit for monitoring, include the **WSSN, Site Code**, and **County** on your request for analysis form. Collect Bacteriological and Automated Partial Chemistry samples close to the shipping time and send overnight delivery. Send all sample results to your Department of Environmental Quality (DEQ) district office unless you use the DEQ laboratory. Test codes, sample units, and costs are listed to help you complete the DEQ laboratory form. Prices are subject to change without notice. The DEQ laboratory is closed on state holidays.

Location: Plant Tap

Collect these samples at the entry point to the distribution system (after treatment, if applicable.)

Sample Type	# Samples/ Frequency	Collect Before	Site Code	Fee	Unit Number	Test Code
Automated Partial Chemistry	This DEQ lab scan includes nitrate, nitrite, fluoride, and sodium whose monitoring frequency requirements differ from one another. Before requesting analyses from a laboratory other than the DEQ laboratory, check with your DEQ district staff for the specific monitoring requirements.					
	1/3 months	**Quarterly**	TP001	$18.00	32	R
Volatile Organic Compounds	1/3 months	**Quarterly**	TP001	$100.00	36VO	CXVO
Complete Metals	1/36 months	**09/30/2014**	TP001	$102.00	36ME	CMET2
Arsenic	1/3 months	**Quarterly**	TP001	$18.00	36ME	CAS
Cyanide	1/3 months	**Quarterly**	TP001	$25.00	36CNa	CCN
SOC – Pesticides	1/3 months	**Quarterly**	TP001	$125.00	36PT	CXPT
SOC – Herbicides	1/3 months	**Quarterly**	TP001	$120.00	36HB	CXHB
SOC – Carbamates	1/3 months	**Quarterly**	TP001	$120.00	36LP	CXLP
Gross Alpha (Radiological)	1/3 months	**Quarterly**	TP001	Not performed at the DEQ Laboratory. A list of certified labs is at www.michigan.gov/DEQ. Select Water, Drinking Water, Community Water Supply, then Certified Labs under Programs and Activities.		
Radium 226 & Radium 228	1/3 months	**Quarterly**	TP001			
Water Quality Parameters	Bi-weekly	**Every 2 Weeks**	TP001	Various	Various	Various
Total Organic Carbon (TOC)	Pair/Monthly	**Monthly**	TP001	$35.00	36TO	CTOC
	Monitor for TOC in the source water before any treatment at the same time as monitoring for TOC in the treated water. These samples (source water and treated water) are referred to as "paired samples." Collect the treated water sample not later than the point of combined filter effluent turbidity monitoring and representative of treated water.					
Expanded SOCs						
Dalapon & Haloacetic Acids	1/12 months	**Between 04/01 and 09/30/2014**	TP001	$130.00	36HA	CXHA
Diquate	1/12 months	**Between 04/01 and 09/30/2014**	TP001	$150.00	36DQ	CXDQ
Endothall	1/12 months	**Between 04/01 and 09/30/2014**	TP001	$150.00	36EN	CXEN
EDB & DBCP	1/12 months	**Between 04/01 and 09/30/2014**	TP001	$70.00	36VO	CXEV

STATE OF MICHIGAN
DEPARTMENT OF ENVIRONMENTAL QUALITY
LANSING DISTRICT OFFICE

RICK SNYDER
GOVERNOR

DAN WYANT
DIRECTOR

April 16, 2014

Mr. Brent Wright
City Of Flint – D.P.W
Flint Water Plant
4500 North Dort Highway
Flint, Michigan 48505

WSSN: 02310

Dear Mr. Wright:

SUBJECT: Revised Drinking Water Monitoring Schedule – 2014
Monthly Operation Reports
Siting Plans and Record Keeping

Monitoring Schedule:

Enclosed is your revised Drinking Water Monitoring Schedule for calendar year 2014 outlining the minimum requirements for your public water supply. Your schedule has been revised based on the City's intent to change the source of its drinking water from the Detroit Water and Sewerage Department to treatment of the Flint River utilizing the City's Water Treatment Plant. Collect samples early in the monitoring period of the year indicated on the schedule. If you use a private laboratory you are required to report the results to us within the first ten days of the month following the month that you received the results. To receive credit for monitoring, the **"WSSN"** (water supply serial number), the **"Site Code,"** and **"County"** must appear on the sample result. Bottles will NOT be mailed automatically. If you use the Department of Environmental Quality Laboratory, you can order bottles by calling 517-335-8184. Be certain of the United States Environmental Protection Agency sampling and analysis method requirements for hold times.

Please note that both distribution and entry point to the distribution system monitoring will increase upon plant startup.

Monthly Operation Report (MOR) Requirements:

The City shall submit MORs as required under Administrative Rule 1502 (R325.11502). In addition to plant operational data collected and as noted in the attached schedule, the City of Flint will be required to collect Total Organic Compounds (TOC) samples from the source and finish water on a monthly basis. You will also be required to collect Water Quality Parameters (WQPs) at your entry point every 2 weeks. The City must also demonstrate adequate contact time (CT) for disinfection in accordance with Administrative Rule 1505a (R325.11505a).

Disinfection By-Product Sample Siting Plans:

The City of Flint must return to routine standard monitoring of disinfection by-products, and a revised Disinfection & Disinfectants By-Product (DDBP) plan must be submitted, which identifies 4 additional sites, 8 sites in total, for routine quarterly monitoring. These sites must be selected in accordance with the Stage 2 DDBP Rule and supporting documentation must be submitted with the plan for review and approval by this office prior to monitoring.

Lead and Copper Monitoring Requirements and Site Sample Pool

This change in source also increases your distribution system monitoring for WQPs to 25 samples per 6 months and 100 sample locations for Lead & Copper for 2 consecutive 6 month rounds of monitoring. The City will need to expand its current sample site pool in accordance with the requirements of Administrative Rule 710a (R325.10710a). A list of the proposed sample site pool locations, including each site's Tier, sample category, service material, and building plumbing material, shall be submitted to this office for review and approval.

Record Keeping:

The City shall maintain all monitoring records in accordance with all applicable requirements under the Administrative Rules including Rule 720a (R325.10720a), Rule 1506 (R325.11506), and Rule 1507 (R325.11507).

The Michigan Safe Drinking Water Act requires certain reports to be submitted to this office each year. Please remember that cross connection reports and annual pumpage reports are due by March 31, and the **Consumer Confidence Report** is due by July 1.

Also enclosed is the document "2014 Monitoring and Reporting Requirements." This provides additional details about monitoring and reporting requirements. If you have any questions, please contact us by telephone or e-mail using the information below.

Adam Rosenthal, EQA
Lansing District Office
Office of Drinking Water and
Municipal Assistance
517-284-6644

Enclosure

cc/encl: Mr. Robert Bisnick, City Of Flint
Genesee Co. Health Dept.

2014 Monitoring and Reporting Requirements

Please Monitor Early: Collect samples early in the monitoring period (month, quarter, year) of the year indicated on the schedule. Bacteriological and partial chemistry samples should be collected close to the shipping time and sent overnight delivery to assure sample holding times are not exceeded (30 and 48 hour hold times respectively). We also recommend avoiding mailing bacteriological samples immediately preceding or following a holiday because samples tend to exceed the 30 hour hold time. When this occurs, a repeat sample must be collected as soon as possible upon notification.

If you use a private laboratory please report the results to us within the first ten days of the month following the month that you received the results. A list of certified laboratories is available on request. If samples are not collected as indicated on your monitoring schedule, you will incur a monitoring violation and may also be subject to a fine. For information on the fines policy, visit http://michigan.gov/deq. Click on Water, Drinking Water, Community Water Supply, and Administrative Fines (under Laws and Rules).

To receive credit for monitoring, you must include the **"WSSN"** (water supply serial number), the **"Site Code,"** and the **"County"** when you submit samples for analysis. Site codes are listed on your monitoring schedule.

Special Instructions If You Use The DEQ Laboratory: Bottles will NOT be mailed automatically. To order bottles, call the DEQ Laboratory at 517-335-8184 or download the form EQP 2301 *Requisition for Water Sample Units* from www.michigan.gov/deq. Click on Key Topics, Laboratory Services, Drinking Water, Obtaining The Necessary Sampling Units, and 'test list'. Please note that the DEQ laboratory is closed on most state holidays. The DEQ laboratory prices are subject to change without notice.

Special Instructions For Automated Partial Chemistry, VOC and TTHM Samples: These sample bottles must be cooled and preserved during shipment to the laboratory. If you use the DEQ laboratory, you will receive the ice pack, acid dropper (if necessary) and small cooler when you request the bottles. Samples must be preserved correctly to be used for compliance purposes. To avoid resampling follow instructions contained with the sample bottle. If you would like more information, contact the DEQ lab, at 517-335-8184, or contact this office.

Cyanide: Previously, supplies that chlorinated the water were waived from monitoring for cyanide. The U.S. EPA now requires all supplies to sample the entry point for cyanide.

UCMR3 Monitoring: You may have monitoring requirements in 2014 under the third Unregulated Contaminant Monitoring Rule (UCMR3). The U.S. EPA will contact you directly if your water supply is required to monitor in 2014. A list of laboratories certified to analyze the samples collected for UCMR3 is available at http://water.epa.gov/lawsregs/rulesregs/sdwa/ucmr/ucmr3/upload/lablist.pdf. Contact the U.S. EPA with questions.

Reminder if Lead and Copper Monitoring Due This Year: You must provide individual lead tap results to people who receive water from sites that were sampled, even if lead was not detected, within 30 days of learning of results. You must also send us a certification that you met all the delivery requirements along with a sample copy of the customer notice within 3 months after the end of the monitoring period. Water supplies that failed to distribute the Consumer Notice of Lead Results must include the following

statement in their CCR, "During the year, we failed to provide lead results to persons served at the sites that were tested as required by the Lead and Copper Rule." To download the *Lead and Copper Report and Consumer Notice of Lead Result Certificate* in Microsoft Word or PDF format, visit www.michigan.gov/deq. Click on Water, Drinking Water, Community Water Supply, and Reporting Forms (under Manuals, Forms & Brochures).

Annual Reports: Act 399 requires certain reports to be submitted to this office each year.

- The **Cross Connection Report**, due by March 31, describes the status of your local cross connection control program. Manufactured housing communities are exempt from this requirements until 2016.

  Each year, water supplies must submit a report regardless of whether a formal program has been implemented. If cross connections do not exist in your water system, indicate so on the report. Download the Cross Connection Report form from http://michigan.gov/deq. Click on Water, Drinking Water, Community Water Supply, Reporting Forms (under Manuals, Forms & Brochures). Instructions are included with the form.

- The **Annual Pumpage/Usage Report**, due by March 31, is required of water supplies that do not submit monthly operation reports.

  A summary of water pumpage and water use must be submitted by each water supply that does not submit a monthly operation report. To manage our natural resources, pumpage data are compiled to determine water use demands in Michigan. Download the Annual Pumpage/Usage Report form from http://michigan.gov/deq. Click on Water, Drinking Water, Community Water Supply, Reporting Forms (under Manuals, Forms & Brochures). Please be sure to indicate the appropriate units on the report (e.g. million gallons or gallons).

- The **Consumer Confidence Report**, due by July 1 to your customers, to your local health department and to this office.

  Electronic delivery methods may be used to distribute the CCR to bill-paying customers, provided they are direct. For more information on e-delivery, visit www.michigan.gov/deq. Click on Water, Drinking Water, Community Water Supply, Consumer Confidence Report Rule (under Laws and Rules).

If water is distributed from this plant in the next couple weeks, it will be against my direction. I need time to adequately train additional staff and to update our monitoring plans before I will feel we are ready. I will reiterate this to management above me, but they seem to have their own agenda.

Thank you,

Mike Glasgow
Laboratory & Water Quality Supervisor

Subject: Proposed Water Monitoring - City of Flint

Adam,

Good afternoon, I am contacting you in regards to possible changes in our monitoring for our change to full time operation out of the Flint river. I am expecting changes to our Water Quality Monitoring parameters, and possibly our DBP and lead & copper monitoring plan. Also, I am wondering about our MOR required testing. I know you have probably been in contact with Howard Croft, however I have not seen anything except the notes you or Prysby made on the last page of our 2014 monitoring schedule "that things were subject to change". Any information would be greatly appreciated, because it looks as if we will be starting the plant up tomorrow and are being pushed to start distributing water as soon as possible. As the acting F-1, I would like to make sure we are monitoring, reporting and meeting our requirements before I give the O.K to start distributing water.

Thanks,

Mike Glasgow

Adam,

Thank you for the quick response. I assumed there would be dramatic changes to our monitoring. I have people above me making plans to distribute water ASAP. I was reluctant before, but after looking at the monitoring schedule and our current staffing, I do not anticipate giving the OK to begin sending water out anytime soon. If water is distributed from this plant in the next couple weeks, it will be against my direction. I need time to adequately train additional staff and to update our monitoring plans before I will feel we are ready. I will reiterate this to management above me, but they seem to have their own agenda.

Rich, here's an update on the Flint blood lead testing. Latest totals are 39 people with elevated levels out of 1,836 tested. If my math is right, that's about 2.1 percent.

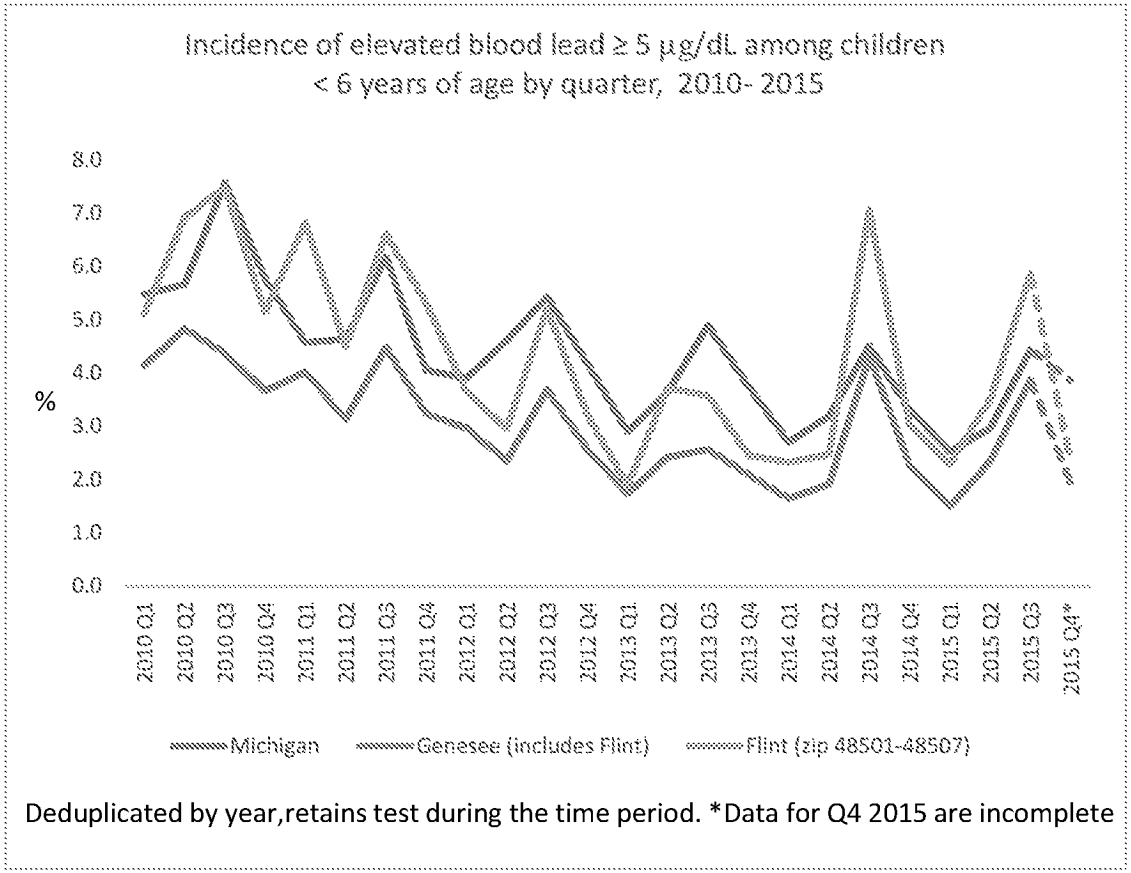
Michigan Department of Health and Human Services (MDHHS)
Blood Lead Level Test Results for Flint Zip Codes 48501-48507
Genesee County, and the State of Michigan
Summary as of December 4, 2015

Executive Summary

This report is generated by MDHHS to track Blood Lead Level test results in Flint, Michigan.

- Counts on this report include both capillary and venous blood tests. People who have had multiple tests are counted only once per year.
- Since 10/1/2015, an additional 1,836 people have been tested in Flint.
- Continued testing efforts by Genesee County Health Department, MDHHS and local medical personnel have identified 27 children with blood lead levels greater than or equal to 5µg/dL (micrograms per deciliter) since 10/1/2015.
- 2.4 percent of the children younger than 6 years old tested since 10/1/2015 have had blood lead levels greater than or equal to 5µg/dL.
- Additional testing is ongoing. Counts will vary as new results are added.



Deduplicated by year,retains test during the time period. *Data for Q4 2015 are incomplete

** Data for Quarter 4 of 2015 are incomplete and subject to change*

MDHHS releases latest round of Flint blood lead level data

LANSING, Mich. – The Michigan Department of Health and Human Services today issued its newest summary report on lead testing in Flint. According to preliminary data, 39 of 1,836 adults and children tested had elevated blood lead levels since Oct. 1.

"As testing continues, our focus remains on helping families reduce all potential exposures to lead," said Dr. Eden Wells, MDHHS chief medical executive. "We are working closely with the Genesee County Health Department to provide information and offer tools in the community, and encourage families to explore the resources that are available to them."

Both capillary and venous blood tests are included in the report, and people who have had multiple tests are counted only once. Tests and their results cover the time since the state action plan was put in place on Oct. 2, and capture the number of elevated blood lead levels greater than 5 micrograms per deciliter.

MDHHS is working closely with local partners to offer resources and distribute important lead testing and prevention information. Additional state funding has allowed for Genesee County Health Department (GCHD) nurses to work with families when an elevated blood lead level is detected. These families can also choose to have the nurse coordinate an environmental health investigation in their home to identify lead exposures, which could be lead from paint, soil, plumbing, and other sources.

To support these efforts, the state is coordinating with its Medicaid health plans and provider communities on enhanced screening and testing. In addition to mandated testing at ages one and two for the Medicaid population, MDHHS has recommended blood lead testing for any child younger than six years of age in Flint who has not previously been tested. The state, in coordination with GCHD, developed and issued a Health Alert Network (HAN) notification for local providers to help ensure consistent messaging and protocols among primary care providers.

Free water filters and replacement cartridges are still available to Flint residents. For a full list of locations and hours of distribution, or to view the full blood lead level report, visit www.michigan.gov/flintwater. The summary will be updated as more data becomes available.

To help residents properly install water filters, and to demonstrate how to replace the original when it expires, MDHHS has created an instructional video on its YouTube channel. For this and other updates, visit www.michigan.gov/flintwater.

Dr. Mona:

It was a real pleasure meeting you and thank you for the incredible work you are doing on behalf of the children in my native city. We are committed to working with you on all fronts to make the way forward the best it could be. Also, I want to let you know that I did follow up on whether the former DEQ department leader was still working on water related issues. To my surprise you were correct. When additional schools needed to be tested she was added to help with the workload. I am told she did not supervise, conclude on testing, or anything of that nature but they needed help and the director of DEQ did approve a limited role for her. He is going to be meeting with the TF tomorrow to discuss actions underway. I apologize for asserting otherwise as I had not been aware.

Please call me if I can assist in any way.

Rich

Mr. Baird and all the other guys,

It was a pleasure meeting everyone and a privilege to present to you all. As I said, we have an incredible and unique opportunity to mitigate the impact of this population-wide exposure. If we act now, proactively, we can buffer our kids from the life-altering impacts of lead poisoning.

Flint has many claims to fame (we put the world on wheels, we birthed Mr. Baird!, etc); and now, with your leadership, we can continue to build generations of strong, smart, and healthy children.

If I can be of any further assistance, please don't hesitate to contact me. Email or cell [redacted]

Thanks again, Mona

When: Monday, December 14, 2015 11:00 AM-12:00 PM.
Where: Governor's Conference Room, 2nd Floor Romney Building, 111 S. Capitol Ave., Lansing, MI 48933

Good Morning,

This is to confirm the meeting with Rich Baird on **Monday, December 14** at **11:00 a.m.** in the Governor's Conference room, second floor Romney Building, 111 S. Capitol Ave. Lansing, MI 48933.

We are located at the George W. Romney Building, 111 S. Capitol Avenue, Lansing. The Romney Building is located directly across the street (Capitol Avenue) from the Capitol Building. There is some metered parking around the building. The closest parking facility is one block south at the corner of Capitol Avenue and Allegan Street (enter the parking facility from Capitol Avenue). https://www.parkme.com/lot/93032/tower-parking-ramp-lansing-mi

You will also want to have a picture I.D. handy for security in the Romney Building. Please let security know who you have a meeting with, they will call me and then send you up to the second floor.

Please let me know if you have any questions.

Thank you!

> **Subject: RE: Edwards Report Response**
>
> The Michigan Department of Health and Human Services has consistently provided information regarding blood lead levels in the city of Flint.
>
> When initially looking at the citywide and county elevated blood lead level numbers, the increase appeared to be consistent with the routine seasonal fluctuation seen in the summer months. It wasn't until the Hurley report came out that our epidemiologists took a more in-depth look at the data by ZIP code, controlling for seasonal variation, and confirmed an increase outside of normal trends. As a result of this process, we have determined that the way we analyze data needs to be thoroughly reviewed. Additionally, Gov. Rick Snyder has created a Flint Water Task Force to review all city, state and federal responses and actions and is expected to make recommendations moving forward.
>
> Our department is focused on ensuring that appropriate case management and follow up is occurring in Flint. Summary reports outlining blood lead level testing are posted online on a bi-weekly basis, and we are working closely with local partners to fulfill data requests as we receive them.
>
> Regarding the FOIA, Mr. Edwards received all of the requested documents, with personal information redacted, on Friday, December 18.

DRAFT: FLINT WATER PLAN

Thursday, Dec. 24: Gov. calls Karen Weaver to set up a meeting

Talking points:

I've read the draft of a report from the state's Office of the Auditor General and I've been briefed on the task force's progress in its ongoing investigation.

I want to work together with you to get this problem solved. As partners, we can get resources in place more quickly.

I want to assure you this isn't a political move on my part – I'm a problem solver and I want to make this right. I'm truly sorry that all this has happened.

It sounds like you have a block of time available on the morning of Jan. 7. Would you be able to come to Lansing so we could talk between 9-10 a.m.? If so, I'll make sure Beth Emmitt, my scheduler, confirms with Maxine Murray.

Saturday, Dec. 26, or Monday, Dec. 28: RB and others start organizing action plan

- RB talks to Nick Lyon and Dan Wyant about messaging changes and embedding a healthy water communications team – potentially Mel Brown and Ron Leix. This duo would work with those departments' respective communications teams, but also free up those teams to work on other issues not related to Flint water. The healthy water team would be the point people for anything concerning Flint water and lead issues, and will have the authority to assist Harvey Hollins, cut red tape for researchers who want access to DHHS and DEQ records, respond to media requests, edit and/or write press releases in conjunction with the Governor's communications team and more.
- RB explores with Dan whether the in-house choice to take over the Office of Drinking Water and Municipal Assistance is the appropriate choice.
- RB or someone else talks to Steve Arwood and Col. Etue about "borrowing" Mel and Ron. We need to get the ball rolling. I'd love to put them out there at the January presser saying, "These are the folks who will answer questions and provide information to media and stakeholders about the Flint water crisis."

Monday, Dec. 28, or Tuesday, Dec. 29: Harvey Hollins reaches out to researchers

Harvey Hollins reaches out to Marc Edwards and Dr. Mona Hanna-Attisha to serves on a task force that includes the state and independent water experts who have worked on Flint water issues. The purpose is to share information, compare results and track how those results were reached to ensure best practices and accurate reporting.

Talking points for Hollins in his ask of Edwards and Hanna-Attisha:

- Your research has been eye opening and we're hoping you'll be willing to join an effort to ensure Flint's water is safe.
- We'd like you to sit down with state epidemiologists and other researchers so you can discuss lead levels and other issues related to the Flint water crisis. There have been variances and we want to be as accurate as possible.

- We want you to have as much access to our data as is possible under HIPPA laws so we can determine the extent of the problem.
- We want the team to brainstorm ways to get Flint's water back to safe levels for drinking, and to help families learn how they can mitigate any effects from lead.
- Once the water is safe, we want your help in showing the people of Flint that their water is drinkable.

In addition, Capt. Chris Kelenske explores ways to help Flint, including the idea of an imminent danger declaration. Has MSHDA explored HUD grants to help families who need to upgrade their service lines?

Tuesday, Dec. 29: Governor releases statement on Flint water

"I've been briefed on the recent meeting of the task force studying the Flint water situation and I've read the report from the Office of the Auditor General on the processes used by DEQ to monitor Flint water.

"While DEQ followed many of the appropriate protocols, it's not surprising at this point to learn that corrosion controls should have been maintained when switching from Detroit to Flint River water. I've talked with DEQ Director Wyant and have told him I want Michigan to be the state that is known for the safest water in the nation.

"I want to thank the task force for keeping me apprised of their continuing investigation. As they uncover more facts, it's clear to me we can do better. The report may take another month or so, but if we need to make changes more swiftly, I plan to take immediate action.

"The bottom line is we'll take responsibility for our part in Flint's water crisis. Moving forward, I vow to make sure that Flint citizens will have safe drinking water. And I'm so very sorry that this happened.

"But I know an apology isn't enough. We've already allocated $10 million to test the water, distribute water filters, mitigate high lead levels in affected families and inspect plumbing in schools and health facilities.

"I called Flint Mayor Karen Weaver last Thursday, and we're going to sit down in the next week to discuss other ways the state can best offer help.

"What happened in Flint is inexcusable. I want to assure the residents of Flint that we will work hard to make things right."

Monday, Jan. 4 – Personnel changes

Dave Murray talking point: "I can't speak to the specifics, but yes, there have been changes in personnel at the DEQ. We'll announce soon who you can contact to get information about Flint's water situation. For now, you can call me."

Thursday, Jan. 7 – Meeting between the Governor and Mayor Karen Weaver

Governor's talking point: "We had a great meeting today. Mayor Weaver had some great ideas that we want to flesh out. We'll announce soon how we plan to move forward in solving the problems with Flint water."

Possibly Jan. 11 or 13 - Press conference with the Governor and Mayor Weaver to announce action plan

Also in attendance: Point person Harvey Hollins, Directors Nick Lyons and Dan Wyant, Capt. Chris Kesenske, Healthy Water communications team Mel Brown and Ron Leix, Sen. Jim Ananich, Rep. ???, Marc Edwards?, Dr. Mona Hanna-Attisha, who else?

Talking points:

Weaver announces more state money to help Flint and how she looks forward to working with Harvey Hollins.

Harvey talks about how he'll be the boots on the ground in Flint and will coordinate with Lansing resources.

Gov. Snyder reiterates his sadness over the situation and says it calls for extraordinary measures, which the state is prepared to make:

- The state will form a team of independent and state water and lead level experts to go over the various results. The team will include Virginia Tech's Marc Edwards and Hurley Hospital's Dr. Mona Hanna-Attisha, along with state epidemiologists, DEQ experts, etc.
- The team will have full access to DEQ and DHHS records.
- Mel Brown and Ron Leix will be the Healthy Wat4er team and serve as point people for all things Flint water and lead levels. Their roles will be explained.
- The state is exploring the best options to provide more help for Flint, including an imminent danger declaration, HUD community block grants for infrastructure improvements, etc.
- We will document what we learn from this experience to help other cities with water/lead issues.

Subject: Re: Draft Document for Review - Not for Distribution - Taking Action on Flint Water - Response Due by Monday, January 4, 2016, COB

I have put Comments/Questions/Suggestions in [ ]...

Draft –Not for Distribution 12/28/15

TAKING ACTION ON FLINT WATER

[I would start off with an apology..."Among the things our citizens have a right to expect from their government is clean, safe water. In Flint's case, government failed them on many levels. As the Chief Executive of the state, I apologize for these failures and am absolutely committed to making things right. I would ask that all of our leaders at the local, state and federal level, work with me to solve the immediate problems and put in place long term measures to monitor and address the consequences from exposure. I also want to thank Dr. Mona Attisha Hannah and Dr. Marc Edwards for their diligence in making sure I understood the severity of the problem.]

• Flint deserves safe drinking water.

• The issues around Flint's drinking water represent the challenges of aging infrastructure.

• As Governor, I am committed to addressing the issue.

• Lead exposure is a serious issue.

• I appreciate those who have brought attention to this issue.

• We are committed to safe drinking water and to working in partnership with the city of Flint and the U.S. EPA.

• We must learn from what happened in Flint.

• **In October, I announced a ten point action plan to address lead exposure in Flint.**

• Today, I am outlining additional actions to make sure the public health is protected in Flint and elsewhere in the State of Michigan.

• I am asking for changes in order to see that the Michigan Drinking Water Program becomes a national leader in public health protection.

On October 2, 2015 the Flint Water Action Plan was announced. With the help of the Michigan Legislature and the Mott Foundation, we have taken significant action to address the issue.Actions include:

• Switching back to the Great Lakes Water Authority/DWSD water supply (October 16, 2015)

• Provided water filters to residents of Flint. (DHHS to provide update) [Distribution has been a problem--are we addressing it?]

• Testing all Flint schools, preschools and day cares. Summary of results to date.(George to provide)

• Expanded health exposure testing of individual residences. Summary of results to date. (Nick to provide)

• Offer water testing at no cost to Flint residents to assure safe water. Summary of results to date. (George to provide)

• Expedite optimizing corrosion control in the Flint drinking water system. Summary of date completed. (George to summarize)

• Utilize the "Safe Drinking Water Technical Advisory Committee." To ensure the best technology, practices and science are being utilized; national experts have been assembled to provide technical advice. [Will you include Dr. Mona? Larry Reynolds? Mark Edwards?]

• Accelerate water system improvement to address replacement of lead service lines. We are working with the city of Flint and our Congressional delegation on a lead service line replacement plan.

• Working to expedite the completion of the Karegnondi Water Authority.

• Expand a lead education program.
(DHHS to provide update)

• Dr. Eden Wells was named as the Flint Drinking Water Public Health Advisor to ensure safe drinking water.

[Dr. Larry Reynolds was named to the Flint After Action Task Force].

In addition to the announced Flint Action plan, I am calling for additional actions to be taken.

• Recently appointed Harvey Hollins to serve as my administration's point person to coordinate ongoing activities and partner with the city of Flint.

• Asking the DEQ to develop a statewide drinking water school testing program.

• Asking for changes in the Michigan Drinking Water Program in order for it to be recognized as a national leader in public health including:

- o New administrative leadership.
- o Creation of corrosion control expertise.
- o Expanded statewide testing.
- o Improved testing protocols.

• The creation of a health fund for children affected by lead exposure.

• Calling on the Legislature to work with my administration and stakeholders to develop a Strategic Water Fund to address Michigan's long term safe water and water quality infrastructure needs. [This can't get lost. Need more to educate people that our infrastructure is old, that the average city of 50,000 or more likely requires $$$ in remediation. At some point the anti corrosive treatment is not likely to be sufficient.]

• I will look to implement additional recommendations of the Flint Water Advisory Task Force, and I appreciate their leadership on this issue.

Subject: Letter to the Governor

Rich:

I want to give you a heads up: the Task Force will be sending a letter to the Governor tomorrow am that states the primary---not the only, but certainly the primary--responsibility for the Flint Water crisis lies at the feet of the MDEQ. We will address three failures: (1) regulatory culture in the Office of Drinking Water and Municipal Assistance; (2) inappropriate and unacceptable public response; and (3) inadequate application of the Lead and Copper Rule.

We address the critical and urgent need to establish responsibility and hold individuals accountable as soon as possible.

It is our intent to send the letter via email tomorrow, with a public release Wednesday am...

The Task Force--both individually and collectively--feel strongly about the need for us to be on record now rather than later.

Don't hesitate to contact me if you have any questions.

Dear Governor Snyder:

The Flint Water Advisory Task Force, which you appointed on October 21, 2015, has devoted considerable effort and countless hours to our review of the contamination of the Flint water supply: what happened, why it occurred, and what is needed to prevent a recurrence in Flint or elsewhere in the state. We have also been assessing ongoing mitigation efforts to help assure that short- and long-term public health issues and water management concerns will be properly addressed to safeguard the health and well being of the Flint community.

Shortly after we began our work, we recognized the immediate need for better coordination of the state's response to the ongoing public health issues in Flint, and for assignment of a single person to provide this coordination. We addressed these concerns in a letter to you on December 7, 2015, and you responded with immediate adoption of these recommendations. We thank you for the commitment your response demonstrates.

In our continuing efforts, we have now interviewed numerous individuals at state and local levels; reviewed many documents, articles, and emails; and deliberated repeatedly as a group. Both individually and as a group, we have visited Flint several times during the past several weeks to meet with citizens, public health officials and healthcare providers, individuals who have water management responsibilities at the city and county levels, and other public officials.

It is clear to us, particularly as we listen to the people of Flint, that it is both critical and urgent to establish responsibility for what happened in their community and to ensure accountability. This is a first step in a long process to re-establish the trust they no longer have in their government and the agencies whose responsibility it is to protect their health. It is urgent because this deep distrust of government continues to compromise the effective delivery of protective services designed to address ongoing public health issues. It is for these reasons that we are sending this letter at this time.

We believe the primary responsibility for what happened in Flint rests with the Michigan Department of Environmental Quality (MDEQ). Although many individuals and entities at state and local levels contributed to creating and prolonging the problem, MDEQ is the government agency that has responsibility to ensure safe drinking water in Michigan. It failed in that responsibility and must be held accountable for that failure.

The Safe Drinking Water Act (SDWA) places responsibility for compliance with its requirements on the public water system. In this instance, the City of Flint had the responsibility to operate its water system within SDWA requirements, under the jurisdiction of the MDEQ. The role of the MDEQ is to **ensure** compliance with the SDWA through its regulatory oversight as the primary agency having enforcement responsibility for the Flint water system.

The MDEQ failed in three fundamental ways.

<u>Regulatory Failure</u>

We believe that in the Office of Drinking Water and Municipal Assistance (ODWMA) at MDEQ, a culture exists in which "technical compliance" is considered sufficient to ensure safe drinking water in Michigan. This minimalist approach to regulatory and oversight responsibility is unacceptable and simply insufficient to the task of public protection. It led to MDEQ's failure to recognize a number of indications that switching the water source in Flint would—and did—compromise both water safety and water quality. The MDEQ made a number of decisions that were, and continue to be, justified on the basis that federal rules "allowed" those decisions to be made. ODWMA must adopt a posture that is driven not by

this minimalist technical compliance approach, but rather by one that is founded on *what needs to be done to assure drinking water safety.*

A culture change must occur within ODWMA. It must be driven by a mission that is aspirational regarding the role of the MDEQ in ensuring the safety and the quality of Michigan's drinking water. We believe, and have expressed to MDEQ Director Dan Wyant, that as a Great Lakes State, Michigan should aspire to have the safest drinking water in the nation, rather than merely aiming for technical compliance with regulatory requirements.

Failure in Substance and Tone of MDEQ Response to the Public

Throughout 2015, as the public raised concerns and as independent studies and testing were conducted and brought to the attention of MDEQ, the agency's response was often one of aggressive dismissal, belittlement, and attempts to discredit these efforts and the individuals involved. We find both the tone and substance of many MDEQ public statements to be completely unacceptable. In a real way, the MDEQ represents the public, including the very individuals it treated dismissively and disrespectfully in public statements. We recognize that the agency might disagree with the opinions of others on a variety of issues, including testing protocol, interpretation of testing results, the requirements of federal law and rules, and other matters. What is disturbing about MDEQ's responses, however, is their persistent tone of scorn and derision. In fact, the MDEQ seems to have been more determined to discredit the work of others—who ultimately proved to be right—than to pursue its own oversight responsibility.

Failure in MDEQ Interpretation of the Lead and Copper Rule

The federal Lead and Copper Rule (LCR) is central to what happened in Flint, because that rule, at least theoretically, is designed to prevent lead and copper contamination of drinking water. The federal LCR calls for "optimized corrosion control treatment," which the MDEQ did not require in the switch to the Flint River. Prior to the switch, MDEQ staff instructed City of Flint water treatment staff that corrosion control treatment (CCT) was not necessary until two six-month monitoring periods had been conducted. The need for CCT would be evaluated after the results from those two monitoring periods were reviewed. The decision not to require CCT, made at the direction of the MDEQ, led directly to the contamination of the Flint water system.

The MDEQ seems to have taken different positions on whether it faithfully followed the LCR in the Flint situation. It first maintained that it followed the LCR, then stated that it did not follow the rule properly, and most recently claimed that a federal memorandum issued by the US EPA in early November 2015 suggests that the original MDEQ interpretation was possibly correct.

We are not convinced. Even the MDEQ's latest interpretation of the US EPA's November memorandum is overly legalistic and misunderstands the intent of the LCR, which is to minimize risks of lead and copper exposure for human health.

We believe ODWMA's single-minded legalistic focus is the heart of the problem, and it is part of the "technical compliance" culture described above. ODWMA should not be basing its actions solely on a legally possible interpretation of the LCR. It should be focusing on how to protect Michigan's citizens from lead in drinking water.

We met with MDEQ Director Wyant on December 16, 2015, to discuss these issues, as well as many others. We note his substantial agreement with many of our conclusions, particularly as it relates to the regulatory failure and the abysmal public response of his agency. It is our understanding that he has drawn similar conclusions in his own evaluation of the MDEQ's role in the Flint water crisis. At the same

time, it was disappointing to hear his weak defense of the CCT decision based on the EPA's November 2015 memorandum.

We are not finished with our work. Other individuals and entities made poor decisions, contributing to and prolonging the contamination of the drinking water supply in Flint. As an example, we are particularly concerned by recent revelations of MDHHS's apparent early knowledge of, yet silence about, elevated blood lead levels detected among Flint's children. We also feel it important to further review local government decision processes under emergency management. Our final report will highlight and discuss those concerns, among many others, to provide some context to a comprehensive series of recommendations. **As stated earlier in this letter, however, we believe that establishing responsibility is a critical and urgent need, and one that should not wait for our final report in 2016. Individuals and agencies responsible must be held accountable in a timely fashion.**

It is our hope that the heightened awareness of the dangers of lead poisoning can be an opportunity to make Michigan safer, particularly for its children. Drinking water must be recognized as a potential source of health risk exposure when water lines and fixtures containing lead are disturbed or compromised. Proper testing, not only in high-risk areas but also in facilities serving children (e.g., schools), must be considered. Facilitating long-term financing of a model public health program, and also replacement of lead-containing water service lines and fixtures, would enable Michigan to realize a positive lasting legacy from the tragedy of the Flint water crisis. Our final report will address some of these issues.

The City of Flint's water customers—fellow Michigan citizens—were needlessly and tragically exposed to toxic levels of lead through their drinking water supply. They deserve a commitment to properly assess responsibility and ensure accountability. They also deserve a commitment to needed mitigation in both the short and long term. The Flint water crisis never should have happened. Having failed to prevent it, state government should coordinate a sustained, public-health-focused response to remedy, to the fullest extent possible, the impacts on the Flint community.

Respectfully yours,

Flint Water Advisory Task Force:

Subject: Thoughts on Next Steps
Attachments: IAP Flint Water 2015-12-29.pdf

Below are some of my initial points to assist with the EO creation. I have not been able to review the local Incident Action Plan so that could change some of the below but my guess is that it will add objectives to it. I attached the IAP from Flint in case it did not go through earlier.

- Before anything can be accomplished, coordination between all parties must be established. We must establish a routine information process between all parties.
- Other avenues of funding must be pursued including federal grants and legislative appropriations.
- While the Emergency Management Act or Stafford may be the best mechanism to fix the issues in Flint, portions of the Emergency Management Act outlining management of events are applicable and should be implemented (e.g. Local emergency operations plans/emergency operations guides as well as emergency operations support plans).

Action Plan

- If a request for a Governor's declaration is received from the county, evaluate the request and provide a recommendation whether to issue a declaration.
- Establish an interagency workgroup comprised minimally of DHHS, MDEQ, and MSP. Consideration should be given to including Civil Rights. Additional agencies/stakeholders who can assist with accomplishing the action plan may be needed. Personnel should be goal oriented and be able to work toward accomplishing the Incident Action Plan created by the state in a timely manner.
- If an EO and/or an Interagency workgroup is created, it must compliment and not replace the current system under the Emergency Management Act.
- The workgroup should utilize the National Incident Management System and Unified/Incident Command as appropriate.
- Establish routine communications protocols at the operational, executive, and legislative levels as determined appropriate.
- Establish interagency workgroup objectives using the following as a starting point.
    1. Determine and convey acceptable standards for potable water.
        - Identify needed remediation.
        - Convey the remediation plan objectives to interested parties.
        - Implement the plan.
    2. Determine health impacts for the impacted population.
        - Identify treatment methods.
        - Convey the treatment plan objectives to interested parties.
        - Implement the plan.
    3. Establish a public information protocol to effectively inform the community of the situation and actions taken.
        - Identify existing Public Information outlets within the city, county, and state.
        - Determine official information flow and approval of information.
        - Convey to interested parties.
    4. Assess the status of the infrastructure and determine feasible actions to upgrade the water system.
        - Determine current state of the infrastructure.

- Develop priorities, costs, and potential funding sources for infrastructure upgrades as part of a long term recovery plan.
- Implement the plan.

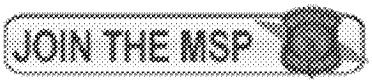
"A PROUD tradition of SERVICE through EXCELLENCE, INTEGRITY, and COURTESY."



CITY OF FLINT

INCIDENT ACTION PLAN

STATE OF EMERGENCY

Objectives:

To provide short term relief and long term solutions in addressing the man-made emergency of increased lead levels in the City of Flint (the "City") water system resulting from the switch to Flint River as the City's water source as well as the threat to public health related to elevated blood lead levels in Flint residents, without interruption of the provision of public safety and other essential public services. Due to the fluidic nature of emergencies and the complexity of the City of Flint's declared emergency, this plan serves as a framework and may be altered as the emergency develops.

The Response Framework

The purpose of this plan is to organize efforts on behalf of the city to assess the extent of the City's infrastructure needs and risks to public health, provide immediate relief to those who are at risk, and establish long term solutions. In addition, the city must ascertain what immediate relief and long term solutions the City is capable of implementing based on what resources are available. For any activities that are beyond the resource capacity of the City, external sources of funding, supplies, and manpower must be sought.

There are a number of steps that must be taken in accordance with the Flint Emergency Support Operations Plan (SEOP), in order for the City to be compliant with the Genesee County Emergency Action Guidelines. These include the activation of the Incident Management Team, the Emergency Operation Center, and the sharing of essential documents with the County, including this plan. Information must also be shared by the City's Public Information Officer on a regular basis, as required by the SEOP.

This plan calls for the provision of immediate relief to those at risk in our community. Special consideration must be given to residents who belong to underserved groups, such as those who are homebound, undocumented, in poverty, etc. Additional consideration must also be given to the equitable provision of services throughout our community in order to equally protect the health and safety of every member of our community.

Implementation of this plan is to be conducted by the Incident Management Team, which will monitor the effective delivery of goods and services in order to address the conditions of the emergency.

Understanding the Issue:

October 1, 2015, the Genesee County Health Department issued a Public Health Emergency after elevated blood-lead levels were found among children in the City of Flint. This incident correlates with elevated levels of lead found in the City's drinking water after the City switched water sources in April of

2014 to the Flint River. The scope of this problem appears to be limited to Flint City Water Customers and their dependents. Public agencies from several levels of government, as well as charitable, nonprofit organizations have partnered with the City to provide immediate relief to Flint residents, including the expansion of health services, the provision of bottled water and NSF rated water filters. The city is also seeking long term infrastructure improvements to eliminate lead and other contaminants from the water system.

Gov. Rick Snyder appointed a task force to review "actions regarding water use and testing in Flint" and to make recommendations for future guidelines: Members of the state task force are Ken Sikkema of Public Sector Consultants, Chris Kolb of the Michigan Environmental Council, Dr. Matthew Davis of the University of Michigan Health System, Eric Rothstein of the Galardi Rothstein Group and Dr. Lawrence Reynolds of Mott Children's Health Center.

In an effort to halt the further escalation of this crisis, the City returned to receiving its water from the Detroit Water and Sewerage Department (DWSD) on October 16, 2015. Since that time, additional corrosion control program has started, estimating a reduction of lead levels over the next six months. In light of these efforts, concerns surrounding the quality of water and health of the residents persist to the point that Mayor Karen Weaver declared a State of Emergency on December 14, 2015 so as to resolve this crisis once and for all.

The current challenge facing the City is providing immediate relief and long term solutions of the quality of the water and health of residents while the City remains in a financially critical condition. It is hoped and expected that higher levels of government recognize this emergency as it pertains to the condition of the City's infrastructure and health of its residents, and do all things necessary to assist the City in the provision of relief and the execution of capital improvement projects that will eliminate the causes of this emergency.

Enhancing Understanding:

Information Collection

Essential Elements of Information (EEIs) can be qualified as the City's water tests containing lead results, the verification of lead water lines (both public and private), and health information. Water testing is performed by the City's water plant in cooperation with the MDEQ. The verification of lead water lines is being handled by University of Michigan Flint, who is currently digitizing the City's water line information and PSI Engineering, who is initiating the effort to verify lead lines by excavating an initial 150 residential lines. This information allows the Incident Management Team to assess the current condition of the emergency by way of determining the water quality and the condition of the water distribution infrastructure.

Information Analysis

The City has sought partners to assist in the analysis and attenuation of complex data. Wayne State University's center for Urban Studies has agreed to assist the City in its efforts to document and track lead water lines, water test results, and filter distribution with geographic information system (GIS) technology. This allows for easily updateable, digestible information to be presented to officials.

Assessment of Impacts

The City will need assistance in determining the total cost of damage done to the public health and infrastructure. As of now, only portions of this damage are visible.

PSI is providing some assistance by excavating 150 residential water lines to verify that they are comprised of lead. This is an initial step, but not enough. More resources will be needed to continue this process.

Continuous Situational Awareness

It is important that the Emergency Management Team receive continuous information regarding water testing results, lead water line numbers, and filter distribution information in order to gain a realistic and current perspective. Much of his information is currently available on the City's website (cityofflint.com) and more is added each week by the PIO team.

Actions taken in Response to the Emergency

Activation of the Incident Management Team

Upon the declaration of Emergency by Mayor Weaver, the Support Emergency Operations Plan (SEOP) was activated. The SEOP calls upon the Incident Management Team to generate the Incident Action Plan (IAP. Each member of this team serves a specific function as it relates to addressing the causes and effects of the emergency. The Emergency Management Team roster can be found in the SEOP on page 3, with a list of alternates on page 4 in case the need for succession arises.

Emergency Operations Center

The Emergency Operations Center (EOC) must be activated upon the declaration of a State of Emergency by the Mayor. This center is required by the SEOP and serves as a nerve center for the Incident Management Team. Here, emergency relief efforts are coordinated by key members of the Incident Management Team. In this case, these relief efforts consist of the distribution of water filters at

City Hall and community events, the distribution of bottled water throughout the city in conjunction with the efforts of community partners, and assisting with the circulation of water testing kits throughout the community. The EOC will also be monitoring and managing the inventory of relief supplies, such as water filters and bottled water.

According to the SEOP, the EOC must establish an incident tracking system. This system will serve as a work plan for the management of the emergency. In addition, it is essential that the IMT record water testing results, lead water line location information, and information about the distribution of water filters and bottled water all in one place so that information is readily available for the Incident Management Team. This information will also be sent out to the public and media in the form of daily regular updates by the City's PIO.

Communication

The EOC maintains a telephone system that exists to intake questions about relief efforts and to organize relief logistics. It is open from 8am to 5pm, Monday through Friday. A voicemail system and eventual email system will exist to handle requests and inquiries that occur outside of the normal operating hours. This system will be constructed by the City's IS department.

Public Awareness and Education

1. **Emergency Alerts and Updates:**
   The City's Public Information Officer will make available information as it relates to the emergency in the form of press releases, emails, and physical documents. Daily updates containing information on the distribution of water filters, bottled water, water testing, blood lead testing, and other relief efforts will be available on the City's website for the public to view. Information will be available at City Hall for residents.

2. **Joint Information Center:**
   The City's PIO will establish a joint Information Center that is organized to coordinate the efforts of multiple agencies to communicate with the public. This includes the circulation of joint press releases, public health information, educational materials, and updates relating to the State of Emergency. This committee is comprised of public information officers and public relations personnel to coordinate efforts to keep the public updated and informed. Regular updates to the media regarding events and progress will be made as news develops.

   The US EPA has offered assistance in the form of Public Information support. Additional support in this area has been provided by the Michigan State Police.

3. **Education:**
   Many government agencies and philanthropic organizations are already distributing information regarding the effects of lead on public health. It is important that the City assist in these efforts so vital information and knowledge is presented to all members of the community. The goal is to continue to eliminate misunderstandings and incorrect information as it relates to reducing lead in drinking water, pursuing medical help, and maintaining a healthy diet to reduce lead absorption in the body. Lead education is currently being performed by the Genesee County Health Department, the Michigan Department of Health and Human Services and Medical community at-large.

Assessment of Social Needs

In order to effectively and equitably provide immediate relief to Flint water customers, the City must take into account many of the socio-economic needs and limitations of the community. Some residents cannot get to City Hall for a water filter. Some residents do not have internet access. Literacy or a language barrier may also pose significant obstacles to the effective distribution of educational information and relief to those in need. These will be continuing challenges facing the community. At present these are the resources the City has available to mitigate some of those challenges.

Logistics

Logistics are being coordinated by the City Emergency Management Team's City's *Chief Logistics Officer*, who is the City Administrator. The CLO is responsible for the coordination, procurement, and transportation of goods and services, which is essential for effective implementation of the response plan.

Fixed Distribution Points

There are several locations throughout the city where residents may acquire a water filter. These locations are:

Flint City Hall
1101 South Saginaw, Flint MI 48502

Genesee County Community Action Resource Department (GCCARD)
601 North Saginaw, Flint MI 48502
and
2727 Lippencott Blvd, Flint MI 48507

Michigan Department of Health and Human Services
4809 Clio Road, Flint MI 48504
and
125 E. Union Street, Flint, MI 48502

Activation of Ward Distribution Centers

Each of the nine wards will have activated distribution centers that are primarily managed by City Council Members or their designees.

Flint City Council – Water Distribution Sites

7	Monica Galloway	Brennan Community Center	1301 Pingree Avenue
8	Vicki VanBuren	Flint Southwestern Academy	1420 W. 12th Street
9	Scott Kincaid	Dort Mall Police Service Station	3600 S. Dort Highway

Mobile Distribution Centers

With the help of transportation agencies, like the Metro Transit Authority (MTA), meals on wheels, and GCCARD, the city can help establish mobile distribution centers and delivery systems that can provide water filters, bottled water, and nutritious foods, among other types of relief accompanied by educational materials to neighborhoods and to homes of people who experience limited mobility.

- Mass Transportation Authority-MTA bus passes: Assisting residents with bus passes to improve their mobility will increase their chances of receiving help. Transportation services will also improve residents' access to medical care.
- MTA-Your Ride mobile distribution:
    - Estimated Costs: $25 per hour to deliver water and filters to homes throughout the City.

Problem 1. Public Health Emergency

The first objective in addressing this emergency is reducing, and eventually eliminating, the danger to public health. As City water coming out of faucets continue to contain lead, and copper and other

harmful contaminants exceeding government guidelines and regulations, it poses a risk to the people of our community. Preventative measures must be taken to avoid the effects of toxicosis that are difficult if not impossible to completely reverse.

As far as preventative measures are concerned, education, water filters, and bottled water must be provided to every household in the City in order to reduce the chances of lead exposure, especially to our most vulnerable members of the community. If lead exposure has occurred, resulting in elevated blood lead levels, immediate and sustained medical attention must be available to those affected. Health services must be expanded in the area to accommodate increased numbers of case loads and specialized care regarding lead poisoning and its effects.

Immediate Relief for Public Health:

1. Prevention: Education, water filters and replacement cartridges, free water testing, and bottled water must be available to everyone.
2. Access to nutritious food that reduces the risks of lead absorption by the body. The City can coordinate activities with the County Health Department

Long Term Solutions: Maintaining Public Health and Coping with Lead Exposure

1. Work closely with the Genesee County Health Department and Michigan Department of Health and Human Services in order to provide sustainable care and monitoring of children exposed to lead. This care must be available for them for several years-preferably several decades.
2. Support and education for primary care providers regarding aggressive long-term neurodevelopmental screening and testing.
3. Improved access to developmental and behavioral (DBP) specialists, pediatric psychologists, pediatric psychiatrists.
    a. Pre-emptive referral to mental health/ toxic stress screenings.
    b. Support capacity building and or incentivize recruitment to allow Genesee health system (CMH) to build this capacity which is currently needed and lacking.
4. Increase recognition and education regarding trauma informed care, social determinants of health (SDOH).
5. Expand State funded Genesee Health System (CMH) services.
    a. Infant mental health (30 day capacity)
    b. Child case management
    c. Home based services
    d. Trauma informed care- trauma focused CBT

Problem 2. Lead Contamination in the Water

Immediate Relief:

1. Education, water filters and replacement cartridges, free water testing for water customers, and bottled water must be available to everyone. Water filters can be obtained at any of the fixed distribution points throughout the City.
2. Identification and verification of lead water service lines throughout the city- both public and private.
3. Assistance to identify lead pipes within buildings and homes.

Distribution of Bottled Water:
At this point, we are directing all offers for donations to the Food Bank of Eastern Michigan. It is imperative that water be accessible to all members of the community through a variety of distribution channels. These channels are explained in the Logistics Section of this plan.

Distribution of Test Bottles:
Water testing kits can be picked up at City Hall with instructions. Test results are posted on the City's website to raise public awareness and encourage more participation.

Long term Solutions: Capital Improvements Needs
The distribution of filters, water, and food to counter the effects of lead are essential response efforts to keep people safe. However, long term solutions are required to keep people healthy, to eliminate lead from the public and private water distribution system distribution, and to provide affordable clean water. Our public infrastructure and utilities must be reliable, sustainable, and equitable in order for this community to rebound after this emergency. The following long term solutions must be implemented in order to set the City of Flint on a course for recovery. These solutions come at a heavy cost for a City that is currently in receivership. The City has experienced financial distress due to this Emergency, in addition to a two million dollar loss from switching back to DWSD. The City has diligently applied for Fiscally Distressed Cities, Villages, and Townships, Grant in order to supplement funding for capital improvement projects. It is essential that these grants be awarded in order to achieve long term solutions.

1. COMPLETE **Transition to a Temporary Safe Water Source until the Completion of KWA:**
   This has already occurred. On October 16, 2015, Flint returned to receiving its water from DWSD on a 9 month agreement. This agreement will expire in June 2016, when the KWA is projected to be complete. The City had to pay $2 million out of its general fund to make this switch.

2. IN PROGRESS **Additional Corrosion Control added to the Water System:**

This is already occurring. In early December, 2015, Flint began to add additional corrosion control to the water coming in from DWSD in attempts to rebuild the protective scale inside its pipes. This is estimated to reduce lead levels in two to six months.

3. **Faucet Replacement:**
   Replacement of Water faucets, and drinking fountains in the school system. It has been determined after state inspections that many sources of lead contamination in the School System's water were the faucets themselves. These faucets need to be replaced.

4. **Water Line Replacement:**
   Water Line Replacement to reduce antiquated infrastructure and lead service lines. These lines must be identified, verified, and replaced. Residents who are facing financial hardships must have access to assistance to cover the costs of these replacements through access to grants and (forgivable) loans made available through State and Federal agencies. The corrosion damage to public and private lines that Flint River water caused is still being determined.
   - Replacement of an estimated fifteen thousand (15,000) lead service lines at an estimated cost of three thousand dollars ($3,000) per line. Total costs forty –five million dollars ($45,000,000). This project is estimated to be one of the most cost-intensive endeavors related to ameliorating water contaminants.

5. **Reimbursement of Critical Expenditures:**
   Seeking reimbursement of two million dollar cost of returning to DWSD and forgiveness of Water Revolving Loan Debt from the State of Michigan.

6. **KWA Capital Improvements**: The City has reconnected to Detroit temporarily until a water line from Port Huron is developed. The new water line known as the KWA pipeline or Karegnondi Water Authority is expected to bring water to the City from Lake Huron by July. The current cost agreement between Flint and DWSD is for nine months, therefore it is imperative that KWA be completed as soon as possible. Assistance relating to capital improvements to expedite this process will help to achieve long term goals.

KWA Capital Improvements:	**Estimated Costs:**
a. Transfer Station to Dort Reservoir	*$4,500,000*
b. Raw water line to pump station #4	*$636,000*
c. Phosphoric acid feed system	*$186,000*
d. Alum Feed system	*$40,000*
e. Post filtration system	*$387,289*

f.	*SCADA Upgrades*	*$424,000*
g.	*Sewer Relining*	*$100,000*
	Total	***$6,273,289***

Ancillary Considerations: Public Safety during an Emergency

During a time of emergency public safety agencies need to be prepared to respond to threats to public safety and critical infrastructure. The City is facing a man-made emergency that is threatening the public health. Resentment and hostility toward local institutions and municipal government is at a significant level.

Critical infrastructure should be safeguarded if the need arises. This includes increasing security at City Hall to reduce potential for public safety risks. In the case of credible threats to public infrastructure, it may be required to hire private security company for first line of defense. Private Security is lower cost, thereby making it the first option. The minimum response is acted upon first, elevating only if the need arises. Credible or imminent threats of damage or destruction to critical infrastructure requires an elevated response. Such needs may require over-time police officers to address critical situations. Mutual aid from surrounding communities can be requested if Flint public safety is overextended.

Implementation:

Community Partners

Financial limitations of the city persist while it confronts this emergency. Many community partners have offered their assistance to perform various needed functions. The city is heavily reliant on the assistance that government agencies and nonprofit organizations have provided.

The Mott Foundation

The Mott Foundation has provided financial assistance, especially in their generous contribution of $4 million. In addition, the Mott Foundation has recently pledged an additional

United Way

The Genesee County United Way has provided significant financial assistance in the way of purchasing and helping to distribute water filters since the public health emergency began on October 1st, 2015.

Genesee County Community Action Resources Department (GCCARD)

GCCARD is organized to fight poverty and has been a primary partner in the distribution of water filters. It has also regularly supported the city with the logistics and availability of water filters at City Hall.

Genesee County Health Department

Has provided educational information to Flint Water customers

Genesee County Board of Commissioners

The Board of Commissioners have pledged their support to help Flint seek solutions to this crisis. The Board has already assisted in making health and nutrition information available to the public.

Assistance from Wayne State University

Wayne State University's Center for Urban Studies will be providing technical GIS support to assist in the documentation of emergency relief efforts.

The US Environmental Protection Agency

Region 5 EPA has offered assistance with Public Information distribution during the emergency.

Outside Help is still needed…

The City of Flint is forever thankful to our community partners who have given so much to help so many people. However the magnitude of this emergency calls for more resources that are beyond the capacity of the combined local organizations and government agencies. Long term solutions will require a heavy investment in health care and capital improvement projects to upgrade the city's antiquated water distribution system.

- Help with Immediate Relief in terms of assuring allocative efficiency. Distribution should be equitable- assistance from other governments required to assure this.
- Reaching communities for the distribution of water filters, water, and educational materials.
- Help with Water Testing to increase participation and lead education.
- Increasing the rate of water testing
- Assistance is required to fund essential capital improvement projects to guarantee clean and safe water.

The goal: Assess the extent of the elevated blood lead levels – the number of those affected and the degree to which they're affected

- Get as many people in the affected zip codes tested as possible – can the Red Cross or some other agency with a bus or mobile unit set up for folks to give blood convert over to blood level testing and go into neighborhoods that have low testing rates?

- A public health friend of mine said that Genesee County Health workers are stressed to the max. Can we deploy appropriate personnel from other county health agencies to help with inspecting homes for possible other causes? In other words, it won't do any good to invest more in water infrastructure if we're finding window sills with teeth marks. I say this NOT to downplay the role that water lead levels may have played. But can we get Habitat for Humanity, for example, to do a massive volunteer effort to eradicate lead paint in homes … or is that beyond their expertise?

- Gather experts to assess exactly how extensive the problem is and potential causes. And then convey this in a much more accessible ways. If you want blood level data, you have to scroll down on the DHHS web site, find the headline and then read a long press release. Maybe we're conveying this information better on the ground, but if not, we need to communicate conclusive findings in multiple ways– graphics, video, informational photo galleries and maybe even a "test" that residents can take to see if their home is at risk in other ways. I know that sounds awfully MLive-ish, but it can be effective.

Team:

Today Harvey and I met with the Flint Water Task Force. It was a good meeting. People were pleased with the G's statement from the prior day. Captain Kelenske joined us and we had a very good discussion about moving forward with the creation of the Flint Water Crisis Agency Coordinating Committee (FIACC). Tim Becker and Captain Kelenske provided me with a fair amount of input. I also read the City of Flint Incident Action Plan for a State of Emergency which Chris received today (enclosed for those who wish to read it as well). I have distilled all of this into a two page plan that I want your edits and comments on and a one page organizational chart (now presented in the "governor's colors" according to our fine people in Communications). Spoiler alert—I made Captain Kelenske Vice Chair of the whole shebang (with the Colonel's blessing) so Harvey wouldn't get lonely.

Here is my ask of you:

1) Within 24 (sooner if you can) hours give me your comments and input

2) Tomorrow I will turn around a final document for Jarrod to review with the Governor either New Year's Day or Saturday

3) Ideally, Governor will approve Harvey sending it to Mayor Weaver Saturday (Sunday latest)

4) Mayor needs to know that this is what the Governor wishes to discuss at the meeting January 7 along with financial resources that we still need some estimates on cost from DHHS for

5) Meegan and Dave need to noodle how best to get out front with this and change the narrative focus on Monday's Genesee County declaration of emergency

I know we are all working way too hard for what should be a rest and recharge period but I do appreciate everyone's efforts and I know the Boss really does as well.

Regards,

Rich

Subject: PRESS RELEASE: City of Flint Water Presentations
Attachments: Water.Presentations.4.17.2014.pdf

For Immediate Release

City of Flint to Hold Special Public Presentations on Water Ahead of Planned Switch to Flint River as City's Water Source

Flint, Michigan – April 15, 2014 – The City of Flint will be holding two separate public presentations on the topic of water on Thursday, April 17, 2014. There will be a forum for Flint restaurateurs held at 3:00pm inside Café Rhema at 432 S. Saginaw Street in which local managers and owners can address any concerns on the river's use. An informational presentation for the general public will then be held at 5:30pm inside the City Council Chambers of Flint City Hall. That event will include a panel of City of Flint officials as well as John O'brien from the Genesee County Drain Commissioner's office and a representative from the Raftelis Financial Consulting firm.

Use of the river, upgrades and maintenance required for the water and sewer infrastructure and the overall cost of the system will be addressed in the presentation. Last week, the Raftelis firm presented the findings of a water and sewer rate study undertaken at the request of Emergency Manager Darnell Earley to the Flint City Council Public Works Committee.

"The results of the study, along with items related to the use of the river for the period during which the KWA pipeline is built, will be included in this comprehensive view of the present and future of the City's water service system and what will be required to maintain its operation long term," said Emergency Manager Darnell Earley. "We have a strategic vision of how to preserve and improve upon that service and plan on sharing it with the people of Flint." Both events come as the City prepares to begin using the Flint River as its primary source, which is scheduled to occur sometime after this Thursday.

LOCALIZED DRINKING WATER WARNING

Coliform bacteria detected in localized area of Flint water system
BOIL YOUR WATER BEFORE USING

Our water system detected the presence of coliform bacteria in the water supply on September 3, 2014. We routinely monitor for the presence of drinking water contaminants. We took routine samples for coliform bacteria during on September 2, 2014 from all sampling locations throughout the city. The location near Flushing Road and Chevrolet Avenue showed the presence of coliform bacteria. We took three repeat samples at this location and at adjacent locations on September 3 and again on September 4, 2014. Two of the three samples on the 3rd showed the presence of total coliform bacteria and three of the three samples collected on the 4th in this same area showed the presence of total coliform bacteria. On September 5th two of three sample showed presence of total coliform bacteria. **Updated area of ML King and Pasadena.** On September 4th one sample showed presence of total coliform bacteria. On September 5th two of the three samples at adjacent locations showed presence of total coliform bacteria. All other monitoring locations in the City continue to show no presence of Coliform bacteria.

What should I do?
DO NOT DRINK THE WATER WITHOUT BOILING IT FIRST. Bring all water to a boil, let it boil for one minute, and let it cool before using, or use bottled water. Boiled or bottled water should be used for drinking, making ice, brushing teeth, washing dishes, and preparing food. Boiling kills bacteria and other organisms in the water. **Continue using boiled or bottled water until further notice.** This boil notice is limited to the area bordered by Dayton Street (north), DuPont Street (east), Flint River (south), and LaVelle Road to Flint River (west).
The current boil water notice is being expanded to the north. This boil water notice is being expanded to the area bordered by Stewart Ave. (north), Saginaw (east), Hamilton Ave (south), and Clio Rd (west).

If you have a severely compromised immune system, have an infant, are pregnant, or are elderly, you may be at increased risk and should seek advice from your health care providers about drinking this water.

What does this mean?
Total coliform bacteria are generally not harmful themselves. *Coliforms are bacteria which are naturally present in the environment and are used as an indicator that other, potentially-harmful, bacteria may be present.*

Usually, coliforms are a sign that there could be a problem with the treatment or distribution system (pipes). Whenever we detect coliform bacteria in any sample, we do follow-up testing to see if other bacteria of greater concern, such as fecal coliform or E. coli, are present. We did not find any of these bacteria in our subsequent testing. If we had, we would have notified you immediately. However, we are still finding coliforms in the drinking water.

2310

CERTIFICATION: WSSN: «WSSN»

I certify that this water supply has fully complied with the public notification requirements in the Michigan Safe Drinking Water Act, 1976 PA 399, as amended, and the administrative rules.

Signature	Plant Supervisor	9/6/2014
	Title	Date Distributed

Reminder to water supplier: This notice / certification must be sent to the DNRE.

What happened? What is being done?
We are still detecting coliform bacteria. We will inform you when our sampling shows that no bacteria are detected. We are flushing the system and increasing the chlorine residual within the affected area. We anticipate resolving the problem within the next two to three days. In the meantime, please continue using boiled or bottled water until we notify you otherwise.

If you have questions, you may contact Mr. Brent Wright of the City of Flint at 810-787-6537,bwright@cityofflint.com , 4500 North Dort Highway, Flint MI. 48505 or Daughtry Johnson, Utilities Administrator
(810) 766-7135, ext. 2602. General guidelines on ways to lessen the risk of infection by microbes are
available from EPA's Safe Drinking Water Hotline at 1-800-426-4791.

CERTIFICATION: 2310 WSSN: «WSSN»

I certify that this water supply has fully complied with the public notification requirements in the Michigan Safe Drinking Water Act, 1976 PA 399, as amended, and the administrative rules.

To: WNEM; ABC12news; Flint Journal; NBC25 Newsroom; Ron Fonger
Subject: PRESS RELEASE: Boil Water Advisory Extended
Attachments: Boil Water Advisory 9.8.2014.pdf

For Immediate Release

City of Flint Boil Water Advisory Remains in Effect for Previously Identified Area

Flint, Michigan – September 8, 2014 – The City of Flint's Utilities Department has extended both of the boil water advisories from Friday and Saturday for a portion of the city. Friday's boil water advisory is in effect for the area bordered by Dayton Street on the north, DuPont Street on the east, the Flint River on the south, and by Lavelle Road (to the Flint River) on the west. Saturday's boil water advisory also covered the area bordered by Stewart Ave. (north), Saginaw (east) Hamilton Ave (south), and CIio Rd (west). This remains a localized issue to those portions of the city.

The Utilities Department believes that due to the low usage and demand of the area, water remains in the system for a longer period of time compared to the rest of the city. The City of Flint Utilities Department is increasing the chlorine added to water in the area, and to improve water circulation, will continue flushing the system in that part of the city. Residents can expect to see open hydrants in the area. The City of Flint will continue to aggressively investigate this issue until it has been corrected.

The Utilities Department has opted to keep the advisory in effect until the results of a citywide sampling taken today are known. This advisory is a precautionary measure to ensure the safety of drinking water for city residents. Residents in the area should continue to boil water or use bottled water for drinking, making ice,

brushing teeth, washing dishes, and preparing food until further notice. Boiling the water kills bacteria or other harmful organisms.

Total coliform bacteria are generally not harmful themselves. Coliforms are bacteria

which are naturally present in the environment and are used as an indicator that other, potentially-harmful, bacteria *may be present.* Usually, coliforms are a sign that there could be a problem with the treatment or distribution system (pipes).

Whenever we detect coliform bacteria in any sample, we do follow-up testing to see if other bacteria of greater concern, such as fecal coliform or E. coli, are present. We did not find any of these bacteria in our subsequent testing. If we had, we would have notified you immediately. However, we are still finding coliforms in the drinking water.

All water testing results at the City of Flint Water Treatment Plant have shown the City's drinking water meets all Safe Water Drinking Standards and this remains a localized problem. Testing of the drinking water is a part of the routine process for ensuring the quality and safety of the system which happens weekly at ten different sites around the city. Anyone with questions about the advisory or any other water issues should call 810-787-6537.

For Immediate Release

City of Flint Boil Water Advisory Remains in Effect for Previously Identified Area

Flint, Michigan – September 8, 2014 – The City of Flint's Utilities Department has extended both of the boil water advisories from Friday and Saturday for a portion of the city. Friday's boil water advisory is in effect for the area bordered by Dayton Street on the north, DuPont Street on the east, the Flint River on the south, and by Lavelle Road (to the Flint River) on the west. Saturday's boil water advisory also covered the area bordered by Stewart Ave. (north), Saginaw (east) Hamilton Ave (south), and Clio Rd (west). This remains a localized issue to those portions of the city.

The Utilities Department believes that due to the low usage and demand of the area, water remains in the system for a longer period of time compared to the rest of the city. The City of Flint Utilities Department is increasing the chlorine added to water in the area, and to improve water circulation, will continue flushing the system in that part of the city. Residents can expect to see open hydrants in the area. The City of Flint will continue to aggressively investigate this issue until it has been corrected.

City of Flint Boil Water Advisory Lifted

Flint, Michigan – September 9, 2014 – The City of Flint's Utilities Department and the DEQ have lifted both of the boil water advisories from this week for a western portion of the city. Testing results from all areas of the city confirm that the water is safe for all purposes. "The investigation into the cause of the boil water advisories continues," said Emergency Manager Darnell Earley, "we will share the results from that investigation once it is available."

Date: September 9, 2014

RECENT BOIL WATER NOTICE LIFTED

It is no longer necessary to use bottled water or boil water before drinking it. No coliform bacteria have been detected in follow-up testing of the system's water. This, in addition to treatment and adjustments made to the system, indicates that the water is now safe to drink.

Customers with questions or concerns about the water should contact Adam Rosenthal, Michigan Department of Environmental Quality 517-335-9715 or for more information, please contact Brent Wright of City of Flint Water Treatment Plant at 810-787-6537, bwright@cityofflint.com .

City of Flint Takes a Step Closer to KWA Preparedness with a Crucial Upgrade to the Water Treatment Plant

Flint, Michigan – December 15, 2014 – The City of Flint has this week taken a big step toward the eventual transition to use of the Karegnondi Water Authority Pipeline with a much needed upgrade to the City's Water Treatment Plant. A large 36" connection line which will serve as the main feed to the plant from the new pipeline was installed over the weekend of December 6, 2014. "This massive undertaking was done without interruption of service to customers and ahead of its scheduled completion," said Department of Public Works Director Howard Croft.

"The installation of the intake section to the water treatment plant represents a key portion of the City of Flint's transition to using the KWA for our water needs," said Utilities Administrator Daugherty Johnson. "Once construction on the KWA pipeline reaches Flint, the City will have the necessary connection in place to begin receiving and treating Lake Huron water." Along with other critical upgrades to the plant in the past two years, the intake installation brings Flint one step closer to having direct control over all of its water system needs. The KWA pipeline is expected to reach Flint by summer of 2016.

Good Morning Director Wyant:

I wanted to take just a moment to thank you and your team for travelling to Flint Wednesday to meet with me, the Mayor, and the Utilities Department staff.

Everyone on our end appreciated the opportunity to meet directly with you and your key staff at the DEQ. We all felt it was a very productive discussion of the many difficult issues facing the City of Flint not only during this transition, but as its own long-term, sustainable water supply and distribution system, leading towards full implementation of the KWA project. As you know Flint is slated to convert to the KWA water source well within the next 18 month timeline. Until that happens however, I think you would agree that we have an excellent opportunity here to send a good, positive message about how the City is managing its water services, and working very closely with your office in the process.

As we discussed, an initial media hit from your office fairly soon would also help us build public confidence through stronger communication on how we are responding to the challenges we encounter, your department's support of our efforts to resolve them, and the resultant potability of the current water source. If there are other next steps you need from us regarding such a media release, please don't hesitate to contact me.

We look forward to our continued partnership in addressing these and other matters critical to environmental quality in the City of Flint and the State of Michigan!

Sincerely,
[http://cityofflint.com/images/Signature.jpg][X]

Frank:

We have a situation in Flint, Michigan that is beginning to get national attention and could be an opportunity for Home Depot. 18 months ago, Flint switched its water supply from Detroit Water (the distance and pumping costs of going uphill made it quite expensive) to the Flint River as a temporary answer, until they could finish the construction to get their water from Lake Huron (Karagondi Water System). The corrosive attributes of the River water have exacerbated the lead deposit leaching into homeowner pipes and there is concern around lead poisoning, especially for infants.

The corporate community is rallying to address the problem. Meijer donated 1500 water filters to low income residents and GM is about to announce a donation of between 5,000 and 10,000 filters. I do not yet know where GM is getting the filters from, but I was thinking that Home Depot might want to join the effort with a donation, supply chain discounting assistance, or some combination of activity that could help Flint residents. Harvey Hollins is our point person for this effort, since he is the Director of Urban Initiatives for Governor Snyder. I have copied him here.

If you could get this into the hands of the right people and see if there is interest in speaking with Harvey, I would be very appreciative. Thanks and take care.

Regards,

Rich

Dennis - in response to your earlier email; Wayne's guys came up with a ballpark estimate for reconnecting to DWSD. Let me emphasize 'ballpark'. They used your assumptions & they talked to Natasha H. after 5:00. Bottom line... the estimated cost is approx $10.5mm to reconnect until June '16.

These numbers on their surface seem much improved over previous DWSD $offers. [Is Daddow in the loop on this ?] We need to give some more thought as to whether this is all inclusive. e.g., there might be some costs from turning down operations at the plant

I am being told this can happen in a relatively short time i.e., less than a week. Which seems aggressive. Obviously that does not mean the lead concerns nor discolored water, etc goes away in a week. The pipe section they sold to the county won't be an impediment to this deal.

There apparently are no 'upfront' costs we need to worry about. In theory, it seems like it can be paid over the 9-10 months (vs a lump sum). But I am not clear Dennis on those couple ideas/sources the Mayor & Senator mentioned i.e., at this point I am not sure where the $10.5mm comes from.

My guess is we will keep refining this estimate. Let us know if you need anything else. Again, "credit " Wayne's guys for pulling this together quickly.

Subject: RE: follow up

City's usage is 14 MGD/Day

Timeline is 9 months until June 2016

Fixed Cost is $662,100 for 9 months or $5,958,900

Commodity Rate is $501,383/month

Total Monthly Cost is $1,163,483

Cost until June 2016 is $10,471,347

The City does not know the cost to move the water plant into stand-by mode. However, they have indicated that there might be some reduced costs as lower chemical costs will be incurred.

Here is the letter from the Genesee Co Drain Commission. My interpretation of the contents would be their estimate is $13.2mm (vs the $12mm discussed this morning).

They included their contract with the City. Sec 5.7 references prevailing rates the City would be charged; that is different than the rates reflected in the $13.2mm. So that contract may need to be modified.

They also raise some other items (under *Procedure to Activate Supply* – p.3) that may have cost implications.

EM SUBMISSION NO.: 2013EM041

PRESENTED: 3-28-13

ADOPTED: 3-29-13

BY THE EMERGENCY MANAGER:

RESOLUTION TO PURCHASE CAPACITY FROM KAREGNONDI WATER AUTHORITY

The Karegnondi Water Authority (KWA) is a governmental consortium of cities and counties in southeastern Michigan that was created to build a water pipeline that will provide water from Lake Huron to interested communities in Sanilac, Lapeer, and Genesee counties. The incorporating bodies that created the KWA are Sanilac County, Lapeer County, Genesee County, the City of Flint, and the City of Lapeer.

The City of Flint is currently in a year to year contract with the City of Detroit for the purchase of water. A study was conducted that projected that staying with Detroit will cost the region $2.1 billion over the next 25 years. In contrast, if the region builds its own pipeline, the projected costs are $1.9 billion over the same period. After the initial 25 year period, the projected costs would be less then 25% of the projected water costs from Detroit.

In order to build the pipeline, the KWA needs commitment from its members regarding the capacity that each member will purchase in the pipeline. The KWA is allowed to withdraw 85 million gallons of water per day. Capacity is available to members in increments of 1 million gallons per day known as units. For each unit of capacity that a member purchases, the buyer shall pay to the KWA a one time fee of $32,300.00. Additionally, the buyer shall pay to the KWA not less then $32,300.00 per unit per year until such time as water is made available to the buyer. After water is made available, the buyer shall pay to the KWA an estimated amount not to exceed $355.300.00 per unit per year until such time that the bonds are paid in full. If it is determined that the costs per unit will exceed $355,300.00 the buyer has a right to cancel the contract.

The purchase of capacity along with the payment of other costs necessary to operate the pipeline gives the member a right to water for sale to its customers. The buyer has a right to resell capacity and water rights. Each party entering into a capacity contract shall also be entitled to appoint additional board members equal to the party's percentage share of the total capacity under contract.

It is in the long term best interests of the City of Flint to enter into a contract with the KWA to purchase up to eighteen (18) units of capacity.

IT IS RESOLVED that City officials are authorized to enter into a contract with KWA to purchase up to eighteen (18) units of capacity.

IT IS FURTHER RESOLVED that the City Administrator is authorized to provide KWA information needed to administer the contract and, with approval of the Chief Legal Officer, to make minor (non-material) modifications to the contract.

APPROVED AS TO FORM:

Peter M. Bade, City Attorney

APPROVED AS TO FINANCE:

For **Gerald Ambrose, Finance Director**

Flint City Council approves resolution to buy water from Karegnondi, state approval still needed

[http://connect.mlive.com/staff/dadams1/index.html] By Dominic Adams | dadams5@mlive.com [http://connect.mlive.com/staff/dadams1/posts.html]
Follow on Twitter [http://www.twitter.com/dominicadams]
on March 25, 2013 at 10:45 PM, updated March 26, 2013 at 1:28 AM

FLINT, MI – Flint is one step closer to getting its water from Lake Huron as part of the Karegnondi Water Authority.

The vote, **approved 7-1 at the Flint City Council meeting Monday, March 25 [http://www.mlive.com/news/flint/index.ssf/2013/03/flint_city_council_again_delay.html]** , may have set in motion the end to Flint paying to get its water from Detroit.

Under the proposal, Flint would get 16 million gallons per day of raw water from Lake Huron, pipe it to Flint for treatment and then sell it to customers throughout the city. Another 2 million gallons per day would come from the Flint River and will be treated in Flint.

Mayor Dayne Walling said the Department of Environmental Quality must approve Flint's getting 2 million gallons per day from the Flint River.

Tuesday's meeting followed weeks of discussions and special meetings surrounding the resolution.

"We got there," Councilman Joshua Freeman said. "That's the important thing."

There were more than 50 people at Monday's meeting.

"Going with Karegnondi is the best decision. We have no opinion on the economics of the decision," said Rebecca Fedewa, Flint River Watershed Coalition executive director. "If we start drawing water out of the Flint River, we are at risk of having to start releasing water from our reservoirs."

Genesee County Drain Commissioner Jeff Wright said the decision must still be approved by a county water and waste advisory board. The KWA board will then be reconvened for final approval.

Wright said construction could start in May.

State treasury officials still must approve the city council's move because Flint has an emergency financial manager. All expenditures over $50,000 must be approved.

Genesee County Drain Commissioner Jeff Wright has said that Flint would pay roughly $6.4 million annually for water service if it joined the pipeline – a nearly $4 million savings on what it pays Detroit for water.

Walling previously said the **city would save $19 million over eight years [http://www.mlive.com/news/flint/index.ssf/2013/03/flint_city_council_delays_deci.html]** by getting water from the KWA.

"It's a historic night in the City of Flint," Walling said. "The savings will be less with the capacity level approved by city council because there will be increased treatment cost for the river water."

He said the DEQ told the city it needed to get 18 million gallons per day or there would have to be additional work done at Flint's water plant.

Flint's water plant and the Flint River is currently the backup for Flint and Genesee County, however, the plant only operates four times per year.

Councilman Bryant Nolden was the lone dissenting vote.

"It was a protest vote," Nolden said. "I knew they had enough votes. I just feel like the Flint River is our best option."

Karengnondi is the regional water authority that includes Genesee, Lapeer and Sanilac counties and the cities of Flint and Lapeer.

Flint is the second municipality, behind Genesee County, to officially decide to purchase raw water through the KWA. Lapeer city officials said they intend to purchase water, but an agreement has been finalized.

What: Jeff Wright Statement on Flint City Council Approving Resolution to Join KWA.

When: March 26, 2013

Additional Info: Jeff Wright, CEO of the KWA, today praised the Flint City Council for voting to approve a resolution to officially have the City of Flint join the KWA and its' water line.

"I have said from the beginning that this decision must be made by Flint's City Council and Mayor," said Wright. "I appreciate the council voting the way they did, but even more than that, I am glad the residents of Flint were able to have their voices heard via their elected officials." The next step in the process will come with the KWA Board executing the contract for the City.

"The most important aspect from the vote is the fact that we as an Authority can move forward knowing Flint's intentions," said Wright.

Despite Emergency Manager Ed Kurtz publicly supporting the project, Wright had made a vote by council a condition of Flint joining the KWA so the residents would have their say.

"There is a basic tenet that government is best when it has local control. We saw that with the council vote. Nobody, whether they live in Flint, Grand Blanc, Davison, Fenton, or anywhere in Genesee County, should have these types of decisions made by people who live outside of their community," said Wright.

At the next Water and Waste Advisory Board meeting a vote will be taken to award a contract for construction of the intake portion of the water line. All bids were submitted to the board at their last meeting for review.

STATE OF MICHIGAN
DEPARTMENT OF TREASURY
LANSING

RICK SNYDER
GOVERNOR

ANDY DILLON
STATE TREASURER

Mr. Edward Kurtz
Emergency Manager
City of Flint
1101 South Saginaw Street
Flint, MI 48502

April 11, 2013

Dear Mr. Kurtz:

Thank you for your March 29, 2013 letter, which is attached for reference. As the Emergency Manager for the City of Flint ("Flint" or "City"), you have asked for my concurrence, pursuant to Public Act 436 of 2012, the Local Financial Stability and Choice Act, to authorize a contract in excess of $50,000.00 not subject to competitive bidding. This request was related to the City entering into an agreement with the Karegnondi Water Authority (KWA) for provision of raw water for the City.

In considering your request, I took note of the following facts in support of Flint joining KWA. First, there is widespread support in the City for this move, including the support of the Mayor, the City Council, and the Emergency Manager. Second, this move will provide a unique opportunity for the City and County to partner on an important project, which will hopefully lead to future regional collaboration. Third, the Department of Environmental Quality is supportive of the City participating in the KWA project. Finally, your representations that this deal will lead to substantial savings for the City over the coming decades, savings that are desperately needed to help with the turnaround of the City of Flint.

It is my understanding that the Detroit Water and Sewer Department is making a final best offer to Genesee County and the City of Flint next Monday, April 15, 2013. As such, this approval will be effective at 5 pm on April 16, 2013 after receiving written notice from the City that either no such offer was presented to the county and the City or that an offer was received and was rejected in good faith based upon specified objections.

For the reasons described above and subject to the conditions set forth herein, pursuant to Section 12 (3) of PA 436 of 2012, I am authorizing you to proceed with adopting the resolution and entering into a contract with KWA.

Sincerely,

Andy Dillon
State Treasurer

FLINT, MI -- Flint residents may soon get their water from Lake Huron.

The Flint City Council voted 7-1 to get 16 million gallons per day from the Karegnondi Water Authority.

"This is about compromise," said Councilman Sheldon Neeley.

Neeley got support from Councilman Joshua Freeman, after the two were previously at odds about the amount the city should withdraw from Lake Huron.

Councilman Bryant Nolden was the lone "no" vote.

"It was a protest vote," Nolden said. "I just feel like the Flint River is our best option."

Genesee County Drain Commissioner said construction of the pipeline could start in May.

The city currently pays to get its water from Detroit.

State treasury officials still must approve the city council's move because Flint has an emergency financial manager. All expenditures over $50,000 must be approved.

(DRAFT)
FLINT WATER ADVISORY TASK FORCE
AFTER-ACTION REVIEW

The Flint Water Task Force is an independent advisory panel appointed by Governor Rick Snyder charged with reviewing actions regarding water use and testing in Flint and with offering recommendations for future guidelines to protect the health and safety of all state residents.

The task force expects to summarize its work in a report to be presented to Governor Rick Snyder within ninety (90) days.

GOALS

The Flint Water Task Force's goals are as follows:

- Complete a thorough review of all steps taken by state and local officials regarding the decision to switch the City of Flint's water source to the Flint River from the Detroit Water and Sewerage Department's system (DWSD).
  - Produce a timeline of actions
  - Establish why each action was taken

- Review the roles of the federal, state, and local officials in the decision-making process
  - Identify best practices for federal, state, and local officials to work together in future similar situations
  - Evaluate where coordination between these entities could have been better, and how it could be improved

- Review federal, state, and local actions and protocols
  - Determine whether the proper procedures were followed
  - Identify which procedures should be changed

- Monitor and review the process, procedures, and protocols being followed as the City of Flint returns to the DWSD system
  - Ensure that proper corrosion controls and testing are in place
  - Highlight the appropriate actions that the City of Flint should follow when the future switch is made to the Karegnondi Water Authority's system

- Assess future practices
  - Highlight practices that should change for communities in similar situations
  - Recommend changes in law, procedure, or practice to ensure all Michiganders are drinking safe water

November 13, 2015

Governor Rick Snyder
Executive Office of the Governor
P.O. Box 30013
Lansing, Michigan 48909

Governor Snyder:

I would like to provide you an update with some of the work we are doing in response to your letter on October 2, 2015 letter. I also have three requests of the state that are necessary to provide relief to the victims of the Flint water crisis.

First, Senator Stabenow, Senator Peters and I wrote a letter to the U.S. Environmental Protection Agency (EPA) asking for clarification on whether federal law permits states to use Safe Drinking Water State Revolving Funds (Revolving Funds) to finance the replacement of privately owned lead water service lines (attached). The EPA responded that the Revolving Funds can in fact be used for this purpose. My office immediately notified both your office and the Michigan Department of Environmental Quality of this fact.

Secondly, the three of us also wrote to Secretary Tom Vilsack requesting that the U.S. Department of Agriculture (USDA) provide greater clarification on the availability of "Ready to Feed" formula for recipients of Special Supplemental Nutrition Program for Women, Infants and Children (WIC) in Flint. Additionally, the letter asks to identify resources to improve the nutrition of Flint residents specifically as it relates to lead, because a certain diet can reduce some of the impact of exposure. The USDA is currently reviewing the letter.

Third, I have been working with the EPA on important revisions to the Lead and Copper Rule that would prevent a public health crisis like the one in Flint from happening again in other communities. I will be providing testimony at a meeting of the National Drinking Water Advisory Council next Wednesday, November 18 on what we have learned firsthand in Flint and the necessary improvements to the Lead and Copper Rule.

I will continue to pursue all of these avenues in order to find assistance for the people of Flint. There are, however, additional steps that need to be taken to remediate the damage done to the people of Flint due to the failures at the state government level, alongside the forgiveness of Flint's Revolving Funds loan debt if that becomes available. I urge state and local partners to work in coordination to fulfill the following requests.

- First, I request that the state of Michigan use its Revolving Funds and other state resources such as the rainy day and general funds to repair the damage done to Flint's water distribution system.

Due to the corrosive nature of the water, conservative estimates show there has been hundreds of millions of dollars of damage done to Flint's water distribution system. The damage to the system will increase maintenance costs resulting in higher rates for Flint water users, who already are burdened by the highest water rates in the state. Furthermore, the presence of over 15,000 lead service lines continues to threaten the quality of the water and creates the potential for future lead exposure through drinking water. As stated previously, the EPA has said that using the Revolving Funds for this purpose is allowed under federal law, and I request the state do so.

- Second, I request the state create a fund for ongoing assistance to the people of Flint to respond to the impacts of lead exposure.

The effects of lead are serious and permanent, with especially harmful impacts on young children and those with weakened immune systems. In discussions with health professionals, they have expressed the need for significant investments in the local health system in order to respond to the widespread exposure of lead to the people of Flint, including monitoring of future lead exposure. This fund should include support for, at a minimum, continuous health monitoring, early education programs, nutrition education, support services for children to succeed in school, and continued exposure prevention efforts. The investments we make now to combat the negative impacts of lead exposure will pay dividends in avoided costs in the future.

- Finally, I again ask that the state immediately reverse course and rescind Flint's obligation to provide $2 million for the cost of connecting to the Detroit water system and refund any money the city of Flint has had to pay.

Requiring a financially distressed city and its people to pay for the state's failures is an abdication of clear responsibility by the state. The state-appointed emergency manager was in charge of the city of Flint during the time that the decision to leave the Detroit system was made. The state – not Flint – created this water crisis, and the state needs to pay to fix it. The $2 million Flint spent to reconnect to the Detroit water system could be used for many other essential services in Flint, such as hiring policemen and firefighters, improving schools and maintaining parks.

In addition to state investments, I encourage the state to request assistance from federal agencies. They have extensive experience working with health, education and nutrition systems nationwide and could provide critical resources to state officials. Specifically, the Centers for Disease Control and Prevention has offered resources if the state requests it. I will work to support any efforts for federal assistance the state makes.

I look forward to working with the state and federal governments to not only provide clean drinking water to the people of Flint immediately, but also repair the damage done to the city's water system and give local health professionals the resources they need to combat the long term impacts of lead exposure.

Sincerely,

Dan Kildee

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
WASHINGTON, D.C. 20460

OFFICE OF WATER

OCT 2 8 2015

The Honorable Dan Kildee
House of Representatives
Washington, D.C. 20515

Dear Congressman Kildee:

Thank you for your October 6, 2015, letter asking whether federal law permits a state to use the Drinking Water State Revolving Fund to finance the replacement of privately owned lead water service lines.

Drinking Water State Revolving Fund loans can be used to finance lead service line replacement on public and private property, provided the loans are made to an eligible entity in accordance with the Safe Drinking Water Act to protect public health, and all other Drinking Water State Revolving Fund requirements are met. The eligible entity in this case is the Flint community water system. The U.S. Environmental Protection Agency is actively discussing the option of using the Drinking Water State Revolving Fund for lead service line replacement with the Michigan Department of Environmental Quality and the City of Flint.

Again, thank you for your letter. If you have further questions, please contact me or your staff may contact Cathy Davis in the EPA's Office of Congressional and Intergovernmental Relations at Davis.CatherineM@epa.gov or (202) 564-2703.

Sincerely,

Kenneth J. Kopocis

Virginia Tech Researcher Claims Stonewalling On Lead Data

The Department of Health and Human Services had data that showed there were elevated lead levels in Flint's water, but delayed in releasing that data to others for review, Virginia Tech professor Marc Edwards said in an article posted to his website documenting the city's water crisis.

Department officials agreed and said the experience led to changes in how they examine data.

Mr. Edwards said the department had data from shortly after Flint changed its water source that showed a spike in blood lead levels in children in two at-risk neighborhoods, but did not disclose that data until September 2015.

"They discovered scientifically conclusive evidence of an anomalous increase in childhood lead poisoning in summer 2014 immediately after the switch in water sources, but stood by silently as Michigan Department of Environmental Quality (MDEQ) officials repeatedly and falsely stated that no spike in blood lead levels (BLL) of children had occurred," he said in the post.

DHHS spokesperson Jennifer Eisner agreed the department had data that showed the spike, but said its analysis at the time overlooked factors that, in retrospect, would have shown there was a water quality problem.

"When initially looking at the citywide and county elevated blood lead level numbers, the increase appeared to be consistent with the seasonal fluctuation seen in the summer months," Ms. Eisner said. "It wasn't until the Hurley report came out that our epidemiologists took a more in-depth look at the data by ZIP code, controlling for seasonal variation, and confirmed an increase outside of normal trends. As a result of this process, we have determined that the way we analyze data collected needs to be thoroughly reviewed."

Mr. Edwards said DHHS officials also stonewalled him on getting access to that data.

He said data he had gotten easily in 2006 documents for a similar review took several weeks to receive after his request sent September 2. When he did finally receive the data, he said it was a version that omitted the lead level spike from summer 2014 that the department had created in July.

He said a series of emails he received under a recent Freedom of Information Act request showed and intention by DHHS officials to keep the reports from the public.
"Our FOIA reveals a shocking DHHS graph created in October 2015. It shows the statistically significant spike in blood lead that occurred in summer 2014 - the scientific result that DHHS has never publicly acknowledged," Mr. Edwards said in his post.
Ms. Eisner said the department has worked to make the data available. "Summary reports outlining blood lead level testing are posted online on a bi-weekly basis, and we work closely with local partners to fulfill data requests as we receive them," she said.

Thank you for the presentation and your approach to this. When you can please share a version of the presentation I can pass in to Sue, Eden and the others in my Population Health area.

Nick

#flintwatercrisis

HURLEY CHILDREN'S HOSPITAL

Background & Secondary Prevention

Mona Hanna-Attisha MD MPH FAAP
Hurley Children's Hospital
Michigan State University College of Human Medicine

Agenda

HURLEY CHILDREN'S HOSPITAL

- Flint Water Timeline
- Lead Facts
- Hurley Research Findings
- Introduction to Toxic Stress
- Next steps – Secondary Prevention

Flint Drinking Water Crisis

HURLEY CHILDREN'S HOSPITAL

- Financial Emergency Managers
- Water switch to Flint River (April 2014)
- Fecal coliform and boil advisories *3 (Sept 2014)
- GM stopped using Flint water – corroding parts (Oct 2014)
- Disinfectant byproducts TTHM (Jan 2015-Sept 2015)

Flint Drinking Water Crisis

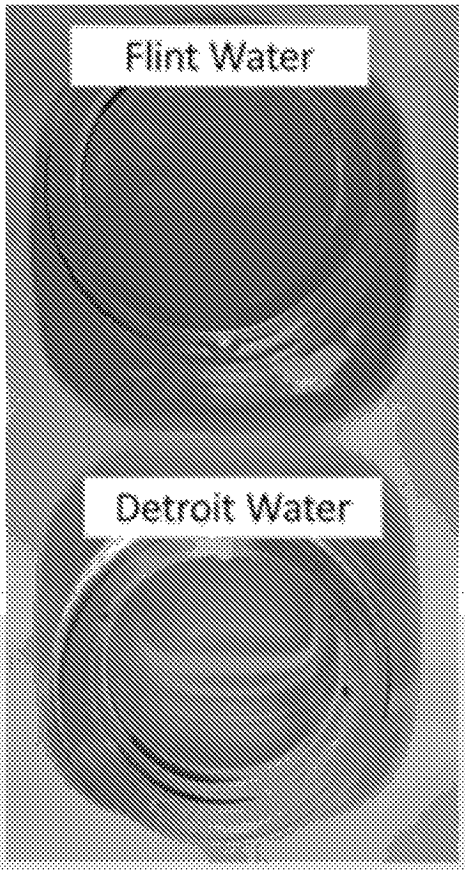
HURLEY CHILDREN'S HOSPITAL

- Perfect storm for lead leaching
  - Flint water more corrosive
  - Lack of corrosion control
  - Aging infrastructure (lead plumbing)
  - Decreased water use - population loss, high water rates

Flint Drinking Water Crisis

HURLEY CHILDREN'S HOSPITAL

- High lead levels detected, EPA contacted (February 2015)
- Leaked EPA memo (June 2015)
  - LeeAnn Walters WLL 13,200 ppb (toxic waste)
- Dr Marc Edwards, Virginia Tech Research (Aug 2015)
  - Flintwaterstudy.org
  - Corrosion & water lead
- Hurley Research (Sept 2015)



https://www.wsws.org/en/articles/2015/09/26/flin-s26.html

Why do we care about lead?

HURLEY CHILDREN'S HOSPITAL

- Lead is a potent neurotoxin with lifelong, multigenerational impacts
- Blood lead levels (BLL) 5 ug/dL or more considered elevated blood lead levels (EBLL)
- Just a few years ago (2012), 10 ug/dL was cutoff
- NO safe blood lead level
- Disproportionately impacts low income and minority children
- Primary prevention is most important

HURLEY MEDICAL CENTER

Primary Prevention

HURLEY CHILDREN'S HOSPITAL

- "Because no measurable level of blood lead is known to be without deleterious effects, and because once engendered, the effects appear to be irreversible in the absence of any other interventions, public health, environmental and housing policies should encourage PREVENTION of all exposure to lead."

"Low Level Lead Exposure Harms Children: A Renewed Call for Primary Prevention." 2012 CDC Advisory Committee on Childhood Lead Poisoning Prevention.

HURLEY MEDICAL CENTER

Impact on cognition

HURLEY CHILDREN'S HOSPITAL

- Vast evidence supports increased likelihood of:
  - Decrease in IQ
    - An increase in BLL from 1 to 4 ug/dL, drops mean IQ -3.7 points
  - Small change in mean IQ, shifts entire population IQ distribution
    - Reduces high achievers IQs (>130) and increases kids with low IQs (<70)
    - Implications for early intervention, special education services, employment, incarceration, life achievement, etc

Lanphear BP et al., Low-level environmental lead exposure and children's intellectual function: an international pooled analysis. Environ Health Perspect. 2005. 113:894-9.
Fewtrell LJ, Pruss-Ustun A, Landrigan P, and Ayuso-Mateos JL, Estimating the global burden of disease of mild mental retardation and cardiovascular diseases from environmental lead exposure. Environmental Research, 2004. 94:120-33.

Impact on behavior

HURLEY CHILDREN'S HOSPITAL

- Increased likelihood of :
  - ADHD behaviors
  - Delinquent behaviors and arrests
  - Total arrests and increased rates of arrests involving violent offenses
  - Other health effects: hematologic, cardiovascular, immunologic, endocrine, etc

Wright, JP, KN Dietrich, MD Ris, et al. 2008. Association of prenatal and childhood blood lead concentrations with criminal arrests in early adulthood. *PLoS Med* 5(5): e101
Chen, A, B Cai, KN Dietrich, et al. 2007. Lead exposure, IQ, and behavior in urban 5-7 year-olds: Does lead affect behavior only by lowering IQ? *Pediatrics* 119(3): e650-e658.
Needleman, HL, C McFarland, RB Ness, et al. 2002. Bone lead levels in adjudicated delinquents: A case control study. *Neurotoxicology and Teratology* 24(6):711-717.

HURLEY MEDICAL CENTER

Cost

HURLEY CHILDREN'S HOSPITAL

- "For childhood lead poisoning, $5.9 billion in medical care costs, as well as an additional **$50.9 billion** (sensitivity analysis: $44.8–$60.6 billion) per year in lost economic productivity resulting from reduced cognitive potential from preventable childhood lead exposure."

- "The present value of Michigan's economic losses attributable to lead exposure in the 2009 cohort of 5 year-olds ranges from $3.19 (using U.S. blood lead levels) to **$4.85 billion** (using Michigan blood lead levels) per year in loss of future lifetime earnings."

Leonardo Trasande and Yinghua Liu. Reducing The Staggering Costs Of Environmental Disease In Children, Estimated At $76.6 Billion In 2008. *Health Affairs*, 30, no.5 (2011):863-870

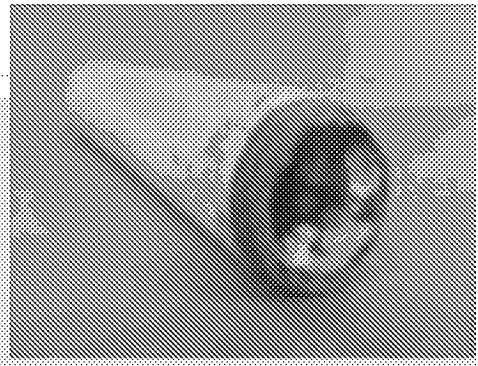
The Price of Pollution: Cost Estimates of Environment-Related Childhood Diseases in Michigan. 2010 Report by Michigan Network of Children's Environmental Health

HURLEY MEDICAL CENTER

Lead in Water

HURLEY CHILDREN'S HOSPITAL

- Not what medicine/public health used to
  - Lead paint obsessed
  - "drinking through a lead painted straw"
- Soluble metal – ingestion via particulate or dissolved in water
- Drinking and cooking risks



Lead in water

HURLEY CHILDREN'S HOSPITAL

- Disproportionally impacts developmentally-vulnerable formula-fed infants
  - For about 25% of infants drinking formula made from tap water at 10 ppb, blood lead would rise >= 5 ug/dL
- Significant risk to unborn babies
  - Increase in fetal deaths and reduced birth weights

Triantafyllidou, S., Gallagher. D. and Edwards, M. Assessing risk with increasingly stringent public health goals: the case of water lead and blood lead in children. Journal of Water and Health. doi: 10.2166/wh.2013.067 58-68 (2014).

Hurley Children's RESEARCH FINDINGS

Sept 24

Medical Community Press Conference

HURLEY MEDICAL CENTER

Methods

HURLEY CHILDREN'S HOSPITAL

- HMC IRB approved
- Data from all blood lead levels processed at Hurley Medical Center
- ZIP code based
- Two periods of comparison (same seasons):
  - PRE-SWITCH: January 1, 2013 – September 15, 2013
    - WATER SWITCH APRIL 26, 2014
  - POST-SWITCH: January 1, 2015 – September 15, 2015
- Analyzed % Elevated Blood Lead (EBLL)
  - EBLL = Blood lead Levels >= 5 ug/dL

HURLEY MEDICAL CENTER

Initial Research Results

HURLEY CHILDREN'S HOSPITAL

- Zip code based (in media)

	ALL FLINT ZIPS (n=1746)	HIGH-WLL FLINT ZIPs (48503-48504) (n=742)	NON-FLINT ZIPS (n=1670)
PRE-SWITCH	2.1%	2.5%	0.6%
POST-SWITCH	4.0%	6.3%	1.0%

HURLEY MEDICAL CENTER

GEOcoded Analysis

HURLEY CHILDREN'S HOSPITAL

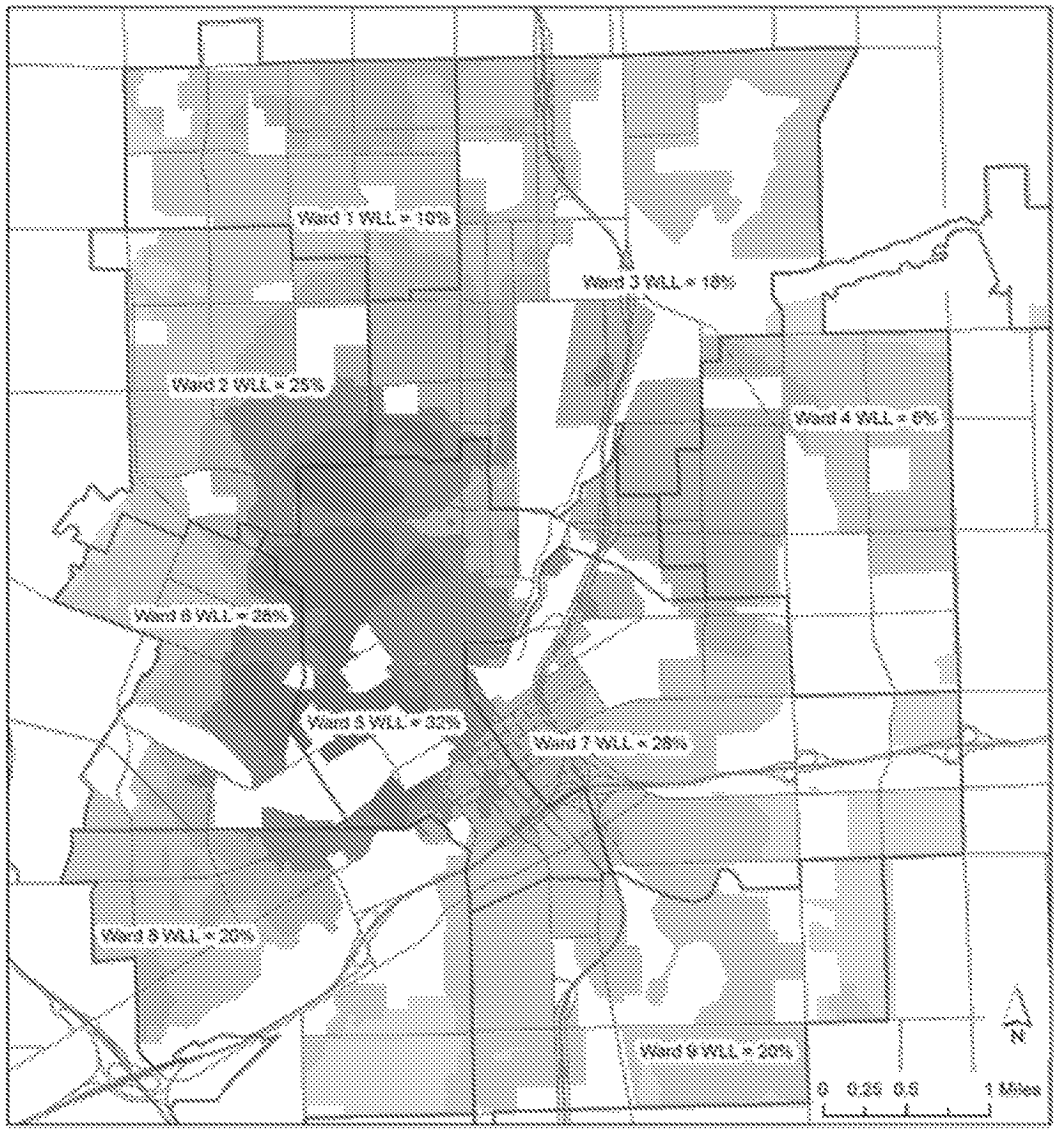
- N= 1473 for Flint water children (pre n=736, post n=737)
- N= 2202 for non-Flint water children (pre n=1210, post n=992)

Flint results for children 5 years and under:

- PRE-SWITCH % EBLL: **2.4%**
- POST-SWITCH % EBLL: **4.9%**
- **p < 0.05; STATISTICALLY SIGNIFICANT CHANGE**

HURLEY MEDICAL CENTER

HURLEY CHILDREN'S HOSPITAL



- Focus on high WLL wards (5, 6, 7); ie., those with high water lead levels

Results:

- PRE-SWITCH % EBLL: **4.0%**
- POST-SWITCH % EBLL: **10.6%**
- **$p < 0.05$; STATISTICALLY SIGNIFICANT CHANGE**

- Note: Hot spots between wards/zips

HURLEY MEDICAL CENTER

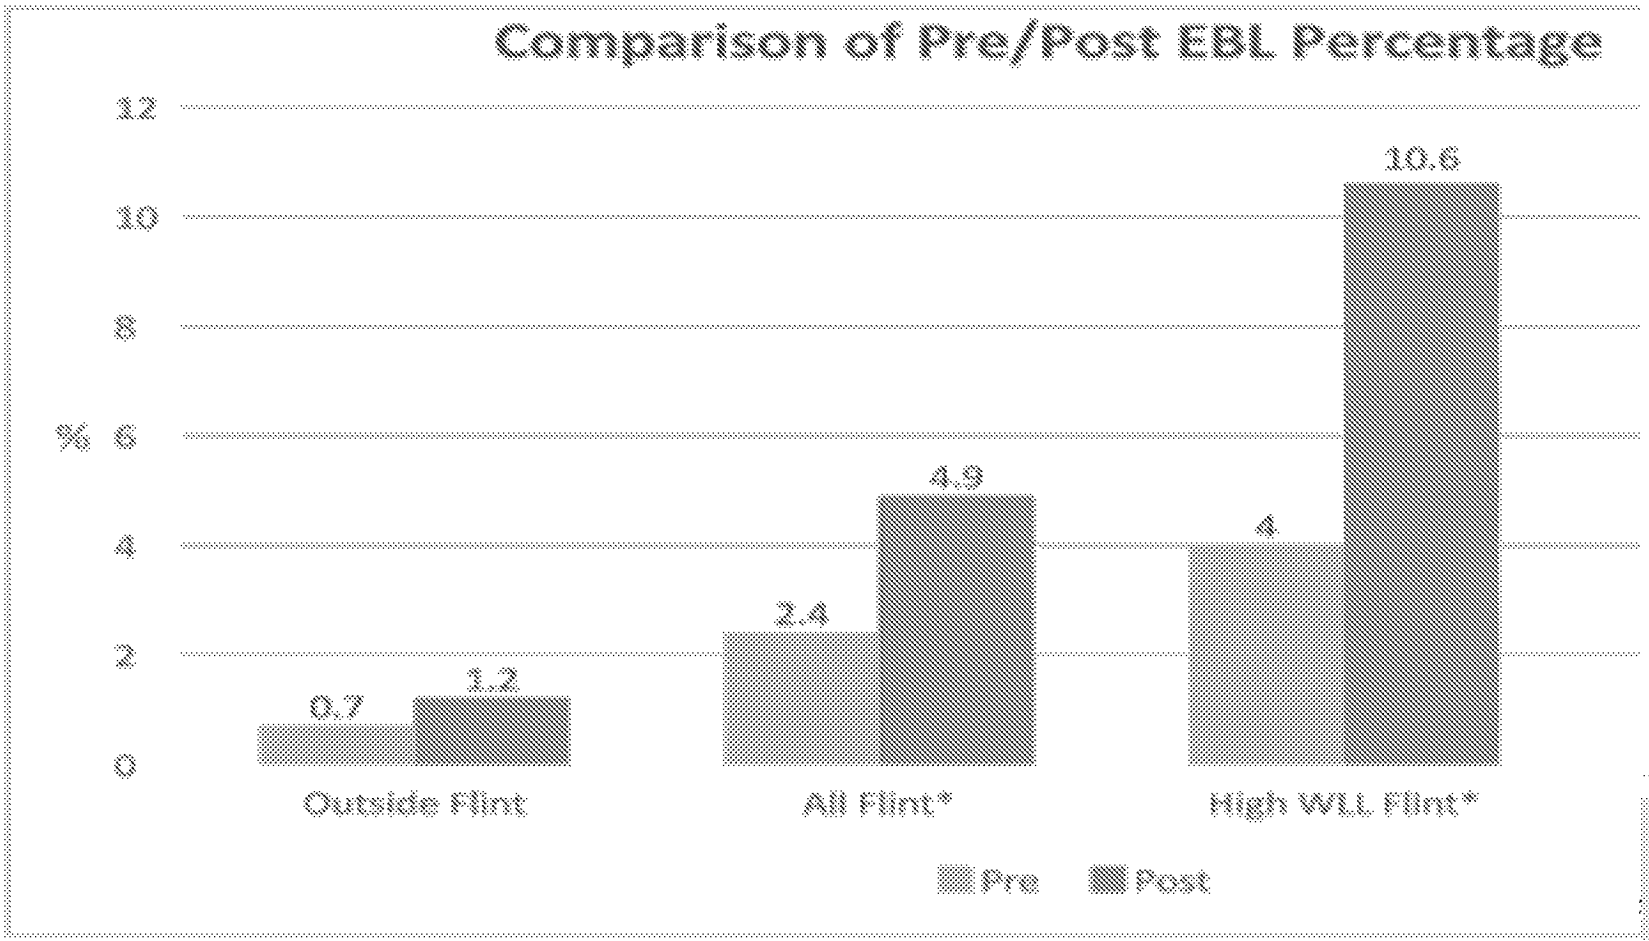
Pre/Post EBL

HURLEY CHILDREN'S HOSPITAL



*p<0.05

Research results

- % of children with EBLL in Flint zips increased
  - Most striking increase in areas with highest water lead levels
- **Results significantly underestimate exposure:**
  - Infants not screened for lead
  - BLL may have peaked before being measured (blood half life 20-30 days)
  - Kids exposed in different settings throughout city
- Widened disparities
- Failure of primary prevention

What happened next?

- Sept 25 City of Flint Lead Health Advisory
- Sept 29 GCHD Health Advisory
- Oct 1 GCHD Public Health Emergency
- Oct 2 State filter program, increased water testing, expedited corrosion control
  - Oct 3 First filter distribution
- Oct 8 Three schools toxic WLL, announced reconnection to DWSD
- Oct 16 Water switched back to DWSD

Epigenetics

HURLEY CHILDREN'S HOSPITAL

Wayne State Researchers Discover Evidence That Lead Exposure in Mothers Can Affect Future Generations

Released: 2-Oct-2015 3:05 PM EDT
Source Newsroom: Wayne State University Division of Research

"A team of researchers at Wayne State University have discovered that mothers with high levels of lead in their blood not only affect the fetal cells of their unborn children, but also their grandchildren. "

HURLEY MEDICAL CENTER

Now

- Preventable population-wide exposure
- Community traumatized
- Loss of trust in government and agencies
  - In 2015, in the middle of the great lakes, no guarantee of safe drinking water
- Ongoing public health emergency

Exposed Population

HURLEY CHILDREN'S HOSPITAL

- Currently identifying/labeling exposed population
- Cohort includes all children less than 6 years who at any time lived in Flint water limits (geocoded) from April 2014 to end date unknown (extend 9 months for fetal exposure).
- Per census data, approx. 8,000-9,000 children

HURLEY CHILDREN'S HOSPITAL

Quick Introduction to ACEs/Toxic Stress…

HURLEY MEDICAL CENTER

Adverse Childhood Experiences (ACEs)

HURLEY CHILDREN'S HOSPITAL

- ACEs are potentially traumatic events that can have negative, lasting effects on health and well-being.
- Also referred to as toxic stress or childhood trauma.
- As number of ACEs increase, the risk for health problems increase in a strong and graded fashion.
- An ACE score of 6 or more results in a 20 year decrease in life expectancy.

- CDC ACE study
  - Kaiser Permanente from 1995 to 1997 with more than 17,000 participants.

HURLEY MEDICAL CENTER

Toxic Stresses

HURLEY CHILDREN'S HOSPITAL

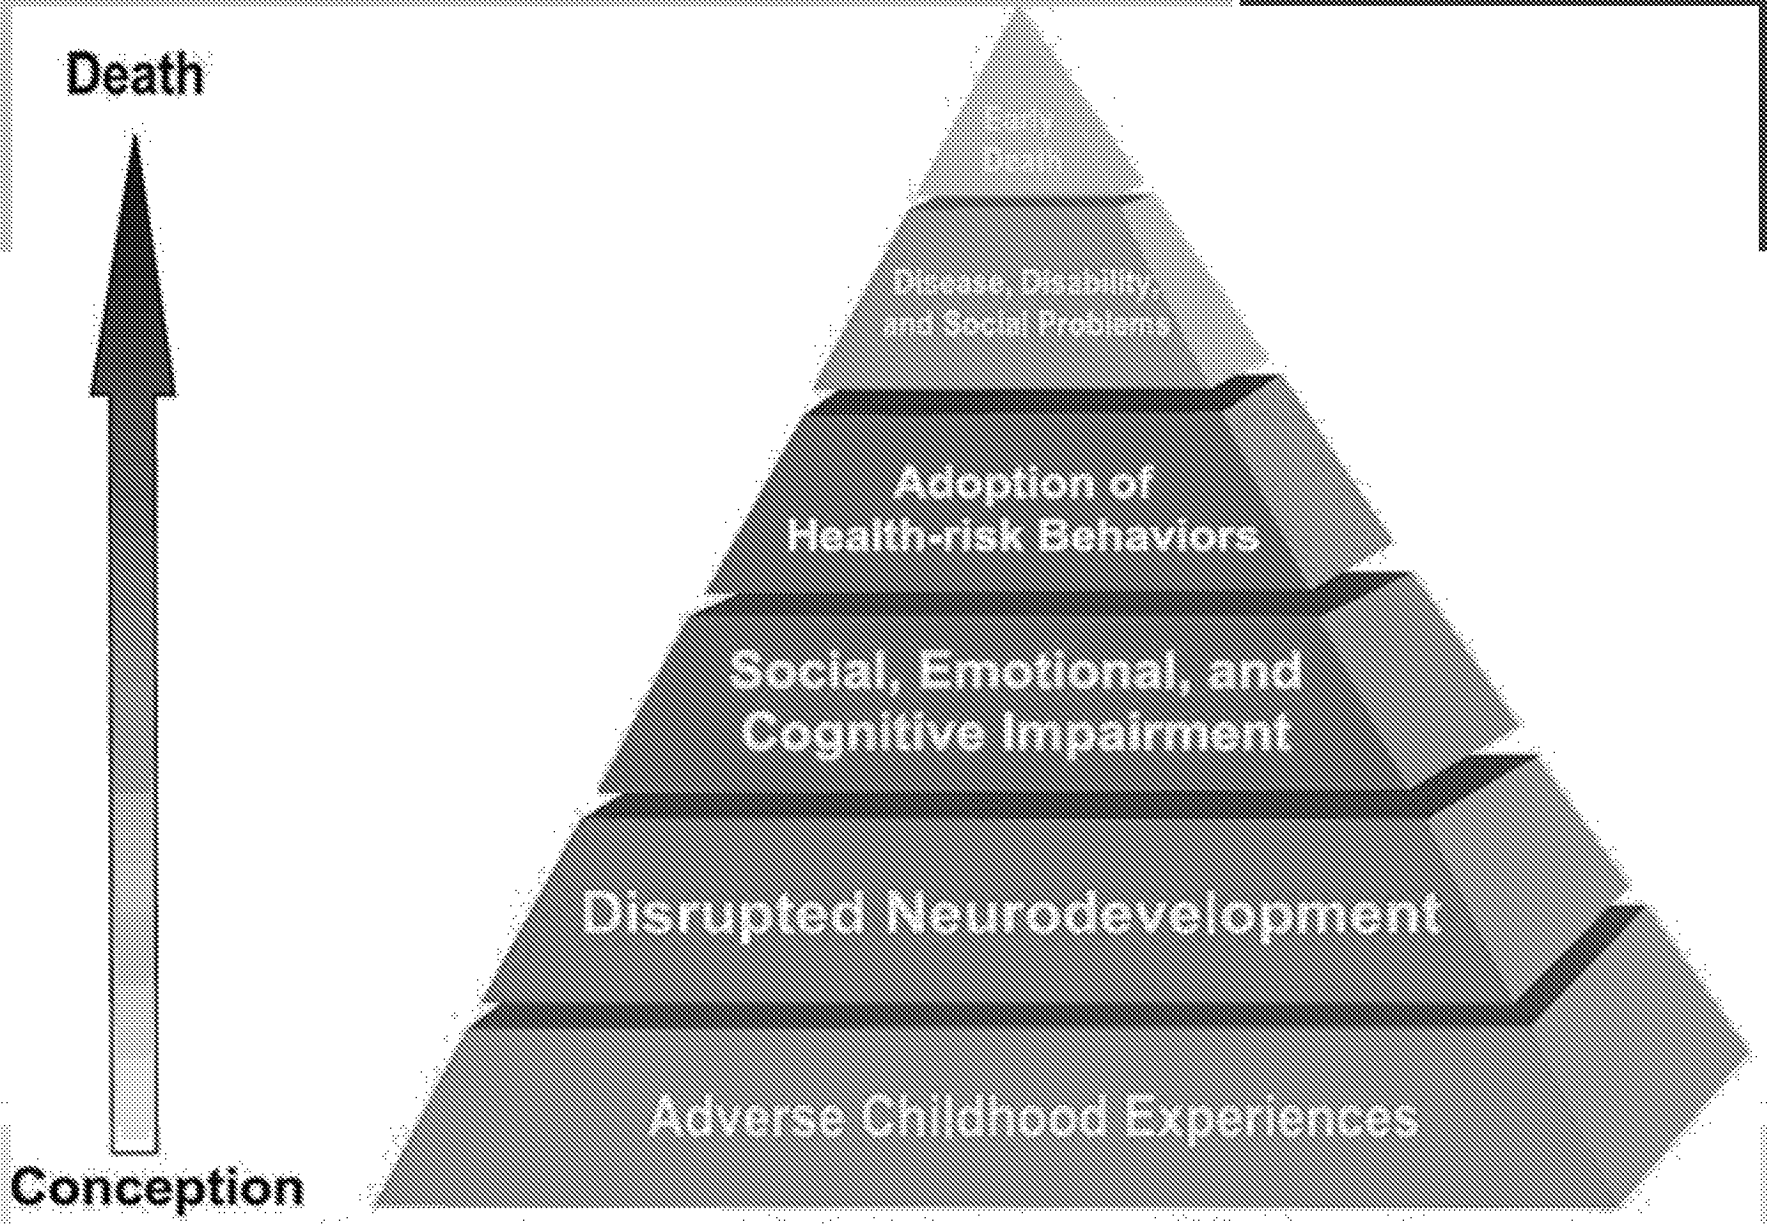
HURLEY MEDICAL CENTER

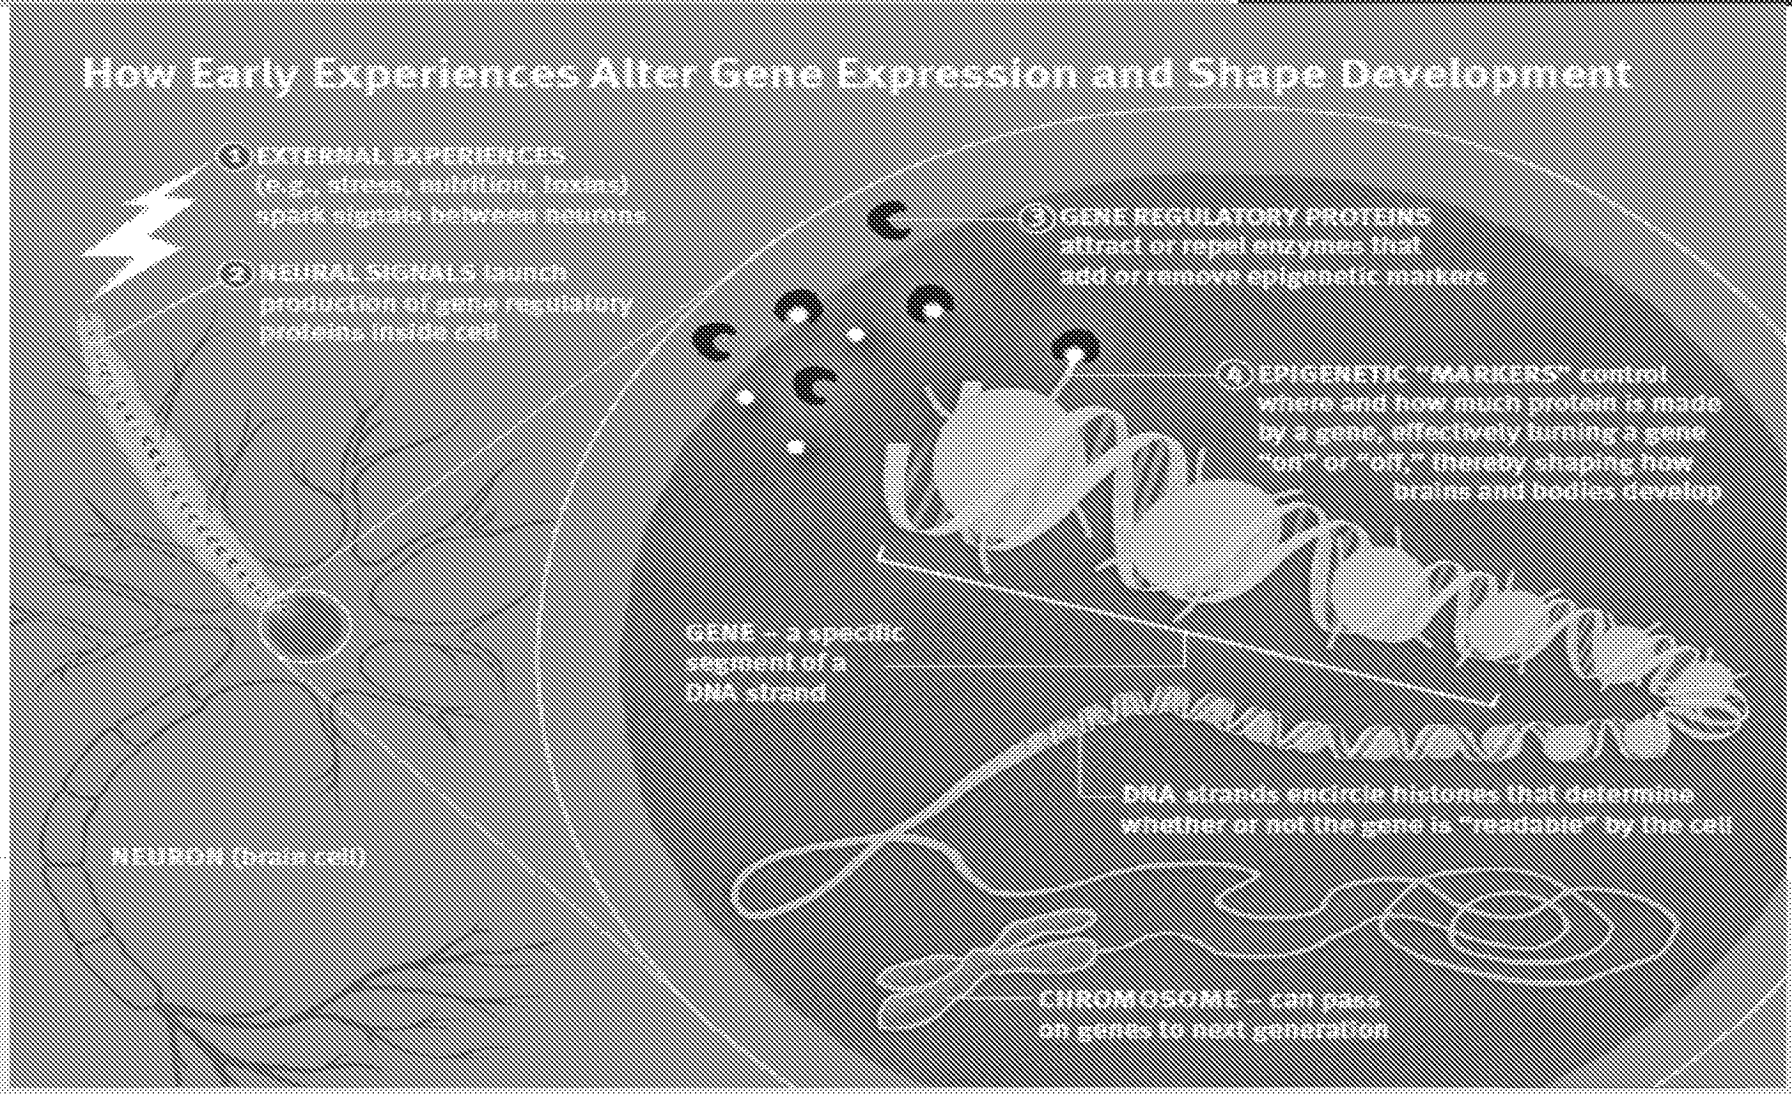


Mechanisms by Which Adverse Childhood Experiences Influence Health and Well-being Throughout the Lifespan

http://www.cdc.gov/violenceprevention/acestudy/

EPIGENETICS

HURLEY CHILDREN'S HOSPITAL



http://developingchild.harvard.edu/science/deep-dives/gene-environment-interaction/

ACE/Toxic Stress

HURLEY CHILDREN'S HOSPITAL

- Many chronic diseases/disparities in adults are determined decades earlier, by experiences in childhood (0-6 critical)
- Lead exposure is an ACE/toxic stress

Flint kids...

HURLEY CHILDREN'S HOSPITAL

HURLEY MEDICAL CENTER

- Now what can we do???

Research/Assessment

HURLEY CHILDREN'S HOSPITAL

- Assess the impact of the exposure
  - Health impact
    - BLL
    - Longitudinal neurodevelopmental f/u
    - Cord blood Pb, brain injury markers, epigenetics
    - Retrospective fetal deaths, IUGR
  - Nutrition impact
  - Psychosocial impact
  - Water quality/infrastructure impact
- Continued monitoring
  - Academic/public health collaborations

HURLEY MEDICAL CENTER

Secondary Prevention

HURLEY CHILDREN'S HOSPITAL

- Unique opportunity to be proactive, to regain public trust, and to **buffer** impact of exposure
  - Short Term
  - Long Term

HURLEY MEDICAL CENTER

Short-Term Secondary Prevention

HURLEY CHILDREN'S HOSPITAL

- Consistent, coordinated, multi-method, trusted messaging/education/risk communication/PSAs
  - Need for central command/hub/emergency response

Short-Term Secondary Prevention

HURLEY CHILDREN'S HOSPITAL

- Water still not safe (public health emergency)
  - Corrosion control optimization
  - Ongoing risk from scale disruption
  - Door to door filter/replacement distribution
    - # filters distributed approx 1/3 of homes
  - Public education re water precautions (filters, flushing, cold water, cooking, infants, etc)
  - Lead plumbing

HURLEY CHILDREN'S HOSPITAL

Secondary Prevention Evidence Based Interventions

#flintwatercrisis
Secondary Prevention

HURLEY CHILDREN'S HOSPITAL

- Medical/Health
- Nutrition
- Education
- Caregiver capacity
- Water quality

HURLEY MEDICAL CENTER

Secondary Prevention
Medical/Health

HURLEY CHILDREN'S HOSPITAL

- Support and education for primary care providers regarding aggressive long-term neurodevelopmental screening & testing
- Improve access to Developmental and Behavioral (DBP) specialists, pediatric psychologists, pediatric psychiatrists
  - Preemptive referral to mental health/toxic stress screening
  - Support capacity building and/or incentivize recruitment to allow Genesee Health System (CMH) to build this capacity which is currently needed and lacking
- Increase recognition and education regarding trauma informed care, social determinants of health (SDOH)
- Consider health fund/enrollment in Children's Special Health Care Services (CSHCS) for exposed kids to cover long-term needs

HURLEY MEDICAL CENTER

Secondary Prevention Medical/Health

HURLEY CHILDREN'S HOSPITAL

- Expand state-funded Genesee Health System (CMH) services
  - Infant Mental Health (30 capacity)
  - Child case management
  - Home-based services
  - Trauma informed care – trauma focused CBT

Secondary Prevention
Medical/Health

HURLEY CHILDREN'S HOSPITAL

- Role of Medicaid HMO plans:
  - Support to drive patients to medical home: enhanced transportation, case management, HEDIS monitoring, pt incentives, mental health access, etc
  - Reimbursement for integrated social work, registered dietician, mental health services, OT/PT services
  - Encourage collaboration/mandate support of Genesee Children's Healthcare Access Program (CHAP)

HURLEY MEDICAL CENTER

Hurley Children's Clinic

Thinking Outside The Box

HURLEY CHILDREN'S HOSPITAL

- Transportation
- Social work
- WIC RD/Nutrition
- Peds Psychology
- Training site

HURLEY MEDICAL CENTER

Secondary Prevention
Nutrition

HURLEY CHILDREN'S HOSPITAL

- Short-term mitigation/protection
  - Promotion/education of Iron, Calcium, Vit C diets
- Promote enrollment and participation in pre-existing nutrition resources (WIC, SNAP, DUFB, MTA)
- Expand WIC eligibility, access (co-locate with PMD), benefits

Secondary Prevention
Nutrition

HURLEY CHILDREN'S HOSPITAL

- Improve food access/security efforts
  - Subsidies, pilots – grocery stores, mobile groceries, urban farming, etc
- Invest in breastfeeding promotion, education, and support services

Secondary Prevention
Education

- Subsidize quality childcare options
- Automatic referral/assessment by Early Intervention (Early On)
- Enroll all in early head start, head start
  - Universal Pre-school/Flint Pre-Promise
- Strengthen special education capacity/trained personnel

Secondary Prevention
Education

HURLEY CHILDREN'S HOSPITAL

- Invest in school health/wellness/behavioral health
  - School nurse:student ratio – MI ranked worst in country
  - 1:750 recommended
  - 1:6,500 Flint
- Place MDHHS employee at every school
- Model lead safe school campaigns
  - Proactive water testing, lead plumbing investigations
  - Lead mitigating school nutrition

Investing in Children: Younger The Better

HURLEY CHILDREN'S HOSPITAL

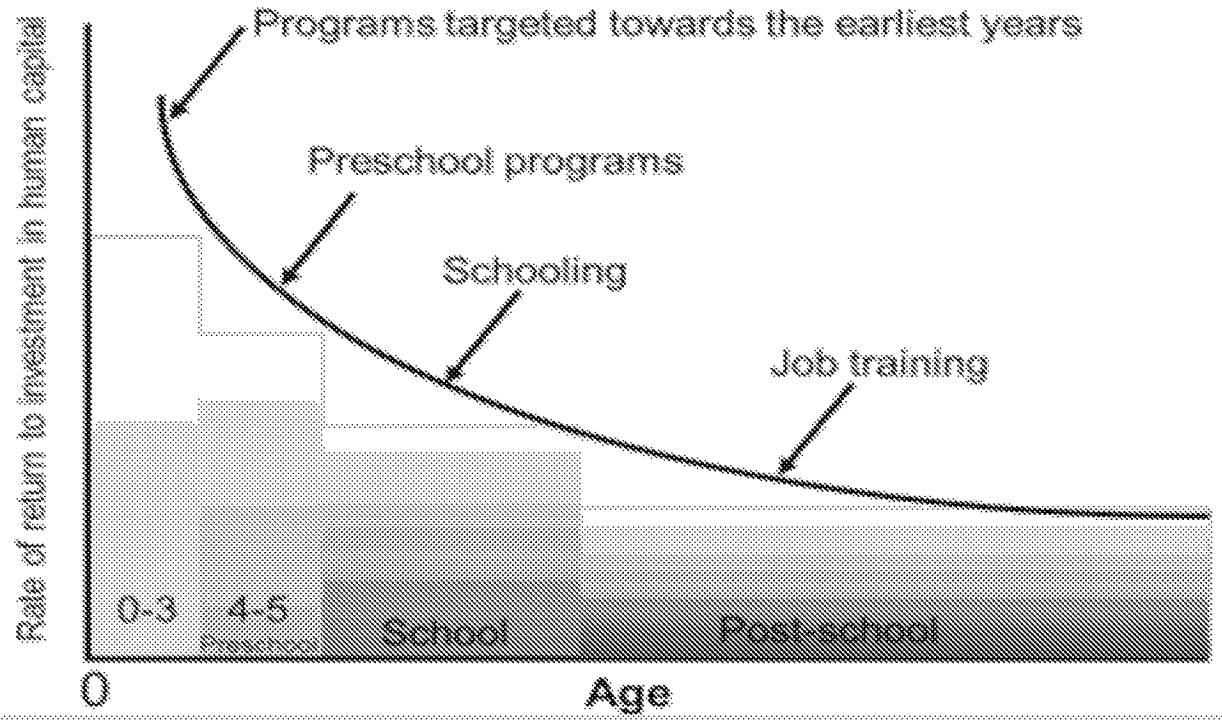
Rates of Return to Human Capital Investment at Different Ages: Return to an Extra Dollar at Various Ages



https://www.aap.org/en-us/advocacy-and-policy/federal-advocacy/Documents/Panel%202%20-%20Marks%20RWJF%20Presentation.pdf

HURLEY MEDICAL CENTER

Secondary Prevention
Caregiver capacity

HURLEY CHILDREN'S HOSPITAL

- Toxic stress and resilience
  - "Strong, frequent, and/or prolonged activation of the body's stress-response system in the absence of the **buffering protection of a supportive, adult relationship**."

Shonkoff, J & Garner, A. (2012) The lifelong effects of early childhood adversity and toxic stress. Pediatrics, 129(1). 232-246.

HURLEY MEDICAL CENTER

Secondary Prevention
Caregiver capacity

HURLEY CHILDREN'S HOSPITAL

- Need to support parents and programs to improve parenting skills
- Evidence-based parenting programs
  - Incredible Years (HCH AAP Grant)
  - Triple P
  - Everyday Parenting
  - Adventures in Parenting
  - Home visiting programs
  - Strengthening Families Framework
  - Maternal Infant Health Program (MIHP)
  - Healthy Start
  - Nurse Family Partnership (NFP)

HURLEY MEDICAL CENTER

Nurse Family Partnership

HURLEY CHILDREN'S HOSPITAL

- 56% reduction in emergency room visits for accidents and poisonings in the second year of the child's life
- 50% reduction in behavioral problems when the children enter school.
- 48% reduction in state-verified reports of child abuse and neglect by child age 15
- 39% fewer healthcare encounters for injuries or ingesions in the first two years of life
- Increase in language scores

"Nurse-Family Partnership", Early Childhood, Social Programs That Work, Coalition for Evidence-Based Policy
hVp://evidencebasedprograms.org/wordpress/?page_id=57

HURLEY MEDICAL CENTER

Secondary Prevention
Caregiver capacity

HURLEY CHILDREN'S HOSPITAL

- Increase support for state-funded NFP, Healthy Start and MIHP
  - Hurley-run NFP capacity for 100

HURLEY MEDICAL CENTER

Secondary Prevention
Water Safety/Infrastructure

HURLEY CHILDREN'S HOSPITAL

- Opportunity to model best practices for lead in water monitoring to protect public health rather than a focus on minimum compliance
  - EPA Flint Safe Drinking Water Taskforce
- Flint will change water source and treat water again once connected to KWA (2016), should not be rushed
- Full lead plumbing replacement (can be targeted)

HURLEY MEDICAL CENTER

Next Steps

HURLEY CHILDREN'S HOSPITAL

- Primary prevention failed
  - Preventable population-wide exposure
- Secondary prevention must be priority

- Invest and prioritize in evidence based interventions that mitigate exposure and build childhood resilience
  - Ages 0 to 6 years critical for life course trajectory

Top Five Interventions

HURLEY CHILDREN'S HOSPITAL

1. Support for emergency response
2. Increase funding/capacity for home visiting maternal-infant support programs
3. Guarantee Flint Pre-Promise (3-5 year quality early education)
4. Fund RN in every Flint school
5. Encourage innovative Medicaid HMO plan and medical home initiatives (ie: CHAP)

HURLEY MEDICAL CENTER

Thank you!

HURLEY MEDICAL CENTER

From: Baird, Richard (GOV)
Sent: Wednesday, December 30, 2015 6:57 PM
To: Agen, Jarrod (GOV); Clement, Elizabeth (GOV); Hollins, Harvey (GOV); Kelenske, Chris (MSP); Holland, Meegan (GOV); Murray, David (GOV); Redford, James (GOV); Becker, Timothy (DHHS); Creagh, Keith (DNR); Roberts, John (DTMB)
Cc: Etue, Kriste (EtueK@michigan.gov); Nick Lyon
Subject: Attorney Client Work Product (Draft), Privileged and Confidential
Attachments: A Proposal to Create the Flint Water Inter.docx; IA Coord Com Org Chart.jpg; IAP Flint Water 2015-12-29.pdf

Team:

Today Harvey and I met with the Flint Water Task Force. It was a good meeting. People were pleased with the G's statement from the prior day. Captain Kelenske joined us and we had a very good discussion about moving forward with the creation of the Flint Water Crisis Agency Coordinating Committee (FIACC). Tim Becker and Captain Kelenske provided me with a fair amount of input. I also read the City of Flint Incident Action Plan for a State of Emergency which Chris received today (enclosed for those who wish to read it as well). I have distilled all of this into a two page plan that I want your edits and comments on and a one page organizational chart (now presented in the "governor's colors" according to our fine people in Communications). Spoiler alert—I made Captain Kelenske Vice Chair of the whole shebang (with the Colonel's blessing) so Harvey wouldn't get lonely.

Here is my ask of you:

1) Within 24 (sooner if you can) hours give me your comments and input
2) Tomorrow I will turn around a final document for Jarrod to review with the Governor either New Year's Day or Saturday
3) Ideally, Governor will approve Harvey sending it to Mayor Weaver Saturday (Sunday latest)
4) Mayor needs to know that this is what the Governor wishes to discuss at the meeting January 7 along with financial resources that we still need some estimates on cost from DHHS for
5) Meegan and Dave need to noodle how best to get out front with this and change the narrative focus on Monday's Genesee County declaration of emergency

I know we are all working way too hard for what should be a rest and recharge period but I do appreciate everyone's efforts and I know the Boss really does as well.

Regards,

Rich

CITY OF FLINT

INCIDENT ACTION PLAN

STATE OF EMERGENCY

Objectives:

To provide short term relief and long term solutions in addressing the man-made emergency of increased lead levels in the City of Flint (the "City") water system resulting from the switch to Flint River as the City's water source as well as the threat to public health related to elevated blood lead levels in Flint residents, without interruption of the provision of public safety and other essential public services. Due to the fluidic nature of emergencies and the complexity of the City of Flint's declared emergency, this plan serves as a framework and may be altered as the emergency develops.

The Response Framework

The purpose of this plan is to organize efforts on behalf of the city to assess the extent of the City's infrastructure needs and risks to public health, provide immediate relief to those who are at risk, and establish long term solutions. In addition, the city must ascertain what immediate relief and long term solutions the City is capable of implementing based on what resources are available. For any activities that are beyond the resource capacity of the City, external sources of funding, supplies, and manpower must be sought.

There are a number of steps that must be taken in accordance with the Flint Emergency Support Operations Plan (SEOP), in order for the City to be compliant with the Genesee County Emergency Action Guidelines. These include the activation of the Incident Management Team, the Emergency Operation Center, and the sharing of essential documents with the County, including this plan. Information must also be shared by the City's Public Information Officer on a regular basis, as required by the SEOP.

This plan calls for the provision of immediate relief to those at risk in our community. Special consideration must be given to residents who belong to underserved groups, such as those who are homebound, undocumented, in poverty, etc. Additional consideration must also be given to the equitable provision of services throughout our community in order to equally protect the health and safety of every member of our community.

Implementation of this plan is to be conducted by the Incident Management Team, which will monitor the effective delivery of goods and services in order to address the conditions of the emergency.

Understanding the Issue:

October 1, 2015, the Genesee County Health Department issued a Public Health Emergency after elevated blood-lead levels were found among children in the City of Flint. This incident correlates with elevated levels of lead found in the City's drinking water after the City switched water sources in April of

2014 to the Flint River. The scope of this problem appears to be limited to Flint City Water Customers and their dependents. Public agencies from several levels of government, as well as charitable, nonprofit organizations have partnered with the City to provide immediate relief to Flint residents, including the expansion of health services, the provision of bottled water and NSF rated water filters. The city is also seeking long term infrastructure improvements to eliminate lead and other contaminants from the water system.

Gov. Rick Snyder appointed a task force to review "actions regarding water use and testing in Flint" and to make recommendations for future guidelines: Members of the state task force are Ken Sikkema of Public Sector Consultants, Chris Kolb of the Michigan Environmental Council, Dr. Matthew Davis of the University of Michigan Health System, Eric Rothstein of the Galardi Rothstein Group and Dr. Lawrence Reynolds of Mott Children's Health Center.

In an effort to halt the further escalation of this crisis, the City returned to receiving its water from the Detroit Water and Sewerage Department (DWSD) on October 16, 2015. Since that time, additional corrosion control program has started, estimating a reduction of lead levels over the next six months. In light of these efforts, concerns surrounding the quality of water and health of the residents persist to the point that Mayor Karen Weaver declared a State of Emergency on December 14, 2015 so as to resolve this crisis once and for all.

The current challenge facing the City is providing immediate relief and long term solutions of the quality of the water and health of residents while the City remains in a financially critical condition. It is hoped and expected that higher levels of government recognize this emergency as it pertains to the condition of the City's infrastructure and health of its residents, and do all things necessary to assist the City in the provision of relief and the execution of capital improvement projects that will eliminate the causes of this emergency.

Enhancing Understanding:

Information Collection

Essential Elements of Information (EEIs) can be qualified as the City's water tests containing lead results, the verification of lead water lines (both public and private), and health information. Water testing is performed by the City's water plant in cooperation with the MDEQ. The verification of lead water lines is being handled by University of Michigan Flint, who is currently digitizing the City's water line information and PSI Engineering, who is initiating the effort to verify lead lines by excavating an initial 150 residential lines. This information allows the Incident Management Team to assess the current condition of the emergency by way of determining the water quality and the condition of the water distribution infrastructure.

Information Analysis

The City has sought partners to assist in the analysis and attenuation of complex data. Wayne State University's center for Urban Studies has agreed to assist the City in its efforts to document and track lead water lines, water test results, and filter distribution with geographic information system (GIS) technology. This allows for easily updateable, digestible information to be presented to officials.

Assessment of Impacts

The City will need assistance in determining the total cost of damage done to the public health and infrastructure. As of now, only portions of this damage are visible.

PSI is providing some assistance by excavating 150 residential water lines to verify that they are comprised of lead. This is an initial step, but not enough. More resources will be needed to continue this process.

Continuous Situational Awareness

It is important that the Emergency Management Team receive continuous information regarding water testing results, lead water line numbers, and filter distribution information in order to gain a realistic and current perspective. Much of his information is currently available on the City's website (cityofflint.com) and more is added each week by the PIO team.

Actions taken in Response to the Emergency

Activation of the Incident Management Team

Upon the declaration of Emergency by Mayor Weaver, the Support Emergency Operations Plan (SEOP) was activated. The SEOP calls upon the Incident Management Team to generate the Incident Action Plan (IAP. Each member of this team serves a specific function as it relates to addressing the causes and effects of the emergency. The Emergency Management Team roster can be found in the SEOP on page 3, with a list of alternates on page 4 in case the need for succession arises.

Emergency Operations Center

The Emergency Operations Center (EOC) must be activated upon the declaration of a State of Emergency by the Mayor. This center is required by the SEOP and serves as a nerve center for the Incident Management Team. Here, emergency relief efforts are coordinated by key members of the Incident Management Team. In this case, these relief efforts consist of the distribution of water filters at

City Hall and community events, the distribution of bottled water throughout the city in conjunction with the efforts of community partners, and assisting with the circulation of water testing kits throughout the community. The EOC will also be monitoring and managing the inventory of relief supplies, such as water filters and bottled water.

According to the SEOP, the EOC must establish an incident tracking system. This system will serve as a work plan for the management of the emergency. In addition, it is essential that the IMT record water testing results, lead water line location information, and information about the distribution of water filters and bottled water all in one place so that information is readily available for the Incident Management Team. This information will also be sent out to the public and media in the form of daily regular updates by the City's PIO.

Communication

The EOC maintains a telephone system that exists to intake questions about relief efforts and to organize relief logistics. It is open from 8am to 5pm, Monday through Friday. A voicemail system and eventual email system will exist to handle requests and inquiries that occur outside of the normal operating hours. This system will be constructed by the City's IS department.

Public Awareness and Education

1. **Emergency Alerts and Updates:**
   The City's Public Information Officer will make available information as it relates to the emergency in the form of press releases, emails, and physical documents. Daily updates containing information on the distribution of water filters, bottled water, water testing, blood lead testing, and other relief efforts will be available on the City's website for the public to view. Information will be available at City Hall for residents.

2. **Joint Information Center:**
   The City's PIO will establish a joint Information Center that is organized to coordinate the efforts of multiple agencies to communicate with the public. This includes the circulation of joint press releases, public health information, educational materials, and updates relating to the State of Emergency. This committee is comprised of public information officers and public relations personnel to coordinate efforts to keep the public updated and informed. Regular updates to the media regarding events and progress will be made as news develops.

   The US EPA has offered assistance in the form of Public Information support. Additional support in this area has been provided by the Michigan State Police.

3. **Education:**
   Many government agencies and philanthropic organizations are already distributing information regarding the effects of lead on public health. It is important that the City assist in these efforts so vital information and knowledge is presented to all members of the community. The goal is to continue to eliminate misunderstandings and incorrect information as it relates to reducing lead in drinking water, pursuing medical help, and maintaining a healthy diet to reduce lead absorption in the body. Lead education is currently being performed by the Genesee County Health Department, the Michigan Department of Health and Human Services and Medical community at-large.

Assessment of Social Needs

In order to effectively and equitably provide immediate relief to Flint water customers, the City must take into account many of the socio-economic needs and limitations of the community. Some residents cannot get to City Hall for a water filter. Some residents do not have internet access. Literacy or a language barrier may also pose significant obstacles to the effective distribution of educational information and relief to those in need. These will be continuing challenges facing the community. At present these are the resources the City has available to mitigate some of those challenges.

Logistics

Logistics are being coordinated by the City Emergency Management Team's City's *Chief Logistics Officer*, who is the City Administrator. The CLO is responsible for the coordination, procurement, and transportation of goods and services, which is essential for effective implementation of the response plan.

Fixed Distribution Points

There are several locations throughout the city where residents may acquire a water filter. These locations are:

Flint City Hall
1101 South Saginaw, Flint MI 48502

Genesee County Community Action Resource Department (GCCARD)
601 North Saginaw, Flint MI 48502
and
2727 Lippencott Blvd, Flint MI 48507

Michigan Department of Health and Human Services
4809 Clio Road, Flint MI 48504
and
125 E. Union Street, Flint, MI 48502

Activation of Ward Distribution Centers

Each of the nine wards will have activated distribution centers that are primarily managed by City Council Members or their designees.

Flint City Council – Water Distribution Sites

WARD	COUNCILPERSON	LOCATION	ADDRESS
1	Eric Mays	Hasselbring Senior Center	1002 W. Home Avenue
2	Jackie Poplar	Joy Tabernacle Church	2505 N. Chevrolet Avenue
3	Kerry Nelson	Antioch Baptist Church	1083 E. Stewart Avenue
4	Joshua Freeman	Flint Fire Station No. 5	3402 Western Road
5	Wantwaz Davis	Doyle/Ryder Elementary School	1040 N. Saginaw Street
6	Herbert Winfrey	New Community Baptist Church	1375 Lavender Avenue
7	Monica Galloway	Brennan Community Center	1301 Pingree Avenue
8	Vicki VanBuren	Flint Southwestern Academy	1420 W. 12th Street
9	Scott Kincaid	Dort Mall Police Service Station	3600 S. Dort Highway

Mobile Distribution Centers

With the help of transportation agencies, like the Metro Transit Authority (MTA), meals on wheels, and GCCARD, the city can help establish mobile distribution centers and delivery systems that can provide water filters, bottled water, and nutritious foods, among other types of relief accompanied by educational materials to neighborhoods and to homes of people who experience limited mobility.

- Mass Transportation Authority-MTA bus passes: Assisting residents with bus passes to improve their mobility will increase their chances of receiving help. Transportation services will also improve residents' access to medical care.
- MTA-Your Ride mobile distribution:
    - Estimated Costs: $25 per hour to deliver water and filters to homes throughout the City.

Problem 1. Public Health Emergency

The first objective in addressing this emergency is reducing, and eventually eliminating, the danger to public health. As City water coming out of faucets continue to contain lead, and copper and other

harmful contaminants exceeding government guidelines and regulations, it poses a risk to the people of our community. Preventative measures must be taken to avoid the effects of toxicosis that are difficult if not impossible to completely reverse.

As far as preventative measures are concerned, education, water filters, and bottled water must be provided to every household in the City in order to reduce the chances of lead exposure, especially to our most vulnerable members of the community. If lead exposure has occurred, resulting in elevated blood lead levels, immediate and sustained medical attention must be available to those affected. Health services must be expanded in the area to accommodate increased numbers of case loads and specialized care regarding lead poisoning and its effects.

Immediate Relief for Public Health:

1. Prevention: Education, water filters and replacement cartridges, free water testing, and bottled water must be available to everyone.
2. Access to nutritious food that reduces the risks of lead absorption by the body. The City can coordinate activities with the County Health Department

Long Term Solutions: Maintaining Public Health and Coping with Lead Exposure

1. Work closely with the Genesee County Health Department and Michigan Department of Health and Human Services in order to provide sustainable care and monitoring of children exposed to lead. This care must be available for them for several years-preferably several decades.
2. Support and education for primary care providers regarding aggressive long-term neurodevelopmental screening and testing.
3. Improved access to developmental and behavioral (DBP) specialists, pediatric psychologists, pediatric psychiatrists.
    a. Pre-emptive referral to mental health/ toxic stress screenings.
    b. Support capacity building and or incentivize recruitment to allow Genesee health system (CMH) to build this capacity which is currently needed and lacking.
4. Increase recognition and education regarding trauma informed care, social determinants of health (SDOH).
5. Expand State funded Genesee Health System (CMH) services.
    a. Infant mental health (30 day capacity)
    b. Child case management
    c. Home based services
    d. Trauma informed care- trauma focused CBT

Problem 2. Lead Contamination in the Water

Immediate Relief:

1. Education, water filters and replacement cartridges, free water testing for water customers, and bottled water must be available to everyone. Water filters can be obtained at any of the fixed distribution points throughout the City.
2. Identification and verification of lead water service lines throughout the city- both public and private.
3. Assistance to identify lead pipes within buildings and homes.

Distribution of Bottled Water:
At this point, we are directing all offers for donations to the Food Bank of Eastern Michigan. It is imperative that water be accessible to all members of the community through a variety of distribution channels. These channels are explained in the Logistics Section of this plan.

Distribution of Test Bottles:
Water testing kits can be picked up at City Hall with instructions. Test results are posted on the City's website to raise public awareness and encourage more participation.

Long term Solutions: Capital Improvements Needs
The distribution of filters, water, and food to counter the effects of lead are essential response efforts to keep people safe. However, long term solutions are required to keep people healthy, to eliminate lead from the public and private water distribution system distribution, and to provide affordable clean water. Our public infrastructure and utilities must be reliable, sustainable, and equitable in order for this community to rebound after this emergency. The following long term solutions must be implemented in order to set the City of Flint on a course for recovery. These solutions come at a heavy cost for a City that is currently in receivership. The City has experienced financial distress due to this Emergency, in addition to a two million dollar loss from switching back to DWSD. The City has diligently applied for Fiscally Distressed Cities, Villages, and Townships, Grant in order to supplement funding for capital improvement projects. It is essential that these grants be awarded in order to achieve long term solutions.

1. COMPLETE **Transition to a Temporary Safe Water Source until the Completion of KWA:**
   This has already occurred. On October 16, 2015, Flint returned to receiving its water from DWSD on a 9 month agreement. This agreement will expire in June 2016, when the KWA is projected to be complete. The City had to pay $2 million out of its general fund to make this switch.

2. IN PROGRESS **Additional Corrosion Control added to the Water System:**

This is already occurring. In early December, 2015, Flint began to add additional corrosion control to the water coming in from DWSD in attempts to rebuild the protective scale inside its pipes. This is estimated to reduce lead levels in two to six months.

3. **Faucet Replacement:**
   Replacement of Water faucets, and drinking fountains in the school system. It has been determined after state inspections that many sources of lead contamination in the School System's water were the faucets themselves. These faucets need to be replaced.

4. **Water Line Replacement:**
   Water Line Replacement to reduce antiquated infrastructure and lead service lines. These lines must be identified, verified, and replaced. Residents who are facing financial hardships must have access to assistance to cover the costs of these replacements through access to grants and (forgivable) loans made available through State and Federal agencies. The corrosion damage to public and private lines that Flint River water caused is still being determined.
   - Replacement of an estimated fifteen thousand (15,000) lead service lines at an estimated cost of three thousand dollars ($3,000) per line. Total costs forty –five million dollars ($45,000,000). This project is estimated to be one of the most cost-intensive endeavors related to ameliorating water contaminants.

5. **Reimbursement of Critical Expenditures:**
   Seeking reimbursement of two million dollar cost of returning to DWSD and forgiveness of Water Revolving Loan Debt from the State of Michigan.

6. **KWA Capital Improvements**: The City has reconnected to Detroit temporarily until a water line from Port Huron is developed. The new water line known as the KWA pipeline or Karegnondi Water Authority is expected to bring water to the City from Lake Huron by July. The current cost agreement between Flint and DWSD is for nine months, therefore it is imperative that KWA be completed as soon as possible. Assistance relating to capital improvements to expedite this process will help to achieve long term goals.

KWA Capital Improvements:	**Estimated Costs:**
a. Transfer Station to Dort Reservoir	*$4,500,000*
b. Raw water line to pump station #4	*$636,000*
c. Phosphoric acid feed system	*$186,000*
d. Alum Feed system	*$40,000*
e. Post filtration system	*$387,289*

f.	*SCADA Upgrades*	*$424,000*
g.	*Sewer Relining*	*$100,000*
	Total	***$6,273,289***

Ancillary Considerations: Public Safety during an Emergency

During a time of emergency public safety agencies need to be prepared to respond to threats to public safety and critical infrastructure. The City is facing a man-made emergency that is threatening the public health. Resentment and hostility toward local institutions and municipal government is at a significant level.

Critical infrastructure should be safeguarded if the need arises. This includes increasing security at City Hall to reduce potential for public safety risks. In the case of credible threats to public infrastructure, it may be required to hire private security company for first line of defense. Private Security is lower cost, thereby making it the first option. The minimum response is acted upon first, elevating only if the need arises. Credible or imminent threats of damage or destruction to critical infrastructure requires an elevated response. Such needs may require over-time police officers to address critical situations. Mutual aid from surrounding communities can be requested if Flint public safety is overextended.

Implementation:

Community Partners

Financial limitations of the city persist while it confronts this emergency. Many community partners have offered their assistance to perform various needed functions. The city is heavily reliant on the assistance that government agencies and nonprofit organizations have provided.

The Mott Foundation

The Mott Foundation has provided financial assistance, especially in their generous contribution of $4 million. In addition, the Mott Foundation has recently pledged an additional

United Way

The Genesee County United Way has provided significant financial assistance in the way of purchasing and helping to distribute water filters since the public health emergency began on October 1st, 2015.

Genesee County Community Action Resources Department (GCCARD)

GCCARD is organized to fight poverty and has been a primary partner in the distribution of water filters. It has also regularly supported the city with the logistics and availability of water filters at City Hall.

Genesee County Health Department

Has provided educational information to Flint Water customers

Genesee County Board of Commissioners

The Board of Commissioners have pledged their support to help Flint seek solutions to this crisis. The Board has already assisted in making health and nutrition information available to the public.

Assistance from Wayne State University

Wayne State University's Center for Urban Studies will be providing technical GIS support to assist in the documentation of emergency relief efforts.

The US Environmental Protection Agency

Region 5 EPA has offered assistance with Public Information distribution during the emergency.

Outside Help is still needed…

The City of Flint is forever thankful to our community partners who have given so much to help so many people. However the magnitude of this emergency calls for more resources that are beyond the capacity of the combined local organizations and government agencies. Long term solutions will require a heavy investment in health care and capital improvement projects to upgrade the city's antiquated water distribution system.

- Help with Immediate Relief in terms of assuring allocative efficiency. Distribution should be equitable- assistance from other governments required to assure this.
- Reaching communities for the distribution of water filters, water, and educational materials.
- Help with Water Testing to increase participation and lead education.
- Increasing the rate of water testing
- Assistance is required to fund essential capital improvement projects to guarantee clean and safe water.

The goal: Assess the extent of the elevated blood lead levels – the number of those affected and the degree to which they're affected

- Get as many people in the affected zip codes tested as possible – can the Red Cross or some other agency with a bus or mobile unit set up for folks to give blood convert over to blood level testing and go into neighborhoods that have low testing rates?

- A public health friend of mine said that Genesee County Health workers are stressed to the max. Can we deploy appropriate personnel from other county health agencies to help with inspecting homes for possible other causes In other words, it won't do any good to invest more in water infrastructure if we're finding window sills with teeth marks. I say this NOT to downplay the role that water lead levels may have played. But can we get Habitat for Humanity, for example, to do a massive volunteer effort to eradicate lead paint in homes … or is that beyond their expertise?

- Gather experts to assess exactly how extensive the problem is and potential causes. And then convey this in a much more accessible ways. If you want blood level data, you have to scroll down on the DHHS web site, find the headline and then read a long press release. Maybe we're conveying this information better on the ground, but if not, we need to communicate conclusive findings in multiple ways– graphics, video, informational photo galleries and maybe even a "test" that residents can take to see if their home is at risk in other ways. I know that sounds awfully MLive-ish, but it can be effective.

Team:

Today Harvey and I met with the Flint Water Task Force. It was a good meeting. People were pleased with the G's statement from the prior day. Captain Kelenske joined us and we had a very good discussion about moving forward with the creation of the Flint Water Crisis Agency Coordinating Committee (FIACC). Tim Becker and Captain Kelenske provided me with a fair amount of input. I also read the City of Flint Incident Action Plan for a State of Emergency which Chris received today (enclosed for those who wish to read it as well). I have distilled all of this into a two page plan that I want your edits and comments on and a one page organizational chart (now presented in the "governor's colors" according to our fine people in Communications). Spoiler

alert—I made Captain Kelenske Vice Chair of the whole shebang (with the Colonel's blessing) so Harvey wouldn't get lonely.

Here is my ask of you:

1) Within 24 (sooner if you can) hours give me your comments and input

2) Tomorrow I will turn around a final document for Jarrod to review with the Governor either New Year's Day or Saturday

3) Ideally, Governor will approve Harvey sending it to Mayor Weaver Saturday (Sunday latest)

4) Mayor needs to know that this is what the Governor wishes to discuss at the meeting January 7 along with financial resources that we still need some estimates on cost from DHHS for

5) Meegan and Dave need to noodle how best to get out front with this and change the narrative focus on Monday's Genesee County declaration of emergency

I know we are all working way too hard for what should be a rest and recharge period but I do appreciate everyone's efforts and I know the Boss really does as well.

Regards,

Rich

Not Responsive

Not Responsive The individual I was speaking with wanted to further explore:

Increased funding/focus for Head start to get ahead of the curve

School nutrition and distribution systems (year around)

Fresh produce/local foods

Individual health screening

Infrastructure improvements

I know most if not all are identified in the outline but might want to further explain the nutrition component if the Docs in the group say it might be beneficial for those involved.

Thanks again-Keith

Captain Kelenske joined us and we had a very good discussion about moving forward with the creation of the Flint Water Crisis Agency Coordinating Committee (FIACC). Tim Becker and Captain Kelenske provided me with a fair amount of input. I also read the City of Flint Incident Action Plan for a State of Emergency which Chris received today (enclosed for those who wish to read it as well). I have distilled all of this into a two page plan that I want your edits and comments on and a one page organizational chart (now presented in the "governor's colors" according to our fine people in Communications). Spoiler alert—I made Captain Kelenske Vice Chair of the whole shebang (with the Colonel's blessing) so Harvey wouldn't get lonely.

STATE OF MICHIGAN
EXECUTIVE OFFICE
LANSING

RICK SNYDER
GOVERNOR

BRIAN CALLEY
LT. GOVERNOR

PROCLAMATION

DECLARATION OF EMERGENCY

WHEREAS, Section 1 of Article V of the Michigan Constitution of 1963 vests the executive power of the state of Michigan in the Governor; and

WHEREAS, under the Emergency Management Act, Act No. 390 of the Public Acts of 1976, as amended, MCL 30.401 to 30.421, the Governor is responsible for coping with dangers to this state or the people of this state presented by a disaster or emergency or threat thereof, and may issue executive orders and proclamations, having the force and effect of law to implement the Act; and

WHEREAS, under Section 3 of the Emergency Management Act, 1976 Public Act 390, MCL 30.403, the Governor shall, by executive order or proclamation, declare a state of emergency if the Governor finds that an emergency has occurred or that the threat of an emergency exists; and

WHEREAS, on April 25, 2014 the City of Flint, Michigan switched from the Detroit water system to the Flint River as a water source, the harmful effects of untreated water struck the city's water infrastructure, causing leaching of lead into the water which caused damage to the water system and potential negative health impacts to the citizens; and

WHEREAS, the area affected includes parts of the City of Flint, within the County of Genesee; and

WHEREAS, the damaged water infrastructure and leaching of lead into the city's water caused damage to public and private water infrastructure, and has either caused or threatened to cause elevated blood lead levels, especially in the population of children and pregnant women, and causing a potential immediate threat to public health and safety and disrupting vital community services; and

WHEREAS, from October 1, 2015 to this date, the County of Genesee and the City of Flint have taken a number of actions to cope with the situation, including but not limited to, switching back to the Detroit water system on October 16th, declaring local states of emergency, activating the emergency response and recovery aspects of their emergency operations plan, marshaling

and distributing required resources on a city-wide level, and issuing emergency public information and bulletins; and

WHEREAS, local resources have been insufficient to address the situation, and additional assistance from voluntary organizations and the state is required to protect public health, safety, and property, and to lessen or avert the threat of more severe and long lasting impacts to the community;

NOW, THEREFORE, I, RICHARD D. SNYDER, Governor of the state of Michigan, pursuant to the Constitution of the state of Michigan and provisions of Act No. 390 of the Public Acts of 1976, as amended, do hereby proclaim that a state of emergency exists in the aforementioned county and municipality; and

FURTHER, the Emergency Management and Homeland Security Division of the Department of State Police shall coordinate and maximize all state efforts, and may call upon all state departments to utilize resources at their avail to assist in the emergency area pursuant to the Michigan Emergency Management Plan; and

FURTHER, termination of this emergency will occur at such time as the threats to public health, safety, and property caused by the emergency no longer exist and appropriate programs have been implemented to recover from the effects of this emergency, but in no case longer than February 1, 2016, unless extended as provided by Act No. 390.

Given under my hand and the
Great Seal of the State of Michigan this
5th day of January in the Year of Our
Lord, Two Thousand and Sixteen.

RICHARD D. SNYDER
GOVERNOR

Subject:	Internal Flint Water Meeting
Location:	Governor's Conference Room, 2nd Romney
Start:	Wed 1/28/2015 10:00 AM
End:	Wed 1/28/2015 11:00 AM
Show Time As:	Out of Office
Recurrence:	(none)
Meeting Status:	Accepted
Organizer:	Posthumus, Dick (GOV)
Required Attendees:	Clement, Elizabeth (GOV); Muchmore, Dennis (GOV); Walsh, John (GOV); Wisniewski, Wendy (GOV); Hall, Jean (GOV); Pleyte, Beth (Treasury); Saxton, Thomas (Treasury); Clayton, Stacie (GOV); Hollins, Harvey (GOV); Murray, David (GOV)

Attending:
Dick Posthumus
Dennis Muchmore
John Walsh
Beth Clement
Tom Saxton
Harvey Hollins
Dave Murray

Subject: Call Jerry Ambrose Re: Flint Water and Ministers Meeting
Location: PPI

Start: Fri 1/30/2015 12:30 PM
End: Fri 1/30/2015 12:45 PM
Show Time As: Out of Office

Recurrence: (none)

Organizer: Hollins, Harvey (GOV)

1) Safe water
    a. Water is safe to drink but if you're a vulnerable to health risk, talk with your doctor
    b.
2) Improve the water
    a. Decision was made by council to go to KWA, but not to use the Flint River as a temporary fix
    b. $200M borrowed to transition the system
    c. Saved immediately $9M / year
3) Cost of Water
    a. TODO: Duggan's initiative
    b. Old infrastructure
    c.

Subject: Flint Water Press Conference
Location: Haskell Community Center, 2201 Forest Hills Ave. Flint

Start: Tue 2/3/2015 3:00 PM
End: Tue 2/3/2015 4:00 PM
Show Time As: Out of Office

Recurrence: (none)

Meeting Status: Accepted

Organizer: Clayton, Stacie (GOV)
Required Attendees: Hollins, Harvey (GOV)

Tuesday, Feb. 3, 2015, 3-4 p.m.
Haskell Community Center, 2201 Forest Hills Ave. Flint
Governor's communications: Dave Murray, murrayd1@michgian.gov, PPI
DEQ communications: Brad Wurfel, wurfelb@michigan.gov, PPI
Treasury communications: Terry Stanton, stantont@michigan.gov, PPI

Purpose

The state government is providing support for the Flint government as it addresses issues with its water system. The state on Tuesday is announcing that Flint is receiving two grants totaling $2 million related to water system improvements through the Financially Distressed Cities, Villages and Townships grant program. DEQ Director Dan Wyant will address ongoing efforts with his agency to test Flint water and explain why the city is facing some of its problems. Senate Minority Leader Jim Ananich, D-Flint, will discuss his appreciation for the ongoing support for the city and its residents.

Attending

- Harvey Hollins, director of the Michigan Office of Urban Initiatives
- Dan Wyant, director of the Michigan Department of Environmental Quality
- Wayne Workman, deputy treasurer, Michigan Department of Treasury
- Jerry Ambrose, Flint emergency manager
- Dayne Walling, Flint mayor
- State Sen. Jim Ananich
- State Rep. Sheldon Neeley
- State Rep. Phil Phelps

Agenda

3:00 PM – 3:05 PM:	Harvey Hollins announces that Flint has received two grants totaling $2 million.
3:05 PM – 3:10 PM:	Dan Wyant discusses the state's ongoing role in monitoring Flint's water and any assistance that has been provided and will continue to be provided.
3:10 PM – 3:15 PM:	Mayor Dayne Walling remarks about appreciation for state assistance.
3:15 PM – 3:20 PM:	Sen. Jim Ananich remarks about appreciation for state assistance.
3:20 PM – 3:25 PM:	

3:25 PM – 3:35 PM: Harvey Hollins closing remarks, opens floor to media questions.
3:35 PM Event ends, though this might be optimistic.

Background

- The quality of Flint water has been a high-profile concern in recent weeks, with residents complaining about the color, taste and smell of tap water since a switch to Flint River water as a temporary source as a pipeline is built to Lake Huron as a water source starting in 2016.
  - Residents have attended meetings with jugs of brownish water.
  - U.S. Kildee has worked with labor and community groups to distribute bottled water.
- Mayor Walling has issued a letter (included below) calling for state and federal assistance for the city, including forgiveness of some $20 million in debt through the Drinking Water Revolving Loan Fund and calling for the governor to come to Flint personally.
  - Walling also submitted a guest column to the Flint Journal with similar requests.
    - He said the loan forgiveness is needed for the city to upgrade its water treatment process.
  - Governor and Mayor Walling had a telephone conversation on Friday, and the mayor has pledged to work together on solutions.

- Rep. Sheldon Neeley also has sent the governor a letter, saying that his constituents "are on the verge of civil unrest."

- The Department of Environmental Quality has been monitoring the water situation, with a detailed backgrounder and talking points attached below.

- The Treasury Department is announcing Tuesday that Flint is among the cities receiving a combined $8 million the Financially Distressed Cities, Villages and Townships grant program.
  - The announcement of the other grants will follow the Flint announcement.
    - The Flint grants are $1.1 million to allow the city to replace the functions of the old incinerator with new water pollution control facility allowing for the disposal of waste to landfills.
    - The other is $900,000 to allow the city to hire a contractor to perform a leak detection survey, which will lead to prioritizing repairs.
  - A breakdown of the grants is included below.

Treasury breakdown of Flint grants

Flint Incinerator: The grant project entails shutting down the current Water Pollution Control Facility Incinerator (due to the incinerator not being up to new EPA standards). In order to meet EPA standards, it would cost roughly $8.8M in upgrades to the current incinerator. The grant funding will allow them to replace the functions of the old incinerator by constructing new facilities which will allow for the disposal of waste to landfills.

Budget Breakdown	
Construction Contractor	$1,050,000
Project Management	$50,000
Total	$1,100,000

Flint Leak Detection: The grant project will allow the city to hire a contractor to perform a leak detection survey of the city water lines. The city will receive a map of leak locations and an assessment of leak severity. This data will allow the city to prioritize leak repair. The project also covers the expense of conducting a water pipe line wall thickness condition assessment on a portion of the city's pipes. The assessment will guide the city's water main replacement program.

Budget Breakdown	
Project Planning	$90,000
Mobilization of Crew to Site	$27,000

Leak Detection < 16" diameter	$378,000
Leak Detection 16" diameter or >	$270,000
Pipe Condition Assessments	$135,000
Total	$900,000

DEQ backgrounder on Flint water

Following the formal approval of Flint into the KWA in 2012, DWSD sent Flint a letter saying their contract was thereby terminated (by early 2013).

Genesee County has been using DWSD water without a contract since May 2014. But Flint took the letter to imply a water cutoff, and promptly turned to DEQ with a proposal to use the Flint River (their historic backup system).

This proposed shift was pitched primarily as a money saver. But it put the city in the business of water production, where they historically had been in the business of water transmission. DEQ approved the use of the river as a source, based on the treatment plant's past performance as a standby facility and the improvements we outlined prior to a switchover.

Several municipalities around the state use surface water supplies (rivers): Blissfield near Monroe, Manistique, and Alma to name a few.

The city completed the upgrades at the water plant the facility and DEQ approved it April 2014.

There were some initial hiccups. Last summer, there were a couple of 'boil water' notices issued. One for a water test that showed e. coli, one for a break in the water main.

The challenge to using the Flint River as a source is that the condition of the water is variable and changes with season and weather. It has substantially more organic matter than deep lake sources like Lake Huron. This organic matter is mobilized by high water events, and warm weather also can account for more organic material in the water.

The treatment of the organic matter is done with chlorine. One might conclude that the continual answer is just to use more chlorine to achieve water safety. However, at some point on the continuum, the chlorine and organic matter create TTHM – total trihalomethanes – as a byproduct. When the standard for those is exceeded over several consecutive quarters of testing, the supply is required by law to issue public notice and submit an approved plan for addressing the situation.

You'll note that this regulatory approach means TTHM testing is done quarterly. That means people who use the system are exposed to TTHM for several months before the public notice is required. It's because TTHM is a chronic health threat. Over the long term (measured in decades), continued exposure can contribute to some known health problems. If this were an immediate health threat, customers would receive immediate notification to boil their water or not use it.

Put in context, the EPA (which established the standard and the rule) estimates the existence of the TTHM standard prevents an estimated 280 bladder cancer cases each year … out of more than 330 million people who use public water supplies around the country.

It's not "nothing." State and federal law requires quarterly testing for TTHM and that the public be informed of it when the annual average of four quarters' worth of consecutive testing shows TTHM levels exceeding 80 parts per billion. Flint's results managed to exceed the annual average in three quarters, and they must develop a plan to address it.

But it's not like an eminent threat to public health. Unlike an e. Coli or even total coliform bacteria maximum contaminant level, which require immediate public notification and response and are part of daily / hourly testing of public water supplies, TTHMs pose a public health concern with chronic, long-term exposure.

It's clear the nature of the threat was communicated poorly. It's also clear that folks in Flint are concerned about other aspects of their water – taste, smell and color being among the top complaints.

The Safe Drinking Water Act requires public water supplies be tested for more than 90 regulated contaminants, including microbial contaminants. The act, and the program here in Michigan, work to ensure that water is safe to drink. The act does not regulate aesthetic values of water. Here are some factors affecting the aesthetics of water in Flint.

1. It's the Flint River. The water supplied by DWSD historically came from Lake Huron. It's softer. With hard water, you get a different flavor and feel. It's why General Motors suspended use of Flint Water – it was rusting their parts. Also, there's the 'organics' factor (discussed previously).
2. The system is old. Flint has more than 500 miles of water pipes. More than half of those pipe miles are more than 75 years old. Much of it is cast iron. Hard water can react with cast iron and exacerbates the rusty factor, which creates that brown water that angry residents were holding up in jugs for the media cameras last week. Valve failure has also been a key challenge. The system has an estimated 7,500+ valves. When they stick open or stick shut, it affects the hydraulics of the system and increase areas of stagnation. The city has a backlog of valves that need to be addressed. They've done half a dozen or so since November.
3. Flint is old. Many of the homes served by the system are old. Brown water complaints may also be attributable to cast iron pipes in customers' service connection to the city lines. The DEQ has been encouraging people with water coloration concerns to contact the city and see whether it is the service line or the City's line causing the issue. Again, discoloration is not an indicator of water quality or water safety, but we recognize that nobody likes it.

In summary, the City of Flint has tremendous need to address its water delivery system. We are not aware that they have any capital improvement funds for preventative maintenance in place, much less line replacement project monies that will require hundreds of millions.

The City was approved for a Revolving Fund loan in 2008 or 2009. As a Distressed Community, they qualified for flexible terms and 2 percent interest rate Revolving Fund Loan. After they were notified they were approved for the loan, they declined it. Previous SRF loans from the state to Flint bear an outstanding balance of $20.7 million today.

The DEQ continues working with the city to address the TTHM issue. They can take interim steps – from scrubbing the insides of transmission lines to carefully monitoring the hydraulic challenges in their system – to address customers' aesthetic concerns. Their TTHM numbers already are showing dramatic improvement; the November testing showed only one of seven sample points exceeding the standard.

The key now is that the standard is an average of three quarters' worth of results. It will be some time before they are officially "not in violation." However, depending on weather in 2015, it's not unforeseeable that we will be having this conversation again by next Christmas.

The key to the conversation is that TTHM is not a top health concern. That's key because residents need to understand TTHM in context, and it is key because it appears the mayor has seized on the public panic (sparked, frankly, by their poor communication of the violation notice) to ask the state for loan forgiveness and more money for their infrastructure improvement.

Another key thing to remember is that once the city connects to the new KWA system in 2016, this issue will fade in the rearview.

Key messages:

1. The DEQ Drinking Water program works with communities around the state to ensure that municipalities provide customers with clean, safe drinking water.
2. Municipal water supplies are tested rigorously and regularly for more than 90 regulated contaminants, including microbial contaminants that pose an immediate public health concern.
3. Flint's exceedance of the TTHM standard should reassure residents that the testing program is effective.

4. TTHM is not an immediate health threat. It is a chronic concern, one that can be problematic over the course of several decades of exposure. The public was notified because the law requires the city to make public notification, so that everyone can make informed decisions. This is particularly true for people with infants or those with compromised immune systems.
5. The DEQ is working with the City to address the situation. Recent tests show the TTHM numbers dropping rapidly. The department will continue working with the city in the months ahead, and residents should feel confident that their water is safe to drink unless the DEQ or City notifies them otherwise.
6. The discoloration and odor issues some Flint residents are experiencing are separate issues from the TTHM issue. TTHM is odorless, colorless and measured in parts per billion.
7. Flint water customers who have questions or concerns about their water should first contact the city to get answers and help. They also can contact the Michigan DEQ.

Mayor Walling's Facebook post

Friend,

Access to clean, safe, affordable water is a basic human right.

That's why I just sent Gov. Snyder my Flint Water Improvement Plan. It focuses on the areas of safety, quality, access, investment and education. My letter urges the governor to quickly implement these ideas so that Flint's water is 100% safe.

Please contact Gov. Snyder by calling (517) 335-6397 (or by clicking here) and ask him to take action immediately to implement my plan and ensure Flint's water is safe.

My plan offers new ideas and also builds on successful models of utility, energy and assistance programs at the state and federal levels. Here is my plan:

Safety & Quality

- 100% Safety is the standard
- City of Flint releases testing data to assure safety and expands testing to households with support from the Michigan Department of Environmental Quality
- Support alternatives for those advised not to drink the water by their doctors through the Michigan Health Endowment Fund and community partners to protect the vulnerable like seniors and infants
- Bring on experienced river water treatment operational management in the City of Flint
- Require water testing data to be released quarterly by law in all Michigan communities

Access

- Announce an amnesty program for turn-ons and reduce the turn-on cost in Flint
- Develop a revised payment plan policy to allow customers to come back on to the Flint system
- New Federal and State partnership to establish new Drinking Water Emergency Assistance Fund for customers (modeled on Federal and State energy utility programs: Low Income Home Energy Assistance Program; Michigan Energy Assistance Program; State Emergency Relief)

Investment

- Accelerate water system improvements outlined in the City of Flint Capital Improvement Plan through Federal and State Investments
- State approves City of Flint's Distressed Cities Fund applications
- Federal and State forgiveness of payment to Drinking Water Revolving Loan Fund
- Federal and State financing for future improvements
- City Water Department implements budgeted FY15 projects including leak detection, valve repairs, new pipes and meter replacements

Education

- Develop a community partnership to provide household and business customers with information on testing and conservation
- Ongoing partnership with Michigan Department of Human Services, United Way, Salvation Army and community organizations to provide information on water assistance
- Expand youth energy initiative to assist households with conservation and efficiency (piloted in summer 2014 with Northwestern High School students, EcoWorks and Consumers Energy)

The struggle with our water has gone on for too long. The state must take action and do its part. Please ask Gov. Snyder to take action immediately to implement my plan and ensure Flint's water is safe. Thank you for your ongoing support.

Subject: Karegnondi Water Authority

Harvey,

If you get a chance I wanted to ask you a few questions about the city of Flint's application to the state to join in the creation of the Karegnondi Water Authority linking us to the counties to the east leading to Port Huron. Since we are under state management this must be approved by the Treasure, I believe an application or request was sent this week. I'm interested to know what stance we're expecting the Treasure's office to have realizing this will directly impact Detroit if Flint starts their own water authority.

FROM: Bill Rustem

SUBJECT: Flint Water System

DATE: April 18, 2013

Governor, this information was compiled by the Department of Treasury.

Summary

In November 2012 the Department of Treasury commissioned the firm of Tucker, Young, Jackson & Tull, Inc. (TYJT) to analyze options for the City of Flint to either remain a customer of the Detroit Water & Sewer Department (DWSD) or to join the Karegnondi Water Authority (KWA) in Genesee County. The purpose of this study was to provide objective analyses to the State Treasurer and Flint's Emergency Financial Manager (EFM) in order to secure future potable drinking water for the City.

In December 2012, staff from TYJT met with representatives from the Department of Treasury and the City of Flint to provide a preliminary report on their findings. At this meeting, five options were presented: These options ranged from the Flint Water Plant providing 100% water, to 100% provision of untreated Lake Huron Water by KWA, to 100% provision of treated drinking water by DWSD, or provision of variable amounts of water from DWSD using a combination of blended DWSD water and Flint River water.

From the presentation of the preliminary report in December 2012 to the submission of the final report by TYJT in January 2013, a number of developments made arriving at a final decision very difficult.

- DWSD provided the City of Flint with at least two modified proposals to consider.
- A debate ensued between TYJT and KWA's principal engineering firm regarding the others' conclusions and estimates for construction of the KWA pipeline.
- The Flint EFM eliminated all options except the 100% DWSD option or joining KWA.

In January 2013, the Office of Financial Review (OFR) provided a comprehensive report to the State Treasurer analyzing three questions: 1) The projected construction costs and why Treasury believed the projections provided by Flint/KWA were acceptable; 2) Identification of the construction contingencies; and 3) Identification of the options Flint will utilize in the event of a construction cost overrun or a delay in construction. At the end of this report, the OFR recommended to the State Treasurer that KWA presented the best future option for future potable water. The OFR also concluded that KWA appeared to be the cheaper option; the quality of water would improve; Genesee County appeared willing to assist the City in securing the financing for their portion of the project; the KWA project could signify the beginning of better collaboration between the City of Flint and Genesee County; and the KWA project had both political and popular support.

Between January and April, intense scrutiny of the various proposals was undertaken by Treasury and Flint officials. Treasury officials met with officials from Genesee County to gain a better understanding of

the KWA project. In February 2013, Genesee County opened bids for construction of the Lake Huron intakes. This bid opening represented the first meaningful step toward commencing construction of the KWA system. The bid was $3-million less than projected.

In March 2013, Treasury was notified that DWSD had contacted Flint to negotiate with the City to retain them as a customer. On April 12, 2013, the State Treasurer authorized the Flint EFM to join KWA, pending review of any final offer from DWSD. A final offer was received from DWSD on April 15, 2013.

DWSD's final offer provided two options. The first option was for a "supply only" rate schedule. Only water treatment costs would be recovered and DWDS would absorb all other delivery costs. Capital and operating revenue charges would be calculated based upon KWA's usage relative to the entire demand upon DWSD's Lake Huron WTP. KWA would also have the ability to construct and own its own transmission lines.

The second option was a "full service" rate option. DWSD would provide all production and transmission services. Transmission rates would be calculated only on those costs necessary to supply KWA and no additional transmission rates would be charged. Capital and operating revenue charges would be calculated based upon KWA's usage relative to the entire demand upon the Lake Huron WTP.

Independent analyses of DWSD's final offer by the OFR, the Flint EFM, and the Department of Environmental Quality (DEQ) generally reached the same conclusions:

- DWSD's offer was a framework subject to negotiations and was not a firm offer.
- The offer provided by DWSD was incomplete.
- DWSD's offer did not include a guaranteed rate beyond year one, nor did it limit maximum annual rate increases.
- The DWSD scenarios were based on 40 MGD of service capacity. However, the KWA project provides 60 MGD of initial capacity with potential expansion to 75 MGD.
- DWSD indicates that Flint/ Genesee County would be given "broadened representation," it is unclear exactly what this means in terms of actual control in the decision making processes.
- The DWSD offer relies on a single transmission system and would require the City of Flint to maintain its WTP for emergency purposes. In addition, it would leave Genesee County without an adequate backup supply to meet their needs.
- DWSD's offer included an attachment that listed the rank-ordered options (from cheapest to most expensive). DWSD Scenario 2 is listed as the least expensive option (but it is unclear how the total cost of this option was arrived at). DWSD Scenario 1 was not listed.
- DWSD provided a summary table of their unit costs but how these figures are arrived at was not clear, so analysis proved difficult.

Without specific details from DWSD on this proposal, a true comparative analysis is difficult to provide. As such the Flint EFM rejected the DWSD proposal and agreed to join KWA.

If further information on this issue is needed, please let me know.

Not Responsive

KWA

- Public groundbreaking ceremony for the process of converting Flint River water into drinking water once the City of Flint no longer receives water from Detroit during the transition toward the newly established Karegnondi Water Authority.
- Water will be cut off from Detroit on April 18th
- The conversion process for preparing the local water treatment facilities is expected to be completed by April 7th, however vendors have yet to be selected as of Wednesday of this week.
- Bids were due in from vendors by Thursday of this week, putting a strain on the willingness of qualified vendors to participate. The expedited timeframe is less than ideal and could lead to some big potential disasters down the road.

CITY OF
FLINT
Water and Wastewater Rate Study
Draft Rate Report

Scope of Services

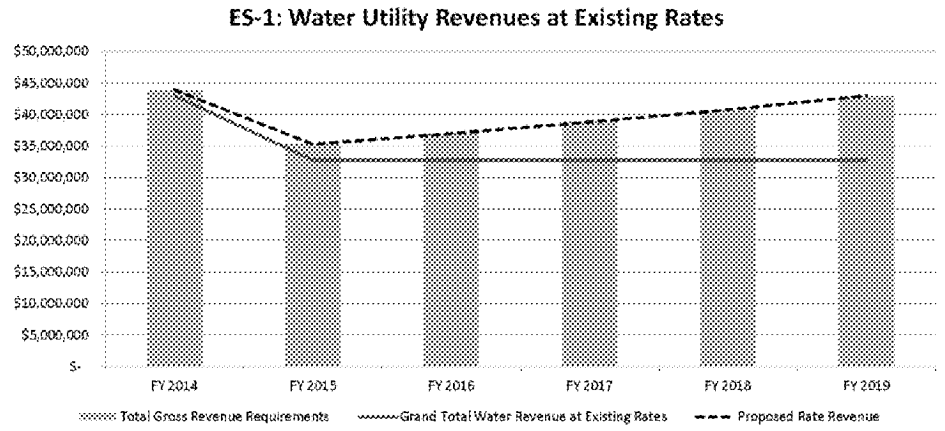
- Adequacy of Existing Water and Wastewater Revenues
- Water and Wastewater Financial Plans
- Cost of Service Study and Proposed Rates
- Impact of Transitioning to KWA
- Water and Wastewater Operations and Best Management Practices ("BMP")

ADEQUACY OF EXISTING REVENUES

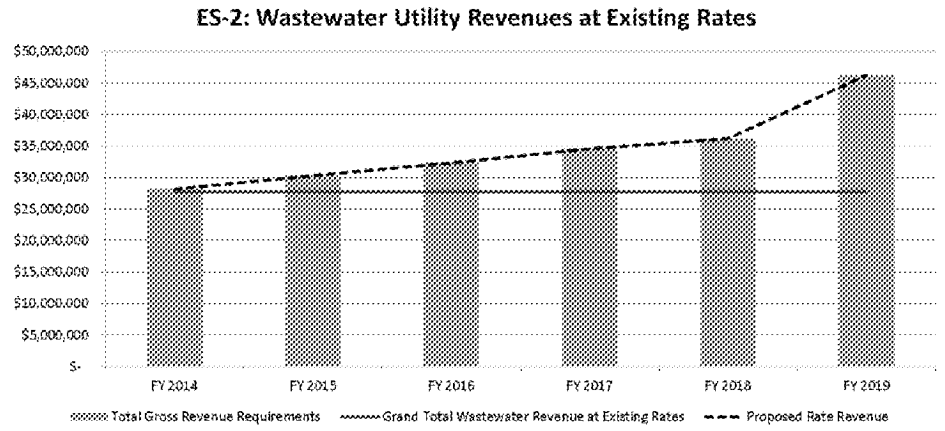
Factors Impacting Utility Revenues

- Marked decrease in billed water and wastewater usage
  - Approximately 12% below FY 2014 Budget
  - Under investigation under separate contract,
  - A normal pattern of declining per customer water usage
- Increases in utility revenue requirements
  - O&M
  - Cash-Funded Capital Improvements
  - Improving Financial Management Practices (e.g. increased cash reserves)

Water Utility Revenues at Existing Rates



Wastewater Utility Revenues at Existing Rates



WATER AND WASTEWATER FINANCIAL PLANS

Financial Planning Overview

- Purpose: determine rate revenue required for financial sustainability
- Process
  - Forecast customer units of service and revenue at existing rates
  - Forecast operation and maintenance expenditures ("O&M")
  - Forecast capital expenditures
    - CIP
    - Existing and Proposed DS
  - Develop detailed cash flow forecasts

Factors Driving Financial Plans

- Inflationary O&M Increases
- Annual Utility Recapitalization
- Water Utility Capital Improvements Associated with the Transition to KWA
- Financial Policies

Inflationary O&M Increases

- Largely associated with personnel costs
  - Annual COLA adjustments to Salaries and Medical
  - Legacy costs
    - Pension and Retiree Healthcare
    - Generally increase with salaries, usually higher based on pension funding levels
- Also related to the cost of materials and supplies
  - Cost of Chemicals for Water and Wastewater Treatment
  - Utilities Costs (Primarily Electric)
- Increases in cost of services provided via the General Fund (i.e. overhead cost allocation)

Recapitalization

- Necessary at some level on an annual basis
- Level and frequency based on age of water and wastewater system and original construction materials
- Can reduce O&M costs (i.e. less sewer back-ups, water main breaks etc.)
- Avoids "mining assets"

Transition to KWA

- Assumed April 1 transition to KWA.
- Revenues:
  - Decrease in revenues associated with cessation of service to Genesee County.
- Expenditures:
  - Decrease in O&M associated with elimination of DWSD water purchases
  - Increases in expenditures associated with full-time Flint WTP Operation
    - O&M: Increased costs to operate and maintain WTP
    - Capital: Expenditures to upgrade WTP to operate full-time
  - Debt Service: Flint's share of KWA project debt service

Financial Policies

- Separate Financial Plans for Each Utility
  - Equity for Customers
  - Ensures one fund is not subsidizing another
- Operating Reserve
  - Target of 90 days O&M and Debt Service
  - Working up to target over 5 years to mitigate rate impact
- Cash Funded Capital Improvements
  - All cash funded due to financing constraints
  - Potential to use Michigan SRF in the future
  - Short term rate impact, but long-term savings over debt
- Existing Debt Service Coverage
  - Substantial for water utility due to cash funding
  - No outstanding wastewater debt

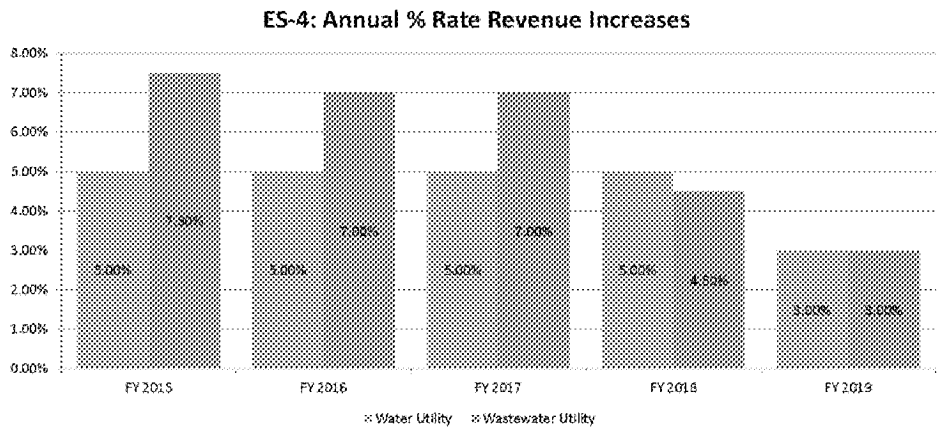
Financial Plans from Rate Model

ES-3: SUMMARY OF WATER AND WASTEWATER FINANCIAL PLANS

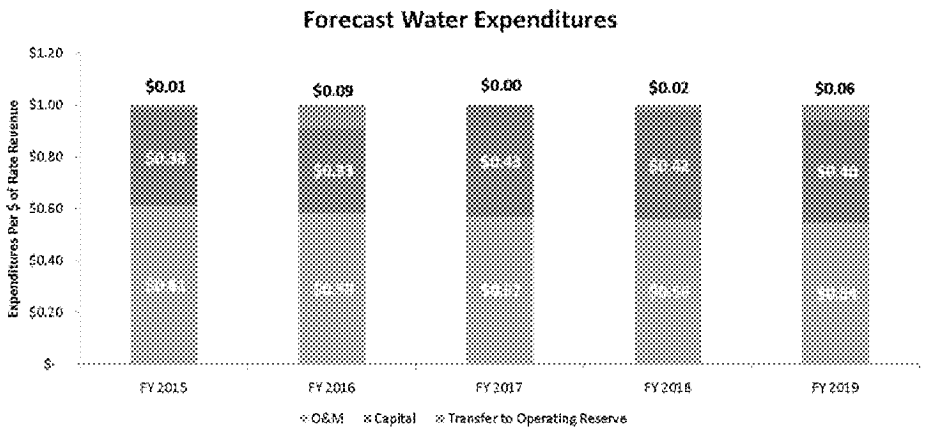
Water Utility	Budget Year FY 2014	Test Year FY 2015	Forecast FY 2016	Forecast FY 2017	Forecast FY 2018	Forecast FY 2019
REVENUES						
Gross Total Water Revenue at Existing Rates	$ 47,894,534	$ 32,782,575	$ 32,782,575	$ 32,782,575	$ 32,782,575	$ 32,782,575
Additional Revenue from Rate Increases	$ -	$ 1,500,000	$ 3,350,000	$ 5,054,500	$ 7,000,400	$ 9,202,500
Total Non-Rate Revenues	$ 555,000	$ 697,575	$ 913,500	$ 956,225	$ 998,531	$ 925,000
Add Transfers-in from General Fund	$ -	$ -	$ -	$ -	$ -	$ 1,000,000
Total Rate and Non-Rate Revenues	$ 48,449,534	$ 34,980,150	$ 37,046,075	$ 38,793,300	$ 40,781,506	$ 43,910,075
GROSS REVENUE REQUIREMENTS						
O&M	$ 30,500,000	$ 31,030,500	$ 31,604,500	$ 32,073,000	$ 33,156,500	$ 33,756,700
Capital	$ 14,267,515	$ 13,747,621	$ 12,346,425	$ 15,248,566	$ 17,166,000	$ 17,162,156
Transfer to Operating Reserve	$ (1,317,981)	$ 818,951	$ 3,219,150	$ 158,734	$ 457,506	$ 2,991,219
Total Gross Revenue Requirements	$ 43,449,534	$ 45,597,072	$ 47,170,075	$ 47,480,300	$ 50,780,006	$ 53,909,075
SURPLUS (DEFICIENCY) BEFORE ADJ.	$ -	$ (10,616,922)	$ (10,123,999)	$ (8,686,999)	$ (9,998,500)	$ (9,998,999)

Wastewater Utility	Budget Year FY 2014	Test Year FY 2015	Forecast FY 2016	Forecast FY 2017	Forecast FY 2018	Forecast FY 2019
REVENUES						
Gross Total Wastewater Revenue at Existing Rates	$ 37,555,374	$ 37,777,374	$ 37,777,374	$ 37,777,374	$ 37,777,374	$ 37,777,374
Additional Revenue from Rate Increases	$ -	$ 2,982,300	$ 4,113,500	$ 5,470,750	$ 7,000,000	$ 9,000,000
Total Non-Rate Revenues	$ 390,000	$ 406,765	$ 413,400	$ 421,326	$ 430,769	$ 439,093
Add Transfers-in from General Fund	$ -	$ -	$ -	$ -	$ -	$ 2,000,000
Total Rate and Non-Rate Revenues	$ 38,173,248	$ 38,966,431	$ 42,303,991	$ 43,669,550	$ 45,148,143	$ 49,216,467
GROSS REVENUE REQUIREMENTS						
O&M	$ 24,565,811	$ 25,088,555	$ 25,619,500	$ 26,569,375	$ 27,720,642	$ 28,511,472
Capital	$ 9,500,000	$ 9,500,000	$ 10,000,000	$ 10,500,000	$ 10,000,000	$ 10,000,000
Transfer to Operating Reserve	$ 3,992,564	$ 1,770,000	$ 2,553,750	$ 3,429,150	$ 500,750	$ 5,202,925
Total Gross Revenue Requirements	$ 38,173,248	$ 36,358,555	$ 38,173,250	$ 40,498,525	$ 38,221,392	$ 43,714,397
SURPLUS (DEFICIENCY) BEFORE ADJ.	$ -	$ 2,607,876	$ 4,130,741	$ 3,171,025	$ 6,926,751	$ 5,502,070

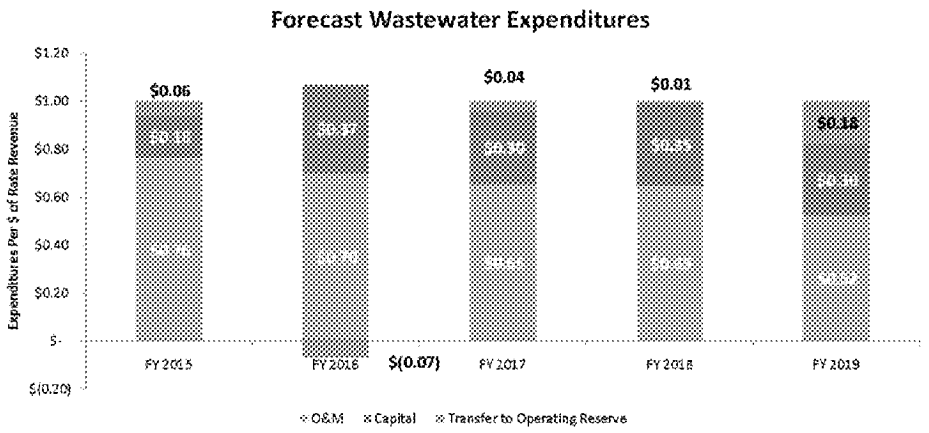
Forecast Rate Revenue Increases



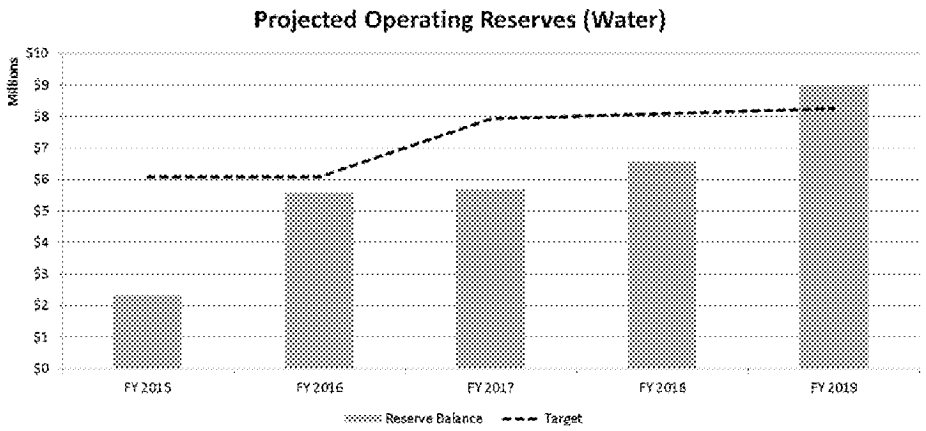
Expenditure Breakdown (Water)



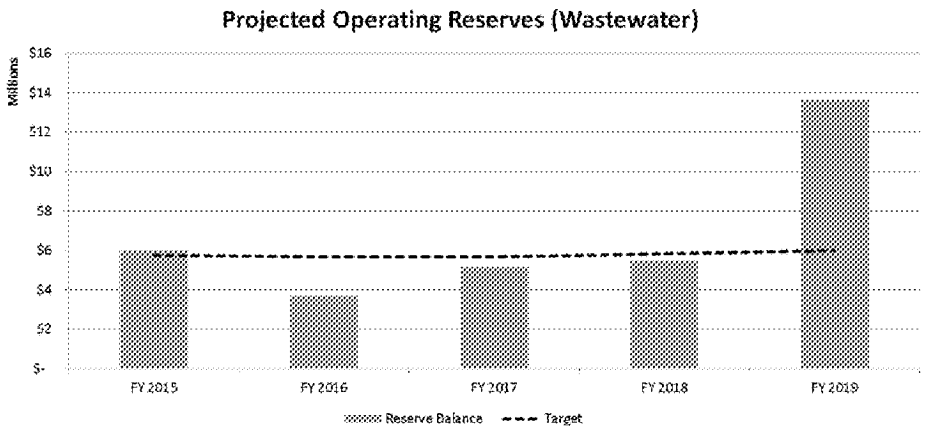
Expenditure Breakdown (Wastewater)



Projected Operating Reserves (Water)



Projected Operating Reserves (Wastewater)



COST OF SERVICE STUDY AND PROPOSED RATES

Cost of Service Study Overview

- Purpose:
  - Allocate costs to customer classes based on the demands they impose on the water and wastewater utility systems
  - Demand
    - Water: Average and Peak (Max Day, Max Hour) usage, and Customer Costs
    - Wastewater: Volume, Strength (BOD and TSS) and Customer Costs
- Process
  - Determine revenue requirement
  - Allocate revenue requirement to cost components
  - Determine units of service by customer class
  - Determine unit cost of service
  - Allocate costs to customer classes

Cost of Service Results

ES-5: SUMMARY OF COST OF SERVICE STUDY RESULTS

CUSTOMER CLASS	WATER	WASTEWATER
Allocated Cost of Service		
Total Inside City Residential COS	$ 18,347,403	$ 16,413,652
Total Inside City Commercial/Industrial COS	$ 15,262,006	$ 13,377,848
Total Inside City Lawn COS	$ 370,634	N/A
Total Inside City COS	$ 33,980,043	$ 29,791,500
Total Outside City Residential COS	$ 59,493	$ 2,383
Total Outside City Commercial/Industrial COS	$ 321,139	$ 66,791
Total Outside City Lawn COS	$ -	N/A
Total Outside City COS	$ 420,632	$ 69,174
Total System Cost of Service	$ 34,400,675	$ 29,860,674

Rate Design Issues

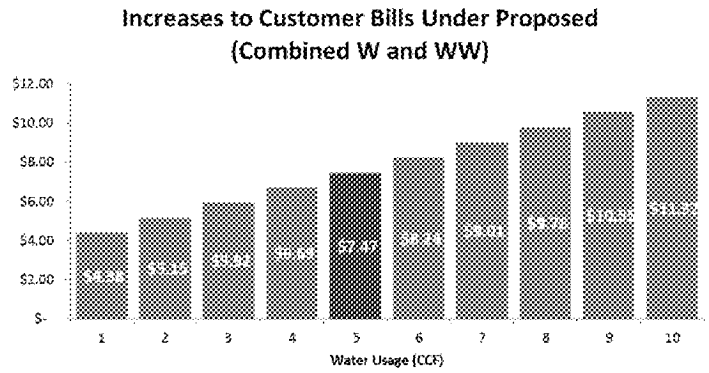
- Fixed vs. Volumetric Charges
  - Fixed ($.34 per dollar of rate revenue)
    - Typically recovers meter reading billing and collection and CS
    - Generate $.34 of every $1 of rate revenue
    - (+) Revenue Stability, (-) Larger Impact on lower volume users
  - Volumetric ($.66 per dollar of rate revenue)
    - Recovers average and peak demand costs for water, strength and volume for wastewater
    - (+) Potentially more equitable, (-) More variable revenue stream
- Maintaining Existing Rate Structure
  - Structure changes create winners and losers
  - Potential demand response (losers may use less, but winners will not use more)
  - Navigate the KWA transition and revenue collection issues, address structure changes in the future

Existing and Proposed Rates

Water Rates			
	Existing	Proposed	$
Block 1 *0-35 Ccf*	$ 7.52	7.92	$ .40
Block 2 *36-2000 Ccf*	$ 7.31	7.62	$ .31
Block 3 *>2000 Ccf*	$ 5.79	6.09	$ .30
Fixed Charge	$ 21.78	22.90	$ 1.13

Wastewater Rates			
	Existing	Proposed	$
Block 1 *0-35 Ccf*	$ 4.80	$ 5.17	$ .37
Block 2 *36-2000 Ccf*	$ 4.80	$ 5.17	$ .37
Block 3 *>2000 Ccf*	$ 4.80	$ 5.17	$ .37
Fixed Charge	$ 32.00	$ 34.48	$ 2.48

Bill Impacts



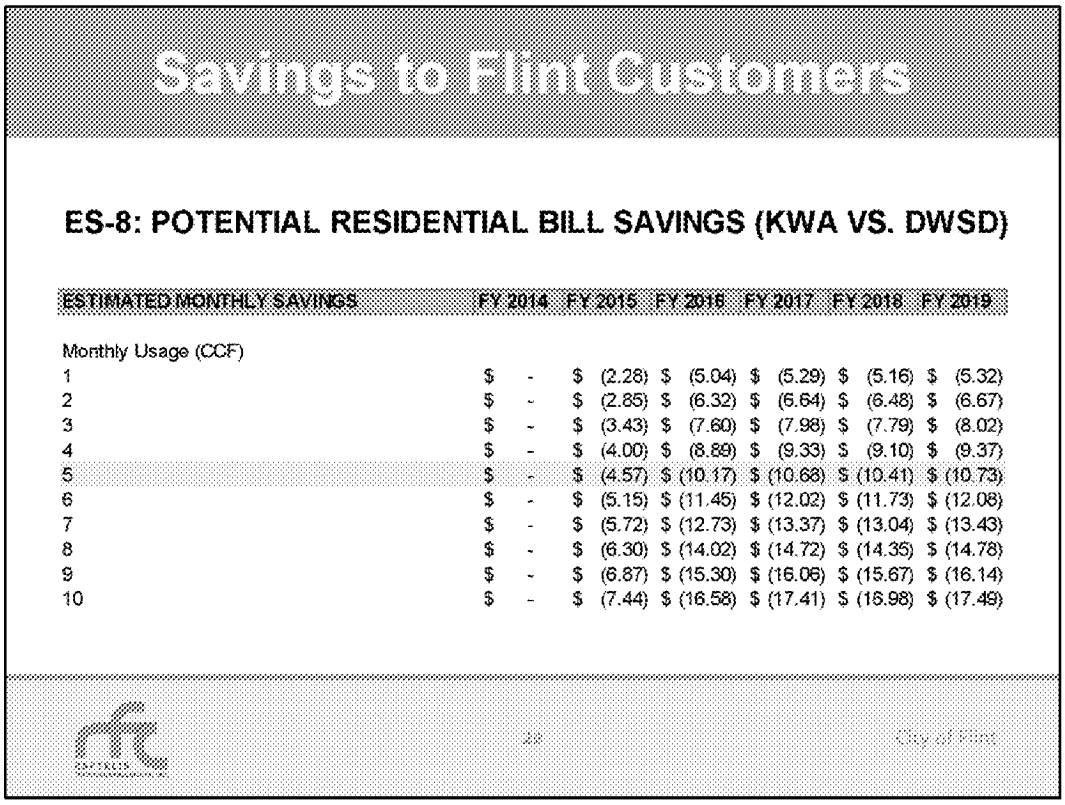
IMPACT OF TRANSITION TO KWA

KWA Project Overview

- City previously a wholesale customer of DWSD
- Contract with DWSD will cease April 17
- City staff believe cost savings over continuing with DWSD could be achieved via KWA
- KWA project will draw raw water from Lake Huron, but will not be operational by April 17
- City will draw and treat water from the Flint River in the interim
- KWA members pay a portion of project costs based on contract capacity

Analysis Overview

- RFC worked with City staff to develop separate financial planning scenarios
  - Continuing with DWSD
  - Transition to KWA
- Assumptions and Data
  - April 1 transition
  - 5% DWSD rate increases into the future
  - Similar financial planning policies in each scenario
    - Policies and strategy discussed in prior section applied to DWSD scenario
  - O&M Budget incorporating transition provided by City Staff
  - Project costs and phasing provided by City staff
  - Estimated Flint share of KWA debt service provided by City staff



For example, a City customer using 5 CCF per month would see a combined monthly bill of approximately $123.12 under the KWA. That same customer, should the City continue receiving service from DWSD, is estimated to have a bill of approximately $127.69. Consequently, the savings to the typical City is approximately $4.57 per month, or $54.84 per year.

SPEAKER NOTES PAGE

[Slide 29]

For example, a City customer using 5 CCF per month would see a combined monthly bill of approximately $123.12 under the KWA. That same customer, should the City continue receiving service from DWSD, is estimated to have a bill of approximately $127.69. Consequently, the savings to the typical City is approximately $4.57 per month, or $54.84 per year.

Total Bills

RATE IMPACT 5/8" Customer	FY 2014	FY 2015	FY 2016	FY 2017	FY 2018	FY 2019
Monthly Usage (CCF)						
1	$ 66.10	$ 70.48	$ 74.79	$ 79.38	$ 83.12	$ 85.62
2	$ 78.41	$ 83.57	$ 88.64	$ 94.03	$ 98.48	$ 101.43
3	$ 90.73	$ 96.66	$ 102.49	$ 108.68	$ 113.83	$ 117.24
4	$ 103.05	$ 109.74	$ 116.33	$ 123.33	$ 129.18	$ 133.06
5	$ 115.37	$ 122.83	$ 130.18	$ 137.98	$ 144.54	$ 148.87
6	$ 127.69	$ 135.92	$ 144.03	$ 152.63	$ 159.89	$ 164.69
7	$ 140.00	$ 149.01	$ 157.88	$ 167.28	$ 175.24	$ 180.50
8	$ 152.32	$ 162.10	$ 171.72	$ 181.93	$ 190.59	$ 196.31
9	$ 164.64	$ 175.19	$ 185.57	$ 196.58	$ 205.95	$ 212.13
10	$ 176.96	$ 188.28	$ 199.42	$ 211.23	$ 221.30	$ 227.94

For example, a City customer using 5 CCF per month would see a combined monthly bill of approximately $123.12 under the KWA. That same customer, should the City continue receiving service from DWSD, is estimated to have a bill of approximately $127.69. Consequently, the savings to the typical City is approximately $4.57 per month, or $54.84 per year.

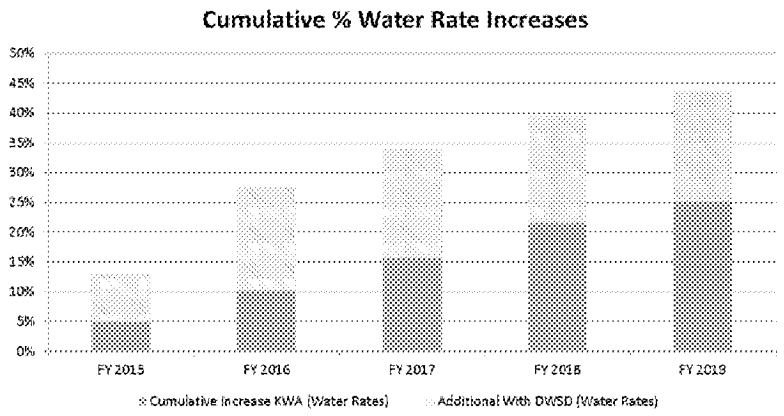
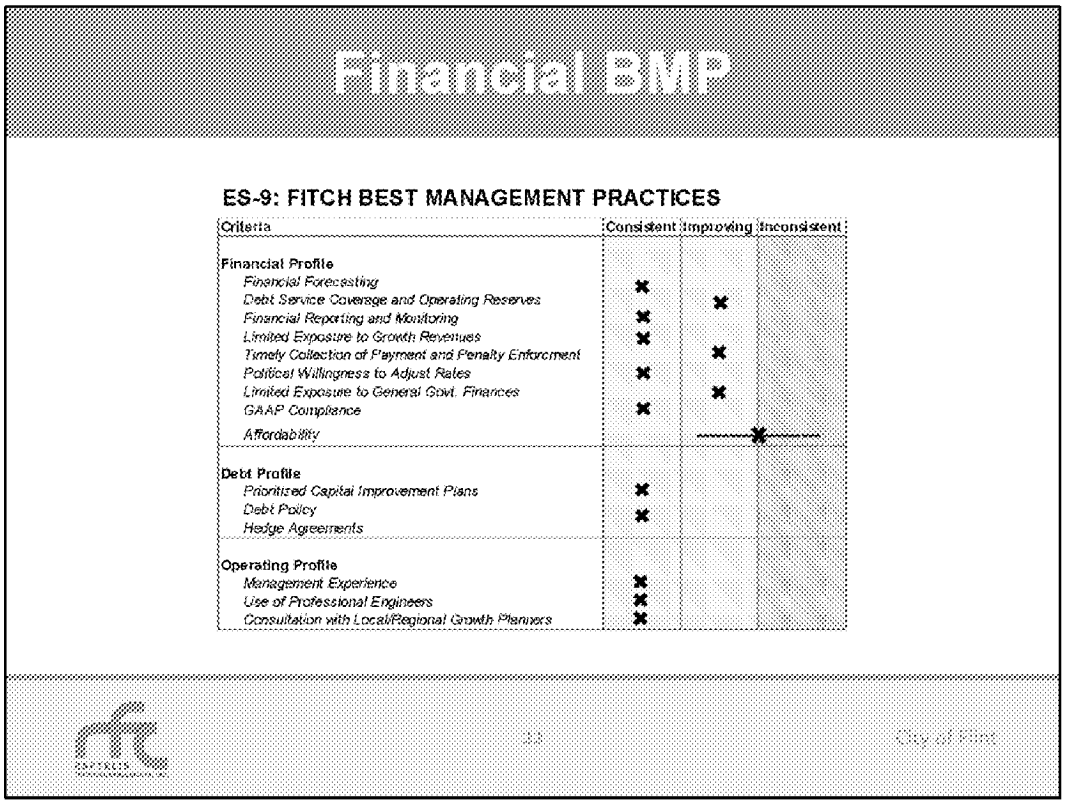
Consequently, the savings to the typical City is approximately $4.57 per month, or $54.84 per year.

Cumulative Increase in Water Rates



FINANCIAL BEST MANAGEMENT PRACTICES



The City is working to improve consistency in three areas:

- First, as mentioned above, the financial plans build-up to the minimum recommended 90 operating reserve and should achieve this reserve, all else equal, in the next 5-6 years.

- Second, the City is working with RFC, under a separate contract, to identify sources of lost water and wastewater revenue to improve the City's revenue collections, and reduce the cost of utility service theft to paying customers.

- Third, Affordability…

- Finally, the City is currently determining arrangements whereby the general fund can repay its obligations to the water and wastewater utilities, ensuring the water and wastewater funds are not subsidizing general government operations going forward.

Subject: MEDIA ADVISORY: Flint River Water Transition Event

MEDIA ADVISORY:
City of Flint Transition to Flint River Water Ceremony

WHERE: Flint Water Treatment Plant, 4500 N. Dort Hwy. by Stewart Ave.

WHEN: Friday, April 25, 2014 at 2:00pm

Description: The City of Flint is holding a ceremony tomorrow to officially begin the transition to use of the Flint River by shutting the valve to the intake pipe from Detroit.

The DEQ has given Flint final authorization to begin water distribution from the Flint Water Treatment Plant. City, Genesee County, and Michigan Department of Environmental Quality officials will be on hand to witness this historic event and answer media questions.

Subject: PRESS RELEASE: Flint Officially Begins Using River
Attachments: Flint.River.Transition.4.25.14.pdf

For Immediate Release

City of Flint Officially Begins Using Flint River as Temporary Primary Water Source

Flint, Michigan – April 25, 2014 – For the first time in fifty years, the City of Flint is using the Flint River—part of the Saginaw River watershed—as a primary water source for city residents. Today the valve to the pipeline from Detroit was closed and the Flint River officially became Flint's water supply. The temporary switchover is scheduled to support the city's primary water needs for the next two years while construction of the forthcoming pipeline from Lake Huron is completed by Karegnondi Water Authority. Officials from the City of Flint, the Genesee County Drain Commission and the Michigan Department of Environmental Quality were all on hand to witness the historic event.

The Flint River was once the primary source of water for city residents up to the 1960s. Over the past 40 years, it has provided water to city residents as a back-up to water provided to us by Detroit. During our partnership with Detroit, Flint has had to transition to the use of the Flint River for residential water on a few different occasions, with the most recent temporary switchover happening in 2009. Each temporary stint on local water proved three things to city employees and residents alike: That a transition to local river water could be done seamlessly, and that it was both sensible and safe for us to use our own water as a primary water source in Flint.

Even with a proven track record of providing perfectly good water for Flint, there still remains lingering uncertainty about the quality of the water. In an effort to dispel myths and promote the truth about the Flint River and its viability as a residential water resource, there have been numerous studies and tests conducted on its water by several different independent organizations. In addition to what has been found in independent studies, it is also the responsibility of the City of Flint Water Service Center to continually test the water

provided to city residents. Michael Prysby of the Michigan DEQ Office of Drinking Water verified that "the quality of the water being put out meets all of our drinking water standards and Flint water is safe to drink."

For nearly 10 years Mike Glasgow has worked in the laboratory at the City of Flint Water Service Center. He has run countless tests on our drinking water to ensure its safety for public use. Mike has not only conducted tests on water provided to us by Detroit, but also on local water from nearby rivers, lakes and streams including the Flint River. When asked if over the last decade if he has seen any abnormalities of major concern in the water, his response was an emphatic, "No." In his words, "there has been nothing seen that was of major concern," during his ongoing tenure working in the lab. "The tests results have shown that our water is not only safe, but of the high quality that Flint customers have come to expect," announced DPW Director Howard Croft "we are proud of the end result."

Apart from the water plant's devotion to ensuring that our water is good, Flint is doubly blessed in having the Flint River Watershed Coalition as a separate organization dedicated to monitoring the overall welfare of local bodies of water, overseeing more than 30 different nearby locations. Rebecca Fedewa has been director of the watershed coalition since 2008. By virtue of her passion for her work and her position on the board, she is very conversant with the condition of the Flint River. In her words, "The Flint River is increasingly healthy, and completely suitable as a drinking water source." Fedewa and FRWC are working closely with the city "to monitor flows and habitats between the intake and the waste water treatment plant to ensure there are minimal to no impacts to the overall health of the river."

FRWC also invites city residents to be a part of their monitoring exercises during this spring in order "to gain firsthand knowledge in the health and vitality of our Flint River." Mayor Dayne Walling invited everyone at today's event to toast to Flint's water. "It's regular, good, pure drinking water, and it's right in our backyard," said Mayor Walling, "this is the first step in the right direction for Flint, as we take this monumental step forward in controlling the future of our community's most precious resource."

City of Flint Officially Begins Using Flint River as Temporary Primary Water Source

Flint, Michigan – April 25, 2014 – For the first time in fifty years, the City of Flint is using the Flint River—part of the Saginaw River watershed—as a primary water source for city residents. Today the valve to the pipeline from Detroit was closed and the Flint River officially became Flint's water supply. The temporary switchover is scheduled to support the city's primary water needs for the next two years while construction of the forthcoming pipeline from Lake Huron is completed by Karegnondi Water Authority. Officials from the City of Flint, the Genesee County Drain Commission and the Michigan Department of Environmental Quality were all on hand to witness the historic event.

The Flint River was once the primary source of water for city residents up to the 1960s. Over the past 40 years, it has provided water to city residents as a back-up to water provided to us by Detroit. During our partnership with Detroit, Flint has had to transition to the use of the Flint River for residential water on a few different occasions, with the most recent temporary switchover happening in 2009. Each temporary stint on local water proved three things to city employees and residents alike: That a transition to local river water could be done seamlessly, and that it was both sensible and safe for us to use our own water as a primary water source in Flint.

Even with a proven track record of providing perfectly good water for Flint, there still remains lingering uncertainty about the quality of the water. In an effort to dispel myths and promote the truth about the Flint River and its viability as a residential water resource, there have been numerous studies and tests conducted on its water by several different independent organizations. In addition to what has been found in independent studies, it is also the responsibility of the City of Flint Water Service Center to continually test the water provided to city residents. Michael Prysby of the Michigan DEQ Office of Drinking Water verified that "the quality of the water being put out meets all of our drinking water standards and Flint water is safe to drink."

For nearly 10 years Mike Glasgow has worked in the laboratory at the City of Flint Water Service Center. He has run countless tests on our drinking water to ensure its safety for public use. Mike has not only conducted tests on water provided to us by Detroit, but also on local water from nearby rivers, lakes and streams including the Flint River. When asked if over the last decade if he has seen any abnormalities of major concern in the water, his response was an emphatic, "No." In his words, "there has been nothing seen that was of major concern," during his ongoing tenure working in the lab. "The tests results have shown that our water is not only safe, but of the high quality that Flint customers have come to expect," announced DPW Director Howard Croft, "we are proud of the end result."

Apart from the water plant's devotion to ensuring that our water is good, Flint is doubly blessed in having the Flint River Watershed Coalition as a separate organization

Darnell Earley
ICMA-CM, MPA
Emergency Manager

Dayne Walling
Mayor

dedicated to monitoring the overall welfare of local bodies of water, overseeing more than 30 different nearby locations. Rebecca Fedewa has been director of the watershed coalition since 2008. By virtue of her passion for her work and her position on the board, she is very conversant with the condition of the Flint River. In her words, "The Flint River is increasingly healthy, and completely suitable as a drinking water source." Fedewa and FRWC are working closely with the city "to monitor flows and habitats between the intake and the waste water treatment plant to ensure there are minimal to no impacts to the overall health of the river."

FRWC also invites city residents to be a part of their monitoring exercises during this spring in order "to gain firsthand knowledge in the health and vitality of our Flint River." Mayor Dayne Walling invited everyone at today's event to toast to Flint's water. "It's regular, good, pure drinking water, and it's right in our backyard," said Mayor Walling, "this is the first step in the right direction for Flint, as we take this monumental step forward in controlling the future of our community's most precious resource."

Subject: PRESS RELEASE: Boil Water Advisory Lifted
Attachments: Boil Water Advisory Lifted 8.20.14.pdf

For Immediate Release

City of Flint Boil Water Advisory has been Lifted, All Testing Indicates Contaminant Free Water throughout the City.

Flint, Michigan – August 20, 2014 – The City of Flint's Utilities Department has received word today from the Department of Environmental Quality that the boil water advisory issued for a small portion of the city has been lifted. Testing that occurred over the past 24 hours as part of the City's normal water quality monitoring has returned showing no signs of coliform bacteria in any of the sampling areas throughout the city.

Following the initial positive test result on August 12, resampling was done on August 13th. One sample did yield a positive result for fecal coliform bacteria. On August 14, another round of resampling was done and two locations tested positive for total coliform bacteria. August 16's samples resulted in two positive samples for total coliform. August 17's samples resulted in one sample testing positive for total coliforms. Each day samples were collected within the boil water area, both upstream and downstream from the initial location. To address the total coliform issue the City increased the Chlorine and flushed more fresh water into the area. Flushing was to add chlorine to the boil water area.

Whenever a sample results in a positive for total coliform, a second test is performed for E. coli. No samples following the initial fecal coliform positive test have shown any E. coli bacteria. The city of Flint Utilities Department in conjunction with the MDEQ worked to investigate possible causes of the positive sample results in this area; these could have included water main breaks, loss of pressure, cross connection, unauthorized connection to the water system, and sampling error.

Follow-up testing needed to continue until three days of sampling showed negative results for E. coli. That testing concluded with negative results as of yesterday. The DEQ's advice to continue the boil-water advisory was due to an abundance of caution.

Total coliform is a naturally occurring and generally harmless. Total coliform positive results generate more testing, but do not initiate a boil water notice. When total coliform is detected, follow-up tests are conducted to determine if the water contained the more problematic E-coli bacteria. DEQ sampling protocols allow for 5% of the samples to contain coliform without need for immediate concern or notification.

All subsequent testing to date has indicated no E-coli. "We've gone above and beyond the DEQ sampling requirements to verify that the City's water is safe in all areas. We are working closely with the MDEQ and pleased to announce their authorization to lift the Notice. The continuation of the Notice was at the request of the DEQ so we could include the normal City wide test results", said Flint Utilities Director Daugherty Johnson.

Drinking water contamination due to E-coli or coliform bacteria is very rare due to the fact that the bacteria cannot survive in the water for very long. The colder temperature

of water in the system coupled with the regular blending of chlorine into the water makes for a hostile environment for these kinds of bacteria.

Mike Prysby, district engineer for the Michigan Department of Environmental Quality, said, "The Flint Water Treatment Plant has met all applicable drinking water standards during the entire episode including total fecal coliform bacteria. This episode was isolated to the distinct section (of the city)."

Testing of the drinking water is a part of the routine process for ensuring the quality and safety of the system which happens weekly at ten different sites around the city. The Flint Water Treatment Plant works diligently to provide water of the highest quality to everyone in the city.

BOIL WATER NOTICE LIFTED

It is no longer necessary to use boiled or bottled water for drinking or cooking.

On August 15, 2014 you were notified of the need to boil all tap water used for drinking and cooking. Corrective measures have been taken and no coliform bacteria have been detected in follow-up testing of the system's water. The water is safe to drink. We apologize for any inconvenience and thank you for your patience.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

For more information, please contact Brent Wright of City of Flint Water Treatment Plant at 810-787-6537, bwright@cityofflint.com .

4500 N. Dort Hwy
Flint, MI 48505

This notice is being sent to you by City of Flint, water supply serial number 2310.

Mr. Earley,

The Public Works committee meeting ran a little long and I had a late start on this but was able to complete a bullet point overview of the boil water advisory. One copy is in white paper format and the other is an official memorandum. I tried to condense this into a comprehensive overview that focused on the main aspects.

I can add further details if this is not sufficient.

Thank you,

MEMORANDUM

TO: Darnell Earley, Emergency Manager

FROM: Howard Croft, Public Works Director

DATE: September 16, 2014

RE: Recent Boil Water Advisory

Mr. Earley,

I have compiled a bullet point list of the pertinent events surrounding the recent boil water advisory in the City of Flint. I have separated the events into five categories and attempted to condense them into a comprehensive sequence for your review.

OVERVIEW

- On Friday September 5th the City of Flint issued a boil water advisory to residents in two of ten test areas around the city.
- The advisory was due to multiple positive tests for "total coliform" and the area covered approximately 9 square miles.
- On Sunday September 7th the City expanded the advisory to include another of the ten test areas due to a subsequent positive test.
- The boil water advisories were lifted on Tuesday September 9th at 5:00 after consultation with the DEQ.

BACKGROUND

- State of Michigan Regulations requires that the City of Flint Water Treatment Plant perform testing of its water distribution system on a routine basis in ten different locations around the City.
- The tests take twenty four hours to produce valid results and are sent directly to the Department of Environmental Quality for review.
- Test results which show positive for "Ecoli" or "fecal coliform" trigger boil water notices for the test area and the advisories usually remain in effect until three consecutive tests return negative results.
- A single positive test for "total coliform" does not generally result in a boil water advisory, rather it indicates that the environment is conducive for bacteria.
- Typically, investigation into possible causes followed by corrective measures such as flushing the affected area with open hydrants will cleanse the system.
- This process is overseen by an employee who is required to hold an F-1 State License and is listed as the Operator in Charge of the Water Plant and an employee who holds an S-1 State License which is required to maintain distribution systems of this municipal size.
- The City of Flint has over 500 miles of pipe in its distribution system, much of which is over 70 years old.
- The City of Flint has over ten-thousand valves throughout its distribution system.
- The City of Flint has a professional reliability study of its system, that was updated in December 2013.

PROBLEM

- ❖ After detecting the initial positive test for total coliform, normal procedures did not clear the condition and multiple positive tests ensued.
- ❖ The continued positive total coliform tests were the cause for issuing the boil water notice.
- ❖ Additional discoveries showed that residual chlorine levels in the affected area were considerably lower than normal.

SOLUTION

- ✓ On Monday September 8th the City convened all licensed personnel, Utility Supervisors, and DPW Director to a single meeting location and held a brainstorming session with the DEQ on conference call.
- ✓ It was agreed that while not totally isolated, the concern was mainly present in a specific large transmission line that ran through all positive testing areas.
- ✓ It was determined to expand the hydrant flushing outside of the immediate impact area.
- ✓ It was found that a 24" valve which feeds this transition main was broken in the OFF position outside of the immediate impact area.
- ✓ The broken valve was preventing fresh water from being pushed directly into the impacted area while causing water to travel from the water plant around the entire city and preventing adequate circulation of fresh water.
- ✓ In repairing the broken valve, virtually all of the symptoms were erased over a 24 hour period and the chlorine count has steadily risen back to normal levels throughout the transmission main.

CONCLUSION

- ✓ The City was in direct contact with DEQ personnel daily.
- ✓ The positive tests were for "total coliform" only.
- ✓ The following statement about total coliform was approved by the DEQ and made in writing to the public as part of the recent boil water.

Total coliform bacteria are generally not harmful themselves. Coliforms are bacteria which are naturally present in the environment and are used as an indicator that other, potentially-harmful, bacteria may be present.
Usually, coliforms are a sign that there could be a problem with the treatment or distribution system (pipes). Whenever we detect coliform bacteria in any sample, we do follow-up testing to see if other bacteria of greater concern, such as fecal coliform or E. coli, are present. We did not find any of these bacteria in our subsequent testing. If we had, we would have notified you immediately. However, we are still finding coliforms in the drinking water.

- ✓ The City of Flint is in the first year of strategic budgetary investment in an infrastructure strategy.
- ✓ The City of Flint infrastructure strategy has been, and will continue to be developed with state licensed employees, industry experts, and proven experienced consultants.

Subject: PRESS RELEASE: Fall Hydrant Flushing
Attachments: Fall.Hydrant.Flushing.9.25.14.pdf

For Immediate Release

Fire Hydrant Flushing Scheduled to Occur in Areas of the City of Flint Beginning Friday, September 26, 2014

Flint, Michigan – September 25, 2014 – The City of Flint's Water Service Center will be doing fire hydrant flushing throughout the city beginning on Friday, September 26, 2014 that will continue throughout the weekend. The hydrant flushing is a part of regular maintenance designed to enhance the circulation of water in the system and a part of the city's effort to provide high quality water to its residents and businesses. This activity is expected to continue throughout the Fall in various parts of the City and will have no effect on water usage by residents and businesses.

Residents in the areas where flushing is taking place should expect to see activity by City crews and signs marking open hydrants. "There will be ongoing hydrant flushing as needed and all hydrants in the city will be flushed within the next several weeks," said Utilities Administrator Daugherty Johnson. "If you see a hydrant with a barricade on it we are aware of it running and its part of the normal safe operation of a large municipal drinking water system."

Water distribution systems commonly flush hydrants in an effort to reduce retention times within the system. This coupled with constant sampling ensures high quality water to the customer and helps to avoid any future boil water notices. The flushing going on currently is reactionary to water plant chlorine residual testing and is very dynamic as the chlorine residuals change at different rates.

"Hydrant flushing is a necessary display of proper system maintenance/operation and should be looked upon favorably by everyone," said Robert Bincsik, City of Flint Water Distribution and Sewer Maintenance Supervisor. "After all, hydrants are one of the only visible parts of a water distribution system and serve as a way to visually monitor the system."

Subject: PRESS RELEASE: Water Main & System Repairs
Attachments: Water Map 10.15.2014.pdf; Water Main Repairs 10.15.14.pdf

MEDIA AVAILABILITY FOR QUESTIONS AND COMMENTS WILL BE 9:00AM, THURSDAY OCTOBER 16, 2014. PLEASE CONTACT THIS OFFICE TO CONFIRM.

For Immediate Release

Major Water Line Repairs Will Take Place in Robert T. Longway Blvd & Dort Hwy. Area, More Repairs to System Scheduled

Flint, Michigan – October 15, 2014 – The City of Flint's Department of Public Works is working to repair a water main break in the area of Dort and Longway. That repair will be followed by more scheduled repairs to the system in the area which will begin on Saturday, October 18, 2014 and which should be completed by evening Sunday, October 19. The work being performed will result in improved operational control over a large transmission line running down Dort Hwy. which will include improving chlorine residuals in the southern portion of Flint. No residential customers are connected to this line; however, there will be a reduction of pressure to the system, which may cause low water pressure in the surrounding area.

In accordance with DEQ regulations the City of Flint will be issuing a Boil Water Advisory for the area (see attached map) ONLY if residents lose water service during this 24 hour period. Residents who lose water service during that time should expect to use boiled water for 24 hours after service is restored based on testing. If residents in the area do not experience a loss of water service, then there is no need to boil water. Any residents who do experience a loss of water should call the Water Service Center at 810-766-7202 between 8:00am and 4:00pm on Saturday to report the issue.

A Boil Water Advisory is restricted to drinking water and un-boiled water used for cooking. Once again, this is merely a precaution as no one in the affected area should be directly connected to the portion of the system being repaired. Low pressure and discoloration may occur for those in the area, but this is no cause for concern. The City of Flint asks that residents watch their local news station for announcement of the completion of repairs.

A break in the sixteen inch water main was discovered a week ago and crews have since been examining the surrounding system. As a result of that examination, a number of valves in the area were identified as "long overdue" for replacement. "The valves we are replacing in this area have needed attention for quite some time," said Flint Utilities Administrator Daugherty Johnson, "the fact that we now have the resources and planning to perform this work is a tremendous benefit for the entire City."

All of the scheduled work taking place is part of an ongoing, broader plan to examine different sections of the water system citywide for needed repairs and upgrades. Upgrading critical infrastructure such as the water system is a key part of the City's Strategic Plan, which is directly guided by the Master Plan, and part of the City's commitment to deliver the highest quality water possible.

For Immediate Release

Major Water Line Repairs Will Take Place in Robert T. Longway Blvd & Dort Hwy. Area, More Repairs to System Scheduled

Flint, Michigan – October 15, 2014 – The City of Flint's Department of Public Works is working to repair a water main break in the area of Dort and Longway. That repair will be followed by more scheduled repairs to the system in the area which will begin on Saturday, October 18, 2014 and which should be completed by evening Sunday, October 19. The work being performed will result in improved operational control over a large transmission line running down Dort Hwy. which will include improving chlorine residuals in the southern portion of Flint. No residential customers are connected to this line; however, there will be a reduction of pressure to the system, which may cause low water pressure in the surrounding area.

In accordance with DEQ regulations the City of Flint will be issuing a Boil Water Advisory for the area (see attached map) ONLY if residents lose water service during this 24 hour period. Residents who lose water service during that time should expect to use boiled water for 24 hours after service is restored based on testing. If residents in the area do not experience a loss of water service, then there is no need to boil water.

–CONTINUE–

CITY OF FLINT
OFFICE OF EMERGENCY MANAGER
DARNELL EARLEY
ICMA-CM, MPA

Any residents who do experience a loss of water should call the Water Service Center at 810-766-7202 between 8:00am and 4:00pm on Saturday to report the issue.

A Boil Water Advisory is restricted to drinking water and un-boiled water used for cooking. Once again, this is merely a precaution as no one in the affected area should be directly connected to the portion of the system being repaired. Low pressure and discoloration may occur for those in the area, but this is no cause for concern. The City of Flint asks that residents watch their local news station for announcement of the completion of repairs.

A break in the sixteen inch water main was discovered a week ago and crews have since been examining the surrounding system. As a result of that examination, a number of valves in the area were identified as "long overdue" for replacement. "The valves we are replacing in this area have needed attention for quite some time," said Flint Utilities Administrator Daugherty Johnson, "the fact that we now have the resources and planning to perform this work is a tremendous benefit for the entire City."

All of the scheduled work taking place is part of an ongoing, broader plan to examine different sections of the water system citywide for needed repairs and upgrades. Upgrading critical infrastructure such as the water system is a key part of the City's Strategic Plan, which is directly guided by the Master Plan, and part of the City's commitment to deliver the highest quality water possible.

For Immediate Release

Water Issues for General Motors are Not Issues for Residents

Flint, Michigan – October 16, 2014 – The City of Flint is committed to ensuring that all Flint residents have safe quality drinking water. That is why we recently reached an agreement with General Motors to allow the company to temporarily use Flint Township as a water source for their manufacturing needs.

The City of Flint uses chloride as an important component in making water safe for drinking, but that can cause problems for GM's machining work. The agreement comes after GM raised concerns about chloride levels in Flint's treated water.

This temporary switch is needed to allow GM to use water that does not have the same level of treatment provided for high quality drinking water. This ensures that Flint residents will continue to have safe quality drinking water but minimizes the impact on GM's machining work. City officials continuously test drinking water to ensure quality.

ABC12 Investigates: What's in your water?

Posted: Jan 29, 2015 3:38 PM EST
Updated: Jan 29, 2015 11:54 PM EST

By Larry Elliott CONNECT

FLINT (WJRT) - (01/29/15) - The results are in and we now have a completely independent look at what's in Flint's water supply.

For months, since Flint switched from a Detroit water supply to the Flint River as it's water source, Flint water customers have complained of smelly, cloudy, bad tasting water and blame it for a variety of health problems.

Complaints exploded earlier this month when Flint notified its water customers that a group of chemicals known as TTHM were at much higher average levels than allowed by law.

With so many questions and distrust of the answers, ABC12's Larry Elliott investigates - What's in your Water?

It seems no matter who you ask in the Flint area, there's an opinion about the city's water. Most of the issues center on the quality of the water and whether it's safe to drink.

"Right now it smells," said Flint resident Lee Miller. "We're getting water out of our own back yard now and it's costing me double what it was coming from Detroit."

"It has a funny taste to it," said Flint resident Milton Alexander.

"It could be dangerous to us, actually I don't know how dangerous it is," said Flint resident Shanika Sanders.

"I'm no cheerleader for the water department here, I think we've got a lot of issues to work on," Ken VanWagoner, of Good Beans Cafe - Flint.

Most of the issues center on the quality of the water and whether it's safe to drink, but concern over its safety reached a new high earlier this month when the city was required by the state Department of Environmental Quality to notify residents that the water had exceeded the allowable limit of a group of chemicals known as TTHM.

TTHM is in most municipal water systems and is thought by some to be a possible carcinogen in long term exposure.

It's a byproduct of chlorination, which is commonly used to help purify water. Last August, as Flint's water treatment plant worked to purify the water it was drawing from the Flint River, levels of TTHM grew to well over the EPA allowed maximum.

August test results provided by the DEQ to ABC12 show all of the eight testing sites around Flint had TTHM levels well above the legal limit.

The lowest level among the eight sites was 40 percent above the legal limit. The highest was 145 percent

more than allowed.

DEQ rules only require the city to report higher than allowed levels to the public once a year, and only if the average of quarterly tests is higher than the legal limit.

That notification went out to residents on Jan. 5. Since then, many residents have refused to believe assurances from the DEQ and the city that the water is now safe to drink.

So, we set out to do complete and independent testing to find out for ourselves exactly what's in your water.

It took a bit of research, but we finally found Water Tech, in Howell, a testing lab with absolutely no ties to Flint, just to make sure there are no questions about the test results.

After having Water Tech train ABC12's Larry Elliott on the proper methods for collecting water samples, we set out last week to randomly test five sites in Flint.

1. Downtown.

"I'm excited to see this done because this is an independent way to find out that everything's just fine," VanWagoner said.

2. The north side.

"We'd like to do kind of a whole battery of tests of your water. Oh yeah," Alexander said.

3. The west side.

"It could be dangerous to us. How about if we help you find out what's in it right now?" Sanders said.

4. The east side.

"I'm hoping for a good test and put my family at ease," Miller said.

5. Our main studio, on the south side.

We also wanted to compare whatever we're to find with Detroit supplied water, so we took a sample from the Burton water system.

Since next year Flint will connect to the new KWA pipeline, getting its water from Lake Huron, we took a comparison sample from the Saginaw-Midland water system, which currently uses Lake Huron water.

We tested all the sites for levels of TTHM. We also tested how much residual chlorine was in the Flint and Burton water supply and more importantly, we tested at two of our Flint sites for a number of other hazardous chemicals that could cause skin or other health problems.

Tests for those other chemicals are not required for public water systems, but we decided to run those tests anyway.

Here's what our independent testing shows:

All sites tested, including the Saginaw-Midland water system and the Burton system, using Detroit water, contained TTHM - but all of them were well below the EPA allowed maximum.

Saginaw-Midland water had less than a third of the maximum TTHM allowed, the Burton system had only about 25 percent of the maximum and the highest level found of all of our Flint tests showed just over 65 percent of what's allowed, all below EPA limits.

A similar byproduct of chlorination, haloacetic acids, was also well below EPA maximums in Flint's water.

We tested Flint's north and east water samples for many other hazardous chemicals that a doctor told us could cause skin or other health problems, and on both tests, not a single one of those chemicals was detected.

Since most often any smell to the water would be caused by levels of total residual chlorine, we tested that too, in both our Flint and Burton samples.

The legal limit is 4 milligrams per liter. The average of our Flint samples shows a level of about a half milligram per liter. Our test in Burton actually shows 22 percent more residual chlorine than Flint.

Our Flint sample also showed no Coliform bacteria.

We asked Chris McCarthy, of Water Tech, a few questions.

Q: How would you describe these test results?

A: "Well, for the samples received, the tests we performed, everything is within EPA guidelines for safe drinking water."

Q: Is there anything in these results that raises a red flag for you?

A: "For water quality or water safety, No."

We then asked residents if these results change their opinion of what they'll do with their water now.

"To be honest, no," Alexander said.

"It will make me feel a lot more comfortable about bathing and brushing my teeth in it, but I'm still not going to drink it and I'm not gonna give it to my kids or my dog," Sanders said.

"It makes me feel a lot more safer, a lot more comfortable knowing that it's safe to drink now, you know. I'll tell you a load lifted off my shoulders. When the kids take baths, when my wife takes a shower, you know, I know now we're safe," Miller said.

So what about those who've stood before Flint City Council with jugs of discolored water?

While Genesee County Drain Commissioner Jeff Wright points out he has no jurisdiction over Flint's water system, he says in general, discolored water like this is nearly always the result of water main breaks or repairs, and Flint has more than its share because of its aging system.

Wright also says the KWA pipeline won't change that. It will take better management of repairs and money - lots of it - to replace Flint's aging water mains.

Unfortunately for the city of Flint, those very high levels of TTHM recorded last August in Flint water tests are still required by the DEQ to be included in the next report calculating average TTHM levels.

The next test will be done next week, and city Public Works Director Howard Croft tells ABC12, because of the high levels last August, the city will again be found in violation and will be required by the DEQ to send out another TTHM notice of violation to all Flint water customers in early March, even if all new tests show levels under the legal limit.

Flint grants talking points

- Gov. Rick Snyder has awarded Flint $2 million in grants for water system infrastructure improvements, part of an overall $8 million plan to help cities through the Financially Distressed Cities, Villages, and Townships Grant Program.

- Flint is among six municipalities receiving grants through the program.
    - Municipalities are eligible for the grants of they are experiencing one or more conditions indicative of "probable financial stress," as defined by Public Act 436 of 2012, the Local Financial Stability and Choice Act.
    - Under the grant program, funding may be used to pay for specific projects, services, or strategies that move a city, village, or township toward financial stability.
    - There was $8 million appropriated for the program with a $2 million cap, per local unit.

- A $900,000 grant will allow the city to hire a contractor to perform a leak detection survey of the city water lines.
    - The city will receive a map of leak locations and an assessment of leak severity, allowing the city to prioritize leak repair.
    - The project also covers the expense of conducting a water pipe line wall thickness condition assessment on a portion of the city's pipes.
    - The assessment will guide the city's water main replacement program.

- The city also was awarded $1.1 million to shut down its current Water Pollution Control Facility incinerator and replace it with new facilities which will allow for the disposal of waste in landfills.
    - The existing facilities are not up to federal Environmental Protection Agency standards.

- These are opportunities for the state government to assist Flint city leaders as they address issues related to the city's water system.

Flint water talking points from DEQ

- The DEQ Drinking Water program works with communities around the state to ensure that municipalities provide customers with clean, safe drinking water.

- Municipal water supplies are tested rigorously and regularly for more than 90 regulated contaminants, including microbial contaminants that pose an immediate public health concern.

- Flint's exceedance of the TTHM standard should reassure residents that the testing program is effective.

- TTHM is not an immediate health threat. It is a chronic concern, one that can be problematic over the course of several decades of exposure.
    - The public was notified because the law requires the city to make public notification, so that everyone can make informed decisions. This is particularly true for people with infants or those with compromised immune systems.

- The DEQ is working with the City to address the situation. Recent tests show the TTHM numbers dropping rapidly. The department will continue working with the city in the months ahead, and residents should feel confident that their water is safe to drink unless the DEQ or City notifies them otherwise.

- The discoloration and odor issues some Flint residents are experiencing are separate issues from the TTHM issue. TTHM is odorless, colorless and measured in parts per billion.

- Flint water customers who have questions or concerns about their water should first contact the city to get answers and help. They also can contact the Michigan DEQ.

Hi Ron,

Director Hollins and Pastor Harris did speak yesterday, and they continue to engage in discussions about the Flint water issue. Everyone wants Flint residents to have clean, safe water. All parties to the discussions are gathering information about a variety of available options. There have been passionate and productive talks, and they will continue.

Dave:
I just spoke to Pastor Alfred Harris with Concerned Pastors for Social Action.
He talked about a conference call yesterday with Harvey Hollins, and said Hollins has asked the cities of Flint and Detroit for information about the cost of supplying water to Flint.
I tried to reach Brad Wurfel as a starting point on this but I'm not having any luck. Who should I be talking to at the state for information on this?
Thanks,

For Immediate Release

City of Flint to Form Water Advisory Committee from Members of the Community to Share Updates and Concerns

Flint, Michigan – February 16, 2015 – In response to the recent concerns regarding water quality in the City of Flint, a water advisory committee of 40 citizens consisting of business owners, elected officials and members of various community organizations is being formed. The committee's formation comes after the City hired the firm Veolia to provide an analysis of Flint's water system as well as recommendations on actions to improve water quality. The purpose of the committee will be to provide the community with ongoing information on the City's work to maintain a safe water supply and to improve quality.

In addition to gathering information from the City to share during their interactions with the community, committee members will also be expected to share the concerns they receive from the community in order for those concerns to be addressed. Mayor Dayne Walling pointed out that the level of connection between the City and the community provided by the committee is an important step toward ensuring that the public is engaged in this ongoing issue.

"Members of our community have concerns about the quality of their water, the costs associated with delivering it and the problems facing the infrastructure that brings it to them," said Mayor Walling. "As we worked to address each of these areas in turn, keeping our residents, businesses and visitors informed on the progress being made and keeping a dialogue open to hear any new concerns is crucial."

All meetings by the Water Advisory Committee will be open to the public and will be held at easily accessible locations throughout the city. Meetings will be held on a regular basis as work continues at least until the City is receiving its water from the Karegnondi Water Authority, which is anticipated to be in 2016.

The first meeting is anticipated to be during the first week of March, 2015. Letters have been sent to prospective members and confirmation is expected to be received by Friday, February 20, 2015. Any group who has not received an invitation and who would like to have a member participate can send a request to mayor@cityofflint.com.

A second, smaller group of experts in various areas surrounding water is also being formed. The Technical Advisory Committee will consist of members from the areas of health, government, industry, education and scientific research. That group will be announced later this week.

Groups and designated individuals asked to join the Water Advisory Committee:

Flint City Council President

Chair Public Works Cmte.

Concerned Pastors for Social Action

Flint & Genesee Chamber of Commerce

Hurley Medical Center

Last Report Status

1) Public Safety Update –

Not Responsive

2) Governor's Office

Not Responsive

3) Finance and
Administrative Update

Not Responsive

	Last Report	Status
	Not Responsive	

4) City Council Update

	Not Responsive	

5) Water Issues

a) MDEQ Violation Notice	The next TTHM sampling was conducted 2/17/15, testing will be done by the MDEQ. Our most recent internal tests show water to be within federal/state guidelines. Expect to receive a violation notice from MDEQ, due to the running average calculation, in 7-10 days. The notice to customers will go out by mid-March.	Update
b) Distressed Cities Grants	Announcements made for grant awards to Flint for Leak Detection and Sewage sludge Load Out Facility.	No Change
c) Drinking Water Revolving Fund	Discussing possible restructuring of loans.	No Change
d) Water Quality Consultant	Veolia will provide preliminary recommendations at the 2/18/15 Public Works Committee meeting - including process improvements, distributions system actions, communications improvements, and personnel support by way of new policies and procedures, training and new testing models. Priority budget, and timeline to follow within 1-2 weeks; much improvement has occurred as demonstrated by the most recent testing.	Update
e) WAC/TAC	A Water Advisory Committee and a Technical Advisory Committee have been formed as part of the process of improving communication and receiving additional feedback.	New

	Last Report	Status
6) 9-1-1 Reconsolidation Plan	Not Responsive	
7) Transition Activities	Not Responsive	
8) Other Items	Not Responsive

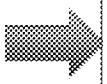
VEOLIA
City of Flint, MI
City Council Public Works Committee
Interim Water Quality Report

Veolia Scope of Work

Week 1

- Provide a review of current actions
- Engage staff, visit facilities and analyze data
- Make interim report



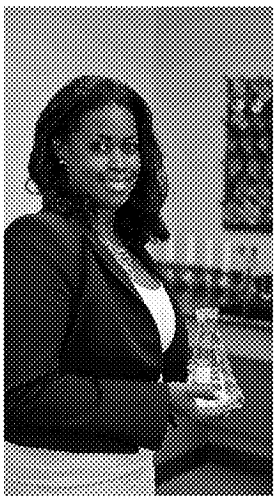
Week 2

- Carry out more detailed study of initial findings
- Make recommendations for improving water quality
- Provide a plan, cost and schedule for change

Items of Note

- **Not in scope** – studying why the change from DWSD or the history of the utility
- **What we found** – A very frustrated community and a staff trying to solve the problem, having some success but frustrated with the pace of change

Everybody Is Checking the Safety of Water



- City, state, news media, universities and other groups
- Safe = compliance with state and federal standards and required testing
  - *Latest tests show water is in compliance with drinking water standards*
  - *Monthly report available on web page*
- More than 20,000 tests required annually for city
- Strict testing requirements in place (what and how to test)

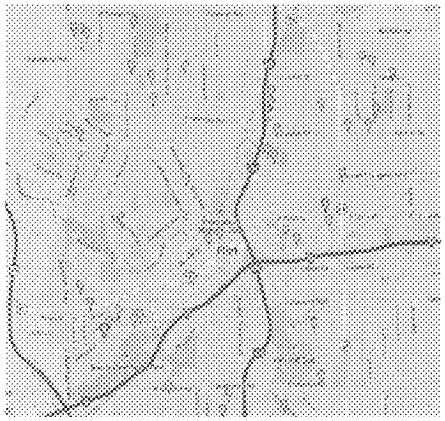
Why TTHM Notices?

- TTHM is formed as a result of the reaction between chlorine and organic material in the water
- City is required to test quarterly at 8 sites
  - *Last summer, several sites had more TTHM than allowed*
- City has reduced levels of TTHM and now all sites are in compliance
  - *Customer notification letters are required until tests are in compliance an average of four quarters*
- It will take at least 2 more quarters to lower average
  - *Even a change to DWSD water doesn't solve problem*
- Flint is not alone – hundreds of communities are facing TTHM issues

Why Discolored Water?

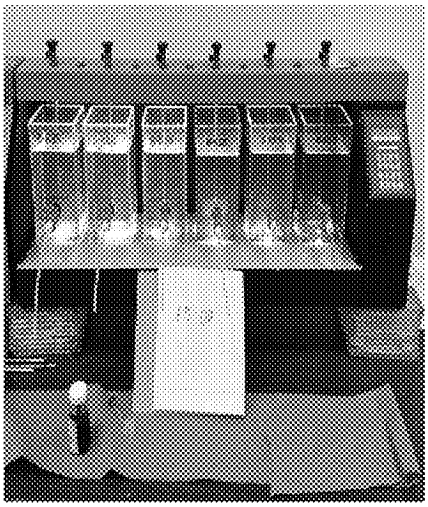
- Old cast iron pipes
- Always has been some discolored water problems – mostly after water breaks
- Efforts to reducing TTHM didn't help discoloration
  - *Doesn't mean the water is unsafe but it is not appealing and raises questions*
- City will test the water at your home – call 787-6537 or email flintwater@cityofflint.com
- Tracking customer complaints is important

Location of water quality complaints
The last 12 months – fewer than you think



Water Quality Can Be Improved

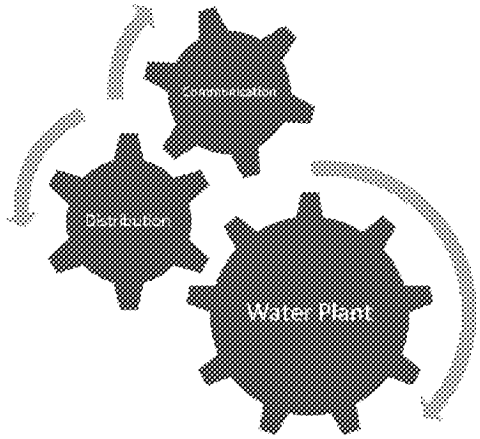
- Adjust the chemicals being fed – stop some, increase some and change some
- Provide better monitoring of water quality to help make adjustments
- Continue repair or replacement of broken parts
- Reduce the over capacity of the distribution system
- Do a better job explaining what is happening
- Do a better job of asking for help



VEOLIA

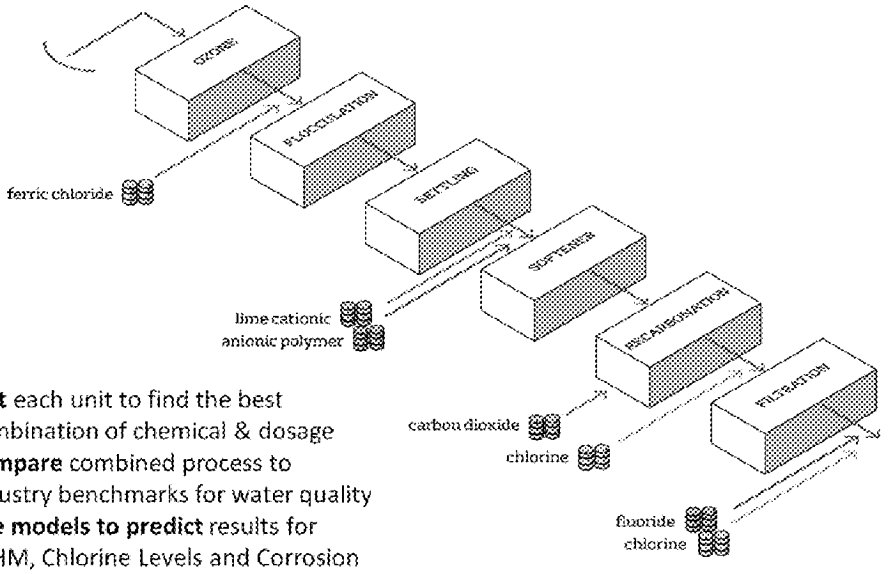
Further Explanation of Solutions

Solution Involves Coordination of 3 Activities



- Water plant improvements
  - *Optimize chemical dosages*
  - *Consider different chemicals*
  - *Change dosing points*
  - *Install granulated activated carbon*
  - *Complete plant upgrades*
  - *Implement best mgt practices*
- Distribution system improvements
  - *Fix broken valves*
  - *Ask for customer feedback*
  - *Reduce tank storage*
  - *Target line flushing*
  - *Run a hydraulic model*
- Better communication with customers
  - *Engage advisory committees*
  - *More accessible utility*
  - *Make it easy to access information*
  - *Better customer communication*

Optimize Plant Processes



- **Test** each unit to find the best combination of chemical & dosage
- **Compare** combined process to industry benchmarks for water quality
- **Use models to predict** results for TTHM, Chlorine Levels and Corrosion

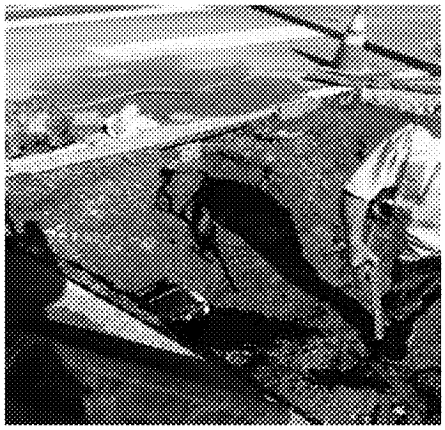
Complete Plant Construction & Re Prioritize Capital

Cost effective plan in budget

- Complete water plant renovation
  - *Target SCADA and instrumentation in plant*
- Speed up valve turning contract & provide money for replacements
- Speed up hydraulic model update to reduce tank volume
- Evaluate installing of granulated activated carbon on filters

Weather can impact timing

Digging up a water valve for repair
Need good weather to start



Implement Best Management Practices

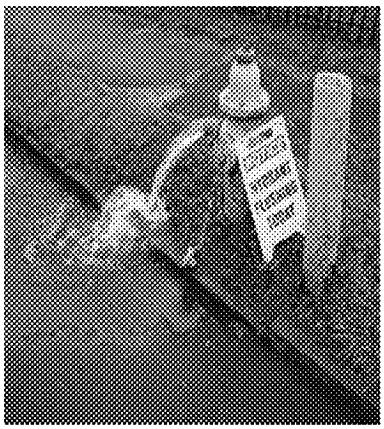
Activities to Help Operators Maintain Good Water Quality

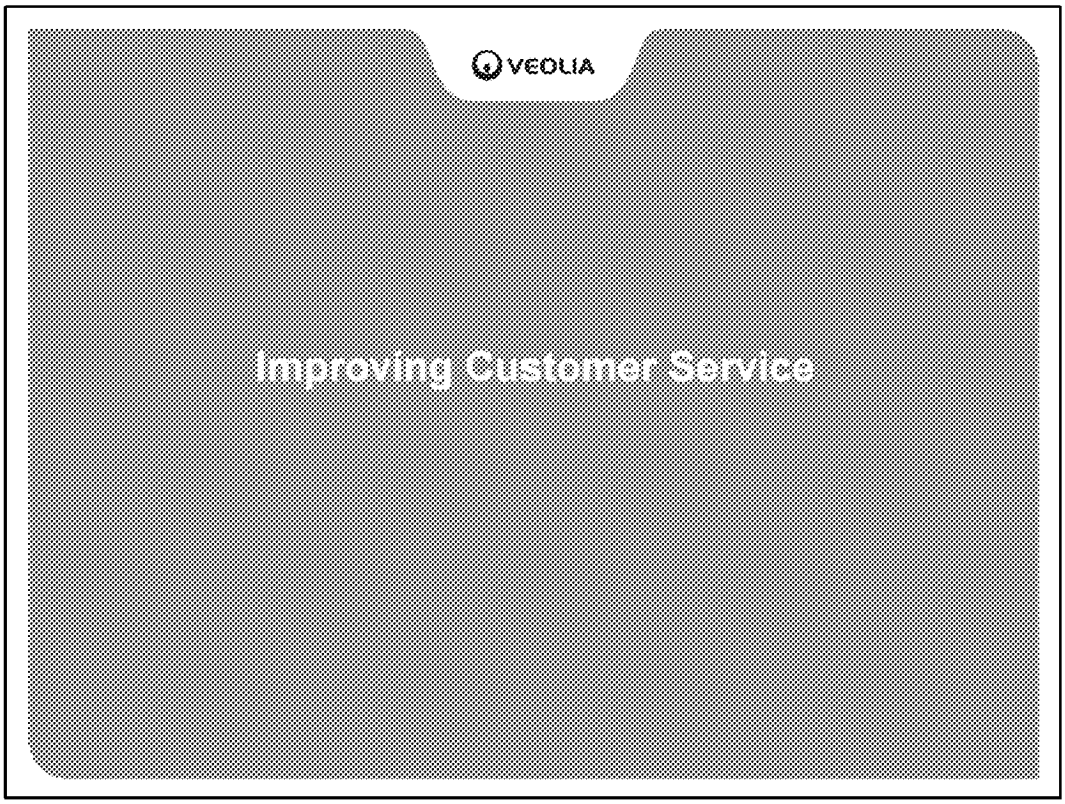
- Process Control Management Plan
- Lab QA/QC Program
- Computerized Maintenance Management System
- Asset Management System
- Training and Certification Program
- Vulnerability Plan

Distribution System Improvements

- Speed up flow of water from plant to homes – 2 weeks plant to house
  - *Find closed valves & open them*
  - *Replace broken valves*
  - *Update hydraulic model*
  - *Reduce system storage*
- Track customer complaints
  - *Test customer water*
  - *Spot flush hydrants to clean areas of stagnant water in the system*

Flushing out discolored water





VEOLIA
Improving Customer Service

Make It Easy to Access Information and People

Develop a proactive customer communication plan

- Create advisory committees to help direct efforts and improve flow of information
- Establish a single point of contact to manage all water quality complaints
- Provide additional customer service training to staff
- Expand neighborhood and community outreach
- Change monthly billing statements from card to envelope with information

Example – Communicate in the field

NOTICE: ANNUAL FLUSHING PROGRAM

We are conducting our annual flushing program to enhance your water quality and clean the distribution system.

DC Water crews will be flushing hydrants in your area 10:00 p.m. to 6:30 a.m. on the following dates:

9/24 through 9/30

IMPORTANT INFORMATION

- Your water supply will not be shut off during hydrant flushing.
- You may notice slight water discoloration or low water pressure.
- During this time, customers can continue normal water usage, including drinking, bathing and laundry (unless water is discolored).

If you experience discolored water during this period:

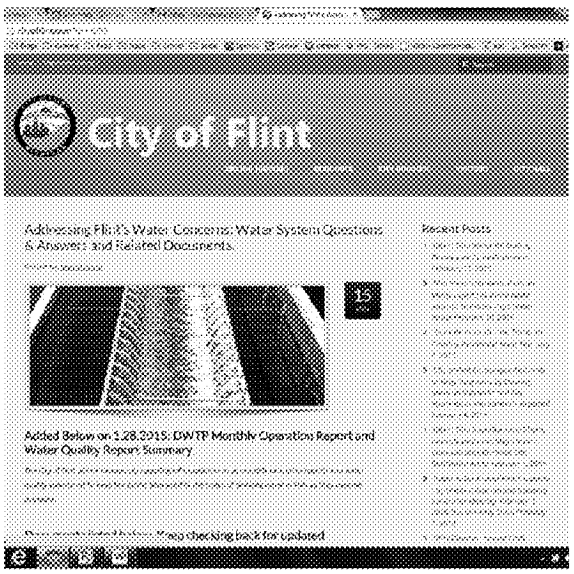
- Run your cold water taps for 15 minutes. If it does not clear up, please contact our Drinking Water Division.
- Do not run your hot water. If you experience discolored water from your hot water tap for several hours, then it is recommended to drain and flush your water heater tank.

Provide field crews with additional communications tools to use to address questions or concerns from the public

- Create door hangers, flyers, or post signs to notify customers of planned flushing activities. Be sure flushing or system maintenance is not a surprise to your customers.
- Consider providing contact information for customers to call with questions and provide a number or an email account to contact with the Department of Public Works and to encourage public comment.

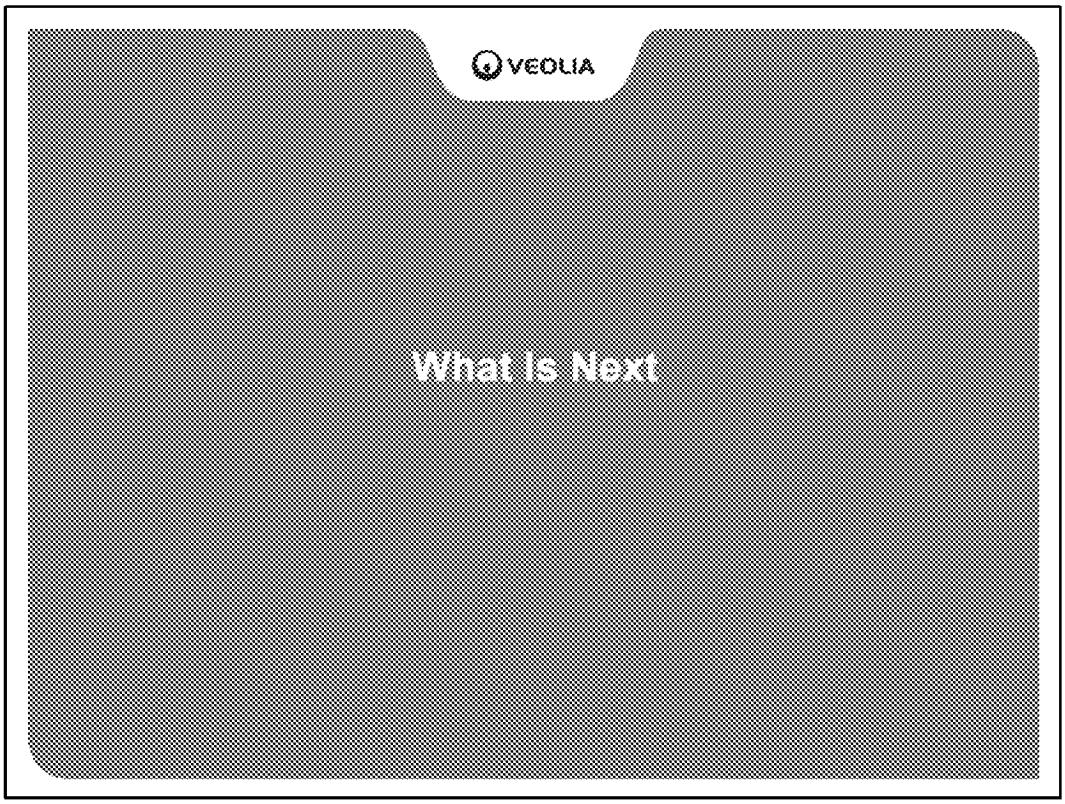
Submit door hangers provided by DC Water's Drinking Water Division

Clear, concise information is key



Simplify the reports on the web page dedicated to addressing water system questions

- Create a single point link to understand report for the public
- Use words to provide other information in plain language about testing, sampling and system or treatment plant operations
- Provide historic results from homes and other sites in the community in a clear, easy to understand format
- Continue to provide Monthly Operating Report and Water Quality Report Summary for those customers interested in more technical information
- Work with Resource Coordinator to help Flint's most impacted customers



VEOLIA
What Is Next

Next Steps

Week 1

- Provide a review of current actions
- Engage staff, visit facilities and analyze data
- Make interim report

Week 2

- Carry out more detailed study of initial findings
- Make recommendations for improving water quality
- Provide a plan, cost and schedule for change

Questions Being Heard

REMEMBER

We just started. Might not have an answer yet to your question

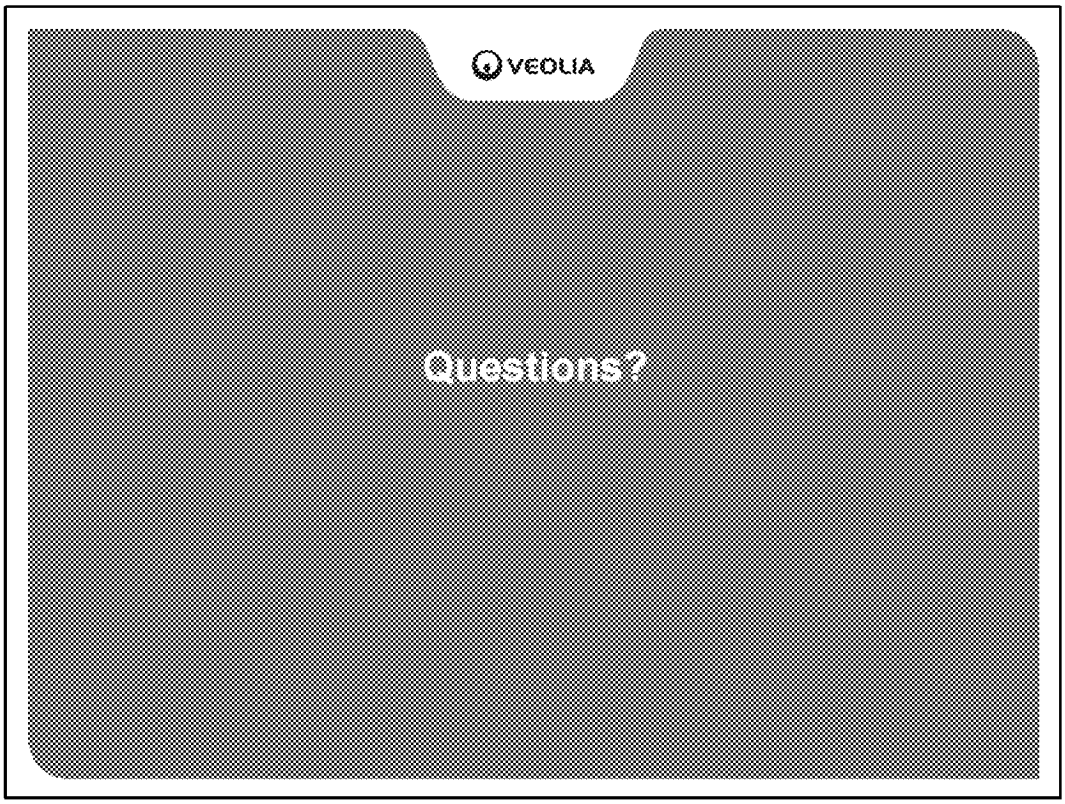
- **When will water improve -** The water has improved with current actions. More changes will occur over weeks and months because of safety reviews
- **Date of next update and final report** – An update will be provided next week and a report the following week.
- **Time frame for implementing recommendations –** The City is already started. Others a few days and some weeks or months due to State approval being required or weather.
- **Cost of changes** – Don't know yet but we are aware of the financial concerns

More Questions Being Heard

- **How are TTHM formed –** It's the reaction of chlorine to organics (leafs, dirt) in the water.
- **How to reduce TTHM –** Reduce organics before introducing chlorine and shorten time chlorine has to react with the organics
- **What causes discoloration –** Older lines, the iron parts of the system will leach iron into the water causing the discoloration. Other times its just air built up.
- **Why no discoloration with DWSD –** There was. Flint had a bad time with breaks of old line and is doing lots of construction. This stirred up the water and caused discoloration.

More Questions Being Heard

- **Can you test my water –** The city will test your water for free. But, only 2 of 20 people have taken the city up on the offer since it began offering the service.
- **Medical problems** – Some people may be sensitive to any water. Talk to your doctor. The City is communicating with the medical community.
- **Confidence that future problems will be avoided** – Recommendations will include putting programs in place to better respond to water changes and assure quality



VEOLIA
Questions?

From: Elizabeth Murphy <emurphy@cityofflint.com>
Sent: Thursday, February 19, 2015 9:49 AM
To: Hollins, Harvey (GOV)
Cc: Gerald Ambrose; Workman, Wayne (TREASURY)
Subject: Flint Water Cost Analysis
Attachments: DWSD Switch Impact (2).xlsx

Mr. Hollins,
Jerry Ambrose asked me to respond to your request for more information on the Flint water cost analysis chart which you sent him yesterday. Please see the attached chart; it contains an added analysis by Jerry. The sections for which you asked for data can not be provided as we don't calculate prices in the manner you are comparing.

Jerry's chart clearly represents what Flint has been talking about - a major increase in water rates would be necessary to pay the additional charge to purchase DWSD water.

It would be interesting to back into the numbers that Harvey wants....but I am assuming you or Al can break up the $149 into fixed and commodity.

On Fri, Feb 20, 2015 at 12:56 PM, Hollins, Harvey (GOV) <hollinsh@michigan.gov> wrote:

Ms. Murphy,

Thank you. The calculations in the table was provided by treasury and I was seeking clarification. I am not a water expert, but I learned that typically, most rates have two components.

1. Fixed-cost recovery charge

This charge is based on the size of the water meter at the home or business. Most residential customers will have a meter between 5/8$^{th's}$ of an inch and 1 inch.

2. Consumption Charge

This charge is based on the amount of water used. The rate for usage is determined by the distance and elevation of the home or business from the water source.

MCF is used in many place for calculating rates; however, since Flint is currently not using this calculation, what are the cost components that make up the $149 avg. monthly charge to the resident?

Best,

Harvey

Harvey,

Quick response, subject to verification by Liz Murphy:

Components of the average charge:

$ 57.38 fixed-cost recovery charge
$ 91.63 consumption charge
$149.01

Consumption charge based on 7 units of water @$13.09 per unit

1 unit = 748 gallons of water

There may be a way to convert a unit into an MCF, but I do not know it.

Please verify this with Al Mooney - $147 average charge is
for water and sewer. Both have fixed and commodity charges.

You are off by a factor of 10 1 unit= 1ccf= 748 gal. 1 mcf = 100 ccf. Approximately I don't have info in front of me.

Subject: Flint Phone Call
Importance: High

I'd like to convene a phone call today to discuss a Flint water solution. Please let Stacie know your availability for a call today anytime between 2pm and 5pm and she will send out the appointment and conference line information. I'll loop in Gerry Ambrose once we reach consensus.

Best,
Harvey

> Harvey,
> Since group call Tuesday I have been working out how the filter idea might take shape.
>
> To reiterate some key points so we're all clear:
>
> 1. DEQ does not inspect individuals' homes in a situation like this. It's the city's system, their operators handle all complaints and maintenance. In fact, our folks alerted me that the city's got union rules in place forbidding any contractor from touching the system.
> 2. DEQ's role is limited to ensuring the plant is operating to state standards and the water it produces meets potability standards. The aesthetic issues drawing concern from residents – color, odor, taste – stem from a variety of things. Age of the system and prolonged lack of upkeep is the leading factor. But in some areas, another contributing factor is changes in water flow – source used to come from the south, now comes from the north, so some pipes are flowing in reverse, stirring up whatever was settled for a long time. In some sections, large pipes that historically served large communities are now serving a much smaller customer base, contributing to water stagnating in the system. In some areas, household connections are old and worn, so two neighbors may be having dramatically different experiences. My point is, the challenge takes many forms and there's no single solution that will bring sweeping change. The two consultants hired by the city have, as I understand it, both reinforced this idea in their assessments, so that's good.

3. The fix for this will be years in the making, truly. Even if full funding were available, 'big dig' projects can't all happen at once. The city needs to get an assessment of its infrastructure so it can prioritize its needs, and I understand they're working on that. In the near term, maintenance this spring / summer – things like cleaning the pipes in key sections and flushing the system via the hydrants – could offer some short term results. I know nobody wants to just wait for spring, but that is something important to keep in mind.

4. In the meantime, the group discussed possibly making home water filters available somehow. The National Safety Foundation is a Michigan company, headquartered and founded in Ann Arbor, that develops standards for all kinds of infrastructure. They're a globally recognized source for standard setting. A look at their site reveals there are myriad filtration options on the market and within each type (faucet mounted, whole house line filters, etc) there are filters that focus on different aspects of purification.

   If this idea begins to get legs, I'd suggest testing some different models on the local water at the customer level to see if they work. I'd also suggest the idea be focused on tap-mounted models to promote clean, appealing drinking water. And I'd suggest this program could be funded in whole or in part by the state, but would need to be administered by the city (reinforcing the fact that they own, operate and service the system). I've got some information on filter models below.

   Two more considerations: One, while the state has provided residents in some communities with bottled water in the past, it always has to do with their water being somehow contaminated – as in, some kind of chemical plume that impaired local drinking water sources. This would be the first time the state took steps to deal with what is an aesthetic issue on a system where the water is meeting state drinking water standards.

Water filter info:
ANSI NSF Standard 42 Covers bacteriostasis, taste and odor (associated only with chlorine removal), and other aesthetic conditions
http://standards.nsf.org/apps/group_public/download.php/19895/NSF_42-11%20-%20watermarked.pdf

ANSI NSF Standard 53 Covers health effects removal
http://standards.nsf.org/apps/group_public/download.php/19896/NSF_53-11a%20-%20watermarked.pdf

It is important to note that the filters are not required to meet all aspects of the standard, only the portions they want to make claims for. So product information for each filter must be reviewed to determine its applicability.

Most of these point of use filters are basic activated carbon filters that simply remove taste and odor specifically associated with chlorine, not other things like iron, manganese, hydrogen sulfide, etc. that can also impact taste and odor as well as color.

It is important to recognize that taste and odor is generally an individual preference and such standards have for the most part not been developed because groups of individuals may still consider taste and odor issues to exist even after levels for such a standard have been met.

Other considerations are that the test water for such filters attempting to meet the standard uses hardness levels of 170 mg/L or less. Flint's water at times may be above this level, which could then impact filter performance and longevity.

Most of these filters are designed to be replaced after 100 gallons or less of use, a period of about 3 months for most households. In addition the tests allow for initial pressure drops of up to 15 psi. This may limit use in households that already rely on minimum pressure within their household plumbing.

Regarding the health effects standards, as the Flint water system already meets such requirements, with the exception of the current TTHM locational running annual average, there is little point to the use of these filters for such a purpose.

To the point you'd asked about the other day, while Flint and Detroit are leading examples of unmaintained infrastructure, Flint is not alone by any means.

This recent infrastructure report card
http://www.infrastructurereportcard.org/michigan/michigan-overview/
Lists Michigan with a $13.8 Billion need over the next 20 years.

http://www.infrastructurereportcard.org/a/#p/state-facts/michigan

Here's a link to the 2009 Report Card for Michigan Infrastructure
http://www.michiganreportcard.com/

From the report:

"A significant portion of the state's primary distribution system is nearing 100 years old. CWS are facing a significant challenge to maintain the vast network of aging, underground infrastructure. Within the city of Detroit alone, approximately 80% of its distribution piping was installed prior to 1940, which is not unusual for CWS in Michigan."

"The age of the majority of the state's distribution system is the primary contributor to normal decay and failure. In many cases, pipe life has far exceeded useful service life. Much of the older water systems consist of undersized mains constructed of materials such as unlined cast iron pipe. Minor fluctuations in system flows or pressure may cause red water complaints and even result in pipe failure. All CWS should have routine flushing and valve maintenance programs; however many are hesitant due to the time and cost."

"Under the Stage 2 Disinfection Byproducts Rule, all CWS that disinfect are required to provide increased trihalomethane (THHM) and haloacetic acid (HAA5) monitoring due to the potential byproducts of chlorine reactions within the pipe system. Corrosion, scale, solid suspension on the interior sidewall of pipe, in addition to the age and condition of the system will require diligent rehabilitation investment to maintain system integrity."

"While better materials and advanced technology is available to replace the aging distribution system, resources remain scarce when compared with the magnitude of the

rehabilitation task at hand. Too often, distribution system replacement costs are underfunded and the first item to be slashed when budget problems arise. Overall, distribution system maintenance is reactionary in much of the older systems. Since the majority of the antiquated system will require removal and replacement beyond the CWS funding resources for systematic upgrade, a reactionary rehabilitation program is inevitable and must be funded accordingly."

Call or email me if you need anything further.

Greetings All,

Attached is a brief overview of the information to be presented on Monday at the 1:00pm meeting with Steve Linder of the Sterling Corporation regarding Flint Water. The meeting will be held at the Sterling Corporation's offices on 106 W. Allegan, Ste. 2 in Lansing. I have sent the appointment and here are the list of attendees:

Harvey Hollins, Director, Governor's Office of Urban and Metropolitan Initiatives
Gerald Ambrose, Flint Emergency Manager
Natasha Henderson, Flint, City Manager
Liane Shekter Smith, Chief, Office of Drinking Water and Municipal Assistance (DEQ)
Stephen Busch, Office of Drinking Water and Municipal Assistance (DEQ)
Brad Wurfel, Director of Communications (DEQ)

Please let me know if you have any questions, thank you.

Stacie

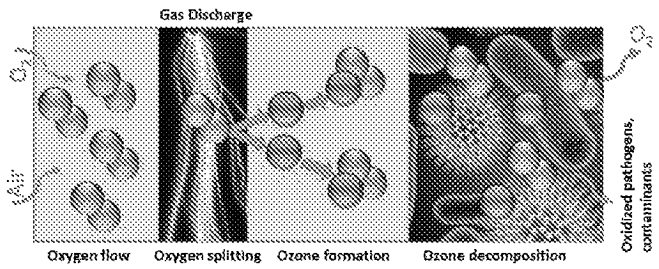
Chemical Free Water Disinfection by Ozone

Today about 98% of water treatment facilities in the U.S. use some form of chlorine to disinfect drinking water supplies. It is a cost effective method for destroying potentially harmful bacteria and viruses. However, chlorine's ability to interact with organic compounds in water leads to trihalomethanes (THMs) formation. Especially, river or lake water with high level of organic matter require heavy chlorination to combat high level of bacteria, resulting in dangerous levels of THMs and bad smell. THMs, when ingested can encourage the growth of free radicals that can destroy or damage vital cells in the body. Besides cancer, exposure to THMs has been linked to other health issues including asthma, eczema, heart disease and higher miscarriage and birth defect rates. Further, high level of chlorine also poses serious risk to the aging infrastructure.

Chemical free water disinfection technologies such as UV light and ozone have long been recognized to be much safer than chlorination, however, their high cost has prevented wider adoption. The basic mechanism of ozone generation and disinfection is shown in the picture. Ozone has a high oxidation potential (much higher than chlorine) and a superior response time compared to other sanitizing products. Its high oxidizing potential enables ozone to break down organic matters that chlorine cannot. Some pollutants can only be oxidized by ozone. For example, ***Cryptosporidium Parvum***, a drinking water pollutant, is resistant to most disinfectants, but is effectively destroyed by ozone. Most importantly, the emission from ozone is pure oxygen and it leaves no residues.



UV light is a competing non-chemical sterilization technique. Intense UV rays break down the sensitive RNA and/or DNA of microorganisms, thus preventing the organism from reproducing. Ozone, on the other hand, oxidizes the microorganisms, thus destroying their cells completely. UV sterilization being a line of sight process, to be effective, one needs to remove most of the suspended matter prior to the treatment. In contrast, ozone oxidizes the soil or particulate matter, changing or destroying the chemistry of the soiling materials such as organic compounds.

Despite the great benefits of ozone, its widespread adoption is limited due to the high total ownership cost of current commercial ozone generators. Somnio's $AiR_2O_3^{TM}$ ozone generator is a paradigm shift in ozone generation technology. The first and only commercial barrier less ozone generator eliminates the requirement of dielectric barriers and highly filtered dried oxygen (pure or enriched) supplies, which restrain current commercial ozone generators. This groundbreaking technology brings a market-competitive, robust, energy efficient, and scalable modular device that offers a financially attractive alternative with the capability of producing varying levels of ozone depending on the application at hand.

Producing ozone cost effectively is only part of the greater story of the far reaching benefits of ozone. Applying ozone effectively for a given application requires careful and intelligent design, sensing and monitoring. In addition to its revolutionary $AiR_2O_3^{TM}$ ozone generator, Somnio

collaborates with end users to provide complete and economical turnkey solutions. Somnio's current in-house test plant incorporates all necessary safety features and automation.

Importance: High

Dear Harvey,

Director Dan Wyant asked that I send you the following information regarding Flint.

As requested, the following information has been gleaned from our database regarding violations:

In calendar years 2013 and 2014, we've identified 1100 violations (200 are standards violations, i.e., MCLs; and 910 other violations).

This represents 326 community water supplies that had violations over these two years.

Flint has 5 violations in those 2 years (TTHM MCLs at 2 sites and 2 bacti MCLs (1 with E. coli that counts as an additional violation)).

Please let us know if you need anything further. Thank you.

From: Gerald Ambrose <gambrose@cityofflint.com>
Sent: Wednesday, March 18, 2015 4:00 PM
To: Hollins, Harvey (GOV)
Subject: draft announcement - dwrf restructuring
Attachments: March 19 announcement.docx

fyi....still being reviewed..

DRAFT

For release March 19, 2015

Emergency Manager Jerry Ambrose today authorized a restructuring of four outstanding Drinking Water Supply Revenue bonds to allow postponing current principal payments in the total amount of $2.24 million. This action will allow the $2.24 million budgeted for debt service to be used for expenses associated with maintaining safety and improving quality of the Flint water supply. Approval of the State Treasurer is required before the restructuring can occur.

Flint has recently received a final report from Veolia, its water expert advisor, making a series of recommendations to maintain and improve the Flint water supply. These recommendations, along with other input as well as items identified in the City's current capital improvements plan, will be considered as the City develops and implements its action plan to maintain and improve the Flint water supply. Discussion on the development of the action plan will begin today at the Water Advisory Committee meeting, scheduled to begin at 2:00 pm at the Flint Public Library.

The State of Michigan was instrumental in allowing the restructuring, as approvals are required by both the State Treasurer and the Director of the Michigan Department of Environmental Quality. "At all levels, the State of Michigan has been most cooperative in assisting the City of Flint as it addresses the many issues confronting the Flint water system", said Emergency Manager Jerry Ambrose." Access to $2.4 million at this time will be very helpful in implementing our action plan."

The proposed restructuring will free up funds to enable the City to more quickly move forward on recommended improvements to its water treatment and distribution system. Several recommendations for improvement are currently unbudgeted, and the $2.4 million will help assure that the most important can be implemented. Recommendations to be considered include the addition of a Granulated Activated Carbon Filter, estimated at as much as $1.5 million; acceleration of the repair and replacement of values, estimated at an additional $120,000 annually; replacement of additional pipeline replacement, estimated at $1 million per mile; and acceleration of the project to automate plant operations, estimated at $450,000. $1.315 million will become available in the City's current fiscal year, and the remaining $925,000 will be available in the next fiscal year.

The bonds are currently financed at a rate of 2.5%, and postponement of the principal payment will incur some additional interest expense over the life of the issue. Interest costs will increase by approximately 2% ($228,000) over the 20 year life of the issues.

Subject: Flint Water Advisory Committee Meeting 03-19-15

Randy,

Yesterday's meeting was very informational; however, discussion was cut short by understandably upset water customers. The main points of information relayed during yesterday's meeting are as follows:

1. The City provided a table of water improvements* currently that the City is in the process of implementing or currently evaluating.
    - The City has built a hydraulic model to assist the City in identifying the locations of bad valves.
    - The City restructured four outstanding Drinking Water Revolving bonds allowing the City to afford an additional $2.24M towards Capital Improvements in Water. With $2.24M the City will:
        i. Installing a $1.5M Granulated Activated Carbon Filter (GAC). This will provide the best reduction possible and provide better than 90% removal of total organic carbon (TOC), dramatically reducing the potential for total trihalomethane (TTHM) formation. This entire project needs to be done by early June to assure a flow of water throughout the system. Several months are required for the engineering design, State approval, bidding of work, and installation of the GAC. According to the Veolia report, this process needs to begin now.
        ii. Accelerate repair and replacement of values, estimated at an additional $120K annually.

iii. Implement a process control management plan (PCMP) to increase efficiency and professionalism by allowing operators on the day shift to communicate with the night shift, ensure operators follow the same treatment plan for the water, ensure adjustments are unified between all operators, and inform staff as to what the process is when water quality set points begin to drift away from its desired quality levels. This will help the City transition to lake water. Estimated at $25K annually.

iv. Automate plant operations to allow the City to monitor activities throughout the entire plant, estimated at $450K.

2. Department of Public Works director Howard Croft provided a breakdown of FY 2015 Water and Sewer budgeted expenditures*, and explained 96% of the $70M is needed if the City uses DWSD or river water as its source.

3. Also provided was a document* with answers to all 61 questions asked at the last Water Advisory Committee.

Suggestions for the City:

1. The facilitators seemed to have inexperience in mediating or controlling the flow of the meeting. This lead to upset outbursts from the public, which stopped any information from being communicated to the public. The City may wish to hire professional mediators with experience in facilitating large public meetings.

2. The agenda did not include time for public comment. This gives the perception that the meeting is "closed off" to the opinions of the residents.

3. It was mentioned by the Mayor, that he City charges an initial cost of $425 to new renters. This fee appears to higher than anticipated, and more information should be provided regarding fees and fee structures.

If additional information is desired, please let me know.

Water Quality Report
March 12, 2015

FROM
Veolia North America

TO
Emergency Manager Gerald Ambrose

Executive Summary

The City of Flint changed water sources, transitioning from Detroit's system to the Flint River. This change created water treatment challenges that have resulted in water quality violations. Aging cast-iron pipe has compounded the situation, leading to aesthetic issues including taste, odor and discoloration. Public interest and scrutiny of the drinking water system intensified following the distribution of required public notices of violation.

The City of Flint has made a number of good decisions regarding treatment changes that have improved water quality. However, this is a very complex water quality issue and the City is seeking additional advice on what to do to ensure healthful drinking water for the community.

Veolia appreciates the City's decision to seek independent third parties to review current treatment processes, maintenance procedures and actions taken to date, and provide ideas for improvement. We are pleased to present this final report to the City of Flint following our experts' 160-hour assessment of the water treatment plant, distribution system, customer service and communications programs, and capital plans and annual budget.

This report provides recommendations and a roadmap for improvement, though our engagement was limited in scope. Our assessment included reviewing actions taken by the City to date, validating the City's plans going forward, and making recommendations for ideas not being considered.

Although a review of water quality records for the time period under our study indicates compliance with State and Federal water quality regulations, Veolia, as an operator and manager of comparable utilities, recommends a variety of actions to address improvements in water quality and related aesthetics including: operational changes and improvements; changes in water treatment processes, procedures and chemical dosing; adjustments in how current technologies are being used; increased maintenance and capital program activities; increased training; and, an enhanced customer communications program.

We are also providing a recommended schedule and estimated costs for implementing changes. It is our desire to help Flint residents and public officials better understand the current situation so that informed decisions can be made to ensure safe drinking water for the city's customers.

Review of Actions Taken to Date

To address water quality issues, the city has made operational changes, sought help from the State, hired engineering firm Lockwood, Andrews & Newnam, Inc. (LAN) to provide additional advice, and hired Veolia for an assessment from a utility operator's perspective. The City has also reached out to different specialty vendors (chemical suppliers, filter companies and tank aeration companies) for information about products to help with the TTHM issues. These are logical steps to take.

Flint is not alone in dealing with TTHM problems, as many utilities across the country are facing this challenge. The City appears to be following standard steps that many of those communities are taking to successfully correct the problem.

Although the primary focus of this review was based on solving the TTHM problem, the public has also expressed its frustration over discolored and hard water. Those aesthetic issues have understandably increased the level of concern about the safety of the water.

The review of the water quality records during the time of Veolia's study shows the water to be in compliance with State and Federal regulations, and, based on those standards, the water is considered to meet drinking water requirements.

The City has been proactive in its efforts to reach out to the medical community, to set up a phone number and email address to receive complaints, to post State Water Quality reports, to provide the list of EPA required water tests, and offer to test the water at customers' homes.

From our review, these numerous efforts demonstrate how the city is trying to be transparent and responsive beyond what many other communities might do in similar circumstances.

State Report

The Michigan Department of Environmental Quality (MDEQ) has requested specific actions be taken related to the total trihalomethane (TTHM) issues. The February 2015 report from LAN (*Operational Evaluation Report TTHM Formation Concern*) indicated apparent reasons for the elevated levels of TTHM in the distribution system. These generally relate to high Total Organic Carbon (TOC) in the water source, improperly operating equipment both in the plant and the distribution system, less-than-optimal plant TOC removal and old cast-iron pipe in the distribution system. **Our assessment confirms that these reasons are likely given our on-site laboratory testing and analysis, as well as our first-hand observations.**

Due to time constraints, LAN's report to the State was submitted prior to Veolia's final analysis and recommendations, and contained a number of key initial and contingent steps the City should consider, including:

Initial Actions

- Hire a Third Party Water Quality Expert to Complete Independent Audit
- Obtain a THM Analyzer
- Carry Out Jar Testing
- Water Plant Optimization Softening
- Water Plant Optimization Disinfection of Filter Beds (Pre-Chlorination)
- Water Plant Optimization Polymer Aid to Coagulation and Flocculation
- Increase Water Main Flushing
- Water Modeling Cedar Street Pump Recirculation
- Water Modeling West Side Pump Recirculation
- Broken Valve Locations
- Increase Flushing

Contingent Actions

- Fix Ozone System
- Start Feeding Coagulant and Flocculation Polymer
- Convert to Lime and Soda Ash Softening
- Change Disinfection to Chloramine or Chlorine Dioxide Temporarily
- Install Pre-Oxidant at Intake
- Replace Filter Media Implement Advanced Treatment
- Increase Main Flushing
- Continue Valve Replacement
- Emphasize Cast Iron Pipe Replacement

Veolia's Recommendations

While many of Veolia's recommendations match the initial assessment provided by LAN, our approach, as an operator and manager of comparable utilities, considers a more comprehensive solution. These improvements include operational changes, differences in water treatment regimes and chemical dosing, increased maintenance, and increased training.

- **Addition of Permanganate** – The addition of a permanganate chemical will help reduce ozone demand as well as chlorine demand. The reduction of ozone is needed to help eliminate the possibility of violating the bromate limit. The addition of the chemical will require state approval, submission of design documents for approval, procurement of the equipment and installation. The State has indicated they will work with the City on expediting review and approval of any requested changes. The required dosage of permanganate is estimated to range from 0.5 mg/L to 1.2 mg/L with a corresponding price of $160,000 to $320,000 per year. (Please note – The water in the river is dynamic which means it will change with weather, seasons and other factors. The estimates provided are based on bench testing at a given time and as such require the operators to test water and to verify chemical dosages on a frequent basis.)
- **Reduction of Ozone Feed** – Treating water is a delicate balance - increasing ozone to fix the TTHM problem can raise bromate levels to a point of violation. The introduction of permanganate is being recommended to reduce the demand for ozone so that feed rates will not exceed 5 mg/L. The current ozone dosing has been as high as 8 mg/L and, as such, if allowed to continue, will increase the risk of violating the bromate levels.
- **Increase of Ferric Chloride** – Four coagulants were tested by Veolia -ferric chloride, ferric sulfate, polyaluminum chloride (PACl) and aluminum chlorohydrate (ACH). Ferric chloride and ACH were found to be the best choice of product for effectiveness in removing TOC, a precursor to TTHM formation. Current ferric chloride dosages are too low and dosages of 100 mg/L or more are recommended. Again, please note, that the amount of chemical needed changes with the nature of the river and as such, water must be tested multiple times a day with corresponding changes in chemical dosages. This increase to 100 mg/L is twice what is currently being fed and much higher than what had previously been fed last year. The increase in chemical costs could be up to $1,000,000 per year. This change in dosage (using ferric chloride) can be made immediately without state permit review.
- **Reduction of Lime** – Lime is currently being overfed. A higher dosage of lime does not necessarily mean better treatment. A review of different dosages with jar testing indicates that the current dosage of 280 mg/L can be reduced to 230 mg/L. This represents a potential range of savings of up to $270,000 per year. This change can be made immediately. It should be noted that the current softening equipment is in poor condition, which does complicate the treatment process with a poor balance of flow between the two basins, weirs that are not level causing bypassing with the softener basins, and simply old mechanical equipment that periodically breaks down. This equipment is not going to be needed when a change to lake water occurs. Addition of soda ash to help further reduce hardness in cold weather might require dosages up to 40 mg/L with an annual chemical cost up to $320,000. There have also been some questions or complaints from the public regarding hard water. The water entering the plant is currently 360 mg/L and the plant is reducing that level of hardness to about 210 mg/L. Optimization of the dosage can reduce the hardness

further to about 180 mg/L. This reduction however has been sporadic as equipment breakdowns and high flows have caused problems keeping the softening process on-line. As we have noted before, the dosage needs to be adjusted daily or more often based on process control monitoring. The raw water hardness in the summer is much less than in the winter. For illustration purposes, the difference could be 360 mg/L in raw water in winter compared with 220 mg/Lin the summer.

- **Eliminate Pre-Chlorination on the Filters** – The reduction of pre-chlorination on the filters during the summer months can help reduce TTHM formation. This action has to be considered carefully with procedures documented and reviewed for engineering principles. As such, it will take time for the design engineer to determine what could be done to assure the proper chlorine contact time and document that other safety protocols in water are met. This requires state approval. Any submission should be considered along with a possible change in filter media. If Granulated Activated Carbon (GAC) is installed then the pre-chlorination would be stopped or drastically reduced because of the chlorine impact on the GAC filter media. Veolia's initial investigation into changes in chlorine feed point indicate that the recommended action can be accomplished while maintaining the required regulatory contact time for disinfection.
- **Change Filters to Granulated Activated Carbon (GAC)** – The object of the other changes being made is to reduce the TOC before chlorine is added into the process. The plant by design is limited on the amount of TOC removal possible. A maximum removal of only 60% is likely if the plant is properly optimized. The change of filter media to GAC would provide the best reduction possible and provide better than 90% removal dramatically reducing the potential for TTHM formation and thus ensuring compliance with that parameter for the water system. The change in filter media; however, is complicated requiring approval by the state, design of the changes, procurement of the media and a contractor to install it. That will take time and is likely in a range of $1.5 million (more or less) in cost. The use of GAC also requires more testing and monitoring of the media and the TOC than with the current media. GAC will accumulate TOC and begin to become in effective after a period of time. Depending upon the level of TOC reaching the filters this could be as short as 3 months and as long as 9 months. The amount of TOC is dependent upon the river water quality and operation of the other plant processes. Once the ability of the filters to remove TOC is diminished, the GAC media has to be replaced if river water continues as a source. The change to lake water will not require TOC removal and the media could continue to be used as filter media for that new water source.
- **Corrosion Control** – The primary focus of this study was to assure compliance with the TTHM limits. That is not the only problem facing the city and its customers though. Many people are frustrated and naturally concerned by the discoloration of the water with what primarily appears to be iron from the old unlined cast iron pipes. The water system could add a polyphosphate to the water as a way to minimize the amount of discolored water. Polyphosphate addition will not make discolored water issues go away. The system has been experiencing a tremendous number of water line breaks the last two winters. Just last week there were more than 14 in one day. Any break, work on broken valves or hydrant flushing will change the flow of water and potentially cause temporary discoloration.
- **Eliminate a Storage Tank** - The water system has more storage than it requires, due to excess capacity in the water lines in combination with the storage tanks. The City has already employed LAN to update the hydraulic model. The hydraulic model should be used to help determine if water levels can be lowered further and even to remove some storage tanks from service. That decision may need to be made

seasonally. For example demand during water main breaks last week required extensive amounts of water. The excess storage is more a problem with TTHM formation for the system in summer than winter.

- **Prioritize Valve Replacement** - The hydraulic model shows long water age in portions of the system that appear to be contributing to the TTHM problems. LAN has updated the model to include the location of broken valves and that added information is being used to identify other system problems. The City has a contract for valve turning and repair work that should be focused on known broken valves, particularly in sections of the distribution system with old water age. This activity however must wait until warmer weather in fear of causing problems in the water system with lines freezing.
- **Target and Increase Flushing** – Flushing the fire hydrants can be useful in cleaning out lines to minimize discolored water complaints and also helping reduce the age of water. This DOES NOT mean just opening hydrants. The hydraulic model needs to be used to determine which hydrants should be opened and for how long to ensure the lines are properly cleaned. For example, this might require 15 minutes or even several hours of flushing depending on location. The flushing of hydrants also needs to include records of hydrant condition, color of water initially and after periodic increments plus chlorine residual testing. All of that information will help provide information to the engineers on the effectiveness of the procedure. Each crew doing the work should be trained to help explain the process to the public and also warn neighborhoods about flushing so that staining of laundry can be avoided.
- **Change to Lake Water** – The changes being made now to the water plant will not be the same changes required to treat lake water once it becomes available. A thorough analysis and plan needs to be made in preparation of that switch. This is going to need to include changes in how the plant is operated, like eliminating lime softening and reducing the dosages of many chemicals. Consideration will also have to be given to algae treatment when lake water is being used.
- **Operating Programs** – All of the changes discussed above are based on testing and techniques proposed by engineers and skilled operators of both LAN and Veolia. The staff will need further training and implementation of detailed protocols to successfully implement the changes and to ensure long-term success at the plant. This means the City needs to implement a series of programs to ensure success in these changes.
    - **Process Control Management Plan** (PCMP) – The amount of testing and resulting changes in chemical dosages, along with monitoring the impact on the water, will require a well-documented process that all operators follow. An example of this is jar testing, which is used by the operators to identify the most effective chemicals and dosages to optimize treatment. The staff understands the basic treatment process but needs further practice and training to become proficient in the use of routine process control to adjust for water quality. This is commonly referred to as a PCMP and is used as a standard operating procedure so that the operators on the day shift can communicate with the night shift, that operators are following the same treatment plan for water, that the adjustments are unified between different shifts and different people, that a desired water treatment quality is defined and variations from it signal alarms and that the staff knows what to do when the water quality setpoints begin to drift away from its desired quality levels.
    - **Lab QA/QC** – The operation of the water plant is dependent upon accurate lab results. Standard operating procedure needs to be set and lab technicians trained in that process. EPA and the State

set procedures and standards to be met and the staff should strive to meet those standards. The City has already purchased a TTHM analyzer but should also consider a TOC analyzer that can be an online continuous device to provide immediate information on influent and effluent levels of TOC. Part of the lab records should be historical review of data to help operators better understand the changes they make in the plant.

- **Maintenance Management** – The key to water equipment is having all the equipment effectively maintained and functioning properly. The current capital program is fixing many broken pieces of equipment and updating the plant to current standards. This however must be followed with a rigorous maintenance program that ensures the proper preventive maintenance, is able to predict when maintenance is needed to keep equipment functioning properly and responsive to changes in flows and source water quality.
- **Training** – The changes being suggested are new to the staff and as such training needs to be provided in what the changes involve, why they are being made, the impact on the water quality, and how best to run the plant. A good demonstration of skill level is for the staff to become certified by the State as a licensed water plant operator. Many utilities now require all operators to hold at least the minimum certification level as a starting point and offer incentives to increase their certification level.

- **Communication Program** – The city should lay out an immediate, written strategy for communicating with the public in the short-term, as well as a 6-to-12 month strategy that contemplates known, future events like the KWA pipeline and switch to lake water. A wide range of activities are underway to work with the public but a comprehensive and coordinated effort, with a strategic focus, will help the utility and its customers.
  - **Dedicated Communications Personnel** – The City has a single, dedicated public information officer, tasked with providing service to all of city government. The current focus on communications support for Public Works, and the anticipated needs over the next several years, indicate the city would benefit from the hiring of a staff person in Public Works who could establish a communications program designed to provide clear and concise information to a broad audience though a number of different channels. In the interim, the city could hire a communications intern, local communications firm, or somebody with experience who is able to provide reduced or no-cost services for the immediate future.
  - **Communications Planning – Public Notification** – The City should be congratulated on its efforts to keep the public informed. It is posting its monthly reports on the web page to provide transparency, though these reports are highly technical – and may be too technical for the customer base at large. They are valuable to those customers who do want this level of detail. The city should create a single-page dashboard of information that outlines the water utility's performance for the previous month, post the dashboard on the website, print copies for distribution at customer service or other reception areas, and be provided during speaking engagements or other events. This dashboard should be easy to understand, and include:
    - The number of water quality tests conducted the previous month
    - The number of violations reported

  - Whether these results are in or out of compliance
  - Information about other proactive measures such as main and hydrant replacements, or other programs to improve performance of the water utility
  - Benchmarking information so the reader has a greater understanding of how Flint compares with other similar utilities in the region and across the country

- **Public Meetings** –There should be additional, proactive coordination with neighborhood, community and civic groups to provide speakers on timely topics. Given the list of numerous responsibilities, the Public Works director cannot do it alone – the city should identify three or four other staff members, knowledgeable about the water utility who can also speak to various groups, provide information and answer questions. The development of an outreach strategy to target key neighborhood, community and civic groups also will advance the communications effort and the dissemination of information in both the short and long term.
- **Standard tools** – Work crews in the field are often the faces of the utility – the city should create standardized tools for communicating with the public that can be easily and quickly delivered to the community in the event of main breaks, flushing or pre-planned capital improvements. Tools should include:
  - Door hangers for individual distribution
  - Yard signs with simple messaging to be placed near work-sites
  - A simple tri-fold brochure with useful information about the utility and appropriate contact information
  - Specific flyers about a range of topics
  - Infographics about how the water system works, from the intake to the customer's site
- **Change in Billing Format** – The City currently has no real way to reach all customers on a regular basis and provide information. The city should consider changing from a billing postcard to using an envelope and bill stuffer. Monthly or bi-monthly bill inserts are typically used to provide educational material for customers and are standard ways to provide information. Understandably, budget considerations must be taken into account.
- **Use Public Affairs Programming and Opportunities** – The news media has been covering this topic quite extensively – there are other media-related opportunities that may reach a wider audience. Taking advantage of these opportunities will help the city relay information to its customers and the community.
  - Participate in regular editorial-board meetings to provide background information and updates on key milestones or events.
  - Identify a local weekly television program and offer to provide guests to speak about key milestones or upcoming events.

Conclusions and Next Steps

The focus of this report is to help assure TTHM compliance and then improve general water quality. The City had good results in its most recent TTHM tests, although that is to be expected with the changes made to date and the cooler weather which contributes to low TTHM formation. Warm weather will be a different situation both in the nature of the Flint River water quality and in the formation of TTHM. With those changes coming, the City needs to act quickly to make improvements before additional testing takes place this spring and summer. The summary below provides the recommended actions, a priority for their implementation and projected costs either operational or capital. The costs are rough orders of magnitude and will vary with changes in water quality, operational decisions, and engineering choices being made and in some cases require State approval. Although a priority is assigned many of these actions can take place simultaneously.

Priority	Action	Annual Operational Cost	One Time Capital Cost
1	Implement operating programs for process control, lab QA/QC, maintenance, and training. These programs are needed regardless of the TTHM issue and will help with transition to lake water. The City has decided upon a central maintenance software and the water system should be the first to utilize this program since costs are already budgeted. These programs should be initiated immediately.	$ 25,000	$ 250,000 - $ 350,000
2	Contract with your engineer and initiate discussions with the State on the reduction of chlorine prior to the filters and changing the filter media to GAC. This activity has the longest time frame for design and approval, but also is extremely critical to assuring reduced TTHM production. The current filter cleaning and maintenance project needs to be adjusted to take into consideration the change in filter media both to dispose of the anthracite instead of cleaning and to install the GAC. This entire project needs to be done by early July to assure a flow of water throughout the system. Several months are required for the engineering design, State approval, bidding of work and installation of GAC and as such needs to begin now.	$ 0	$1,500,000
	Contract with your engineer and initiate discussions with the State on the addition of 0.5 to 1.2 mg/L of either potassium permanganate (dry) or sodium permanganate (liquid). This will take time to get approved and to implement. The use of liquid tanks at the raw water pump station may be the quickest and least expensive alternative for a temporary measure.	$ 160,000 - $ 320,000	$ 50,000

	Contract with your engineer and initiate discussions with the State on the addition of a corrosion control chemical. This action can be submitted and discussed with the state at the same time as the other chemical and filter changes saving time and effort. A target dosage of 0.5 mg/L phosphate is suggested for improved corrosion control.	$ 50,000	$ 50,000
3	Increase the ferric chloride dosage to 100 mg/L depending on river water TOC levels. (Lower TOC levels can be treated with less ferric chloride.) This change can be made now and is allowed by the State.	$ 1,000,000	$ 0
	Reduce the ozone feed rate to 5 mg/. This change can be done now and does not require State approval.	($50,000 – $100,000	$ 0
	Reduce the lime dosage to minimize hardness levels after softening. This will eliminate magnesium removal during treatment, but will also reduce total hardness. A reduction in carbon dioxide dosing for recarbonation treatment also is expected due to the reduction in lime feed. This change can be made now and does not require State approval.	($270,000)	$ 0
4	Confirm with the engineer when the revised hydraulic model will be completed and if necessary for time to focus on areas of longest water age if that would speed up the effort. Identify impact of reducing tank levels or eliminating a tank seasonally to improve water age. Include with this effort a list of hydrants to flush along with time required to assure drawing fresh water through the system. The engineer has been assigned this task already and confirmation of the timing of a delivery is needed.	$ 0	Already Contracted
	Ask the engineer to identify closed valves on a map that are impacting water age and that can be bid for replacement as soon as weather permits. Have the engineer identify areas of the system where the valve contractor should be focused on finding and fixing closed valves.	$ 0	Already Budgeted
5	Implement the recommendations in the communications program including a person assigned to public works education, using envelopes instead of cards along with bill stuffers for education and provide training for staff. Envelopes and bill stuffers are expensive and might be done periodically and not every month. The cost of TTHM notices, Annual Water Quality Reports and City notices should be figured into if any additional costs would exist. Many of these changes are underway now by the City.	Position Being Budgeted	

Notes

- The costs provided are rough order of magnitude which final engineering will firm up but will fluctuate with final decisions on engineering, operating technique and water quality.
- The change from river to lake water will dramatically cut the chemical costs as less is needed once the change occurs. This means that potassium permanganate will likely not be needed, ferric will drop as much as it went up, ozone levels will be lower and little lime will be needed.

Results Expected

The real question is what changes can be expected from these results in lowering the TTHM, improving the aesthetics and preparing for the change to lake water.

- **TTHM** – The City has already made great strides in reducing the TTHM levels with the changes already made. The additional suggestions by Veolia will further reduce TTHM in the water and help get the city released from the notices being provided to customers.
- **Hardness** – The hardness entering the plant this winter is 360 mg/L with the current system reducing it to 210 mg/L and optimization will reduce to about 180 mg/L. During the summer the levels will be lower probably in the 140 mg/L to 150 mg/L range. The target set by the current best operating practices is 120 mg/L to 150 mg/L.
- **Discolored Water** – The discolored water is caused by the old unlined cast iron pipe. The water from the plant can have an impact on discolored water, but a greater concern is the breaks and construction work that disrupt the flow of water causing discoloration. A polyphosphate is suggested to help bind the old cast iron pipe reducing instances of discolored water. This along with improve flow of water and programmed hydrant flushing will help, BUT WILL NOT eliminate discolored water occurrences.
- **Change to Lake Water –** The recommendations include the suggestion of programs to help the staff better manage the treatment process, additional testing to adjust the plant and additional lab monitoring, a maintenance program focused on keeping equipment properly functioning and more training for staff to improve their skill level. Those actions will prepare the staff for the change of water sources when it comes next year in addition to developing a thorough plan for the switch.

Subject: Water - fixed charges
Attachments: Fixed charge calculation1.docx; EM Statement on Water 3.24.2015.pdf

Harvey,

You had requested additional information on the fixed charges used in Flint's water rates. Hopefully the attached helps. I have also included some additional information showing that that many of the recent increases in rates were done prior to the EM being appointed. And also, a reminder that the system was in a deficit position when the EM came on board, making additional increases necessary.

While the system is now solvent, it is not as strong as it once was. And the real challenge for all of is to figure out how to get rates down to an affordable level. But is cannot be done by simply reducing rates!

I am sure you are aware that the Council voted last night to "do everything in their power" to return to the Detroit system. I am attaching my statement in response.

Call if you have questions.

Jerry

RESIDENTIAL WATER/SEWER RATES - FIXED AND COMMODITY CHARGES

General statistics indicate that the average person uses between 80 and 100 gallons of water per day, or between 2,400 and 3,000 gallons per day. The City's general estimate for the average residential bill is based on consumption of approximately 5,200 gallons per day (7 units * 745 gallons. So the average we use is not out of line if the average number of users in a residence is around 2.

At $149 average costs per month, Flint's charges are very high in comparison to other systems, and an issues which must be addressed. Unfortunately, the Flint system, which has the capacity to serve a population of more than 200,000, now serves a population of approximately 100,000. The system, as currently configured today, needs between $65 million and $70 million in revenues annually to operate. One cannot simply reduce rates without affecting the ability of the system to operate.

Like many systems, Flint charges both a fixed charge and a commodity charge to generate revenues. The concept of the fixed charge is that there is a certain amount of the utility system which must operate regardless of how much of the commodity is used. Operation and maintenance of the system, including building, treatment, and distribution infrastructure, as well as debt service, are examples.

On the other hand, chemicals, utilities, and staffing to a certain extent vary with the amount of the commodity and can thus be linked to usage.

In Flint, the total fixed charge for the water and sewer bill accounts for approximately 40% of the average residential users bill. The amounts determined to be "fixed charges" were established many years ago, and the water rate study done for the City in 2014 made no recommendations for change.

The Flint system, which more than 10 years ago was very stable financially, had declined into a deficit financial position by June 30, 2012. Significant rate increases, many of which were enacted before the State assigned an Emergency Manager in late 2011, were necessary to stabilize the financial position of the system. Other decisions, including the decision to partner with Genesee County in the KWA, and the decision to utilize the Flint River for an interim period, were made with the goal of stabilizing rates and moderating future increases. Safety, quality, and affordability are the key priorities going forward.

Following is the detail of the water and sewer rate components.

WATER/SEWER RATES

Average Residential User

WATER COMMODITY CHARGE PER UNIT	Water Service Charge* 5/8" remote	SEWER COMMODITY CHARGE PER UNIT	Sewer Service Charge	Units for Ave. Bill	WATER COMMODITY	Service Charge* 5/8" remote	SEWER COMMODITY	Sewer Service Charge	Total
$ 7.92	$ 22.90	$ 5.17	$ 34.48	7.00	$55.44	$22.90	$36.19	$34.48	**$149.01**

AVERAGE	Water Charges			Sewer Charges			Water and Sewer		
RESIDENTIAL									
UTILITY	29%	$22.90	Fixed Charge	$34.48	49%		$57.38	39%	Fixed Charge
CHARGE	71%	$55.44	Commodity	$36.19	51%		$91.63	61%	Commodity
	100%	$78.34		$70.67	100%		$149.01	100%	

RECENT RATE INCREASES

Overall cost to residential users for water and sewer have increased significantly since 2003 – almost three-fold. Note, however, that much of the recent increases were made prior to the appointment of an EM…

Increases Enacted by EM		Increases Enacted Prior to EM		
EM		PRE-EM

Change in the Financial Position of the Water and Sewer System

The financial position of the water and sewer system in 2003 was strong. However, by 2011 the financial position had declined to the point where the system was in deficit. In spite of increases made prior to the appointment of an Emergency Manager, the utility system was still in a deficit position in 2012. While the financial position of the system is now positive, it is still less strong than in 2003:

Emergency Manager Statement on Water: Spending Extra $12 Million on Detroit Water "Incomprehensible" When Flint Water Just as Safe

Flint, Michigan – March 24, 2015 – At the City Council meeting held on Monday, March 23, 2015, Flint City Council made a motion to "do all things necessary" to return to using water purchased from Detroit and discontinue use of the Flint River as a water source. The following statement from Emergency Manager Gerald Ambrose addresses that point:

"Flint water today is safe by all EPA and MDEQ standards and the City is working daily to improve its quality. Users also pay some of the highest rates in the state because of the decreased numbers of users and the age of the system.

"It is incomprehensible to me that 7 members of the Flint City Council would want to send more than $12 million a year to the system serving southeast Michigan, even if Flint rate payers could afford it. Water from Detroit is no safer than water from Flint.

"If $12 million annually were available for discretionary use, it would be far better spent reducing rates paid by Flint customers and/or modernizing the City's system."

-Gerald Ambrose,
Flint Emergency Manager

Subject: Corrected memo - fixed charge memo
Attachments: Fixed charge calculation1.docx

Sorry, some parts should have said "per month", not "per day."

RESIDENTIAL WATER/SEWER RATES - FIXED AND COMMODITY CHARGES

General statistics indicate that the average person uses between 80 and 100 gallons of water per day, or between 2,400 and 3,000 gallons per month. The City's general estimate for the average residential bill is based on consumption of approximately 5,200 gallons per month (7 units * 745 gallons. So the average we use is not out of line if the average number of users in a residence is around 2.

At $149 average costs per month, Flint's charges are very high in comparison to other systems, and an issue which must be addressed. Unfortunately, the Flint system, which has the capacity to serve a population of more than 200,000, now serves a population of approximately 100,000. The system, as currently configured today, needs between $65 million and $70 million in revenues annually to operate. One cannot simply reduce rates without affecting the ability of the system to operate.

Like many systems, Flint charges both a fixed charge and a commodity charge to generate revenues. The concept of the fixed charge is that there is a certain amount of the utility system which must operate regardless of how much of the commodity is used. Operation and maintenance of the system, including building, treatment, and distribution infrastructure, as well as debt service, are examples.

On the other hand, chemicals, utilities, and staffing to a certain extent vary with the amount of the commodity and can thus be linked to usage.

In Flint, the total fixed charge for the water and sewer bill accounts for approximately 40% of the average residential users bill. The amounts determined to be "fixed charges" were established many years ago, and the water rate study done for the City in 2014 made no recommendations for change.

The Flint system, which more than 10 years ago was very stable financially, had declined into a deficit financial position by June 30, 2012. Significant rate increases, many of which were enacted before the State assigned an Emergency Manager in late 2011, were necessary to stabilize the financial position of the system. Other decisions, including the decision to partner with Genesee County in the KWA, and the decision to utilize the Flint River for an interim period, were made with the goal of stabilizing rates and moderating future increases. Safety, quality, and affordability are the key priorities going forward.

Following is the detail of the water and sewer rate components.

WATER/SEWER RATES

Average Residential User

WATER COMMODITY CHARGE PER UNIT	Water Service Charge* 5/8" remote	SEWER COMMODITY CHARGE PER UNIT	Sewer Service Charge	Units for Ave. Bill	WATER COMMODITY	Service Charge* 5/8" remote	SEWER COMMODITY	Sewer Service Charge	Total
$ 7.92	$ 22.90	$ 5.17	$ 34.48	7.00	$55.44	$22.90	$36.19	$34.48	**$149.01**

AVERAGE RESIDENTIAL	Water Charges			Sewer Charges			Water and Sewer		
UTILITY	29%	$22.90	Fixed Charge	$34.48	49%		$57.38	39%	Fixed Charge

Water Quality Update

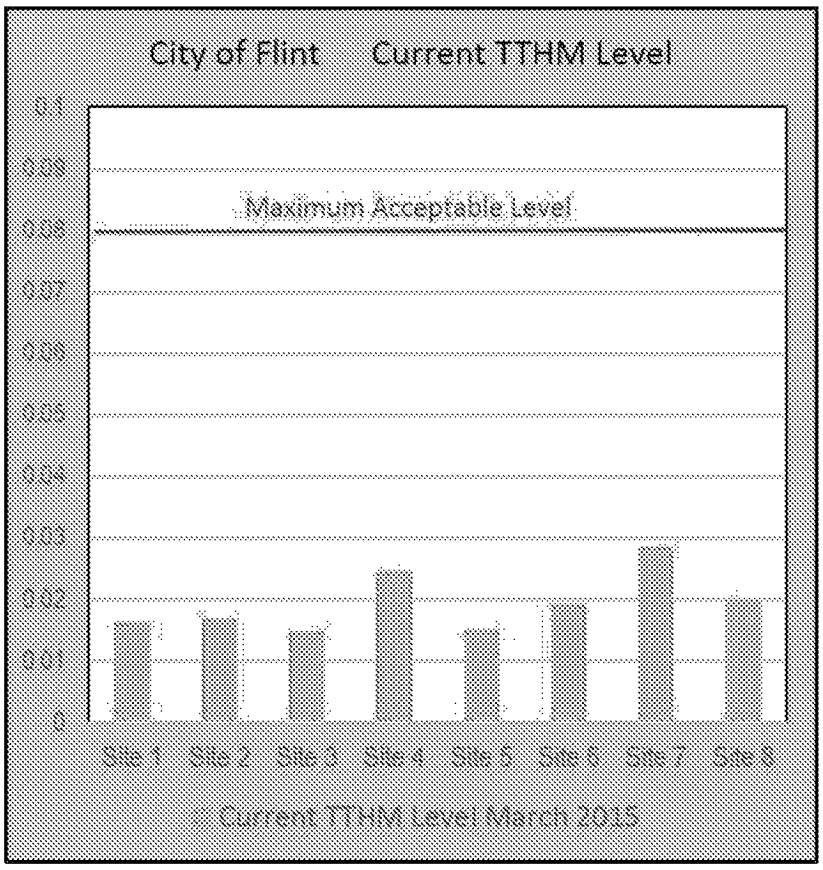
City of Flint Resident:

We are pleased to report that City of Flint water is safe and meets U.S. Environmental Protection Agency guidelines. While we continue to work on improving aesthetic qualities, such as discoloration or odor, you can be confident that the water provided to you today meets all safety standards. Maintaining safety and quality in our water is a top priority of the City.

We accomplished this by:

- Upgrading the ozone treatment process at the Water Treatment Plant
- Increasing water main/hydrant flushing to reduce stagnation
- Conducting additional testing of treatment to identify areas of improvement
- Improving water circulation by repairing valves and adjusting reservoir levels

Our most recent testing in February showed that every testing site was well below allowable levels, as shown below:

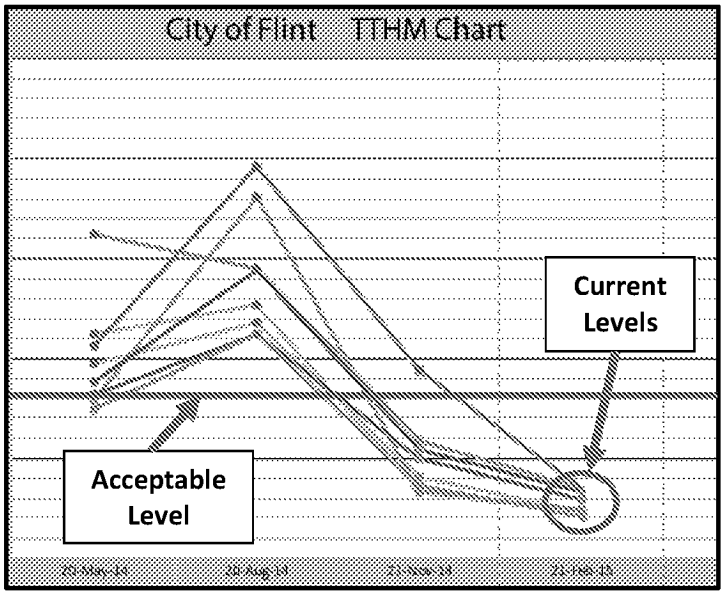


Water Quality Update

The Michigan Department of Environmental Quality (MDEQ) has acknowledged our progress:

"We are encouraged by the results from the most recent round of compliance samples collected on February 17, 2015, which now show individual TTHM levels at less than half of the 0.080 mg/L standard at all locations throughout the City's system. Operational Evaluation Reports from December 2014, and February 2015, have identified possible causes and corrective measures for the previous elevated TTHM levels, which we encourage the City to continue implementing." -MDEQ

Notification is based on four quarters of test results. Because of last year's test results, the City's *annual* quarterly testing average is not yet below the state's allowable average and the City is required to issue the attached notice ***("Important Information about Your Drinking Water")***.



If you have any questions about this report or would like a test done at your home, free of charge, please call us at 810-787-6537.

Maintaining safe water and improving its quality is a top priority for all of us at the City of Flint, and we apologize for the concerns these notices have raised. We have taken many steps to improve the safety and quality of our water supply and will be taking more. As you may know, we have recently received a series of recommendations from several sources, including a report from international urban water system consultant, Veolia North America. We will be taking further action steps to assure that water remains safe and that water quality is improved, and we will be working with our recently created Citizen Advisory Committee and our Technical Advisory Committee as we progress. Please track our progress on our website **cityofflint.com**.

City of Flint

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

City of Flint Did Not Meet Treatment Requirements

Our water system recently violated a drinking water standard. Although this incident was not an emergency, as our customers, you have a right to know what happened and what we are doing to correct this situation.

We routinely monitor for the presence of drinking water contaminants. Samples were collected for total trihalomethanes (TTHM) analysis from eight locations on a quarterly basis (May 21, August 21, November 20 of 2014, and February 17, 2015). The average of the results at ANY of the eight locations must not exceed the maximum contaminant level (MCL) for TTHMs, otherwise our water system exceeds the MCL. The standard for TTHMs is 80 micro grams per liter (µg/L). The location reporting the highest TTHM level was 105 ug/L; thus, our water system exceeds the TTHM MCL.

What should I do?

- There is nothing you need to do unless you have a severely compromised immune system, have an infant, or are elderly. These people may be at increased risk and should seek advice about drinking water from their health care providers.
- You do not need to boil your water or take other corrective actions. If a situation arises where the water is no longer safe to drink, you will be notified within 24 hours.

What does this mean?

This is not an emergency. If it had been an emergency, you would have been notified within 24 hours.

People who drink water containing trihalomethanes in excess of the MCL over many years may experience problems with their liver, kidneys, or central nervous system, and may have an increased risk of getting cancer.

What is being done?

We are currently working on solutions to correct the problem. We anticipate resolving the problem in 2015. Our most recent individual sample results were all less than half the 80 µg/L standard, however since compliance is calculated using a locational running annual average (LRAA) of the most recent four quarters, we are still out of compliance with the MCL at two of eight locations.

For more information, please contact Mr. Brent Wright at 517-787-6537, or the Flint Water Plant at 4500 North Dort Highway, Flint, Michigan 48505.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

This notice is being sent to you by the City of Flint.

CERTIFICATION: F2 S3 WSSN: 02310

I certify that this water supply has fully complied with the public notification requirements in the Michigan Safe Drinking Water Act, 1976 PA 399, as amended, and the administrative rules.

Signature	Plant Supervisor	March 25, 2015
	Title	Date Distributed

Reminder to water supplier: This notice/certification must be sent to the Department of Environmental Quality.

GOVERNOR

ANDY DILLON
STATE TREASURER

SUMMARY REPORT

TO: Brom Stibitz, Senior Policy Advisor; Department of Treasury

FROM: Eric Cline. Unit Operations Specialist

SUBJECT: Flint Water System Summary

DATE: April 18, 2013

Summary

In November 2012 the Department of Treasury commissioned the firm of Tucker, Young, Jackson & Tull, Inc. (TYJT) to analyze options for the City of Flint to either remain a customer of the Detroit Water & Sewer Department (DWSD) or to join the Karegnondi Water Authority (KWA) in Genesee County. The purpose of this study was to provide objective analyses to the State Treasurer and Flint's Emergency Financial Manager (EFM) in order to secure future potable drinking water for the City.

In December 2012, staff from TYJT met with representatives from the Department of Treasury and the City of Flint to provide a preliminary report on their findings. At this meeting, five options were presented: These options ranged from the Flint Water Plant providing 100% water, to 100% provision of untreated Lake Huron Water by KWA, to 100% provision of treated drinking water by DWSD, or provision of variable amounts of water from DWSD using a combination of blended DWSD water and Flint River water.

From the presentation of the preliminary report in December 2012 to the submission of the final report by TYJT in January 2013, a number of developments made arriving at a final decision very difficult.

- DWSD provided the City of Flint with at least two modified proposals to consider.
- A debate ensued between TYJT and KWA's principal engineering firm regarding the others' conclusions and estimates for construction of the KWA pipeline.
- The Flint EFM eliminated all options except the 100% DWSD option or joining KWA.

In January 2013, the OFR provided a comprehensive report to the State Treasurer analyzing three questions: 1) The projected construction costs and why Treasury believed the projections provided by Flint/KWA were acceptable; 2) Identification of the construction contingencies; and 3) Identification of the options Flint will utilize in the event of a construction cost overrun or a delay in construction. At the end of this report, the OFR recommended to the State Treasurer that KWA presented the best future option for future potable water. The OFR also concluded that KWA appeared to be the cheaper option; the quality of water would improve; Genesee County appeared willing to assist the City in securing the financing for their portion of the project; the KWA project could signify the beginning of better collaboration between the City of Flint and Genesee County; and the KWA project had both political and popular support.

Between January and April, intense scrutiny of the various proposals was undertaken by Treasury and Flint officials. Treasury officials met with officials from Genesee County to gain a better understanding of the KWA project. In February 2013, Genesee County opened bids for construction of the Lake Huron intakes. This bid

opening represented the first meaningful step toward commencing construction of the KWA system. The bid was $3-million less than projected.

In March 2013, Treasury was notified that DWSD had contacted Flint to negotiate with the City to retain them as a customer. On April 12, 2013, the State Treasurer authorized the Flint EFM to join KWA, pending review of any final offer from DWSD. A final offer was received from DWSD on April 15, 2013.

DWSD's final offer provided two options. The first option was for a "supply only" rate schedule. Only water treatment costs would be recovered and DWDS would absorb all other delivery costs. Capital and operating revenue charges would be calculated based upon KWA's usage relative to the entire demand upon DWSD's Lake Huron WTP. KWA would also have the ability to construct and own its own transmission lines.

The second option was a "full service" rate option. DWSD would provide all production and transmission services. Transmission rates would be calculated only on those costs necessary to supply KWA and no additional transmission rates would be charged. Capital and operating revenue charges would be calculated based upon KWA's usage relative to the entire demand upon the Lake Huron WTP.

Independent analyses of DWSD's final offer by the OFR, the Flint EFM, and the Department of Environmental Quality (DEQ) generally reached the same conclusions:

- DWSD's offer was a framework subject to negotiations and was not a firm offer.
- The offer provided by DWSD was incomplete.
- DWSD's offer did not include a guaranteed rate beyond year one, nor did it limit maximum annual rate increases.
- The DWSD scenarios were based on 40 MGD of service capacity. However, the KWA project provides 60 MGD of initial capacity with potential expansion to 75 MGD.
- DWSD indicates that Flint/ Genesee County would be given "broadened representation," it is unclear exactly what this means in terms of actual control in the decision making processes.
- The DWSD offer relies on a single transmission system and would require the City of Flint to maintain its WTP for emergency purposes. In addition, it would leave Genesee County without an adequate backup supply to meet their needs.
- DWSD's offer included an attachment that listed the rank-ordered options (from cheapest to most expensive). DWSD Scenario 2 is listed as the least expensive option (but it is unclear how the total cost of this option was arrived at). DWSD Scenario 1 was not listed.
- DWSD provided a summary table of their unit costs but how these figures are arrived at was not clear, so analysis proved difficult.

Without specific details from DWSD on this proposal, a true comparative analysis is difficult to provide. As such the Flint EFM rejected the DWSD proposal and agreed to join KWA.

If further information on this issue is needed, please let me know.

II. Flint Water

In November 2012 the Department of Treasury commissioned the firm of Tucker, Young, Jackson & Tull, Inc. (TYJT) to analyze options for the City of Flint to either remain a customer of the Detroit Water & Sewer Department (DWSD) or to join the Karegnondi Water Authority (KWA) in Genesee County. The purpose of this study was to provide objective analyses to the State Treasurer and Flint's Emergency Financial Manager (EFM) in order to secure future potable drinking water for the City.

In December 2012, staff from TYJT met with representatives from the Department of Treasury and the City of Flint to provide a preliminary report on their findings. At this meeting, options presented were: 1) Flint Water Plant will provide 100% water, 2) 100% provision of untreated Lake Huron Water by KWA, 3) 100% provision of treated drinking water by DWSD, or 4) provision of variable amounts of water from DWSD using a combination of blended DWSD water and Flint River water.

The Flint EFM eliminated all options except the 100% DWSD option or joining KWA, deciding later to join KWA.

On April 25, Flint officially ended nearly 50-years of using DWSD to supply water.

The city currently uses the Flint River until the Karegnondi Water Authority pipeline is built, which will bring untreated Lake Huron water to Genesee County. KWA should be operational by winter 2016.

The Flint River water is harder than DWSD. A number of residents are experiencing discoloration and order with the water. In addition there have been a number of citations largely around heightened levels of Total Trihalomethanes (TTHM).

Given water quality concerns, suggestions have been made that the City of Flint should return to using water purchased through the Detroit Water and Sewerage Department (DWSD). For many reasons, financial and otherwise, the City of Flint can ill-afford to switch courses at this point. The estimated cost to go back to the water provided by the DWSD is approximately $1 million per month and the City expects to be using the Karegnondi Water Authority (KWA) Lake Huron water within or before the 1st quarter of 2016.

The City of Flint is proceeding with a series of actions to ensure the continued safety of Flint drinking water is maintained and that issues of discoloration and odor continue to be addressed. Most notably, the installation of a Granulated Active Charcoal filter (GAC) at the Water Treatment Plant is expected to be authorized this week by Emergency Manager Jerry Ambrose.

The introduction of the GAC to the treatment process at Flint's plant will absorb or reduce the chemical precursors which will block or eliminate the formation of TTHM during the filtration process. Engineering and design are underway and installation of the GAC is targeted for completion by mid-July. Cost of this improvement is projected at $1.5 million and will be paid for by the proceeds from the state approved restructuring of the City's Drinking Water Revolving Fund loans.

In addition to the installation of the GAC, the City of Flint is undertaking a number of other improvements to the water system in the coming months, including a water leak detection monitoring, completion of the hydraulic model and subsequent targeted hydrant flushing program, and the replacement of two miles of water main pipe in a critical area of the city. All of these improvements scheduled to occur within the next six months.

Mark,
Per our last conversation, I expressed that we were interested acquiring and distributing 1500 water filters to Flint residents to assist with the quality (perceived or real) of their drinking water until the KWA pipeline comes online.

A few weeks ago, you asked me to send you the product ID number so you could check with your suppliers regarding price. I apologize for taking long to send you product ID; a number of conversations needed to occur in Flint before we could proceed.

The product ID for a Brita Filter for kitchen faucets is:
Product ID 3176421
UPC 7-23987-0078

Thank you for taking the time to look into this.

Best,
Harvey Hollins III, Director
Governor's Office of Urban Initiatives

Harvey -

We are all set. Stacie Behler can serve as liaison on this one. The merchant team can source 1,500 filters. We will get them to the community at cost. My guess is this will be $20k or so, but the team will give you a final number.

Because we don't want to be a state vendor, we won't sell them to you. Stacie will work out logistics of whether we make a donation of gift cards to the state that you use to purchase them, or whether there is some other entity to which we can give them.

Given all the circumstances, we are not interested in any publicity. We want it to be clear that the state is providing these, not Meijer.

Thanks for reaching out.

Mark

Subject: Flint water article

I always enjoy reading my daily Citylab email. Today was a little different, as the article on Flint water below presents the situation there in a quite negative light.

Thought the team would be interested....

Mark,
Thank you. We will work with Stacie to identify the appropriate entity to receive the filters for Flint residents. In addition, we'll keep you out the public eye on this.

Please know, however, how much we appreciate Meijer and most importantly you for doing this.

Best,
Harvey

Mark,

Per our last conversation, I expressed that we were interested acquiring and distributing 1500 water filters to Flint residents to assist with the quality (perceived or real) of their drinking water until the KWA pipeline comes online.

A few weeks ago, you asked me to send you the product ID number so you could check with your suppliers regarding price. I apologize for taking long to send you product ID; a number of conversations needed to occur in Flint before we could proceed.

The product ID for a Brita Filter for kitchen faucets is:

Product ID 3176421

UPC 7-23987-0078

Thank you for taking the time to look into this.

Best,

Harvey Hollins III, Director

Governor's Office of Urban Initiatives

313.456.4994<tel:313.456.4994> (office)

Thank you, Stacie for the quick response. Harvey does have an additional question. Is the plan for the state to purchase the filters or is the Meijer Foundation donating them? The former is fine and the latter is great. If we purchase them we have to determine the process. If they are donated, I will identify the location in Flint where they will be shipped.

Bob,

I hope all is well for you and I look forward to seeing you this fall at our vendor summit.

Meijer needs some help supporting the Flint Michigan community and was hoping Clorox can jump in.

They are having some issues with water quality and are looking for a donation of 1500 water filters for drinking water.

Would Clorox consider donating as a silent partner with Meijer?

Please let me know as we want to support the community.

Best Regards,

Jamie

Good Morning All,

Thank you, again.

Is it possible to delay the shipment of the filters until next Tuesday, August 4?

I was just informed they are creating a distribution plan in Flint so the filters can be given to the community when received. This will alleviate the church having to store the filters.

I apologize for not communicating this sooner. Please let me know if the delay is possible.

Bob,

I hope all is well for you and I look forward to seeing you this fall at our vendor summit.

Meijer needs some help supporting the Flint Michigan community and was hoping Clorox can jump in.

They are having some issues with water quality and are looking for a donation of 1500 water filters for drinking water.

Would Clorox consider donating as a silent partner with Meijer?

Please let me know as we want to support the community.

Best Regards,

Jamie

Subject: Flint Water Filter Distribution Plan

Rev. Overton,

This email is a follow up to our conversation regarding the distribution plan for the donated water filters. I'm typing this since you were driving and had to tell me verbally. Please let me know if I missed anything.

1500 filters are being donated

- ✓ 500 will be distributed at Mt. Carmel church on the North End
- ✓ 500 will be distributed at Woodside Church on the East End
- ✓ 500 will be distributed on the South End (you are awaiting confirmation on the location)

Communication about distribution of the water filters

- ✓ Faith-based Newspaper
- ✓ Radio
- ✓ Talk Shows
- ✓ Ch. 12 News

Qualifications to receive a filter

- ✓ Must be a Flint resident (verified by driver's license)
- ✓ Distributions at all sites will be monitored to ensure there is only per household

Potential Issues

- ✓ Concerned Pastors group would like filters to go only to low income families
- ✓ Coalition for Clean Water believes anyone should be able to get the filters since everyone drinks the same water no matter income
- ✓ The Coalition believes 1500 is not nearly an adequate number to address the problem
- ✓ The Pastors want to work with what they have right now and address getting more later
- ✓ Pastor Overton wants to ensure this disagreement on the number does not become the focal point of Tuesday's meeting
- ✓ Contamination levels still need to be addressed

Subject: RE: '20150804_Meeting with Flint's Clean Water Coalition'

I didn't think that meeting was as useful as others. If people won't accept the factual information, I'm not sure there is much we can do about it. They're getting their own filters, we've installed six at the main and I thought there were six more coming. As for the flushing, that's part of any city's water system, and people in every community pay for it. As to the frequency, there must be a plan to reduce the number of times.

Questions:
Why does KWA only produce 18 million gals? Doesn't make sense to have a system that doesn't produce enough water. Where do they expect to get the other from? Especially since GM doesn't want the Flint river water (even though presumably GM has been both the biggest commercial user and disposer), how do they separate out the flow?

We can't do too many more of these. The three activists in the room just want to be right, they don't want answers. No matter what we say they'll always want something else to be the answer. The Pastors and the woman form yesterday who usually sits across from me and who always lectures us (that's just a reminder of some of the old time negative racial experiences she's had and I get it) are really a strong group of people. Usually there is a black woman who comes with them, but I missed her yesterday. I really her and of course, Overton and Hill are pretty impressive people in their own right.

I am sending this email to renew my request for assistance from the Governor's Office.

As we engage these challenges, Flint must revisit the present water revolving loan plans to determine how these current funding obligations will affect water delivery and asset development for the future. It is clear that no significant improvements can be obtained without some supportive concessions. Therefore, I am requesting on behalf of the 34th district (Flint) for you to consider an Executive decision to forgive (in-total or part) Flint's water fund loan balances of $20,770,336.00 so that we may effectively apply those funds to rebuilding the City's infrastructure, to competitively obtaining highly qualified personnel and provide a more cost effective water delivery system. Hence, I know there has been many request made of your office to resolve this very serious issue but this approach will best safeguard the health and welfare of the residents of Flint as well as minimize the potential for litigation against the City of Flint and/or the State of Michigan.

Please see a previous request letter for assistance attached to this communication.

Thank you

MICHIGAN HOUSE OF REPRESENTATIVES

SHELDON A. NEELEY

STATE REPRESENTATIVE

January 29, 2015

Honorable Rick Snyder, Governor
State of Michigan

Dear Gov. Snyder,

With the dawn of a new beginning in our state, the city of Flint stands on the precipice of civil unrest. This letter comes as an appeal to your office concerning this proud Michigan community and recent discussions pertaining to Flint's water distribution and management strategies for both present and future operations. Flint has had a long history concerning the implementation of water practices and financial management of its water assets. Our present journey has caused us to take a closer look at our 80-year-old infrastructure and examine a difficult position where we must correct some past and even present challenges, one of which is affecting the people of my community to the point of a fervor over something as simple as drinking clean water.

As we engage these challenges, Flint must revisit the present water revolving loan plans to determine how these current funding obligations will affect water delivery and asset development for the future. It is clear that no significant improvements can be obtained without some supportive concessions. Therefore, I am requesting on behalf of the 34th District, which contains a portion of the city of Flint, for you to consider an executive decision to forgive (in-total or part) Flint's water fund loan balances of $20,770,336 so that we may effectively apply those funds to rebuilding the city's infrastructure, to competitively obtain highly qualified personnel and provide a more cost effective water delivery system. I understand there has been many requests made of your office to resolve this very serious issue, but this approach will best safeguard the health and welfare of the residents of Flint as well as minimize the potential for litigation against the city of Flint and/or the state of Michigan.

With a cost-effective water delivery system, we will be able to improve our system in the following ways: upgrade wastewater treatment processes, improve safe drinking water upgrades, and maintain and sustain a water system that provides a better quality of water product to the citizens of Flint.

Recycled Paper

It is imperative that this issue be addressed in some way on the state level. Residents of Flint are already finding themselves forced to take drastic measures simply to have clean drinking water.

Community health could be on the decline as citizens become afraid to even shower or bathe in their homes. The people of Flint bring bottles of brown water full of sediment and other foreign substances to community meetings, asking only to be treated as human beings. That is all I am asking of you - to see the suffering and anger from the people in one of Michigan's municipalities and understand that there is a need to react and respond to this crisis.

With the beginning of a new year to work toward a better Michigan, my office is ready to have discussions on this request and other planning that works to improve OUR Michigan. I sincerely thank you in advance for your consideration on this matter.

For the Love of the Community,

Sheldon A. Neeley, State Representative
34th District

Subject: Flint water

Harvey,

It was nice running into you last week on the Metro in DC. I hope the CBC conference was productive. I'm glad we had the opportunity to discuss the challenges with Flint's water system. As you're probably aware, the situation has really deteriorated over the past couple weeks, even since we spoke. It's becoming more and more clear that there's a real lead problem in the City, even though the official City/MDEQ tests aren't yet showing lead levels that exceed the EPA standard. For example, researchers at Hurley Hospital are seeing dangerous lead levels in children they treat (http://www.mlive.com/news/flint/index.ssf/2015/09/study_shows_twice_as_many_flin.html#incart_river).

The City is planning to issue a health advisory, and the US Department of Agriculture will probably start providing pre-mixed formula to parents in the WIC program. There's also big push to buy filters using private donations. Those are both important short-term responses to mitigate the hazard for the most vulnerable.

But there's still the question of how to "fix" the problem. I have some thoughts I'd like to run by you, but it might be best to discuss by phone. Could you spare 15 minutes, sometime tomorrow (Friday)?

Thanks,
Paul

Subject: Proposed Press Conference on Flint Drinking Water

Per the ongoing issues in Flint concerning their drinking water, I would offer the following recommendations. Let's discuss.

Recommendation

Press Conference in Flint – Wednesday, Thursday or Friday.

Participants

Mayor of Flint

Dan Wyant – Michigan Department of Environmental Quality
Nick Lyon – Department of Community Health
Susan Hedman – Region 5 Administrator or EPA
Harvey Hollins – Governor's office
Local Public Health Department

Announcement

Federal – State – Local action plan to address Flint Drinking Water

1. Governor Snyder names Dr. Dean Sienko as Flint drinking water Public Health Advisor.

2. All Flint schools water will immediately be tested to ensure that drinking water is safe.

3. Advisories will be disseminated recommending citizens flush your cold water pipes, use only water from the cold water tap for drinking, cooking and especially for making baby formula.

4. Implementation of fully optimized corrosion controls in the Flint drinking water system.

5. Expanded water testing of at risk properties.

6. Offer water testing at no cost to Flint residents to assure water is safe.

7. Convene a safe drinking water " Technical Review Advisory" to ensure best technology, practices and science is being utilized, including EPA's expertise and assistance from their Office of Research and Development.

8. Offer bottled water and premixed formula if test results indicate high levels of lead.

9. Accelerate water system improvements to address replacement of lead service lines.

Natasha,

I am following up on yesterday's phone call with you.

Angela will contact you to set up a conference call for tomorrow afternoon. Because Wayne is out of town Tom Saxton will participate in the discussion regarding your request. Tom and I would request you, Peter Bade and Howard Croft be on the call.

We have a number of follow-up questions: What is the basis for the estimated $18M cost to temporarily reconnect to the Great Lakes Water Authority? What is the timeline? Why didn't Viola advise the City about the potential for elevated lead levels when using Flint river water? What assurances do you have indicating a temporary reconnection to the Water Authority resolves the elevated lead problem or other system problems? Who are the assurances from? Did the Viola report recommend using Ortho Phosphates to treat the water?

Subject: Flint City Council KWA Vote

Still waiting on hearing back from the city to get the original resolution but here are the mlive pieces that covered it from March until July. The meeting when the vote was held was March 25, 2013

March 25th 2013 **Flint council supports buying water from Lake Huron through KWA**
http://www.mlive.com/news/flint/index.ssf/2013/03/flint_city_council_again_delay.html
The Flint City Council voted 7-1 to get 16 million gallons per day from the Karegnondi Water Authority.

7th Ward councilperson Dale Weighill was absent
3rd Ward councilperson Bryant Nolden opposed
The rest were in favor.

March 25th, 2013 **Flint City Council approves resolution to buy water from Karegnondi, state approval still needed**
http://www.mlive.com/news/flint/index.ssf/2013/03/flint_city_council_approves_re.html
Under the proposal, Flint would get 16 million gallons per day of raw water from Lake Huron, pipe it to Flint for treatment and then sell it to customers throughout the City. Another 2 million gallons per day would come from the Flint River and will be treated in Flint. DEQ told the city it needed to get 18 million gallons per day or there would have to be additional work done at Flint's water plant. Flint's water plant and the Flint River is currently the backup for Flint and Genesee County, however, the plant only operates four times per year.

April 12th **State gives Flint OK to join Karegnondi Water Authority project, but Detroit gets to make final offer**

http://www.mlive.com/news/flint/index.ssf/2013/04/state_gives_flint_ok_t.html

The city of Flint has the state's blessing to join in construction of the planned Karegnondi Water Authoritypipeline project once it reviews a final offer from the city of Detroit on Monday, April 15.

April 19th **Governor steps into water war; set to meet with Genesee, Flint, Detroit today**

http://www.mlive.com/news/flint/index.ssf/2013/04/governor_steps_into_water_war.html#incart_river_default

The meeting comes in the same week that the Flint and Genesee County rejected a final offer to continue buying water from Detroit and two days after Detroit gave Flint a notice of termination of its 1965 water contract.

April 19th **Detroit gives notice: It's terminating water contract covering Flint, Genesee County in one year**

http://www.mlive.com/news/flint/index.ssf/2013/04/detroit_gives_notice_its_termi.html

The city of Detroit has given notice that it's terminating a nearly 50-year-old contract for selling water to Flint and the county next year.

July 23rd **Flint River now an option for drinking water following Detroit's termination of contract**

http://www.mlive.com/news/flint/index.ssf/2013/07/city_readying_water_plant_to_t.html

The Flint River was not a viable option to provide drinking water to city residents when the water relationship between Flint and Detroit was stable. But river water might be used temporarily as the city's water supply now that Flint signed an agreement with the Karegnondi Water Authority and will get up to 18 million gallons per day of raw water in 2016 from Lake Huron. The Flint River hadn't been an option, city officials previously said, because upgrades to Flint's water plant would be too expensive, the river didn't provide enough capacity to serve Flint residents' water needs and the Michigan Department of Environmental Quality would not allow it.

Subject: Flint task force notifications

Hello Harvey,

Sara asked that I send this to you for notifications. Would you be able to reach out to the Mott Foundation, pastors group and Mayor Walling's Office? The plan is to issue between 2 and 2:30, with potential notifications around 2 p.m.

Thank you very much!

Dave

Gov. Rick Snyder announces Flint Water Task Force to review state, federal and municipal actions, offer recommendations

Experts in public health, water management, environmental protection to focus on steps to protect residents

LANSING, Mich. – Gov. Rick Snyder today announced the creation of an independent advisory task force charged with reviewing actions regarding water use and testing in Flint and offer recommendations for future guidelines to protect the health and safety of all state residents.

Task force members include experts in public health and medicine, water management, and environmental protection from both sides of the aisle, and will be co-chaired by Ken Sikkema of Public Sector Consultants and Chris Kolb, of the Michigan Environmental Council. Also serving will be Dr. Matthew Davis of the University of Michigan Health System, Eric Rothstein, of the Galardi Rothstein Group and Dr. Lawrence Reynolds of Mott Children's Health Center in Flint.

"Transitioning back to the Detroit Water and Sewerage Department-Great Lakes Water Authority is a good first step to protecting public health in Flint, but it's not the last step," Snyder said. "Bringing in outside experts to evaluate our actions and help monitor and advise on potential changes to law, procedures and practices will be key to continuing work on the comprehensive action plan and ensuring safe drinking water for all the residents in Flint and all of Michigan."

Snyder said the administration will fully cooperate with task force members, saying he wants an unbiased report focusing on steps taken in the past and recommendations that could improve practices to ensure all residents have access to safe, clean water.

Ken Sikkema is a senior policy fellow at Public Sector Consultants, where he specializes in public finance, environment, and energy policy. Prior to joining the firm, Sikkema served in both the Michigan House and Senate, culminating with four years as Senate majority leader. He has also served as both an adjunct and visiting professor at Grand Valley State University.

Chris Kolb is president of the Michigan Environmental Council, a statewide coalition of 70 environmental, public health and faith-based nonprofit groups. Before joining the MEC, Kolb represented Ann Arbor in the state House for six years and served six years on the Ann Arbor City Council. He has been president of the MEC for six years.

Matthew Davis, M.D., M.A.P.P., is professor of pediatrics and internal medicine at the University of Michigan Health System and professor of public policy at the Gerald R. Ford School at the University of Michigan, having joined the faculty in 2000. Davis also is a professor of health management and policy at the School of Public Health. He previously served as the chief medical executive of the Michigan Department of Community Health/Department of Health and Human Services.

Eric Rothstein is a national water issues consultant and principal at the Galardi Rothstein Group. He served as an independent advisor on the creation of the Great Lakes Water Authority. Rothstein also has served as Jefferson County, Alabama's rate consultant and municipal adviser for litigation related to the county's bankruptcy and issuance of $1.7 billion in sewer warrants and led strategic financial planning for the City of Atlanta's Department of Watershed Management. He has more than 30 years of experience in water, wastewater and stormwater utility finance and rate-making assessments.

Lawrence Reynolds, M.D., is a pediatrician in Flint who serves as president of the Mott Children's Health Center. He received his medical degree from Howard University College of Medicine and has been in practice for 36 years. He has served as president of the Genesee County Medical Society and the Michigan Chapter of the American Academy of Pediatrics. He has been honored for his humanitarian and advocacy efforts on behalf of children from the Community Foundation of Greater Flint.

Snyder has said reconnecting with the authority is a critical step to resolving water quality issues and addressing related health concerns. It will not immediately resolve the city's problem with lead service lines or aging infrastructure. It will take time for pipes in Flint to become coated with the phosphate corrosion control.

To best protect public health, state and local authorities will continue to carry out steps outlined on Oct. 2 in a comprehensive action plan, including continued testing, the use of faucet filters and providing residents with accurate information about steps to eliminate lead exposure. The Michigan Departments of Environmental Quality and Health and Human Services are continuing to provide free water filters, free lead testing through the state laboratory for Flint water customers, and hiring additional staff to conduct health exposure monitoring for lead in drinking water.

Re: Letter of Support for Financially Distressed Cities, Villages, and Townships Grant

County: Genesee Local Unit Code: 252040

To whom it may Concern:

Please accept this letter as the City of Flint's commitment to the Michigan Department of Treasury's Financially Distressed Cities, Villages, and Townships Grant Program for the Dupont Street Water Main Replacement Project

The replacement of 1.6 miles of water main along Dupont Street is an essential step in addressing the City's water quality challenges. The City's water system is severely antiquated, which is contributing to the current public health emergency, excessive water main breaks, and inefficient distribution of water to residents and businesses. The replacement of this water main will move the City closer to providing efficient, clean, and safe water to the public.

Even though the City has progressed to strategically reduce deficits by seeking new millages, reducing staff, and reducing services, the City still faces critical financial obstacles. The City does not have the financial resources to undertake and pay for a project of this nature. Further, any expenditure by the City for goods or services in excess of $75,000 must be approved by a Receivership Transition Advisory Board. The FDCVT Grant is essential for the successful implementation of this project, which will improve the safety, reliability, and sustainability of the City's water system.

Respectfully,

Natasha L. Henderson 10/15/2015

Natasha L. Henderson, City Administrator Date

City of Flint, Michigan

Application Due Date:
October 15, 2015

Financially Distressed Cities, Villages, and Townships Application (FY 2016)

Issued under authority of 2015 Public Act 84.

PART 1: APPLICANT INFORMATION

1. Applicant Name	2. Applicant Local Unit Code
City of Flint	252040
3. Applicant FEIN	**4. Applicant County**
38-6004611	Genesee

5. Mailing Address	6. City	7. State	8. ZIP Code
1101 South Saginaw	Flint	MI	48502

PART 2: PROPOSAL OVERVIEW

9. Proposal Title
Dupont Street Water Line Replacement Project

10. Estimated Start Date	11. Estimated Completion Date
06/01/2016	08/30/2016
12. Estimated Total Proposal Cost	**13. Grant Amount Requested**
$ 3,985,267.00	$ 2,000,000.00

14. Additional Local Units, if Participating in a Shared Service Project (include county and local unit code). Attach letters of support from each of the participating local units.

NA

RECEIVED
OCT 15 2015
Office of Revenue & Tax Analysis

15. Is the applicant(s) willing to devote appropriate resources and time to this proposal?

☒ Yes ☐ No If no, explain why the applicant(s) is unable to devote appropriate resources and time to the proposal.

16. Plan for Partial Funding: If full funding is not awarded, how will you fund the proposal? Can you go forward with the proposal if partial funding is awarded?

If at least $1 million is granted, the remainder of the costs can be budgeted through the Capital Improvements Plan for Fiscal Year 2017.

PART 3: PROPOSAL CONTACT INFORMATION

Note: The proposal contact individual should be a vital part of the grant proposal and will be the Michigan Department of Treasury's contact.

17. Contact Name	18. Contact Title
Howard Croft	Director of Public Works
19. Contact Telephone Number	**20. Contact Fax Number**
(810) 766-7346	(810) 766-7218

22. Contact Entity Name
City of Flint

PART 4: CONDITIONS OF PROBABLE FINANCIAL DISTRESS

23. Indicate the conditions affecting the applicant that indicate probable financial distress (check all that apply and attach proof of existence for each condition checked).

☐ 1. The governing body or the chief administrative officer of the city, village or township has requested a preliminary review. The request shall be in writing and shall identify the existing or anticipated financial conditions or events that make the request necessary.

☐ 2. The state financial authority has received a written request from a creditor with an undisputed claim, that remains unpaid 6 months after its due date, against the city, village, or township that exceeds the greater of $10,000.00 or 1% of the annual general fund budget of the city, village, or township, provided that the creditor has notified the city, village or township in writing at least 30 days before the creditor's request to the state financial authority of the creditor's intention to submit a written request.

PART 4: CONDITIONS OF PROBABLE FINANCIAL DISTRESS, CONTINUED

- ☐ 3. The state financial authority has received a petition containing specific allegations of financial distress signed by a number of registered electors residing within the city's, village's, or township's jurisdiction equal to not less than 5% of the total vote cast for all candidates for governor within the city's, village's, or township's jurisdiction at the last preceding election at which a governor was elected. The petition shall not have been filed within 60 days before any election of the city, village, or township.
- ☐ 4. The state financial authority has received a written notification that the city, village, or township has not timely deposited its minimum obligation payment to the city's, village's, or township's pension fund, as required by law.
- ☐ 5. The state financial authority has received a written notification that the city, village, or township has failed, for a period of 7 days or more after the scheduled date of payment, to pay wages and salaries or other compensation owed to employees or benefits owed to retirees.
- ☐ 6. The state financial authority has received a written notification from a trustee, paying agent, bondholder, or auditor engaged by the city, village, or township of a default in a bond or note payment or a violation of 1 or more bond or note covenants.
- ☐ 7. The state financial authority has received a resolution from either the senate or the house of representatives requesting a preliminary review of the city, village, or township.
- ☐ 8. The city, village, or township has violated a requirement of, or a condition of an order issued pursuant to, former 1943 PA 202, revenue bond act of 1933, 1933 PA 94, MCL 141.101 to 141.140, the revised municipal finance act, 2001 PA 34, MCL 141.2101 to 141.2821, or any other law governing the issuance of bonds or notes.
- ☐ 9. The city, village, or township has violated the conditions of an order issued by the local emergency financial assistance loan board pursuant to the emergency municipal loan act, 1980 PA 243, MCL 141.931 to 141.942.
- ☐ 10. The city, village, or township has violated a requirement of sections 17 to 20 of the uniform budgeting and accounting act, 1968 PA 2, MCL 141.437 to 141.440.
- ☐ 11. The city, village, or township has failed to timely file an annual financial report or audit that conforms with the minimum procedures and standards of the state financial authority and is required for cities, villages, and townships under the uniform budgeting and accounting act, 1968 PA 2, MCL 141.421 to 141.440a.
- ☐ 12. The city, village, or township is delinquent in the distribution of tax revenues, as required by law, that it has collected for another taxing jurisdiction, and that taxing jurisdiction requests a preliminary review.
- ☒ 13. The city, village, or township is in breach of its obligations under a deficit elimination plan or an agreement entered into pursuant to a deficit elimination plan.
- ☐ 14. A court has ordered an additional tax levy without the prior approval of the governing body of the city, village, or township.
- ☐ 15. The city, village, or township has ended a fiscal year in a deficit condition as defined in section 21 of the Glenn Steil state revenue sharing act of 1971, 1971 PA 140, MCL 141.921, or has failed to comply with the requirements of that section for filing or instituting a financial plan to correct the deficit condition.
- ☒ 16. The city, village, or township has been assigned a long-term debt rating within or below the BBB category or its equivalent by 1 or more nationally recognized credit rating agencies.
- ☒ 17. There is an existence of other facts or circumstances that, in the state treasurer's sole discretion for a city, village or township, are indicative of probable financial stress.

PART 5: PROPOSAL DETAILS

24. Describe Current State of Affairs: What is working well? What is not working? Explain the current condition of infrastructure/equipment.

See attached.

PART 5: PROPOSAL DETAILS, CONTINUED

25. Describe Strategy, Project, or Service Proposal:

The Dupont Street Water Main Project will replace 2 miles of antiqated water main with 24" ductile iron pipe.

26. Describe How Grant Funding will Lead the Applicant Toward Financial Stability:

The replacement of this water main is an essential step in the City's struggle to provide clean, safe, and relaible water utilities to residents and businesses. Work must begin as sson as possible to safeguard the public health and restore public confidence in the City's water system in order for the City's Water and Sewer Fund to regain a sustainable position.

27. Goals, Measures, and Business Objectives of this Proposal: What are the outcomes you hope to achieve? How will you measure the outcomes? Provide the measures which will be used to determine the success of the proposal.

The goals include reducing the probability for future water main breaks in the area, reduction of contaminants from corrosion and leeching, and to improve the efficiency of water distribution throughout the city.

28. Potential Barriers: Describe any barriers that currently exist that may have an impact on the implementation of the proposal.

Potential barriers to the implementation of this project include the potential of receiving contractor bids that exceed the budget for the project and the weather poses a significant risk of slowing the project's timeline.

29. Continuity of Proposal: How do you plan to fund the proposal going forward once awarded grant funds are exhausted?

Once the project is completed there are no significant residual costs. The project is expected to be funded through grant funds and funds from the Utilities Administration Account in the Water and Sewer Fund.

PART 5: PROPOSAL DETAILS, CONTINUED

30. Cost Savings: Will the proposal save money? **Attach a detailed calculation of the cost savings and provide an explanation of how the cost savings were calculated. Do not include any anticipated FDCVT grant funding as part of the cost savings calculation.**

☒ Yes ☐ No

A. SHORT-TERM (1 year or less)	☒ Yes	☐ No	Estimated Short-Term Savings $ 40,000.00
B. LONG-TERM (Greater than 1 year)	☒ Yes	☐ No	Estimated 5 Year Total Savings $ 30,000,000.00

31. Work Plan and Proposal Timeline: What are the implementation steps to ensure this proposal's success? What are the projected outcomes at each step? **Attach a detailed work plan, if the narrative will not fit in the space provided.**

The project is intended to be bid-out at the beginning of 2016, in which a contractor would be selected by February or March. This contractor would furnish a more detailed work plan in their proposal, which outlines the steps of the project.

Work is expected to begin in June and be completed by August of 2016.

32. Total Grant Budget Worksheet: **For each budget category, attach a detailed list of proposed expenditures, including an indication of the priority for each budgeted item. Explain how the expenditures support and are essential to the proposal.**

Budget Category	Estimated Total Proposal Cost	Grant Budget Amount Requested (Total Limited to $2.0 million)
Water Main Replacement	$ 3,985,267.00	$ 2,000,000.00
	TOTAL ESTIMATED PROPOSAL COST $ 3,985,267.00	TOTAL GRANT AMOUNT REQUESTED $ 2,000,000.00

33. Additional Information and Comments:

PART 6: ATTACHMENTS

34. Check the appropriate boxes and attach the following items to the application. All attachments must be included and labeled appropriately.

☒ Attached	☐ N/A	1. Letter of support from each of the participating local units identified in Part 2, Box 14
☒ Attached		2. Proof of existence for each condition of probable financial distress checked in Part 4, Box 23
☒ Attached	☐ N/A	3. Detailed calculation of cost savings and an explanation of how the cost savings were calculated in Part 5, Box 30
☐ Attached	☒ N/A	4. Detailed work plan, if the narrative will not fit in Part 5, Box 31
☒ Attached		5. Detailed list of proposed expenditures to support Part 5, Box 32, including an indication of the priority for each budgeted item and an explanation of how the expenditure will support and is essential to the proposal

PART 7: CERTIFICATION

35. I certify that all statements in this application, including all requested supplemental information, are true, complete and accurate to the best of my knowledge. If awarded, I agree to allow the Michigan Department of Treasury and the State Auditor General's Office (and/or any of their duly authorized representatives) access, for the purposes of inspection, audit, and examination, to any books, documents, papers, and records of the grantee which are related to this proposal. I agree to allow the Michigan Department of Treasury to conduct periodic program reviews of the proposal. The purpose of these reviews will be to determine adherence to stated proposal goals and to review progress of the proposal in meeting its objectives. I agree to submit semiannual and final narrative and financial status reports and a one-year Final Follow-up Report to the Michigan Department of Treasury. I understand that failure to submit any required reports may result in the termination of the grant. I understand that this grant may be terminated if the Michigan Department of Treasury concludes that I am not in compliance with the conditions and provisions of this grant, or have falsified any information. By way of signature, I agree with all conditions of this grant program.

Applicant's Chief Administrative Officer Signature (as defined in MCL 141.422b)	Date
Natasha L Henderson	10/15/2015
Printed Name of Applicant's Chief Administrative Officer (as defined in MCL 141.422b)	**Title**
Natasha L. Henderson	City Administrator

Applications are due October 15, 2015. Completed applications submitted via mail or e-mail must be received by the Michigan Department of Treasury no later than 11:59 p.m. on Thursday, October 15, 2015. Incomplete applications may not be considered.

A signed and completed application (including attachments) can be submitted by e-mail to TreasRevenueSharing@michigan.gov or by mail to:

FDCVT Supplemental Answers

Part 5: Proposal Details

Question 24. Describe the current state of affairs. What is working well? What is not working? Explain the current condition of infrastructure/equipment.

The City is currently facing a public health emergency. Water from the Flint River, the City's water source, has been leeching lead from old pipes and solder, contaminating the water supply. Elevated lead levels in children were discovered by physicians at Hurley Hospital and The Genesee County Health Department has issued a Public Health Advisory.

The City of Flint is currently in a state of fiscal distress at a time in which considerable demands are placed upon it relating to water provision, court orders, and assessing practices compliance. The City is attempting to cope with these demands, while revenues are down or drastically reduced. Even though the City has progressed to strategically reduce deficits by seeking new millages, reducing the number of city employees and related costs, and ultimately reducing the services to the public, the City continues to face critical financial challenges. Both the income tax and property tax revenue bases have declined by 55% since the economic downturn in 2008. The current resources available to the City are very restricted and limited.

The City of Flint has been in receivership since December 2011. At that time, the State of Michigan Financial Review Team found that the City has a General Fund deficit of $14,621,546 as of June 30th, 2010, which was not eliminated within the two year preceding period.

The City previously submitted a five year deficit elimination plan for a cumulative general fund deficit of $7,046,820 as of June 30th, 2008. However, by June 30th, 2010, the cumulative general fund deficit had grown to $14,621,546. An updated plan submitted for 2010 did not purport to eliminate cumulative deficit until 2030 and that relied upon the issuance of an additional $12 million of debt in 2013.

A structural operating deficit existed in the general fund as of June 30, 2007, 2008, 2009, 2010, and the General Fund was projected to have a $6,768,864 deficit as of June 30, 2011.

The Comprehensive Annual Financial Report for the fiscal year ended June 30, 2011 was received in December 2011. The City's General Fund, which had a $14.6 million deficit at the beginning of the year, ended it with an $8.9 million deficit. The reduction in the deficit was due solely to an $8 million Fiscal Stabilization Bond issued by the city in March 2011. In total, excluding the impact of the FSB proceeds and the Genesee Towers judgment levy, expenses in the General Fund exceeded revenues. The City's Comprehensive Financial Report revealed an unassigned deficit in the General Fund of $8,961,427 as of June 30, 2014, which had resulted from operating deficits.

The City does not have a current bond rating. The most recent bond rating was from over a decade ago and received a score of Ba1, a qualifying indicator of fiscal distress.

As part of a recent judgment, the City was ordered to repay its Water and Sewer Fund 15.7 million from its General Fund. The recent water challenges have also resulted a lower frequency of bill payments from residents, further reducing revenues. This places considerable strain on the City's path to recovery as it struggles to emerge from receivership.

Appendix A
FDCVT Supplemental Answers

The City is in transition back to the Detroit Water and Sewerage Department as the source of water. This project comes at a cost of $2 million from the City's Water and Sewer Fund, an unanticipated expense. It is imperative that old pipes and water lines need to be addressed in order to arrive at a long term solution that will safeguard the public health, return public confidence in the Water System, resulting in a return to a sustainable Water and Sewer Fund. The City is the water provider, and as such, it has an obligation to provide clean and safe water for residents.

The Dupont Street Project is a catalytic endeavor that will begin the process of replacing old infrastructure and improve the quality of water.

Appendix B

Proposed Expenditures

of the

Financially Distressed Cities, Villages, and Townships Grant Application

Appendix B
FDCVT Explanation of Proposed Expenditures

Explanation of Proposed Expenditures

The following expenditures represent the estimated costs of the Dupont Street Water Main Project based on a previous bid for services in 2014 by DiPonio Contracting, Inc. It must be noted that these costs represent an estimation by the contractor that is considered to be adequate to cover the Contractor's profit and overhead for the project. These costs may be adjusted once work begins.

These items are essential for the successful implementation of the project, which include the removal and/or replacement of trees, sidewalk, driveways, areas of road, and parking lots as well as the excavation of the existing water main. Required items also include hydrant assemblies, connecting to the existing main, and equipment costs for traffic control.

Appendix C

Estimated Savings

of the

Financially Distressed Cities, Villages, and Townships Grant Application

Appendix C
FDCVT Cost Savings Calculation

Short Term Savings

Another area of short term savings is considering the decline in water main breaks with an upgraded transmission line. In the past five years, there have been approximately twenty water main breaks in the area of the proposed work. Main breaks have cost the City between $5,000 and $10,000 each to repair. This has amounted to $100,000 to $200,000 in water main repair costs in just that area alone. On average we can expect a savings of $40,000 in the first year alone ($200,000/5 years = $40,000 per year)

Long Term Savings

The ultimate long term benefits of the project are concerned with providing reliable, clean, and safe drinking water for Flint water customers. This area suffers from poor water quality due to longer retention times as a result of inhibited flow. Resolving this is essential to regain public confidence in City provided utilities, which affect bill collections and the overall fiscal health of the Water and Sewer Fund. Addressing antiquated infrastructure is a necessary step to secure public health.

Other savings of this project include the elimination of leaks by replacing the line. Roughly one-third of the water that the City will be purchasing from Detroit will be lost due to leakage from an extremely antiquated system, the use of water when addressing incidents of arson, and water theft or waste from scrapping. Considering that water from DWSD will cost an estimated $1.5 million per month, $500,000 worth of water that is purchased will never be billed every month. That amounts to $6 million per year and $30,000,000 per year if the pattern to repair these aging lines continues through completion. This is a significant waste. Replacing the Dupont Water Main is an essential step in mitigating this loss.

EMERGENCY MANAGER
CITY OF FLINT
GENESEE COUNTY MICHIGAN

ORDER No. 18

ADOPTION OF THE DEFICIT ELIMINATION/RESERVE ACCUMULATION PLAN

BY THE POWER AND AUTHORITY VESTED IN THE EMERGENCY MANAGER ("EMERGENCY MANAGER") FOR THE CITY OF FLINT, MICHIGAN ("CITY") PURSUANT TO MICHIGAN'S PUBLIC ACT 436 OF 2012, LOCAL FINANCIAL STABILITY AND CHOICE ACT, ("PA 436"); DARNELL EARLEY, THE EMERGENCY MANAGER, ISSUES THE FOLLOWING ORDER:

Pursuant to PA 436, the Emergency Manager has broad powers in receivership to rectify the financial emergency and to assure the fiscal accountability of the City and its capacity to provide or cause to be provided necessary services essential to the public health, safety and welfare; and

Pursuant to PA 436, the Emergency Manager acts in place of local officials, specifically the Mayor and City Council, unless the Emergency Manager delegates specific authority; and

Pursuant to PA 436, the Emergency Manager shall develop and may amend a written financial and operating plan for the City, which shall have the objectives of assuring that the City is able to provide or cause to be provided governmental services essential to the public health, safety and welfare and assuring the fiscal accountability of the local government; and

Pursuant to PA 436, an Emergency manager may require and approve or disapprove, or amend or revise, a plan for paying all outstanding obligations of the local government; and

The FY13 Financial Statements for the City of Flint for FY13 disclosed a $12,895,642 General Fund deficit. Most of this deficit arises from various inter-fund borrowings in the form of cash advances to the General Fund from other funds, implemented over the past several years. The deficit has been significantly reduced from the FY12 deficit of $19.2 million.

advances to the General Fund from other funds, implemented over the past several years. The deficit has been significantly reduced from the FY12 deficit of $19.2 million.

This Order further reduces the deficit in FY14 and authorizes actions in subsequent years to eliminate the deficit. This Order is based on the commitment that in future years, expenses in the General Fund will not exceed revenues, thus assuring that the deficit will reduce, not grow.

This Order also recognizes that achieving long term financial solvency requires not only the elimination of deficits but the accumulation of financial reserves at an adequate level.

This Order recognizes reductions made or projected for this year and authorizes and directs additional steps to eliminate the deficit and to establish an appropriate level of reserves as necessary for sustainable financial solvency:

- It is projected that the $12,895,642 General Fund deficit as of the end of FY13 will be reduced by $2,702,097 to $10,195,342 at the end of FY14, as a result of revenues exceeding expenses.

- The General Fund debts to Fund 636 (Information Technology) and Fund 542 (Building Safety) in the total amount of $393,545 will be discharged before the end of FY14, thus further reducing the deficit to $9,800,000. Discharging these debts will not compromise the financial solvency of these funds.

- $800,000 will be transferred from the Capital Improvements Fund to the Sewer Fund, and the General Fund debt to the Sewer Fund will be discharged in a like amount, thus reducing the General Fund deficit at the end of FY14 to $9,000,000.

Continuing in the FY15 budget and future years, until the remaining accumulated deficit is eliminated, expenses will be budgeted at $1 million less than revenues, thus providing for additional deficit reduction. Additionally, $800,000 annually will be appropriated from the Public Improvement Fund for capital improvement funding in Fund 590 (Sewer Fund) in lieu of repayment of cash advances from Fund 590. Using these funds, deficit reduction will continue as follows:

- FY15: $9,000,000 reduced to $7,200,000
- FY16: $7,200,000 reduced to $5,400,000
- FY17: $5,400,000 reduced to $3,600,000
- FY18: $3,600,000 reduced to $1,800,000
- FY19: $1,800,000 reduced to $ -0-

Beginning in FY20, or sooner should the deficit be eliminated sooner, expenses in the General Fund will continue to be annually budgeted at a maximum of $1 million less than General Fund revenues, and expenses in the Public Improvement Fund shall continue to be budgeted at a maximum of $800,000 less than Public Improvement Fund revenues. This shall continue until, at a minimum, the accumulation of funds reach 15% of General Fund revenues. The goal is to have and maintain financial reserves equal to or exceeding 15% of General Fund revenues at any time.

These steps are to be viewed as the minimum actions to be taken with respect to eliminating the deficit and accumulating adequate financial reserves. It is recognized that accomplishing these goals as quickly as possible is desirable.

Pursuant to Act 436, section 12(1), I hereby order that the General Fund debt associated with the cash advances to Funds 636, and 542 in the amounts of $500,000 and $110,000 respectively, are hereby discharged.

I further order that the General Fund debt associated with the cash advance to Fund 591 in the amount of $1,000,000 will be repaid at the end of FY14 with the surplus of General Fund revenues over expenses budgeted for deficit reduction and that $800,000 will be appropriated from Fund 402 to Fund 590 for capital improvements, and that the General Fund debt associated with the cash advance from Fund 590 is hereby reduced by $800,000.

I further order that the General Fund debt associated with the cash advances to Fund 590 remaining after FY14 will be repaid in the amount of $1 million annually for each of the years FY15 through FY19 from the General Fund. Additionally, for the same period, there shall be an annual appropriation from the Public Improvement Fund in the amount of $800,000 to be used for capital improvements, and the General Fund debt associated with the cash advance from Fund 590 shall be reduced in a corresponding manner.

I further order that once the deficit is eliminated, expenses in the General Fund shall continue to be annually budgeted at a maximum of $1 million less than General Fund revenues, and expenses in the Public Improvement Fund shall continue to be budgeted at a maximum of $800,000 less than Public Improvement Fund revenues until such time as the accumulation of funds from these actions reach, at a minimum 15% of General Fund revenues. The goal is to have and maintain financial reserves equal to or exceeding 15% of General Fund revenues at any time. Some portion of the funds accumulated by this action may be transferred to the City's Budget Stabilization Fund, with no less than an amount equal to 5% of General Fund revenues remaining in the General Fund.

I further order that the attached Deficit Elimination Plan is hereby adopted on behalf of the City of Flint. The Finance Director is authorized to take such actions and accounting measures as necessary to implement this order.

The above stated orders are effective immediately.

This Order may be amended, modified, repealed or terminated by any subsequent Order issued by the Emergency Manager.

Evidence of Financial Distress:
Emergency Manager Exit Letter

for the

Financially Distressed Cities, Villages, and Townships Grant Application

CITY OF FLINT

OFFICE OF THE EMERGENCY MANAGER

Gerald Ambrose
Emergency Manager

April 28, 2015

Honorable Rick Snyder
Governor of Michigan
111 South Capitol Avenue
Lansing, MI 48909

Dear Governor Snyder:

The City of Flint has been in a state of receivership since your declaration of a financial emergency in November 2011. Since that time a number of substantial changes have been implemented and I feel that the financial emergency has been sufficiently addressed. I feel it is appropriate to relinquish my position as Emergency Manager (EM) at this time.

As you are aware, I was appointed Emergency Manager on January 13, 2015, under the authority of PA 436 of 2012. I am the fourth EM to serve the City of Flint; my predecessors were Michael K. Brown (PA 4 and PA 436), Edward Kurtz (PA 72 and PA 436) and Darnell Earley (PA 436). Each EM took major steps toward rectifying the financial emergency. These steps included implementing budgetary and financial best practices, restructuring the City departmental organization, implementing new means and levels of service provision, and preparing the City for long term stability.

Addressing the Financial Emergency:

At the time of placement into state receivership, the City of Flint was a city in financial crisis, characterized by accumulated deficits in the General Fund and Water Fund, marginal cash flow, and unsustainable legacy costs. At the conclusion of FY12, the fiscal year in which an Emergency Manager was appointed, the City's General Fund deficit stood at $19.1 million; its Water Fund had a deficit of $8.8 million; and cash flow was $13 million, or less than one month's expenses. Unfunded OPEB liabilities were more that $850 million.

Addressing these issues and putting Flint back onto a path to sustain financial solvency has been difficult for taxpayers, employees, retirees, and those utilizing city services. Taxes and fees have been raised, including a voter approved six mill special levy for police and fire; a special assessment for street lighting; waste collection was changed to a fee for service from a millage rate; and increases in utility rates to among the highest in the state. Services have been reduced to marginal levels (including public

safety), as the workforce and employee compensation has shrunk by more than 20%. And, retirees have seen their cost of retiree health care increase.

As a result, much progress has been made:

- The deficits in the General Fund and Water Fund have been addressed. The Water Fund is now solvent, although not at the level indicated as adequate; and the remaining $7 million General Fund deficit will be eliminated by June 30, 2015, with a loan authorized by the Emergency Loan Board. City wide cash flow is now more than $67 million.
- New ordinances addressing the achievement and maintenance of financial sustainability have been enacted by the City Council, with support of the Mayor. These ordinances include the requirement for creation and maintenance of a strategic plan; requirement for creation and maintenance of a biennial budget and five year financial projections; establishment of a fund balance reserve, including establishment of a budget stabilization fund; establishment of a requirement to begin funding of OPEB liabilities; and an update of the City's purchasing ordinance.
- Long term liability costs have been reduced significantly. $850 million in OPEB liabilities have been reduced to $240 million, and new employees are given a contribution towards future health care costs at retirement instead of the promise of retiree health care. Current retirees now pay a significant amount towards their health care. Multipliers for remaining employees in defined benefit programs have been reduced, and new employees are enrolled in a hybrid pension plan, which has less long term liability for the City. The Flint Employees Retirement System has been dissolved, with pension administration now handled by the Municipal Employees Retirement System.
- The structure of the City organization has been changed significantly. A new City Administrator has been hired, selected on the basis of professional expertise, and with expanded control over daily activities of the City. The workforce has been reduced by more than 20%, and City operations have been reorganized into four program areas. Waste collection and demolition is no longer being done internally, 911 operations will be transferred to the County effective July 1, 2015, and the City-funded 68th District Court is expected to become part of the County- funded 67th District Court in January, 2016. The purchase of water is now planned to come from the Karegondi Water Authority instead of the Detroit Water and Sewerage Department. Collective bargaining contracts have also been revised; increasing flexibility for management and setting the stage for permanent reductions in legacy costs. Partnerships have been established to improve the level of parks maintenance. Senior Centers are now run by independent non-profit organizations, with reduced assistance from the City; and the City golf courses have been leased to private operators.
- The City has put into place a plan for long term stabilization and future development. A new Master Plan (the first since the 1960's) has been adopted, a new Capital Improvement Plan has been completed, and a new framework for a Blight Elimination Plan has been developed. A new zoning ordinance is well on its way to completion. Each of these major planning pieces significantly engaged members of the community and the final products were approved by the Flint City Council, with the support of the Mayor.

- A Blue Ribbon Committee on Governance was established by EM Earley in 2014. The committee recommended a number of Charter revisions and recommended the election of a Charter Review Committee. In November 2014 the voters in Flint approved several revisions to the current Charter and also approved establishing a Charter Review Commission, the members of which will be elected in May 2015. The Commission will consider whether to maintain the current Strong Mayor form of governance or to propose a new Council-Manager format.
- A formal assessment of the values of both Hurley Hospital and the City's utility system have been completed; and concluded that no change in ownership status would be beneficial at this time.

Continuing Challenges:

Significant work has been accomplished to resolve the conditions which put the City of Flint into State receivership. However, there also still exist several major challenges which will require continued work on the part of the City leaders:

- Retiree health care continues to be a significant concern as the City still faces a federal lawsuit over its decision to change (but not eliminate) health care for current retirees. While the City is currently operating under a judge's order which allows modification of the City's historical level of health care for retirees, a loss could have an impact of more than $5 million annually.
- The five year revenue projections still identify a structural deficit. Annual costs for wages and fringes will continue to rise at an approximate 2.4% rate. There is not a comparable increase in projected revenue, which is closer to 1%. While it may be possible to continue the low level of services that Flint now provides for a short while, even that level will be in jeopardy without a long term sustainable new source of revenue. The low level of services that Flint currently provides is not at the level which will help the City to become an attractive place to live, work, study, and play.
- Aging water and sewer systems designed to serve twice as many customers as the number now using the systems have resulted in water and sewer rates that are among the highest in the state. This is another factor impeding the City's ability to attract and retain businesses and residents. There needs to be a concerted effort to reduce rates by as much as 50%, but that cannot even be contemplated without the commitment of financial assistance from the state and federal governments. While the decision to join with Genesee County in the creation of the KWA will result in costs for purchasing water increasing at a rate less than historically paid to the previous supplier, it will not be sufficient to lower costs.
- Continuing voter support for special millages financing public safety is a concern. In 2012 voters approved a 6 mill property tax levy for police and fire, bringing Flint's total level to within 1 mill of its maximum 20 mill limit. This millage, plus one for 2 mills approved some time ago, are expiring in 2017, and without renewal, the resulting level of public safety services, even with the current level of greatly appreciated State Police support, would be unworkable. This was recently confirmed by an evaluation of the organization and staffing for both the Police and Fire departments. The evaluations found both departments are understaffed, but the understaffing situation is significantly more acute in the Police Department, where it was noted that comparable cities have on average 100 more officers on the street than Flint does.

- Equally important to providing State support in the form of Michigan State Police has been the financial commitment by the State to fund the City's lock up at a cost of more than $2.5 million annually – without which there would be no lock-up. Both FPD and MSP have noted that the opening of the City's 72-hour lock-up has been a key component in the reduction in crime.

Emergency Manager's Recommendation:

Section 22(1) of P.A. 436 of 2012, the Local Financial Stability and Choice Act, provides that if the Emergency Manager determines that the financial emergency has been rectified, he or she is required to inform you and the State Treasurer. Based on the examples presented above, I am prepared to say that I have determined the financial emergency in the City of Flint has been rectified. In addition, as required by Section 21(1) of the Act, a two-year budget has been implemented and all bargaining unit contracts have been settled.

Although the financial emergency has been resolved, I recommend the appointment of a Receivership Transition Advisory Board (RTAB) as allowed by Section 23 of the Act. I believe it is critical that the RTAB oversee and provide guidance to the City as they address the continuing challenges facing the City of Flint and complete transition back to full local control.

The path to sustainable financial solvency for the City of Flint will be very difficult, but doable. The new financial policies and practices, and the new organizational structure, are designed to assist City leaders in achieving this goal. Achieving the goal will allow City leaders to become a positive force in leading the City to become an attractive place to live, work, study, and play. I applaud the efforts of the Mayor and Council members who have worked actively and positively to effectuate these changes and are committed to carrying them into the future.

If, however, the new policies, practices, and organizational changes are ignored in favor of returning to the historic ways of doing business, it is not likely the City will succeed over the long term. The focus of City leaders will then likely once again return to confronting financial insolvency.

I have greatly appreciated the opportunity to have been of service to the City of Flint and to the State of Michigan.

Sincerely,

Gerald Ambrose
Emergency Manager
City of Flint

Cc: Nick A. Khouri, State Treasurer

Appendix C
FDCVT Cost Savings Calculation

Short Term Savings

Another area of short term savings is considering the decline in water main breaks with an upgraded transmission line. In the past five years, there have been approximately twenty water main breaks in the area of the proposed work. Main breaks have cost the City between $5,000 and $10,000 each to repair. This has amounted to $100,000 to $200,000 in water main repair costs in just that area alone. On average we can expect a savings of $40,000 in the first year alone ($200,000/5 years = $40,000 per year)

Long Term Savings

The ultimate long term benefits of the project are concerned with providing reliable, clean, and safe drinking water for Flint water customers. This area suffers from poor water quality due to longer retention times as a result of inhibited flow. Resolving this is essential to regain public confidence in City provided utilities, which affect bill collections and the overall fiscal health of the Water and Sewer Fund. Addressing antiquated infrastructure is a necessary step to secure public health.

Other savings of this project include the elimination of leaks by replacing the line. Roughly one-third of the water that the City will be purchasing from Detroit will be lost due to leakage from an extremely antiquated system, the use of water when addressing incidents of arson, and water theft or waste from scrapping. Considering that water from DWSD will cost an estimated $1.5 million per month, $500,000 worth of water that is purchased will never be billed every month. That amounts to $6 million per year and $30,000,000 per year if the pattern to repair these aging lines continues through completion. This is a significant waste. Replacing the Dupont Water Main is an essential step in mitigating this loss.

Subject: Schools and water testing update

Hello All,
I spoke with Madhu Anderson, Senior Policy Director for DEQ on the outreach to urban schools on water testing. I wanted to understand what DEQ's process was before we started canvassing, in case questions arose. George Krisztian, DEQ Lab Director and head of the Flint Action Response Team, suggested if possible that we hold off until they have a process and protocols in place on working with schools outside of the 13 Flint schools. They are working as quickly as possible with these 13 to establish some kind of response capability and backgrounder for all schools. They know, as we do, that this is most likely a statewide issue. Harvey, do you feel comfortable holding up on the calls to systems?

Anne,
Your area is moving forward with schools testing water ahead of DEQ protocols. Grand Rapids is currently doing this and I'm told Muskegon will follow suit. I don't know what Holland is doing. http://michiganradio.org/post/grand-rapids-public-schools-test-drinking-water-lead

Andrew, I need you to call call Benton Harbor, Kalamazoo and Battle Creek's superintendents and ask if they are planning water testing in their schools. If so, send send an email to DEQ Director Dan Wyant and copy me, Dennis Muchmore and Jarrod Agen. If not, don't worry about the communication.

Bay City, Pontiac and Saginaw schools are moving forward. While DEQ is working on their protocols, a number of schools are moving forward with testing. I want the Governor informed about the activity.

Remember, this is simply an inquiry to testing activity in urban districts.

Best,
Harvey

Hello All,
Holland has just completed a large bond infrastructure project. I have two calls into them, but my guess is they will not be testing.
Godwin Heights – get their water from Wyoming. No plans to test
Muskegon Heights – no plans to test.
Calls still out to Godfrey Lee.

Harvey,

Please let me know how you would like to respond? While we may not have specific "projects," our office has played a vital role in:

1) the water issue
2) expansion of AMUS to Flint
3) demolition money
4) transition from an EM
5) the public safety forum

Matt,

My boss is trying to find out, "what was done and dollars spent at the Flint office of Urban and Metropolitan Initiatives." We were sent an agenda for FY 2013-14 (attached), but it does not contain much financial information or details of actual activity completed in Flint.
Do you have or can you get information that will answer my boss' questions?

Thanks,
Steve

BACKGROUND

During the first two quarters of 2013, the Office of Urban and Metropolitan Initiatives summarized and completed the reference document that serves as a guide to the urban agenda for the state. The implementation and adjustment of projects and policies against the indicators outlined in the reference document was designed to create the "Michigan Urban Agenda". We propose that the Governor announces annually several projects and/or legislative initiatives that impact the primary indicators in the Urban Agenda Reference Document—e.g. the Michigan 2014 Urban Agenda.

Taking the Governor's strategy of Vision→ Engage → Adjust → Attack, the projects listed in this document are designed to be piloted in at least one city in the first year, adjusted and rolled out in other cities at a later point or subsequent year. For example, if the Governor approves and announces at least five initiatives each year over the next four years, and replicates each initiative in another city in the subsequent year, that would generate 35 initiatives of which at least one initiative would be active in all major urban centers by 2018.

OUMI's goal would be to propose at least twelve initiatives (or one initiative for each focus area) each year for the Governor. The following is our proposal for the Michigan 2014 Urban Agenda.

ENGAGED COMMUNITIES

Project Description

Support the Michigan Non-Profit Association's (MNA) "Engaged Communities (EC)" initiative designed to support and build effective civically engaged community models. The strategy is to leverage networks and deep community partnerships to create a comprehensive civic engagement program aimed toward communities across the state of Michigan and particularly in the targeted communities of Detroit, Kalamazoo and Flint.

EC is based on the following three key components: Advancing Collaboration; Supporting Lifelong Civic Engagement; and Deepening Capacity through Diversity and Inclusion.

Implementation

Goal 1: Build lasting connections between nonprofit organizations and other community stakeholders.

- Conduct and share community assessments and issue identification via facilitated conversations.
- Foster and support the formation of collaborations in communities to address specific community needs.
- Create a virtual space for communities to organize to address community needs in "real time".

Goal 2: Build and support civic engagement in communities

- Coordinate community partnerships and collaborations between community-based nonprofits and stakeholders in targeted communities.
- Convene community-based organizations to participate in quarterly engagement "boot camps" over the four-year project.
- Create a Civic Engagement blueprint and toolkit for community-based nonprofits to build and sustain a civic engagement plan.

Goal 3: Build nonprofit capacity through Diversity and Inclusion

- Conduct diversity and inclusion assessments for community –based organizations
- Provide diversity and inclusion awareness and training
- Create a common language and definition for Diversity and Inclusion to be adopted by the Michigan nonprofit sector.
- Create a diversity and inclusion blueprint and toolkit uniquely designed for the nonprofit sector.

Impacted Areas

- **Focus Areas:** Civic Engagement
- **Primary Indicator(s):** Number of Neighborhood Associations
- **Secondary Indicator(s):** Number of Opportunities/Access for residents of an area to volunteer or engage, a city's involvement with Civic Health Index (CHI) for ongoing measure and awareness
- **Lead Department(s):** DHS; however, all departments will engage
- **Geographic Area:** Detroit, Flint and Kalamazoo

FOOD INCUBATION ACCELERATOR PROJECT: Second Stage Incubation

Project description

As one of Michigan's largest industries, agriculture plays a huge role in the economic health of our state. In 2011, annual agricultural exports generated nearly $2.8 billion, and our agricultural diversity trails only California. One of the strongest growth sectors in this industry is in local food systems, small-scale farming, and cottage foods. Farmer's Markets and other entities have established a number of incubator kitchens across the state and an increasing number of entrepreneurs are launching food-based businesses. While many of these start-ups have met with success, far too many have struggled with how to get past the initial incubation stage and make the leap to their own facility. For many, the leap to taking on the purchase and build-out of their own facility is simply out of their range. These small-scale start-ups are often able to secure financing for equipment, but a build-out is not possible.

What is needed is an intermediary step between the typical rent by-the-hour incubator kitchen and a large facility. Eastern Market Corporation has studied the feasibility of creating a space where a number of flexible kitchens could be built out to minimal specifications by a central landlord and each individual space finished and equipped by the tenants. Unfortunately, this does not easily fit the current paradigm- banks have never financed a project like this and with no proof of concept are reluctant to loan on what is viewed as a risky proposition. Likewise, this does not easily fit the metrics of MEDC as job creation numbers are difficult to ascertain.

This project provides the opportunity to create jobs, accelerate one of Michigan's strongest growth sectors, and increase access to healthy food. It is anticipated that with successful execution, this project will provide proof of concept resulting in private sector support for similar efforts moving forward. Additionally, this project offers the opportunity to benefit both rural growers and urban entrepreneurs and their employees.

Implementation

1. Establish criteria for funding two $500,000 matching grants to catalyze construction of food incubation accelerators
2. Develop curriculum around accounting, merchandising, marketing, branding, inventory control, food safety etc. for grantees to provide to tenants
3. Launch and promote incentive
4. Measure participation and accelerator graduation rates

Impacted areas

- **Focus Areas:** Economic Development, Health
- **Primary Indicators:** Percentage of population employed, Public-private investment in contaminated/blighted/vacant land and buildings, Median household income, Percentage population that live and work in city
- **Secondary indicators:** Percentage of small-business start-ups in existence after five years**,** Percentage of SBA loans approved/denied
- **Lead Department:** MDARD, MEDC
- **Geographical Area:** Kalamazoo

Last Update: April 2014

HEALTHY CORNER STORE

Project Description

One of the key detriments to increasing density around our anchor institutions in Flint & Saginaw are the proliferation of small neighborhood convenience stores dedicated to selling and advertising beer, wine and liquor. A potential strategy to convert these businesses into neighborhood assets is The Healthy Corner Store Project currently being implemented by Detroit Fresh. The project is one that could show great benefits on a statewide level. The focus is coming in to help interested businesses introduce more fresh food choices into their regular inventory.

This model operates as a triage approach and works closely with local growers, marketing and store placement to ensure the intervention is a sound business decision as well as healthy neighborhood addition. Additionally policy could be introduced to impact the liquor board and making fresh produce a requirement for businesses located in geographically identified food deserts.

Food Policy Ordinance-Detroit, Neighborworks-Grand Rapids

Detroit Fresh: http://www.clas.wayne.edu/detroitfresh/

Implementation

1. Creation of a fresh food toolkit or playbook
2. Target businesses in key areas with limited access to fresh produce
3. Promote the program and incentives to business
4. Provide setup and implementation assistance
5. Track feedback and success

Impacted Areas

- **Focus Areas**: Economic Development, Health
- **Primary Indicator:** Percentage of residents within 1/4 mile of grocery with full scale produce department
- **Secondary Indicator:** State resources allocated locally to Economic Development programs/incentives
- **Lead Department:** MDARD
- **Geographic Area:** Flint

MUNICIPAL ASSESSMENT TOOL FOR LOCAL LIVE/BUY INITIATIVE

Project Description

The Midtown Anchor Strategy leverages the economic power of the Henry Ford Health Systems, Wayne State University and Detroit Medical Center to bring more residents, capital and business opportunity to the Corridor. A study by ***U3 Ventures*** found that the three institutions collectively employ nearly 30,000 people, enroll 32,000 undergraduate and graduate students annually, and control nearly 40% of the undeveloped real estate. The study also found that these anchors could potentially add up to 10,000 residents to the Midtown neighborhood, achieve 30 percent local procurement, and reach 35% local employment over the next 10 years. As a result, the anchors launched the Live Midtown and Buy Detroit strategies (**Live/Buy Initiative**)

Early success in working toward these goals is being achieved through ***Live Midtown***, a residential living program designed to entice employees of the three anchors to live and invest in a Midtown neighborhood. The program offers incentives to attract new homeowners and renters, as well as to retain current homeowners and renters in the neighborhood. Launched in 2011, the program has already closed on 197 applications yielding 19 new homeowners, 100 lease renewals and 76 new renters. Live Midtown's success has inspired other Detroit-based employers to use the same platform to incentivize their employees to move to the City. On July 25, 2011, five downtown Detroit employers announced the launch of a $5 million program—which uses the same incentive structure as Live Midtown—to attract their employees to become residents of six targeted Detroit neighborhoods. The program, called Live Downtown will also be managed by Midtown Detroit, Inc. and will be open to the 16,000 employees of DTE Energy, Compuware, Quicken Loans, Blue Cross Blue Shield of Michigan and Strategic Staffing Solutions.

The ***Buy Detroit strategy*** aims to increase the volume of institutional procurement from Detroit based businesses through three core approaches: 1) identifying potential Detroit based vendors through a **commodity** based approach; 2) working with DEGC on the development of a Detroit based business **repository**; and 3) business **technical assistance**, retention, and attraction. The Detroit Medical Center, Henry Ford Health System and Wayne State University are bolstering efforts to buy goods and services from Detroit businesses instead of out-of-state or out-of-area vendors. The strategy has generated millions of dollars for local businesses, helping them to grow and hire. Combined, the DMC, Henry Ford Health and Wayne State spend $1.6 billion a year on everything from dinner rolls to janitorial supplies, but less than 10 percent was spent in Detroit. In 2011, the three institutions redirected nearly $400,000 in purchases to Detroit businesses. In 2012, the buy local strategy redirected $16 million to local businesses.

The objective is to development web-based assessment tool for communities to determine whether they are able to successful launch a Live/Buy initiative. In 2012, OUMI worked with MSHDA to fund a study of eight Michigan cities (Battle Creek, Flint, Saginaw, Muskegon, Lansing, Jackson, Battle Creek, Kalamazoo, and Benton Harbor) to determine their readiness to launch a Live/Buy initiative. The study determined four cities (Flint, Kalamazoo, Jackson, and Saginaw) were ready to launch a Live/Buy initiative that would produce economic impact beneficial to city growth. The U3 Venture study cost $100,000 and revealed efficiencies for state to engage all cities while limiting the number who would qualify for a deeper study like U3 Ventures, and other tools such as targeted market analysis.

Implementation

- Conduct study on eight Michigan cities (completed 3/13).
- MSHDA and DEQ's Office of Great Lakes will complete the web-based assessment tool by 2nd quarter of 2014)

Impacted Areas

- **Focus Areas:** Economic Development, Talent Attraction and Placemaking
- **Primary Indicator(s):** Percentage population that live and work in the city; Investment in downtown and neighborhood building areas (including new construction, historic and infill projects); and Percentage of population holds a post-secondary degree or certificate.
- **Secondary Indicator(s):** Investment in neighborhoods; Quality housing , Walk Score
- **Lead Department(s):** MSHDA (PMDC)
- **Geographic Area:** Battle Creek, Benton Harbor, Lansing and Muskegon

MUNICIPAL FINANCE SYSTEM REVIEW

Project Description

As cities begin to progress through state receivership under PA 436 the opportunity exists for local government to request for a transition advisory board, to assist in returning control to locally elected officials. This presents a great opportunity for the State to position itself as a strong advocate for the future health of cities. The proposed project would be the creation of a formal process for cities to actively participate in revitalizing their financial structure. Upon the request of the local government the state would convene a formal review mirroring that of the initial emergency management board review. The result of this review would be an assessment of current conditions, key changes that had occurred and necessary benchmarks yet to be attained. In addition to the current state of city finances an impact analysis of structural changes key for future governance will be conducted. Here, local authorities are placed with tangible goals to accomplish such as changes in: city charter, operations, organizational structure and others. The ultimate result of implementing this approach will be a transparent process that creates the groundwork for an active partnership in city management between city and state.

Implementation

To be implemented over 18 months by the OUMI-Associate Directors. A key group of stakeholders and professional experts will be established to provide a substantive state strategy that addresses issues of revenue, legacy costs, tax expenditures, bankruptcy, municipal incorporation and many others. The project time frame for planning and idea creation is approximately one year. During this year OUMI will lead and direct this group. At the conclusion, key directives (statutory, legislative & department policies) will be presented and from their Treasury will serve as the key department with tracking implementation.

Impacted Areas

- **Focus Area**: Municipal Services
- **Primary Indicator:** Unrestricted general fund balance is stable or increasing over a 5-year period
- **Lead Department:** Treasury
- **Geographic Area:** Statewide

NEIGHBORHOOD STABILIZATION SCHOOL ANCHOR PROJECT (NSSA)

Project Description

Traditionally, if you answer yes to the following questions, you have an anchor institution: 1) does it have a large stake and an important presence in your city and community; 2) Does it have economic impacts on employment, revenue gathering, & spending patterns; 3) Does it consume sizeable amounts of land; 4) Does it have crucial relatively fixed assets and you are not likely to relocate; 5) Is it a job generator; 6) Does it attract businesses and highly skilled individuals; 7) Is it one of the largest employers, providing multilevel employment possibilities; 8) Is it a center of culture, learning and innovation with enormous human resources? Traditionally, anchors have been describe and big organizations such as a corporation, hospital or university.

A new framework for anchor work is emerging. One part of the framework is that very few anchors have the power to make change happen on their own. Instead, to achieve significant impact in communities, anchor institutions must partner with each other and with other types of organizations. Second, anchors must move beyond projects to make strategies a core part of their business operations in areas like procurement, place-making and personnel. And third, anchor strategies must engage communities as full partners in developing and implementing change efforts.

Many of the challenges that urban communities face manifest themselves in residential areas seen through high crime, poor educational opportunities, lack of employment, high foreclosures and blight. At issue question is whether it possible to build strategy around non-traditional anchors in neighborhoods such as: schools, faith based institutions and small business?

The Neighborhood Stabilization/School Anchor (NSSA) initiative focuses many strands of community involvement and neighborhood investment around a common goal of enhancing the quality of life around schools in four key areas: public safety (AmeriCorps Urban Safety), lighting, demolition and additional services in the school (e.g. Pathways to Potential). The NSSA Initiative establishes a defined area of a neighborhood with a school at its nucleus (currently a half-mile radius around the school). Efforts around the school differs in scope and form in each neighborhood, depending on the community's need, but will begin with a collection and analysis of data and demographics from: the school system, the city's planning and development department (or the equivalent of such), land banks (the Michigan Land Bank, city and county), public safety, fire, and unemployment. The data assessment will provide decision makers a clear understanding where government investment will produce the greatest impact and return on investment.

Once a school is selected within a targeted area based on the data assessment, subsequent activities will engage the community to secure acceptance and local buy-in from community stakeholders to coordinate outcomes that added significant value to the existing neighborhood quality of life strategies for students and their families. The NSSA requires a long-term commitment by the school system to maintain operations at that school for no less than five years, dual purpose the facility as recreational options for the community and extend the hours of operation from 8 to 12 hours/day.

City, county, federal and state partners will assess and allocate resources (human and financial) specifically targeted at areas around schools to reduce blight, enhance security and lighting, insert state services in the

schools, and use the lengthened school hours of operation for programs such as adult literacy initiatives, talent development, or community recreational activities. The initiative must be embraced by community stakeholders and include an anticipated and well-orchestrated exit strategy by the some state government.

Implementation

- Strategy implemented August 2012 in three communities in Detroit with the kickoff at Clark Elementary School in Detroit with Mortgage Settlement funding to address blight
- Strategy will be expanded to two additional neighbors in Detroit beginning October 2013, and in Flint and Benton Harbor by the 2nd quarter of 2014.

Impacted Areas

- **Focus Areas:** Economic Development, Placemaking, Education
- **Primary Indicator(s):** Reduction of crime, population growth, business growth
- **Secondary Indicator(s):** Investment in neighborhoods; Quality housing
- **Lead Department(s): MEDC, MSHDA and MSP**
- **Geographic Area:** Detroit, Flint, Grand Rapids

NSSA: AMERICORPS URAN SAFETY PROJECT (AMUS)

Project Description

The AmeriCorps Urban Safety project (currently run by Wayne State University) is designed to build a culture of neighborly communication and responsibility in the city of Detroit. In order to reduce crime in the area, AMUS working with local residents to create block clubs, a forum for residents to connect and create neighborhood safety strategies. This initiative provides the spark for a network of residents that will continue their crime-fighting efforts well after the program has moved on. AMUS works to improve levels of neighborhood guardianship; reduce victim attractiveness and susceptibility; and provide technical assistance for wireless internet connections in residents' homes, in order to enable citizens to use Internet-based programs to help reduce crime.

In an effort to enhance the NSSA Initiative, AMUS was expanded to five areas in Detroit which includes the three existing NSSA areas through a Governor's/Mayor's AmeriCorps Grant. In November 2013, Gov. Rick Snyder and Mayor Dave Bing announced the launch and expansion AMUS crime reduction model in the city of Detroit. This initiative is a unique public-private partnership, the program utilizes 36 AmeriCorps members as catalysts to mobilize and recruit community volunteers to join them in improving public safety in targeted Detroit neighborhoods.

AMUS utilizes the progressive COMSTAT crime mapping program to evaluate crime "hot-spots" and implement targeted strategies to reduce blight, assaults, break-ins, drug dealing, and vehicle-related crimes. Contributing to the program's success, which has seen a 44 percent reduction in crime in its targeted areas, is the joint collaboration between residents, neighborhood non-profits, faith-based organizations, law enforcement, existing neighborhood associations and block clubs to improve public safety.

Currently, AMUS is active in **five areas strategically selected in neighborhoods surrounding local Detroit schools where other state and local improvement initiatives are already underway around the following public schools:** English Village, Cody, Osborn, Clark, Bates, Bagley, Gompers, Harms and Neinas. The effort also includes two EAA schools: Bethune and Phoenix Academy. Flint is the next community to launch this initiative.

The funders are the Corporation for National and Community Service (CNCS) CEO, and the foundation community. CNCS is responsible for administering all federal national service programs, including AmeriCorps, Senior Corps, the Volunteer Generation Fund, and other service efforts.

Implementation

- Identify schools in an NSSA area.
- Complete crime mapping
- Apply for CNCS support (currently the Governor/Mayors RFP)
- Secure foundation support to serve as a CNCS match
- Implement COMSTAT monitoring through a local university.

Impacted Areas

- **Focus Areas:** Public Safety
- **Primary Indicator(s):** Kindergarten readiness; 3rd grade reading proficiency
- **Secondary Indicator(s):** Investment in neighborhoods; Quality housing
- **Lead Department(s):**MEDC
- **Geographic Area:** Detroit and Flint

NSSA: ONE STOP CENTER

Project Description

One Stop Health Center modeled after Holy Cross Children's Services Samaritan Center in Detroit. Services available at the center include: medical and mental health services, job training and placement, educational programs, spiritual ministries, youth recreational opportunities, housing development, business and community development, and general community support. Services are available for seniors, children, adults, and families. This model is consistent with other neighborhood based intervention strategies such as Pathways to Potential, Neighborhood School Anchor Strategy and Community Schools. With the increase in school closures in many of our urban centers the remaining buildings are prime candidates to be repurposed for this type of model. Services would primarily focus on health as there is an increased need for Federally Qualified Health Centers, but expansion of these centers could include several wrap around services that currently exist in the Samaritan Center which are critical for the targeted underserved populations.

Samaritan Center: http://www.samaritan-center.net/

Implementation

Initial task is to identify appropriate location within Flint to house the center working with the Flint Community Schools remaining building inventory. This discussion has already begun and can be bolstered with state endorsement. From there identify which existing programs are to be enveloped

into the center (pathways to potential, workforce development, financial literacy training etc…). The final operation of the center will be strongly based on the location of the center, nearby community needs and cooperation of relevant departments, agencies and external organizations.

Impacted Areas

- **Focus Areas:** Health, Talent
- **Primary Indicators:** Number of primary care providers per capita
- **Secondary Indicators:** Amount of certificate training offered
- **Lead Department:** DHS, DCH and School Building Project
- **Geographic Area:** Flint

NSSA: SCHOOL OF CHOICE ANCHOR

Project Description

Despite remarkable revitalization in the surrounding neighborhood, enrollment continues to lag at Congress Elementary. Indeed, approximately half of the available students in the neighborhood (some 350) choose to attend Congress, which sits at the heart of the neighborhood. Hundreds more available students live in the schools' total catchment area but many also choose alternative options. Congress as a result currently operates at 52 percent capacity which threatens:

- Building closure
- Critically important school-owned public space
- Neighborhood's ability to retain and attract families.

In response to these concerns, the *East Hills Love Congress* initiative aspires to reinvent the elementary school as the school-of-choice for young families and ultimately a neighborhood anchor institution.

Implementation

East Hills Loves Congress, developed by the East Hills Council of Neighbors, is a strategic initiative to:

- Organize a group of families that will enroll their kids at Congress.
- Design and implement a neighborhood-based Spanish/English program to more effectively serve the surrounding Latino/Guatemalan population.
- Design and implement a "walkable school" model to strengthen community connections among students, residents, businesses, and educators.
- Develop a community-driven plan for the future improvement of school facilities, with special emphasis on maintaining the building as a hub for community activities.
- Establish a critical path for meaningful parental/community participation in school reinvention.

These activities are fully aligned with Grand Rapids Public Schools' Transformation Plan and the District views this pilot initiative as a potentially promising model for deployment to other neighborhoods.

The neighborhood also currently is developing a resident-driven Public Spaces Improvement Strategy that will define specific recommendations for restoration/expansion of the school and rehabilitation of the surrounding park and green space.

Impacted Areas

- **Focus Areas:** Education, Placemaking
- **Primary Indicator(s):** Kindergarten readiness; 3rd grade reading proficiency
- **Secondary Indicator(s):** Investment in neighborhoods; Quality housing
- **Lead Department(s):** MEDC, MSHDA and School Building Project
- **Geographic Area:** Grand Rapids

NSSA: TARGETED JOB TRAINING

Project Description

Most job training programs are targeted at all residents in a city. The challenge to train enough people who secure employment to impact unemployment is extremely difficult in cities like Detroit, Flint, Saginaw, and Muskegon Heights. The objective with Neighborhood Targeted Job Training would be to train and secure employment by neighborhood as a mechanism for stability; a working neighborhood is a safe and populated neighborhood.

The 2014 effort will pilot Detroit STRIVE, a best practice , neighborhood-based workforce development program..

STRIVE

STRIVE's mission is to help people acquire the life-changing skills and attitudes needed to overcome challenging circumstances, find sustained employment, and become valuable contributors to their families, their employers, and their communities.

- Since 1984, STRIVE has helped over **50,000** individuals find work
- STRIVE graduated **3,000** and **placed over 2,200** into jobs nationwide last in 2012.
- **Two-thirds** of STRIVE graduates **are placed** into jobs
- STRIVE's graduates **earn $10-$11 per hour** on average – a threshold to living wages
- More than **90% of graduates are still working** three months after placement

Implementation

- Secure unemployment data for each NSSA neighborhood.
- Place STRIVE in one NSSA neighborhood and CMEP in another targeted neighborhood.

Impacted Areas

- **Focus Areas:** Economic Development, Housing and Talent Attraction/Retention
- **Primary Indicator(s):** Percentage population that live and work in the city; Percentage of the population employed in the targeted neighborhood, Quality of housing (condition of structure), Number of people per acre in city overall, Net migration rate
- **Secondary Indicator(s):** Number of jobs created through incentives, Cost per incentivized job created, Dwelling vacancy rate by specified rental- or owner-occupied status.
- **Lead Department(s):**MSHDA and MEDC
- **Geographic Area:** Detroit

OPERATIONAL EXCELLENCE IN LOCAL GOVERNMENT

Project Description

The Grand Rapids Area Chamber of Commerce is leading a public-private initiative to institutionalize *Operational Excellence* (OpEx) across local governments by introducing *Lean Six Sigma* (LSS) processes.

- OpEx is a philosophy of leadership, teamwork, and problem solving that supports continuous improvement throughout an organization by focusing on the needs of the customer/citizen, empowering frontline employees, and optimizing existing process activities.
- The LSS management method is a proven approach to improve efficiency and effectiveness. LSS enables break through innovation and removes barriers by establishing an organizational culture in which innovation is instinctive.

This initiative potentially presents an innovative approach to improve municipal service delivery. Taken together, OpEx/LSS is an inclusive approach that works from within the organizations and is most effective when the subject matter experts who actually work in the organizations are directly engaged in identifying, developing, and implementing process improvements.

The Chamber initiative comes in response to recommendations made by the Community Collaboration Work Group, established by the Kent County Board of Commissioners in 2011 "to identify, evaluate, and recommend opportunities for collaboration and consolidation of public services." The Work Group's report, presented in March 2013, outlined several recommendations to enhance government efficiency and effectiveness and boost economic development opportunity across the region. The report also cited private sector leadership via the Grand Rapids Area Chamber of Commerce as key to implementing the recommendations.

Implementation

1. A Community Trustee Leadership Team made up of key private sector executives will guide the Chamber's initiative, which proposes to focus in three key service delivery areas: public safety, judicial, planning and zoning.
2. A preliminary pilot study of public safety practice(s) across three local jurisdictions will be conducted in fall 2013 to gauge the initiative's potential to return positive results.
3. The project is envisioned as a three-year initiative with results available by June 2018.

Impacted Areas

- **Focus Areas:** Municipal government
- **Primary Indicator(s):** annual cost savings achieved through partnerships
- **Secondary Indicator(s):** stable general fund balance; paid ARC contributions; investment in building areas
- **Lead Department(s):** Treasury
- **Geographic Area:** Metro Grand Rapids

PLACES AND PRACTICES

Project Description

It is known that the largest generation in the United States is now the millennial generation, and that they are increasingly choosing where to live based on quality of place, bringing their talent, innovation, and entrepreneurialism to places outside of Michigan. With only one city in the *top 100 places to live for millenials,* Michigan is at a decided disadvantage when it comes to attracting and retaining talent, something vital to our state's success.

With the advent of the MIPlace initiative, the state, its component departments, and also local units are increasingly realizing the importance placemaking. Recently, The Office of Urban and Metropolitan Initiatives contracted with consultants U3 Ventures to analyze the potential for anchor-based economic development strategies and placemaking -a vital component to the transformative turnaround of Midtown Detroit.

In the eight cities already analyzed, U3 has provided a set of recommendations on how best to leverage the power of local anchor institutions and identified additional opportunities for transformative practices and projects.

Working in close coordination with multiple state agency partners, OUMI will act as advisor for the implementation of a three phase anchor-based economic development program in two tiers of cities (based on population). Step one will consist of identification of communities with potential for anchor-based economic development strategies with an online assessment tool (complete in tier one cities). The identified tier-two cities will receive a package of consulting services through U3 Ventures which will analyze the demographics, housing stock, and opportunities for development strategies. Once U3 has made recommendations, communities will follow a carefully plotted set of additional steps ensuring that local conditions, zoning regulations, development processes etc. meet best practice benchmarks. At the conclusion of each phase, the state will provide an additional suite of grants/technical assistance/project assistance.

It is anticipated that this project will result in a great number of Michigan cities adopting best practices from a zoning and development process perspective, making them more attractive to private investment. Additionally, through the coordination of anchor institution resources it is anticipated that a number of locally-financed initiatives will emerge, driving increased local procurement, innovation, and leading to denser residential patterns.

Implementation

1. **Identification of set of local best practices to encourage**
2. **Identification of state incentives to be offered at completion of stages**
3. **Software tool design and build.**
4. **Project roll-out**
5. **Track and report impacts**

Impacted Areas

- **Focus Areas:** Economic Development, Placemaking, Municipal Finance, housing, public safety, Talent
- **Primary Indicators:** Percentage of people that live and work in the city, Public/private investment in blighted/contaminated structures and land, Quality of housing, Number of blighted or abandoned houses as percentage of housing stock, Population and household density.
- **Secondary indicators potentially impacted**: Number of mixed-use building permits, Assessed values per-capita, biking paths/facilities, Complete streets policies/ordinances, Walkscore

- **Lead Departments:** MSHDA, MEDC
- **Geographic Area:** Kalamazoo

PUBLIC SCHOOL JOINT USE INITIATIVE

Project Description

There are more public school buildings than any other public facility in the United States; the buildings contain an estimated 6.6 billion square feet of space on more than 1 million acres of land. Schools have highly desirable spaces for joint use, such as meeting rooms, auditoria, gymnasia, swimming pools, playgrounds, and sports fields, and in the decade between 1994 and 2005 about $500 billion was spent by school districts on new school construction and building improvements.[1] About half of this was spent on new construction and additions, but the other $250 billion was spent on improvements to existing facilities. There is a growing conversation about and demand for joint use[2] as a way to provide services to children and families in convenient locations, improve opportunities for physical activity by increasing use of school recreational and outdoor spaces, leverage capital investments, and more.

In Detroit and other urban communities, there are more seats than there are students. With a decline in population in most urban centers, more schools will have to close. When a school closes, it decimates a community/neighborhood. The model for such an approach is the Argonaut Building in Detroit which thee College for Creative Studies (CCS), a leading institution for art and design education, redeveloped the historic into a new arts- and design-focused community in the New Center commercial district of Detroit, Mich. As the centerpiece of the New Center Economic Development Plan, the project preserves the historic Argonaut Building while restoring it to use for a growing community of creatively-focused businesses, nonprofits, professionals and students. The Argonaut Building houses a charter school; a creative business accelerator offering office space and services to start-up ventures; administrative, learning and student living facilities for CCS; and office and retail space.

Implementation

- Use social impact bonding in a K12 neighborhood school with less than 60% occupancy for a mixed used development in the school's unutilized space.
- Development commercial opportunities in public school space

Impacted Areas

- **Focus Areas:** Economic Development, Placemaking
- **Primary Indicator(s):** Private-public investment in vacant buildings.
- **Secondary Indicator(s):** Investment in neighborhoods; Quality housing, job creation
- **Lead Department(s):** School Building Project
- **Geographic Area:** Detroit

PUBLIC SCHOOL JOINT USE INITIATIVE: Second Vocational School Supplier

Project Description

Volkswagen Slovakia has its own training center, which is run in cooperation with the Electro-Technical Secondary Vocational School in Bratislava. Every year, the company selects around ten students enrolled in the first year of the school to continue their training at VW, where they complete the second and the third year of studies. Another 10-15 graduates of higher education are also offered work placements within VW Slovakia, for a 12-month training program (Interview VW SK:2010).

Researchers find the presence of widespread vocational training, which is usually taken as a marker of specific skill regimes, as an indicator suggesting a convergence towards a coordinated market economy types. Although countries exhibit different trends in the relative supply and wages of workers who are secondary education graduates, there is evidence of increased demand for skilled workers, reflecting skill-biased technological change.

One idea to accelerate convergence is to establish a relationship with an OEM to partner with a K-12 vocational school to serve as a tier supplier. For example, Ford contracts with Randolph Career and Technical Center in Detroit to supply a "widget" for its company. Revenues support employees and overhead so that Randolph is self-sustaining. Employment opportunity will be for 11th or 12th graders with an opportunity to be pipelined into advanced training with the OEM.

Implementation

- Secure a contract with one of the "Big Three Auto" and Lear.
- Work with Focus Hope to manage the initiative with DPS.
- Target three vocational schools in Detroit through DPS.
- Target effort as pilot at Randolph Career and Tech Center

Impacted Areas

- **Focus Areas:** Economic Development, Education
- **Primary Indicator(s):** Percentage population that live and work in the city
- **Secondary Indicator(s):** Number of jobs created through incentives, Cost per incentivized job created, and Percentage of students earning a post-secondary degree or certificate.
- **Lead Department(s):** MSHDA and MEDC
- **Geographic Area:** Detroit and Kalamazoo

RESONANT CITIES PROJECT

Project Description:

The ability of the arts to impact quality of life, and thus the economic vitality of a community is well-established. Increasingly, the establishment is realizing the contribution that vibrant public places play in developing healthy communities. Likewise, communities that have an actively engaged citizenry realize greater outcomes in economic, public safety, and employment measures among others.

With an increasing amount of state investment and education being directed at large-scale Strategic Placemaking, and the foundation laid by initiatives such as ArtPlace America or the NEA's Our Town initiatives, it is important to not overlook the value and impact of grassroots, artist-led creative placemaking. Major philanthropic investments from the Kresge and Knight Foundations have given credence to the fact that modestly-funded, arts-based, citizen-driven placemaking projects are one of the leading contributors to quality of life, economic vitality and connectivity across communities.

It is proposed that the state fund a multi-stage competition in the 8 communities served by OUMI to help with the launch of creative placemaking projects. In each community, artists from across Michigan would be asked to partner with community-based teams to propose small creative placemaking projects. In each of the communities, a workshop would be conducted with the selected teams to educate and equip the teams with skills, resources and network to position them to engage in effective and sustainable creative placemaking, positioning these efforts to continue and be shared among other Michigan communities.

The selected teams would have 30 days to refine their project proposal, and in each city, one winner of a $5,000 grant would be selected. Stage two would allow the eight winners to compete for four grants of $25,000 to complete their projects. To be eligible for one of the semifinalist grants, teams would have to provide a 1/1 match for the $5000 grant from community-based sources. The four semi-finalists would be allowed to compete for one final grant of $50,000 to implement their project.

With preference given to projects that are artist-led, involve high levels of community engagement in design and implementation, and serve to address specific issues/challenges identified by and relevant to the community, this project would have significant impact in vibrancy of place, likely leading to increased economic and investment activity, neighborhood improvements and increased connectedness across communities. Additionally, through the requirement that local teams use crowdsourcing and other non-traditional fundraising mechanisms, to leverage funding and cultivate community buy-in and engagement, a grassroots philanthropic ecosystem will be fostered in these communities.

Implementation

1. Design program
2. Design partnership agreement with ArtServe Michigan
3. Initiative launch
4. Publicity campaign

Impacted Areas

- **Focus Areas:** Arts, Culture, and the Creative Economy, Placemaking, Civic Engagement
- **Primary Indicators:** Economic activity, income, and jobs generated by arts and cultural organizations, and creative industries, both direct and indirect, Net migration rate, Public/private investment in contaminated/blighted/vacant land and buildings.
- **Secondary Indicators:** Dollars raised in local arts-related capital campaigns, State dollars invested in arts, culture, and creative economy support and promotion, Number of creative jobs, creative businesses, and creative industries clusters, including sector growth trends and comparison against leading models nationally, Number of opportunities/access for residents of area to volunteer or engage, Number of theaters, restaurants, and cultural events, Number and size of public gathering spaces in downtown, neighborhood areas.
- **Lead Department:** MEDC, MSHDA and Arts Council
- **Geographic Area:** varied depending upon applicants

TARGETED URBAN EXPANSION PROJECT

Project description

As Michigan continues to recover from the great recession, jobs are being added at a robust pace and the manufacturing sector, especially autos is thriving. Concurrently, the numbers of structurally unemployed in our urban areas remains unacceptably high and educational attainment levels unacceptably low. New jobs being added to the market are not having the impact on the most marginalized populations. Additionally, many Michigan OEMs are utilizing out-of-state suppliers producing tremendous economic leakage.

MEDC programs Pure Michigan Business Connect and Community Ventures both address parts of these challenges in limited ways. PMBC events offer Michigan-based suppliers the opportunity to network and meet with OEM procurement departs and has been successful in directing millions of dollars back into the Michigan economy. This investment however, has not been directed into any specific geography. Community Ventures offers employers the opportunity to receive $5000 for every person that they hire from returning prisoner populations, also providing necessary social services and support. This program has been limited to Detroit, Pontiac and Flint. Some employers have expressed concern with the perceived bureaucracy programs such as this typically entail and have been reluctant to utilize them.

This project stems from a conversation Director Hollins had with Mark Weishaar, President of Sturgis Molded Products. Mr. Weishaar's company has realized great success and he was seeking to give back to the region and offer employment to populations that have been structurally unemployed. Additionally, Mr. Weishaar is willing to bring the jobs ***to*** these populations, and is seeking to build a new facility in the heart of urban Kalamazoo for that purpose.

The key to this project's success is the ability of Sturgis Molded Products securing a contract large enough to justify the building of the new facility. We envision taking the PMBC model and reversing the relationship- that is, as opposed to numerous suppliers having the opportunity to get in front of one OEM with the goal of securing business, MEDC would facilitate Sturgis Molded Products and similar suppliers with a commitment to hiring underserved populations and locating in urban centers an opportunity to meet with multiple OEMs to share their vision for urban employment and secure contracts.

This initiative provides the opportunity to direct investment into urban core cities, creating much needed tax base. This project will direct jobs to populations desperately in need. It is envisioned that similar suppliers willing to hire structurally unemployed individuals could be identified in multiple communities and that OEMs looking for a positive PR story without the perceived challenges of working through a program such as Community Ventures would be interested in participating in the program.

Implementation

1. Design program parameters
2. Publicize and secure partner companies
3. Launch events
4. Track results

Impacted Areas

- **Focus Areas:** Economic Development, Municipal Finance
- **Primary Indicators**: Per capita incomes of 18-35 year-olds, Percentage of population employed, Median household income, Percentage of population that lives and works in the city, Unrestricted general fund balance is stable or increasing over five-year period.
- **Secondary indicators:** Number of jobs created through incentives**,** Average FICO score in census tract
- **Lead Department:** MEDC
- **Geography:** Kalamazoo

TALENT DEVELOPMENT PROJECTS

Michigan's Urban Centers are places where mobile young talent locates, the existing workforce is ready for the diverse jobs that are available and the next generation is being prepared for the jobs of tomorrow. The following are key objectives for talent development in cities:

1. Cities have a trained, competitive workforce
2. Cities are places where talented individuals choose to live and work
3. Cities create, grow, and prepare for the next Michigan economy.

METRO EZ RIDE

Project Description

The need for reliable transport services for Detroit residents is undeniable as time after time we hear that transportation is a barrier in connecting employers and workers. Residents are conflicted enough with challenges of finding and keeping a job or attending college, university or trade schools. *MetroEZride* will represent a new **GAP** transportation strategy and community partnerships to help job seekers, students and employers surmount transportation barriers and develop transportation solutions.

A top notch transportation network is a key component to successful economic growth and connecting people and jobs in new ways is a vital part of a public transportation system. We're excited about our potential to work together as a region to develop comprehensive transportation solutions. Following its Detroit launch, *MetroEZride* will begin community-based planning process [focus groups, research, and meetings with key stakeholders] in Flint, Pontiac and Saginaw to develop similar workforce transportation strategies that can be used as a roadmap for action in those communities.

Implementation

- Access opportunities to for GAP transit services in Detroit that are not competitive with existing city transit operations.
- ***MetroEZride* will partner with faith-based, community, business and grassroots organizations** utilizing vans and passenger vehicles typically not used during the weekday. *MetroEZride's* transportation network will also include its own fuel-efficient passenger vehicles and serve to maximize the potential of existing D-DOT/SMART regional public transportation system by forming connecting hubs.

- *MetroEZride* services will be designated for urban core residents *(18 and older and Detroit Public School night school students taking additional classes to graduate)* needing new transit options to city and suburban job sites and schools, and employed workers in 24/7 industries such as health care and hospitality who need transportation on evenings, nights and weekends.

Impacted Areas

- **Focus Areas:** Mobility and Talent Attraction/Retention
- **Primary Indicator(s):** Percentage population that live and work in the city; Annual number of public transit trips per capita
- **Secondary Indicator(s):** Investment in neighborhoods; Miles of transit routes Timeliness of service (i.e. reliability)
- **Lead Department(s):** MDOT and MEDC
- **Geographic Area:** Detroit

LEGISLATIVE INITIATIVES

LAND VALUE TAXATION TO REPLACE TRADITIONAL PROPERTY TAXES

Problem: The strong demand for urban core living is evident on the ground and in the numbers. Housing market values on main streets are substantially, and rental vacancy rates are low. Developers are responding to growing demand, and new construction and rehab activity are becoming visible in several cities including Detroit. In spite of this activity, persistently high occupancy rates indicate an undersupply of housing—a condition created by a substantial gap between what it costs to construct or rehab new units, and the (still low) rents the market will support.

Solution: The state should **consider legislative options for allowing the City of Detroit (and other cities) to use land value taxation in place of traditional property taxes** as a means of raising revenue and encouraging sustainable development. This form of taxation only taxes the value of the land, not the buildings or equipment that makes up the full value of the real estate (as done with traditional property taxes). By taxing only the land at a higher rate, instead of the entire property value at a lower rate, cities could remove some of the disincentives for developers to make improvements to properties and reduce the speculative element in land pricing that result in long-term vacant or abandoned properties. This tool has been used effectively in states such as Pennsylvania and Maryland to maintain (and increase) municipal revenue and help improve local economic conditions. The elimination of the PPT should achieve some of this.

Impacted Areas

- **Focus Areas:** Housing, Placemaking
- **Primary Indicator(s):** Population growth, business growth
- **Secondary Indicator(s):** Investment in neighborhoods; Quality housing
- **Lead Department(s): Treasury, DTMB**
- **Geographic Area:** Statewide

MCOLES REVISION

Problem: Reduction in funding support for cities has challenged the stability of law enforcement. In 2012, Michigan had eight cities listed on the FBI's top 100 most violent crime list which four were on listed in the top 10. In 2004, MCOLES rule changes prevented private colleges and universities from having peace keeping activities outside the footprint of their campus.

Solutions: Revise MCOLES to permit private institutions to have arresting authority outside the footprint of their campus under certain conditions modeled after Wayne State University's policing operation in Midtown Detroit.

Impacted Areas

- **Focus Areas:** Public Safety, Placemaking
- **Primary Indicator(s):** Reduction of crime, population growth, business growth
- **Secondary Indicator(s):** Investment in neighborhoods; Quality housing
- **Lead Department(s): MSP, MEDC, MSHDA**
- **Geographic Area:** Statewide with primary impact cities being Detroit and Flint

ON-BILL FINANCING OF HOME ENERGY IMPROVEMENTS

On-Bill Financing of Home Energy Improvements

Project Description

Holland, MI, which has a municipal utility serving its residents and businesses, has developed a widely-supported *Community Energy Plan* that aspires to establish the city as a national leader in energy affordability, efficiency, and security. The Plan's overarching mission is to enhance Holland's attractiveness to investors, businesses, and residents by providing a more cost-effective, reliable, clean energy supply.

One key component of the Plan is the proposed *Home Energy Retrofit Pilot Program*, an initiative to lower energy rates, leverage private capital and expertise, drive home improvements that boost energy efficiency and conservation, and save money for all Holland citizens and businesses. The program's innovative idea is to finance home energy improvements with on-bill financing, a new approach that enables home owners to pay for improvements through monthly utility bills rather than upfront payment or borrowing money, the traditional financing paths that often serve as barriers for homeowners. (This is similar to the performance contracting model that the Michigan Legislature and Governor recently supported for business and government, only designed for homeowners.)

The City has yet to promote the proposed retrofit program but currently counts some 200 residents interested to take advantage of the initiative. The Holland Board of Public Works, the municipal utility, wants to partner

with private capital and service firms to perform 1) home energy audits and 2) deep energy retrofits on homes across the city. A pilot already is designed and ready to kick off.

This retrofit program is a key building block in Holland's plan to keep energy costs and rates down by rightsizing their current build power plant building needs. Current law does not allow the utility to implement this locally-designed, locally-desired program.

What the City needs to move forward is flexibility from the Michigan Legislature. The City's preferred solution is legislation that specifically authorizes their municipal utility to offer the on-bill financing option by securing debt against home energy meters. The City has worked diligently to draft proposed legislation and secure the support of key West Michigan lawmakers. The Governor's administration also supports Holland's request for this flexibility.

Given the legislative solution, Holland could begin to implement its pilot initiative and, if successful, scale the program city wide. The initiative also potentially provides a new model for both other municipal utilities and private sector energy companies to consider.

Impacted Areas

- **Focus Areas:** Energy and Environment; Quality of Housing
- **Primary Indicator(s):** Energy expenditures as a percentage of household income
- **Secondary Indicator(s):** Quality housing; Percentage of homes meeting Healthy Home principles
- **Desired Outcome(s):** Lower energy rates and costs for businesses and residents; long-term property value improvements; resident and business satisfaction
- **Geographic Area:** Holland
- **Cost:** Modest staff time and technical assistance

Dennis – attached is a first draft of a timeline. We will refine it tomorrow. We rec'd some info from Brad that we might need to incorporate. And Terry & Wayne's staff are still coming up with dates/events. Please let us know if this is what you had in mind.

Terry found these links; including an article when City Council approved the move/switch. There are some noteworthy quotes.

Flint City Council approves resolution to buy water from Karegnondi, state approval still needed

FLINT, MI – Flint is one step closer to getting its water from Lake Huron as part of the Karegnondi Water Authority.

The vote, **approved 7-1 at the Flint City Council meeting Monday, March 25**, may have set in motion the end to Flint paying to get its water from Detroit.

Under the proposal, Flint would get 16 million gallons per day of raw water from Lake Huron, pipe it to Flint for treatment and then sell it to customers throughout the city. Another 2 million gallons per day would come from the Flint River and will be treated in Flint.

Mayor Dayne Walling said the Department of Environmental Quality must approve Flint's getting 2 million gallons per day from the Flint River.

Tuesday's meeting followed weeks of discussions and special meetings surrounding the resolution.

"We got there," Councilman Joshua Freeman said. "That's the important thing."

There were more than 50 people at Monday's meeting.

"Going with Karegnondi is the best decision. We have no opinion on the economics of the decision," said Rebecca Fedewa, Flint River Watershed Coalition executive director. "If we start drawing water out of the Flint River, we are at risk of having to start releasing water from our reservoirs."

Genesee County Drain Commissioner Jeff Wright said the decision must still be approved by a county water and waste advisory board. The KWA board will then be reconvened for final approval.

Wright said construction could start in May.

State treasury officials still must approve the city council's move because Flint has an emergency financial manager. All expenditures over $50,000 must be approved.

Genesee County Drain Commissioner Jeff Wright has said that Flint would pay roughly $6.4 million annually for water service if it joined the pipeline – a nearly $4 million savings on what it pays Detroit for water.

Walling previously said the **city would save $19 million over eight years** by getting water from the KWA.

"It's a historic night in the City of Flint," Walling said. "The savings will be less with the capacity level approved by city council because there will be increased treatment cost for the river water."

He said the DEQ told the city it needed to get 18 million gallons per day or there would have to be additional work done at Flint's water plant.

Flint's water plant and the Flint River is currently the backup for Flint and Genesee County, however, the plant only operates four times per year.

Councilman Bryant Nolden was the lone dissenting vote.

"It was a protest vote," Nolden said. "I knew they had enough votes. I just feel like the Flint River is our best option."

Karengnondi is the regional water authority that includes Genesee, Lapeer and Sanilac counties and the cities of Flint and Lapeer.

Massive Karegnondi water project moving forward after state OKs pipeline tap into Lake Huron

Jeff Wright

GENESEE COUNTY, MI -- The state has approved a critical permit that allows the Karegnondi Water Authority to tap into Lake Huron with a 1.5-mile underground intake.

But water authority officials are still waiting for Flint to decide if it will be part of it.

Construction on the intake -- estimated to cost $27 million -- might mark the no-turning-back point for the massive project, and county Drain Commissioner Jeff Wright said other developments make it necessary Flint to make a final decision on its involvement in the next few months.

As control of Flint has shifted from mayors and city councils to emergency managers, the city has never committed to buying a minimum volume of water from the KWA.

"The only question at this point really is whether Flint is going to be a partner," said Wright, who has met with emergency financial manager Ed Kurtz and wants to resolve the question before Kurtz leaves his position -- something likely to happen soon after the November election.
"I'd say we have a couple of months here," Wright said of Flint's deadline. He described Kurtz as positive about the city's potential involvement but said, "There's still some questions Flint is working on with Detroit and Lansing."

Kurtz said he can't predict what will happen.

"We're looking at all our options," Kurtz said Friday.
County Commissioner Ted Henry, D-Clayton Twp., said regardless of the city's participation, the pipeline can be built by the remaining partners: Genesee, Sanilac and Lapeer counties and the city of Lapeer.

"The answer is yes," Henry said. "It will be a little different but it can go,"

The drain commissioner said construction of the pipeline intake, which has already been designed, is expected to start this year, after the job is put out for bids and borrowing is authorized by the county Board of Commissioners.

Building the intake will be specialized work, part of which must be done from a barge, and will require building tunnels below the sand bottom of the lake and laying an 84-inch pipe below the surface of the water.

In addition to the state Department of Environmental Quality permit to build the intake, the KWA also needs approval from the U.S. Army Corp of Engineers, Wright said.

A 45-day public comment period on the intake permit has passed and county officials said they expect the permit to be approved within two weeks.

Among other recent developments in the pipeline project:

- The Genesee County Water and Waste Advisory Committee, made up of elected and appointed city, township and village officials, has voted unanimously to set a date for accepting public bids to build the intake.
- The same committee has approved negotiating a contract with Wade Trim to act as program manager for the pipeline project once all necessary permits have been received.
- The county has revised its estimate on the cost of the intake portion of the pipeline from $40 million to $27 million.

Wright said his office is ready to negotiate a contract for Wade Trim to oversee the pipeline work, and said he expects six or seven engineering and surveying companies to assist in getting the job done.

County officials count those jobs among the 1,000 that they say will be created by building the pipeline.

"I want to use local (people) wherever possible and keep the money here," Wright said.

The drain commissioner said the selection of Wade Trim is important to the city of Flint because it signals the start of engineering, which includes decisions about the size of pumps, motors and pipes that will be used to build the pipeline.

Flint officials have options, including the use of Flint River water, or continuing to purchase water from the city of Detroit.

Wright said the only choice for the rest of the county is build the pipeline or sign a 30-year contract with Detroit.

A KWA study claims that continuing to buy water from Detroit will cost the region $2.1 billion during the next 25 years. By building a pipeline, that cost would be $1.9 billion over the same period, the KWA Web site says.

After the initial 25-year period, the cost of water would be less than 25 percent of the projected cost of water form Detroit, according to KWA.

STATE OF MICHIGAN
DEPARTMENT OF TREASURY
LANSING

RICK SNYDER
GOVERNOR

NICK A. KHOURI
STATE TREASURER

Flint Water Timeline (09-28-15)

June 26, 2012 – Letter from Flint EM Mike Brown to DWSD for permission to begin blending Flint River water with treated water from DWSD. The letter indicates that the DEQ is supporting this option and its implementation would save the City between $2M and $3M annually.

September 20, 2012 – Letter from Flint EM Ed Kurtz to DWSD requesting written permission to implement the blending option. Approval is requested by October 1, 2012.

October 31, 2012 – Analysis by the Flint Finance Director suggests that the annual cost to purchase water from DWSD will steadily increase to $23M per year by fiscal year 2020.

November 2012 – Treasury retains Tucker, Young, Jackson and Tull (TYJT) to evaluate the KWA proposal to the City of Flint.

November 6, 2012 – Letter from Flint Emergency Manager Ed Kurtz to State Treasurer Dillon that a proposal from DWSD is expected but that the initial assessment is that switching to KWA is in the best interest of the City of Flint.

February 2013 – TYJT issues a final report to Treasury on the comparison between Karegnondi Water Authority (KWA) and DWSD. Analysis suggests that the KWA option is the cheaper option for the City of Flint.

March 2013 – DWSD contacts the City of Flint to begin direct negotiations on a contract extension. Multiple options are provided to the Flint Emergency Manager (EM) Ed Kurtz.

March 26, 2013 – The Flint City Council endorses joining KWA.

April 11, 2013 – State Treasurer Andy Dillon authorizes Flint EM Ed Kurtz, pursuant to Section 12(3) of P.A. 436 of 2012, to enter into a contract with KWA if a final offer from DWSD is either not received for rejected in good faith based upon specific objections.

April 15, 2013 – DWSD provides a best and final offer to the City of Flint. Analyses by Flint EM Ed Kurtz, the Department of Environmental Quality and Treasury's Office of Fiscal Responsibility independently conclude that the KWA option is cheaper for the City of Flint.

April 16, 2013 –Flint EM Ed Kurtz informs the State Treasurer that the City will join KWA. This decision was officially announced May 1, 2013.

April 17, 2013 – DWSD transmits a letter to Flint EM Ed Kurtz terminating service to the City of Flint, effective April 17, 2014.

June 2013 – Groundbreaking for the Karegnondi Water Authority. Flint also requests full time use of the Flint Water Treatment Plant with Flint River water as a source.

June 28, 2013 – Financing Contract between the City of Flint and KWA is approved. Effective September 1, 2013. This document was signed by EM Mike Brown.

February 19, 2014 – The KWA Board of Directors adopts Resolution 2014-01, authorizing KWA to bond for water line construction on-behalf of the City of Flint.

April 17, 2014 – Water service from DWSD officially ends. The City of Flint also conducts two separate public forums regarding the use of Flint River water, upgrades to the City's water system and the overall cost of the switch to KWA.

April 25, 2014 – City conducts public event marking the transition to the use of Flint River water. DEQ information shows that transition complete by May 2015.

March 3, 2015 – Flint EM Jerry Ambrose provides a memorandum to Deputy State Treasurer Wayne Workman stating that a reconnection to DWSD will cost the City $10.1M/year and that water purchases could be as high as $1M/month.

March 12, 2015 – The City of Flint hires Veolia to conduct an operational evaluation of the City's water system.

Frank:

We have a situation in Flint, Michigan that is beginning to get national attention and could be an opportunity for Home Depot. 18 months ago, Flint switched its water supply from Detroit Water (the distance and pumping costs of going uphill made it quite expensive) to the Flint River as a temporary answer, until they could finish the construction to get their water from Lake Huron (Karagondi Water System). The corrosive attributes of the River water have exacerbated the lead deposit leaching into homeowner pipes and there is concern around lead poisoning, especially for infants.

The corporate community is rallying to address the problem. Meijer donated 1500 water filters to low income residents and GM is about to announce a donation of between 5,000 and 10,000 filters. I do not yet know where GM is getting the filters from, but I was thinking that Home Depot might want to join the effort with a donation, supply chain discounting assistance, or some combination of activity that could help Flint residents. Harvey Hollins is our point person for this effort, since he is the Director of Urban Initiatives for Governor Snyder. I have copied him here.

If you could get this into the hands of the right people and see if there is interest in speaking with Harvey, I would be very appreciative. Thanks and take care.

Regards,

Rich

Hi Rich,

These are two documents that I think are helpful addressing the questions about lead and Flint water overall, prepared by DEQ and DHHS. These were intended for internal use, so please ask our partners to not share them beyond the people on their teams making the decisions.

Please let me know if you need anything else.

Dave

Frequently Asked Questions:
Water Lead Levels in the City of Flint
September 2015

How can lead get into drinking water?
Lead detections in Flint drinking water exist at the home level. Sampling at the Flint Water Treatment Plant has shown no lead in its treated water. However, this contaminant leaches into water from a home's lead service lines, lead solder, and leaded plumbing materials including fixtures, faucets, and fittings.

Does the city meet federal drinking water standards for lead and copper?
Yes, the city is meeting state and federal guidelines for lead and copper.

The City of Flint has regularly monitored for lead and copper since federal law began requiring it in 1991.

When the City changed water sources in May 2014, state and federal law required the city to sample for lead and copper for a full year to determine how the water may be interacting with residential lead plumbing to increase lead levels. While the city's results show residential lead levels below the federal threshold for immediate response activities, Flint is moving quickly to optimize corrosion control measures in its water system.

Some individual homes showed high numbers for lead. Isn't that a concern?
For the homeowner, yes it is. There is no "safe" level for lead, and while the leading cause of lead poisoning around the country is lead paint, any source of lead ingestion is worthy of concern.

But the State and federal guidelines for lead and copper acknowledge an important reality: Any home that has a lead service connection or lead plumbing will impart some varying amount of lead into the home's water. The only way to eliminate lead in a home water system is to remove lead plumbing or replace lead service connections to the city system.

The lead and copper rule requires the local operator to sample dozens, sometimes hundreds of homes in the service area to get a general sense of how the water supply is interacting with lead plumbing and service connections. The tests are done specifically at homes with lead service connections. Individual results vary and all participants are

Are there other ways the city monitors for lead exposure?
The County Health Department, overseen statewide by the Michigan Department of Health and Human Services, regularly monitors blood levels in children throughout Michigan communities. The leading cause of lead poisoning is exposure to lead paint.

Blood lead level testing results for the 12-month period just after the City of Flint changed its water source (May 2014 – April 2015) showed no significant change in the pattern of blood lead levels in Flint, compared to the previous three years. This data suggests the recent change in water source by the City of Flint has not contributed to an increase in lead exposure throughout the community.

How does the state decide if the water is creating a lead problem?
Compliance with the federal lead rule is based on a 90th percentile calculation. If more than 10 percent of samples report lead above the federal action level of **15 parts per billion**, a water supply has an "action level exceedance." An exceedance is not a violation. It triggers other requirements which could include public notification, additional water quality sampling, and possibly further treatment.

While some of Flint's individual samples exceeded the 15 parts-per-billion lead action level, compliance is based on **the 90th percentile of samples**. The City of Flint's 90th percentile level has ranged between 0 parts per billion in 2008 and 2011, and 15 parts per billion in 1992, but never exceeded the action level.

The two most recent sampling periods, in 2014 and 2015, were 6 parts per billion and 11 parts per billion, respectively.

Did the city use <u>every</u> sample they got back?
Sampling requirements for lead and copper are designed to target the most common pathways to lead ingestion in homes with the least protection. The sample must be collected from a commonly used kitchen or bathroom tap, and in accordance with the provided sampling instructions. Homes that employ filtration or additional treatment cannot be included. Samples must also be collected within the established monitoring period.

I have a lead service connection or lead plumbing. What should I do?
Replacement is the only way to eliminate lead exposure. However, here are some interim steps homeowners can take to reduce it:

Flush pipes before drinking, and only use cold water for consumption.

The more time water has been sitting in your home's pipes, the more lead it may contain. When water in a particular faucet has not been used for six hours or longer, "flush" cold-water pipes by running the water until it becomes as cold as it will get. This could take five to 30 seconds if there has been recent water use elsewhere in the home, such as showering or flushing toilets. Otherwise, it could take two minutes or longer.

Use only water from the cold-water tap for drinking, cooking, and especially for making baby formula. Hot water is likely to contain higher levels of lead.

Who is responsible for replacement of leaded materials?

Replacement of service pipes on private property and any leaded plumbing materials within the home is a **homeowner's responsibility**. The City of Flint owns the service pipe from the water main to the curb stop valve, and that is **the City's responsibility**. This valve is normally located two feet in from the street curb. From there to the house is private property and the responsibility of the homeowner.

Why doesn't the city at least replace its portion of lead service lines?

Partial lead service line replacement has been shown to mobilize more lead and make the situation worse. Only full lead service line replacement has been demonstrated effective in achieving long-term reductions in drinking water lead levels.

What is the City's timeline for installation of corrosion control treatment?

The federal government allows the steps to complete the installation of optimal corrosion control treatment and follow-up monitoring to take up to five years.

However, the City of Flint has committed to completing installation of Optimized Corrosion Control Treatment in **less than six months**.

What will happen when Flint joins the Karegnondi Water Authority next year?

The City has committed to having Optimized Corrosion Control Treatment in place prior to its connection with the Karegnondi Water Authority (KWA). The water provided by KWA will come from a new source, Lake Huron. The city will continue its lead and copper sampling every six months. Additionally, the city's water treatment plant will continue to operate with uninterrupted Optimized Corrosion Control Treatment.

How long would it take to replace lead service lines throughout Flint?

The city has about 32,900 service connections in total. **More than 15,000** of these connections are considered lead service lines. Even if many crews were contracted, it would likely take up to 15 years to complete this work.

What would it cost to replace the lead service line at my house?

Average costs to replace a lead service line at an individual home range from $2,000 to $8,000. Costs vary depending on the length and size of service line that is needed, as well as the ground cover and soil conditions encountered.

With more than 15,000 lead service lines at an estimated average cost of $4,000 for each replacement, total cost could **be $60 million or more**.

Blood Lead Levels in Flint background information
September 24, 2015

- Promoting the health of our residents is a statewide priority – a priority that includes ensuring clean, safe drinking water for all residents and especially children.
- The results of the Hurley Children's Hospital are under review by the Michigan Department of Health and Human Services.
- The analysis that Hurley conducted is different from the way MDHHS has analyzed data regarding blood lead levels in Flint.
- MDHHS is looking to see if we can replicate the results of the Hurley study to see how they achieved their results.

MDHHS Blood Lead Testing Results in Flint

- MDDHS data shows a comprehensive look at the data since 2010, years before the change in Flint's water source occurred in April 2014.
- Each year shows a seasonal increase in childhood lead poisoning in the summer months, the highest seasonal increase of which occurred in 2010.
- If elevated blood lead levels were being driven by the change in water, we would expect to see the elevated levels remain high after the change in water source, rather than follow the seasonal pattern as they did by decreasing in the fall months.
- All data included in the MDHHS analysis were reported by laboratories directly to MDHHS, in accordance with State Law.

Differences in Analysis

- MDHHS data provides a much more robust picture of the entire blood lead levels for the Flint area, and specifically, accounts for data over the full course of the past five years.
- Looking at the past five years as a whole provides a much more accurate look at the seasonal trends of lead in the area.
- Seasonal exposure is higher in the summer for a variety of reasons including children playing outside in the soil, and when windows are open and lead paint is more likely to be in the air. This seasonal increase would be unrelated to the water system.
- Our data includes children from the entire city, including all medical facilities, rather than just Hurley, has a larger age group of children, and includes a much larger sample size.
- The MDHHS analysis looks specifically at the first elevated blood lead level for each child, which provides an accurate picture of when first exposure occurred.
- The Hurley data includes a smaller sample size, much more limited time period (January-September of 2013 and 2015 only), and a smaller age group of children.

WIC Children

- In homes with infants on WIC, if the household has documentation from an official source of unsanitary water supply issues, that family may be eligible to receive ready-to-feed formula. Families should contact WIC to see if they are eligible.
- Each household would have to be looked at on an individual basis.
- WIC cannot cover bottled water.

City of Flint
September 5th 2014 Boil Water Advisory Review

OVERVIEW

- On Friday September 5th the City of Flint issued a boil water advisory to residents in two of ten test areas around the city.
- The advisory was due to multiple positive tests for "total coliform" and the area covered approximately 9 square miles.
- On Sunday September 7th the City expanded the advisory to include another of the ten test areas due to a subsequent positive test.
- The boil water advisories were lifted on Tuesday September 9th at 5:00 after consultation with the DEQ.

BACKGROUND

- State of Michigan Regulations requires that the City of Flint Water Treatment Plant perform testing of its water distribution system on a routine basis in ten different locations around the City.
- The tests take twenty four hours to produce valid results and are sent directly to the Department of Environmental Quality for review.
- Test results which show positive for "Ecoli" or "fecal coliform" trigger boil water notices for the test area and the advisories usually remain in effect until three consecutive tests return negative results.
- A single positive test for "total coliform" does not generally result in a boil water advisory, rather it indicates that the environment is conducive for bacteria.
- Typically, investigation into possible causes followed by corrective measures such as flushing the affected area with open hydrants will cleanse the system.
- This process is overseen by an employee who is required to hold an F-1 State License and is listed as the Operator in Charge of the Water Plant and an employee who holds an S-1 State License which is required to maintain distribution systems of this municipal size.
- The City of Flint has over 500 miles of pipe in its distribution system, much of which is over 70 years old.
- The City of Flint has over ten-thousand valves throughout its distribution system.
- The City of Flint has a professional reliability study of its system, that was updated in December 2013.

PROBLEM

- ❖ After detecting the initial positive test for total coliform, normal procedures did not clear the condition and multiple positive tests ensued.
- ❖ The continued positive total coliform tests were the cause for issuing the boil water notice.
- ❖ Additional discoveries showed that residual chlorine levels in the affected area were considerably lower than normal.

SOLUTION

- ✓ On Monday September 8th the City convened all licensed personnel, Utility Supervisors, and DPW Director to a single meeting location and held a brainstorming session with the DEQ on conference call.
- ✓ It was agreed that while not totally isolated, the concern was mainly present in a specific large transmission line that ran through all positive testing areas.
- ✓ It was determined to expand the hydrant flushing outside of the immediate impact area.
- ✓ It was found that a 24" valve which feeds this transition main was broken in the OFF position outside of the immediate impact area.
- ✓ The broken valve was preventing fresh water from being pushed directly into the impacted area while causing water to travel from the water plant around the entire city and preventing adequate circulation of fresh water.
- ✓ In repairing the broken valve, virtually all of the symptoms were erased over a 24 hour period and the chlorine count has steadily risen back to normal levels throughout the transmission main.

CONCLUSION

- ✓ The City was in direct contact with DEQ personnel daily.
- ✓ The positive tests were for "total coliform" only.
- ✓ The following statement about total coliform was approved by the DEQ and made in writing to the public as part of the recent boil water.

Total coliform bacteria are generally not harmful themselves. Coliforms are bacteria which are naturally present in the environment and are used as an indicator that other, potentially-harmful, bacteria may be present.
Usually, coliforms are a sign that there could be a problem with the treatment or distribution system (pipes). Whenever we detect coliform bacteria in any sample, we do follow-up testing to see if other bacteria of greater concern, such as fecal coliform or E. coli, are present. We did not find any of these bacteria in our subsequent

testing. If we had, we would have notified you immediately. However, we are still finding coliforms in the drinking water.

- ✓ The City of Flint is in the first year of strategic budgetary investment in an infrastructure strategy.
- ✓ The City of Flint infrastructure strategy has been, and will continue to be developed with state licensed employees, industry experts, and proven experienced consultants.

- ✓ In repairing the broken valve, virtually all of the symptoms were erased over a 24 hour period and the chlorine count has steadily risen back to normal levels throughout the transmission main.

CONCLUSION

- ✓ The City was in direct contact with DEQ personnel daily.
- ✓ The positive tests were for "total coliform" only.
- ✓ The following statement about total coliform was approved by the DEQ and made in writing to the public as part of the recent boil water.

Total coliform bacteria are generally not harmful themselves. Coliforms are bacteria which are naturally present in the environment and are used as an indicator that other, potentially-harmful, bacteria may be present.
Usually, coliforms are a sign that there could be a problem with the treatment or distribution system (pipes). Whenever we detect coliform bacteria in any sample, we do follow-up testing to see if other bacteria of greater concern, such as fecal coliform or E. coli, are present. We did not find any of these bacteria in our subsequent

testing. If we had, we would have notified you immediately. However, we are still finding coliforms in the drinking water.

- ✓ The City of Flint is in the first year of strategic budgetary investment in an infrastructure strategy.
- ✓ The City of Flint infrastructure strategy has been, and will continue to be developed with state licensed employees, industry experts, and proven experienced consultants.

Hi there Harvey -

Just following up on this per brief conversation/mention at yesterday's senior staff meeting and Dave's voice mail to you as well.

I believe you had indicated you had a meeting on this tomorrow, yes?

We need to touch base and get all facts on this situation ASAP. Turning into unfortunate and unnecessary PR issue that we're trying to work with Treasury and DEQ to be on top of, stem, find resolution, etc.

Please call our office today to connect with Dave (as our lead on this) or myself or Jarrod if he's not available for some reason.

Thanks much,
SW

Dave & Harvey: We are working with Veolia North America, the water consulting team Flint has hired to "assess the situation." We're planning to hold a media roundtable with city officials on Tuesday to introduce the Veolia team to local reporters. Gerry Ambrose suggested we invite some of the folks you invited to attend the newser earlier this week. Is that a list you can share with me or would it be better for the invite to come from you or the EM directly? I don't have a specific time yet but can provide that information for you when it is available. What do you think?

Kelly

You may have already seen this (below) blurb from MLive. Also, I had a call from Jerry A. He indicated Veolia is coming to the same conclusion that it may involve tweaking of the process vs some major undertaking. We will know more next week.

I have also attached a table Wayne's & Jerry's staff put together. My sense is there is still this thought that hooking back up to DWSD is cost neutral or nearly so. Hopefully this table shows that is not the case. The info is consistent with we sent you the other day i.e., there is an estimated 30% rate impact.

FLINT, MI – A water quality expert who has spent years working with environmentalist Erin Brockovich is expected to speak at two events in Flint Saturday, Feb. 14.
Robert W. Bowcock, founder of Integrated Resource Management, met with Mayor Dayne Walling, Councilman Wantwaz Davis and others Friday, Feb. 13.
Bowcock said earlier this week that he believes small treatment and distribution adjustments could help fix some of Flint's water quality problems. He toured the city's water treatment plant Friday.
Walling declined to comment on his conversation with Bowcock, but city Councilman Eric Mays said he is anxious to hear his assessment and recommendations.

Davis said Bowcock was straightforward in giving his opinion that the city can cut back on some of the chemicals being used to treat water.

City spokesman Jason Lorenz issued a statement, saying, "The city of Flint honored a request for a tour of its water treatment plant submitted by Mr. Bowcock, as it has done with individuals and groups in the past.

"(Director of Public Works) Director Howard Croft and F-1 Licensed Treatment Operator Mike Glasgow guided the tour and answered all of Mr. Bowcock's questions. Tours of the Water Treatment Plant can be arranged by appointment for interested groups by calling 810-787-6537."

Bowcock is scheduled to join in a march for water quality through downtown Flint, which is planned to begin at 1 p.m. Saturday at Flint City Hall, 1101 S. Saginaw St., and end at The Durant.

Bowcock is also scheduled to speak at a forum at the Saints of God Church, 2200 Forest Hill Ave., Flint, from 3-4:15 p.m.

Brockovich, portrayed by Julia Roberts in a 2000 movie about her fight over the pollution of a California town, has been speaking out on Facebook about Flint's water issues for several weeks. Today, she posted a photo of Bowcock, Davis and march organizer Melissa Mays inside the Flint water plant, saying she was "so honored this community would seek my help ... and I am glad I could send Bob to get it done."

In addition to customer complaints about the price and quality of the water, there were several boil water advisories in Flint in 2014 and the city was found in violation of the Safe Drinking Water Act for excess total trihalomethanes in the water supply last year.

The city began using the Flint River as its source of drinking water in April after 50 years of handling only the distribution of already-treated Lake Huron water purchased from the Detroit Water and Sewerage Department.

Since that time, some citizens and members of the City Council have advocated abandoning the use of the river and purchasing lake water from the Detroit until the Karegnondi Water Authority pipeline is complete.

The city and Genesee County are partners in the KWA.

> When Flint left, the annual revenue profile for the Water System was initially reduced by $12.5 million, However, we immediately recalculated the rate for Genesee County (recognizing their higher demands), to effectively "claw back" about $2 million of the reduction, so the net Flint impact is ~ $10.5 million, or just under 2.5% of the (reduced) Water System rate revenue. Assuming that same amount could be replaced, and all else being equal, the "system rate increase" could be reduced by about 3 percent, with a bit more of the reduction occurring in the suburban wholesale rate structure. Safe to say that (again, absent any other changes) the average suburban water rate increase would be closer to 8 percent compared to the current 11.1%.

However, it would seem to me that in a fixed cost system such as water, if Flint were to be hooked up again at the $847K / month cited in Ms. McCormick's January 12th memorandum and after the release of the rates yesterday, bringing Flint back would – on a marginal cost basis –

serve to mitigate the wholesale (suburban) customer rate increase of 11.1% cited in yesterday's presentation. Without going into a whole lot of detailed calculations (unless necessary), what would the impact of the inclusion of Flint starting say on July 1, 2015 (hypothetical date) be on the rate increase presently now in the public? A revised increase of what – 10.6% - looking for a high level sensitivity analysis here. Can you help? RJD

Tom,
What are the total revenues collected from water and sewer rates for the following months: 9/14, 10/14, 11/14, 12/14?

To get a handle on the last table you sent Friday that was attached to your communication below, I attached an excel spreadsheet to help me understand this better. The yellow highlighted cell is where I need data filled in. I broke up the potential reduction ($3m and $8.4m) and spread them into the monthly and annual even though is sounds like the $8.4 million for professional services is a one-time or short-term expense. The pink highlight is the % increase in rates base on the table you sent last Friday which is different from the 24% rate increase I calculated…so where did I error?

Assuming there are fixed costs in the current rates via the Flint river, what are they?

Thanks,
Harvey

>
> Some background:
> When Flint left, the annual revenue profile for the Water System was initially reduced by $12.5 million, However, we immediately recalculated the rate for Genesee County (recognizing their higher demands), to effectively "claw back" about $2 million of the reduction, so the net Flint impact is ~ $10.5 million, or just under 2.5% of the (reduced) Water System rate revenue. Assuming that same amount could be replaced, and all else being equal, the "system

rate increase" could be reduced by about 3 percent, with a bit more of the reduction occurring in the suburban wholesale rate structure. Safe to say that (again, absent any other changes) the average suburban water rate increase would be closer to 8 percent compared to the current 11.1%.

Hope this helps . . .

> Nikki / Bart – don't need a hard and fast number on this. However, it would seem to me that in a fixed cost system such as water, if Flint were to be hooked up again at the $847K / month cited in Ms. McCormick's January 12th memorandum and after the release of the rates yesterday, bringing Flint back would – on a marginal cost basis – serve to mitigate the wholesale (suburban) customer rate increase of 11.1% cited in yesterday's presentation. Without going into a whole lot of detailed calculations (unless necessary), what would the impact of the inclusion of Flint starting say on July 1, 2015 (hypothetical date) be on the rate increase presently now in the public? A revised increase of what – 10.6% - looking for a high level sensitivity analysis here. Can you help? RJD

Subject: RE: Flint Water Cost Analysis

Ms. Murphy,
Thank you. The calculations in the table was provided by treasury and I was seeking clarification. I am not a water expert, but I learned that typically, most rates have two components.

1. Fixed-cost recovery charge
This charge is based on the size of the water meter at the home or business. Most residential customers will have a meter between 5/8$^{th's}$ of an inch and 1 inch.

2. Consumption Charge
This charge is based on the amount of water used. The rate for usage is determined by the distance and elevation of the home or business from the water source.

MCF is used in many place for calculating rates; however, since Flint is currently not using this calculation, what are the cost components that make up the $149 avg. monthly charge to the resident?

Best,
Harvey

Mr. Hollins,
Jerry Ambrose asked me to respond to your request for more information on the Flint water cost analysis chart which you sent him yesterday. Please see the attached chart; it contains an added analysis by Jerry. The sections for which you asked for data can not be provided as we don't calculate prices in the manner you are comparing.

Jerry's chart clearly represents what Flint has been talking about - a major increase in water rates would be necessary to pay the additional charge to purchase DWSD water.

Jerry,
Thank you very much. I believe 1MCF equals 7480 gallons of water. If that is true then 10 units = 1 MCF.
Best,
Harvey

On Feb 20, 2015, at 1:40 PM, Gerald Ambrose <gambrose@cityofflint.com> wrote:
Harvey,

Quick response, subject to verification by Liz Murphy:

Components of the average charge:

$ 57.38 fixed-cost recovery charge
$ 91.63 consumption charge
$149.01

Consumption charge based on 7 units of water @$13.09 per unit

1 unit = 748 gallons of water

There may be a way to convert a unit into an MCF, but I do not know it.

Good morning Harvey,

Glad to know that you have agreed to participate on the Advisory Committee. We have more than 40 individuals who have agreed to participate.

We extended an invitation to Rev. Harris as head of the Concerned Pastors on February 16. However, we did not receive any response. This morning we sent a notice of the meeting to all who were initially invited, including Rev. Harris. Can you confirm that Rev. Harris received the invitation and whether or not he or his designee will be participating?

Thanks!

Thank you for your interest in participating in the Flint Water Advisory Committee. This committee has been formed to enhance the two-way communication between the City of Flint and our residents, businesses, and organizations. The committee will be made up of about 40 people who represent a wide variety of entities.

The first meeting will be held on **Thursday, March 5 from 2-4pm at the MTA Auditorium 1401 S. Dort Hwy. 48503**. This meeting will be facilitated and will be open to the public.

We look forward to your attendance and participation.

Subject: FW: Tap Filters

Harvey,
Since group call Tuesday I have been working out how the filter idea might take shape.

To reiterate some key points so we're all clear:

1. DEQ does not inspect individuals' homes in a situation like this. It's the city's system, their operators handle all complaints and maintenance. In fact, our folks alerted me that the city's got union rules in place forbidding any contractor from touching the system.
2. DEQ's role is limited to ensuring the plant is operating to state standards and the water it produces meets potability standards. The aesthetic issues drawing concern from residents -- color, odor, taste -- stem from a variety of things. Age of the system and prolonged lack of upkeep is the leading factor. But in some areas, another contributing factor is changes in water flow -- source used to come from the south, now comes from the north, so some pipes are flowing in reverse, stirring up whatever was settled for a long time. In some sections, large pipes that historically served large communities are now serving a much smaller customer base, contributing to water stagnating in the system. In some areas, household connections are old and worn, so two neighbors may be having dramatically different experiences. My point is, the challenge takes many forms and there's no single solution that will bring sweeping change. The two consultants hired by the city have, as I understand it, both reinforced this idea in their assessments, so that's good.

3. The fix for this will be years in the making, truly. Even if full funding were available, 'big dig' projects can't all happen at once. The city needs to get an assessment of its infrastructure so it can prioritize its needs, and I understand they're working on that. In the near term, maintenance this spring / summer -- things like cleaning the pipes in key sections and flushing the system via the

hydrants – could offer some short term results. I know nobody wants to just wait for spring, but that is something important to keep in mind.

4. In the meantime, the group discussed possibly making home water filters available somehow. The National Safety Foundation is a Michigan company, headquartered and founded in Ann Arbor, that develops standards for all kinds of infrastructure. They're a globally recognized source for standard setting. A look at their site reveals there are myriad filtration options on the market and within each type (faucet mounted, whole house line filters, etc) there are filters that focus on different aspects of purification.

   If this idea begins to get legs, I'd suggest testing some different models on the local water at the customer level to see if they work. I'd also suggest the idea be focused on tap-mounted models to promote clean, appealing drinking water. And I'd suggest this program could be funded in whole or in part by the state, but would need to be administered by the city (reinforcing the fact that they own, operate and service the system). I've got some information on filter models below.

   Two more considerations: One, while the state has provided residents in some communities with bottled water in the past, it always has to do with their water being somehow contaminated – as in, some kind of chemical plume that impaired local drinking water sources. This would be the first time the state took steps to deal with what is an aesthetic issue on a system where the water is meeting state drinking water standards.

Water filter info:
ANSI NSF Standard 42 Covers bacteriostasis, taste and odor (associated only with chlorine removal), and other aesthetic conditions
http://standards.nsf.org/apps/group_public/download.php/19895/NSF_42-11%20-%20watermarked.pdf

ANSI NSF Standard 53 Covers health effects removal
http://standards.nsf.org/apps/group_public/download.php/19896/NSF_53-11a%20-%20watermarked.pdf

It is important to note that the filters are not required to meet all aspects of the standard, only the portions they want to make claims for. So product information for each filter must be reviewed to determine its applicability.

Most of these point of use filters are basic activated carbon filters that simply remove taste and odor specifically associated with chlorine, not other things like iron, manganese, hydrogen sulfide, etc. that can also impact taste and odor as well as color.

It is important to recognize that taste and odor is generally an individual preference and such standards have for the most part not been developed because groups of individuals may still consider taste and odor issues to exist even after levels for such a standard have been met.

Other considerations are that the test water for such filters attempting to meet the standard uses hardness levels of 170 mg/L or less. Flint's water at times may be above this level, which could then impact filter performance and longevity.

Most of these filters are designed to be replaced after 100 gallons or less of use, a period of about 3 months for most households. In addition the tests allow for initial pressure drops of up to 15 psi. This may limit use in households that already rely on minimum pressure within their household plumbing.

Regarding the health effects standards, as the Flint water system already meets such requirements, with the exception of the current TTHM locational running annual average, there is little point to the use of these filters for such a purpose.

To the point you'd asked about the other day, while Flint and Detroit are leading examples of unmaintained infrastructure, Flint is not alone by any means.

This recent infrastructure report card
http://www.infrastructurereportcard.org/michigan/michigan-overview/
Lists Michigan with a $13.8 Billion need over the next 20 years.

http://www.infrastructurereportcard.org/a/#p/state-facts/michigan

Here's a link to the 2009 Report Card for Michigan Infrastructure
http://www.michiganreportcard.com/

From the report:

"A significant portion of the state's primary distribution system is nearing 100 years old. CWS are facing a significant challenge to maintain the vast network of aging, underground infrastructure. Within the city of Detroit alone, approximately 80% of its distribution piping was installed prior to 1940, which is not unusual for CWS in Michigan."

"The age of the majority of the state's distribution system is the primary contributor to normal decay and failure. In many cases, pipe life has far exceeded useful service life. Much of the older water systems consist of undersized mains constructed of materials such as unlined cast iron pipe. Minor fluctuations in system flows or pressure may cause red water complaints and even result in pipe failure. All CWS should have routine flushing and valve maintenance programs; however many are hesitant due to the time and cost."

"Under the Stage 2 Disinfection Byproducts Rule, all CWS that disinfect are required to provide increased trihalomethane (THHM) and haloacetic acid (HAA5) monitoring due to the potential byproducts of chlorine reactions within the pipe system. Corrosion, scale, solid suspension on the interior sidewall of pipe, in addition to the age and condition of the system will require diligent rehabilitation investment to maintain system integrity."

"While better materials and advanced technology is available to replace the aging distribution system, resources remain scarce when compared with the magnitude of the rehabilitation task at hand. Too often, distribution system replacement costs are underfunded and the first item to be slashed when budget problems arise. Overall, distribution system maintenance is reactionary in much of the older systems. Since the majority of the antiquated system will require removal and replacement beyond the

CWS funding resources for systematic upgrade, a reactionary rehabilitation program is inevitable and must be funded accordingly."

Call or email me if you need anything further.

> To reiterate some key points so we're all clear:
>
> 1. DEQ does not inspect individuals' homes in a situation like this. It's the city's system, their operators handle all complaints and maintenance. In fact, our folks alerted me that the city's got union rules in place forbidding any contractor from touching the system.
> 2. DEQ's role is limited to ensuring the plant is operating to state standards and the water it produces meets potability standards. The aesthetic issues drawing concern from residents – color, odor, taste – stem from a variety of things. Age of the system and prolonged lack of upkeep is the leading factor. But in some areas, another contributing factor is changes in water flow – source used to come from the south, now comes from the north, so some pipes are flowing in reverse, stirring up whatever was settled for a long time. In some sections, large pipes that historically served large communities are now serving a much smaller customer base, contributing to water stagnating in the system. In some areas, household connections are old and worn, so two neighbors may be having dramatically different experiences. My point is, the challenge takes many forms and there's no single solution that will bring sweeping change. The two consultants hired by the city have, as I understand it, both reinforced this idea in their assessments, so that's good.
>
> 3. The fix for this will be years in the making, truly. Even if full funding were available, 'big dig' projects can't all happen at once. The city needs to get an assessment of its infrastructure so it can prioritize its needs, and I understand

they're working on that. In the near term, maintenance this spring / summer – things like cleaning the pipes in key sections and flushing the system via the hydrants – could offer some short term results. I know nobody wants to just wait for spring, but that is something important to keep in mind.

4. In the meantime, the group discussed possibly making home water filters available somehow. The National Safety Foundation is a Michigan company, headquartered and founded in Ann Arbor, that develops standards for all kinds of infrastructure. They're a globally recognized source for standard setting. A look at their site reveals there are myriad filtration options on the market and within each type (faucet mounted, whole house line filters, etc) there are filters that focus on different aspects of purification.

   If this idea begins to get legs, I'd suggest testing some different models on the local water at the customer level to see if they work. I'd also suggest the idea be focused on tap-mounted models to promote clean, appealing drinking water. And I'd suggest this program could be funded in whole or in part by the state, but would need to be administered by the city (reinforcing the fact that they own, operate and service the system). I've got some information on filter models below.

   Two more considerations: One, while the state has provided residents in some communities with bottled water in the past, it always has to do with their water being somehow contaminated – as in, some kind of chemical plume that impaired local drinking water sources. This would be the first time the state took steps to deal with what is an aesthetic issue on a system where the water is meeting state drinking water standards.

Water filter info:
ANSI NSF Standard 42 Covers bacteriostasis, taste and odor (associated only with chlorine removal), and other aesthetic conditions
http://standards.nsf.org/apps/group_public/download.php/19895/NSF_42-11%20-%20watermarked.pdf

ANSI NSF Standard 53 Covers health effects removal
http://standards.nsf.org/apps/group_public/download.php/19896/NSF_53-11a%20-%20watermarked.pdf

It is important to note that the filters are not required to meet all aspects of the standard, only the portions they want to make claims for. So product information for each filter must be reviewed to determine its applicability.

Most of these point of use filters are basic activated carbon filters that simply remove taste and odor specifically associated with chlorine, not other things like iron, manganese, hydrogen sulfide, etc. that can also impact taste and odor as well as color.

It is important to recognize that taste and odor is generally an individual preference and such standards have for the most part not been developed because groups of individuals may still consider taste and odor issues to exist even after levels for such a standard have been met.

Other considerations are that the test water for such filters attempting to meet the standard uses hardness levels of 170 mg/L or less. Flint's water at times may be above this level, which could then impact filter performance and longevity.

Most of these filters are designed to be replaced after 100 gallons or less of use, a period of about 3 months for most households. In addition the tests allow for initial pressure drops of up to 15 psi. This may limit use in households that already rely on minimum pressure within their household plumbing.

Regarding the health effects standards, as the Flint water system already meets such requirements, with the exception of the current TTHM locational running annual average, there is little point to the use of these filters for such a purpose.

To the point you'd asked about the other day, while Flint and Detroit are leading examples of unmaintained infrastructure, Flint is not alone by any means.

This recent infrastructure report card
http://www.infrastructurereportcard.org/michigan/michigan-overview/
Lists Michigan with a $13.8 Billion need over the next 20 years.

http://www.infrastructurereportcard.org/a/#p/state-facts/michigan

Here's a link to the 2009 Report Card for Michigan Infrastructure
http://www.michiganreportcard.com/

From the report:

"A significant portion of the state's primary distribution system is nearing 100 years old. CWS are facing a significant challenge to maintain the vast network of aging, underground infrastructure. Within the city of Detroit alone, approximately 80% of its distribution piping was installed prior to 1940, which is not unusual for CWS in Michigan."

"The age of the majority of the state's distribution system is the primary contributor to normal decay and failure. In many cases, pipe life has far exceeded useful service life. Much of the older water systems consist of undersized mains constructed of materials such as unlined cast iron pipe. Minor fluctuations in system flows or pressure may cause red water complaints and even result in pipe failure. All CWS should have routine flushing and valve maintenance programs; however many are hesitant due to the time and cost."

"Under the Stage 2 Disinfection Byproducts Rule, all CWS that disinfect are required to provide increased trihalomethane (THHM) and haloacetic acid (HAA5) monitoring due to the potential byproducts of chlorine reactions within the pipe system. Corrosion, scale, solid suspension on the interior sidewall of pipe, in addition to the age and condition of the system will require diligent rehabilitation investment to maintain system integrity."

"While better materials and advanced technology is available to replace the aging distribution system, resources remain scarce when compared with the magnitude of the rehabilitation task at hand. Too often, distribution system replacement costs are underfunded and the first item to be slashed when budget problems arise. Overall, distribution system maintenance is reactionary in much of the older systems. Since the

majority of the antiquated system will require removal and replacement beyond the CWS funding resources for systematic upgrade, a reactionary rehabilitation program is inevitable and must be funded accordingly."

Call or email me if you need anything further.

Flint Emergency Management Briefing

Before 2011

Flint has been devastated by decades of plant closings and mass layoffs in the auto industry. In 1970, GM employed 82,000 workers in the city. Now, there are less than 8,000. Over the same four decades, the population has gone from 193,000 to just over 100,000.

In 2002, the city of Flint attempted to avoid emergency management, by cutting $12 million, including closing a northside police precinct and halting ambulance service. However, the review team determined that a fiscal emergency existed in Flint, former Gov. John Engler later declared a financial emergency and the city was placed under state receivership. Governor Engler appointed Ed Kurtz, former president of a private business college, as emergency financial manager to oversee Flint's finances. A city audit five months into Kurtz's tenure revealed a $26.6 million deficit.

Before Kurtz was appointed, the city had eliminated it's ambulance and housing services. The cuts Kurtz initiated included: closing the city's recreation centers, cutting mayor and council pay, raising water bills 11%, and eliminating 54 jobs.

In 2004, Governor Granholm removed the emergency manager, but continued oversight through January 2006.

EM Administrations and governing public acts:

○ Ed Kurtz	2002-2004	PA 72
○ Michael Brown	2011-2012	PA 4 (PA 4 was suspended in 2012)
○ Ed Kurtz	2012-2013	PA 72 – PA 436
○ Michael Brown	2013	PA 436
○ Darnell Early	2013-2014	PA 436
○ Gerald Ambrose	2015	PA 436

Emergency Management after 2011

Achieved Benchmarks:

- Complete elimination of operating deficits through cost reductions and the implementation of financial best practices
- General Fund accumulated deficit reduction from 19.1 million in 2012 to approximately $7 million currently
- Flint City Lockup reopens for the first time since 2008. It can house up to 110 inmates for up to 72 hours and costs $2.1 million annually to operate.
- Workforce and employee compensation both have been reduced by 20%
- $850 million in unfunded OPEB liabilities has been reduced to $240 million
- A qualified city administrator has been hired.
- Consolidation of the city-funded 68th district court into the county funded 67th district court creating $800k in annual savings.
- Consolidation of 911 dispatch services into the county system. More than $1 million in annual savings.
- The City has adopted its first Master Plan since the 1960s.
- The City adopted a new Capital Improvement Plan.

- The City implemented a new methodology for blight.
- The City will request a $7 million emergency loan to fully eliminate its remaining General Fund Accumulated deficit.

Remaining Challenges:

- OPEB reductions are subject to a federal lawsuit. Loss of this legal action means an additional $5million annual OPEB expense.
- Future expense reductions are necessary to balance multi-year projections.
- The transition to KWA and maintenance of the aging water distribution infrastructure are important challenges which require significant funding and continued leadership.
- The City must reappraise all of the real property in the City prior to the 2018 Assessment Roll. This will be a costly, but necessary undertaking.

Flint Water Briefing

In November 2012 the Department of Treasury commissioned the firm of Tucker, Young, Jackson & Tull, Inc. (TYJT) to analyze options for the City of Flint to either remain a customer of the Detroit Water & Sewer Department (DWSD) or to join the Karegnondi Water Authority (KWA) in Genesee County. The purpose of this study was to provide objective analyses to the State Treasurer and Flint's Emergency Financial Manager (EFM) in order to secure future potable drinking water for the City.

In December 2012, staff from TYJT met with representatives from the Department of Treasury and the City of Flint to provide a preliminary report on their findings. At this meeting, options presented were: 1) Flint Water Plant will provide 100% water, 2) 100% provision of untreated Lake Huron Water by KWA, 3) 100% provision of treated drinking water by DWSD, or 4) provision of variable amounts of water from DWSD using a combination of blended DWSD water and Flint River water.

The Flint EFM eliminated all options except the 100% DWSD option or joining KWA, deciding later to join KWA.

On April 25, Flint officially ended nearly 50-years of using DWSD to supply water.

The city currently uses the Flint River until the Karegnondi Water Authority pipeline is built, which will bring untreated Lake Huron water to Genesee County. KWA should be operational by winter 2016.

The Flint river water is harder than DWSD. A number of residents are experiencing discoloration and order with the water. In addition there have been a number of citations largely around heighten levels of Total Trihalomethanes (TTHM).

Given water quality concerns, suggestions have been made that the City of Flint should return to using water purchased through the Detroit Water and Sewerage Department (DWSD). For many reasons, financial and otherwise, the City of Flint can ill-afford to switch courses at this point. The estimated cost to go back to the water provided by the DWSD is approximately $1 million per month and the City expects to be using the Karegnondi Water Authority (KWA) Lake Huron water within or before the 1st quarter of 2016.

The City of Flint is proceeding with a series of actions to ensure the continued safety of Flint drinking water is maintained and that issues of discoloration and odor continue to be addressed. Most notably, the installation of a Granulated Active Charcoal filter (GAC) at the Water Treatment Plant is expected to be authorized this week by Emergency Manager Jerry Ambrose.

The introduction of the GAC to the treatment process at Flint's plant will absorb or reduce the chemical precursors which will block or eliminate the formation of TTHM during the filtration process. Engineering and design are underway and installation of the GAC is targeted for completion by mid-July. Cost of this improvement is projected at $1.5 million and will be paid for by the proceeds from the state approved restructuring of the City's Drinking Water Revolving Fund loans.

In addition to the installation of the GAC, the City of Flint is undertaking a number of other improvements to the water system in the coming months, including a water leak detection monitoring, completion of the hydraulic model and subsequent targeted hydrant flushing program, and the replacement of two miles of water main pipe in a critical area of the city. All of these improvements scheduled to occur within the next six months.

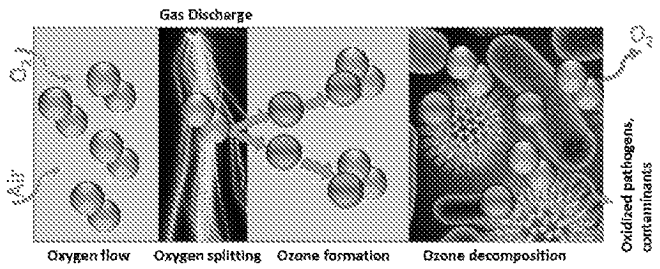
SonnioGlobal_Ozone disinfectio...

Brad Wurfel, Director of Communications (DEQ)

Chemical Free Water Disinfection by Ozone

Today about 98% of water treatment facilities in the U.S. use some form of chlorine to disinfect drinking water supplies. It is a cost effective method for destroying potentially harmful bacteria and viruses. However, chlorine's ability to interact with organic compounds in water leads to trihalomethanes (THMs) formation. Especially, river or lake water with high level of organic matter require heavy chlorination to combat high level of bacteria, resulting in dangerous levels of THMs and bad smell. THMs, when ingested can encourage the growth of free radicals that can destroy or damage vital cells in the body. Besides cancer, exposure to THMs has been linked to other health issues including asthma, eczema, heart disease and higher miscarriage and birth defect rates. Further, high level of chlorine also poses serious risk to the aging infrastructure.

Chemical free water disinfection technologies such as UV light and ozone have long been recognized to be much safer than chlorination, however, their high cost has prevented wider adoption. The basic mechanism of ozone generation and disinfection is shown in the picture. Ozone has a high oxidation potential (much higher than chlorine) and a superior response time compared to other sanitizing products. Its high oxidizing potential enables ozone to break down organic matters that chlorine cannot. Some pollutants can only be oxidized by ozone. For example, ***Cryptosporidium Parvum***, a drinking water pollutant, is resistant to most disinfectants, but is effectively destroyed by ozone. Most importantly, the emission from ozone is pure oxygen and it leaves no residues.



UV light is a competing non-chemical sterilization technique. Intense UV rays break down the sensitive RNA and/or DNA of microorganisms, thus preventing the organism from reproducing. Ozone, on the other hand, oxidizes the microorganisms, thus destroying their cells completely. UV sterilization being a line of sight process, to be effective, one needs to remove most of the suspended matter prior to the treatment. In contrast, ozone oxidizes the soil or particulate matter, changing or destroying the chemistry of the soiling materials such as organic compounds.

Despite the great benefits of ozone, its widespread adoption is limited due to the high total ownership cost of current commercial ozone generators. Somnio's $AiR_2O_3^{TM}$ ozone generator is a paradigm shift in ozone generation technology. The first and only commercial barrier less ozone generator eliminates the requirement of dielectric barriers and highly filtered dried oxygen (pure or enriched) supplies, which restrain current commercial ozone generators. This groundbreaking technology brings a market-competitive, robust, energy efficient, and scalable modular device that offers a financially attractive alternative with the capability of producing varying levels of ozone depending on the application at hand.

Producing ozone cost effectively is only part of the greater story of the far reaching benefits of ozone. Applying ozone effectively for a given application requires careful and intelligent design, sensing and monitoring. In addition to its revolutionary $AiR_2O_3^{TM}$ ozone generator, Somnio

collaborates with end users to provide complete and economical turnkey solutions. Somnio's current in-house test plant incorporates all necessary safety features and automation.

jlorenz@cityofflint.com
For Immediate Release
Water Advisory Committee to Hold Second Meeting at Flint Public Library on Thursday, March 19, 2015
Flint, Michigan – March 17, 2015 – The Water Advisory Committee formed to help aid in communication between the City and the community is holding its second meeting on Thursday, March 19, 2015 from 2:00-4:00pm at the Flint Public Library. The committee will be updated on the current status of improvements to the water system, the next steps to be taken including cost and timing estimates and formatted responses to questions asked at the previous meeting. In addition, the committee will be provided with a comprehensive budget overview with clear cost breakdowns.
The purpose of the Water Advisory Committee is to provide the community with ongoing information on the City's work to maintain a safe water supply and to improve quality. In addition to gathering information from the City to share during their interactions with the community, committee members will also be expected to share the concerns they receive from the community in order for those concerns to be addressed.
All meetings by the Water Advisory Committee will be open to the public and will be held at easily accessible locations throughout the city. Meetings will be held on a regular basis as work continues at least until the City is receiving its water from the Karegnondi Water Authority, which is anticipated to be in 2016.
Any group who has not received an invitation and who would like to have a member participate can send a request to mayor@cityofflint.com.
–END–

All,

I am sending everyone a copy of the press release that is being sent to the media this afternoon regarding the upcoming Flint Water Advisory Committee Meeting. Please take note that the venue for the meeting this Thursday March 19th is the Flint Public Library.

The meeting time is once again from 2:00 pm until 4:00 pm and we look forward to good participation.

Thank you,

--

Michigan leaders to announce action plan for Flint drinking water

Friday, Oct. 2 at 1:30 p.m.
Local, state and federal leaders will host a press conference to announce a comprehensive action plan for addressing drinking water concerns in Flint. Participants will include:
• Harvey Hollins, Director of the Office of Urban Initiatives for Gov. Rick Snyder
• Dan Wyant, Director for the Michigan Department of Environmental Quality
• Nick Lyon, Director for the Michigan Department of Health and Human Services
• Dr. Eden Wells, Chief Medical Executive for the Michigan Department of Health and Human Services
• Dayne Walling, Mayor of Flint
• Other local, state and federal officials

Location:
Kettering University, Innovation Center
1300 Bluff St.
Flint, MI 48504

Subject:	RDS - REMARKS (AHeaton) Press Conference Re: Flint Water
Location:	Mott Foundation Conference Center, 503 S. Saginaw, Flint
Start:	Thu 10/8/2015 10:00 AM
End:	Thu 10/8/2015 10:42 AM
Recurrence:	(none)
Meeting Status:	Accepted
Organizer:	GovCalendar
Required Attendees:	Agen, Jarrod (GOV); Biehl, Laura (GOV); Wyant, Dan (DEQ); Thelen, Mary Beth (DEQ); Hollins, Harvey (GOV); Clayton, Stacie (GOV); Lyon, Nick (DHHS); Grijalva, Nancy (DHHS)
Optional Attendees:	Heaton, Anna (GOV); Wurfel, Sara (GOV)

Purpose: Press conference regarding Flint water

Program Participants:
Flint Mayor Dayne Walling
DEQ Director Dan Wyant
DHHS Director Nick Lyon
Dr. Eden Wells, DHHS
Ridgeway White, Mott Foundation
Harvey Hollins
Sen. Jim Ananich

Non-Speaking Invitees: (all attendance unconfirmed)
Rep. Tim Greimel
Rep. Phil Phelps
Rep. Sheldon Neely
Flint City Councilmembers
Faith Based Community members
U of M Flint Chancellor Susan Borrego (RDS talked to 10/7/15 at the Higher Ed Summit)
Amy Hovey, Staff of Congressman Dan Kildee
Jamie Gaskin, CEO of Genesee County United Way
Tim Herman, CEO of Flint and Genesee Chamber of Commerce
Brian Larkin, Flint and Genesee Chamber of Commerce (fmr. EO staff)
Kathryn Thomas, VP of Communications for Mott Foundation
Neal Hegarty, VP of Programs for Mott Foundation
Kimberly Roberson, Director of Flint Area Grantmaking Program for Mott Foundation

Agenda:
10:00 AM – 10:01 AM Harvey Hollins kicks off press conference; introduces Governor
10:01 AM – 10:05 AM Governor gives remarks
10:05 AM – 10:06 AM Harvey Hollins introduces Mayor Dayne Walling
10:06 AM – 10:10 AM Mayor Walling gives remarks
10:10 AM – 10:11 AM Harvey Hollins introduces DEQ Director Dan Wyant

10:11 AM – 10:15 AM	Director Wyant gives remarks
10:15 AM – 10:16 AM	Harvey Hollins introduces DHHS Director Nick Lyon
10:16 AM – 10:17 AM	Director Nick Lyon brief comments, introduces Dr. Eden Wells
10:17 AM – 10:20 AM	Dr. Eden Wells remarks
10:20 AM – 10:21 AM	Harvey Hollins introduces Senator Jim Ananich
10:21 AM – 10:26 AM	Senator Jim Ananich remarks
10:26 AM – 10:27 AM	Harvey Hollins introduces Ridgway White of Mott Foundation
10:27 AM – 10:32 AM	Ridgway White gives remarks
10:32 AM – 10:42 AM	Q&A from the podium (SW to moderate)
10:42 AM	Event concludes; Governor departs

OPEN Press

High level points:

- Protecting the health and safety of our residents in Flint and across Michigan is always our top priority.
    - All Michigan residents need access to safe, clean water
- That's why today, in consultation with health and water experts in our state agencies, I'm advocating reconnecting the Flint drinking water with the Great Lakes Water Authority.
- I'm recommending to my partners in the Legislature that the state government provide $6 million of the needed $12 million to reconnect with authority.
    - The Flint city government has agreed to cover $2 million of this cost, and the Charles Stewart Mott Foundation is generously offered to donate $4 million.
- What you are seeing here today is a community coming together to work toward solving a problem.
    - I appreciate the assistance of Mayor Walling, and the U.S. Environmental Protection Agency.
    - This is a collaborative approach, and I appreciate that community organizations including the United Way and come forward to assist.

Briefing: Flint Water System Press Conference
Thursday, Oct. 8, 2015
Mott Foundation/Commerce Center Building Ground Floor
519 S. Saginaw St., Flint
Communications: Sara Wurfel, 517-599-3470, wurfels@michigan.gov
Dave Murray, 517-449-8343, murrayd1@michigan.gov

Purpose:

We're announcing the decision to reconnect Flint to the Detroit Water and Sewerage Department, a collaborative effort between the state government, Flint city government and the Mott Foundation.

High level points:

- Protecting the health and safety of our residents in Flint and across Michigan is always our top priority.
    - All Michigan residents need access to safe, clean water.

- That's why today, in consultation with health and water experts in our state agencies, I'm advocating reconnecting the Flint drinking water with the Great Lakes Water Authority.

- I'm recommending to my partners in the Legislature that the state government provide $6 million of the needed $12 million to reconnect with authority.
    - The Flint city government has agreed to cover $2 million of this cost, and the Charles Stewart Mott Foundation is generously offered to donate $4 million.

- What you are seeing here today is a community coming together to work toward solving a problem.
    - I appreciate the assistance of Mayor Walling, and the U.S. Environmental Protection Agency.
    - This is a collaborative approach, and I appreciate that community organizations including the United Way and come forward to assist.

Agenda:

9:00 AM - 9:45 AM	Gov meets with Mayor Walling in [Room 1]
9:45 AM – 10:00 AM	Pre-Brief in [Room 2]
10:00 AM – 10:01 AM	Harvey Hollins kicks off press conference; introduces Governor
10:01 AM – 10:05 AM	Governor gives remarks
10:05 AM – 10:06 AM	Harvey Hollins introduces Mayor Dayne Walling
10:06 AM – 10:10 AM	Mayor Walling gives remarks
10:10 AM – 10:11 AM	Harvey Hollins introduces DEQ Director Dan Wyant
10:11 AM – 10:15 AM	Director Wyant gives remarks
10:15 AM – 10:16 AM	Harvey Hollins introduces DHHS Director Nick Lyon
10:16 AM – 10:17 AM	Director Nick Lyon introduces Dr. Eden Wells
10:17 AM – 10:20 AM	Dr. Eden Wells remarks
10:20 AM – 10:21 AM	Harvey Hollins introduces Ridgway White of Mott Foundation
10:21 AM – 10:25 AM	Ridgway White gives remarks
10:25 AM – 10:35 AM	Q&A from the podium
10:35 AM	Event concludes; Governor departs

Attendees: Roughly 20 in audience

Susan	Borrego	Chancellor, U of M Flint
Oscar	Overton	Pastor
Alfred	Harris	Pastor

Latrelle	Holmes	Pastor
Jim	Ananich	Michigan Senate
Sheldon	Neely	Michigan House
Phil	Phelps	Michigan House
Jeff	Wright	Drain Commissioner, Genesee County
Amy	Hovey	Dan Kildee office
Jamie	Gaskin	Dan Kildee office
Tim	Herman	Flint Chamber of Commerce
Brian	Larkin	Flint Chamber of Commerce
Eric	Mays	Flint City Council
Jacqueline	Poplar	Flint City Council
Kerry	Nelson	Flint City Council
Joshua	Freeman	Flint City Council
Wantwaz	Davis	Flint City Council
Herbert	Winfrey	Flint City Council
Monica	Galloway	Flint City Council
Vicki	VanBuren	Flint City Council
Scott	Kincaid	Flint City Council

Speaker comments:

RDS – Collaboration led to solution, outline of solution
Mayor Walling – Importance of solution to Flint
Dan Wyant – School testing results, overview of steps on transition from Flint River to DWSD
Nick Lyon – DHHS involvement
Dr. Eden Wells – Testing of water going forward, use of filters approved by NSF
Ridgway White – Importance of collaboration/commitment to Flint

Talking points:

- Protecting the health and safety of our residents in Flint and across Michigan is always our top priority.
    - All Michigan residents need access to safe, clean water

- That's why today, in consultation with health and water experts in our state agencies, I'm advocating reconnecting the Flint drinking water with the Great Lakes Water Authority.

- I'm recommending to my partners in the Legislature that the state government provide $6 million of the needed $12 million to reconnect with authority.
    - The Flint city government has agreed to cover $2 million of this cost, and the Charles Stewart Mott Foundation is generously offered to donate $4 million.
    - The Michigan Department of Health and Human Services and the Department of Environmental Quality today also is committing an additional $3.5 million for water filters, free lead testing through the state laboratory for Flint water customers, and hiring additional staff to conduct health exposure monitoring for lead in drinking water.

- What you are seeing here today is a community coming together to work toward solving a problem.
    - I appreciate the assistance of Mayor Walling, and the U.S. Environmental Protection Agency.
    - This is a collaborative approach, and I appreciate that community organizations including the United Way and come forward to assist.

- Today's announcement in an important step as we move forward together.
    - But it is not our first step, nor will it be our last.

        - This announcement builds on work we've already set in place.
            - That includes $4.2 million in state grants and loan restructuring to help identify and fix infrastructure problems.
            - State agencies have been working closely with Flint leaders and the community for more than a year.

- There will be more to do.
    - Flint has an aging water infrastructure system with challenges that we – together – will continue to address.

- We will continue to test Flint schools for lead levels in drinking water.
    - Schools across the state might also have questions.
    - The Department of Environmental Quality will work with districts across the state to provide testing.
        - Districts can send water samples and paperwork and the nominal charge. (It costs $26 per sample).

- The steps outlined in the comprehensive action plan are still in effect.

FAQs for Media Q&As

Switch to Great Lakes Water Authority

What finally pushed the state to this decision?

This was the City's request, and the Governor supports it, based on several key factors:
In the near term, DWSD water will be easier to manage. It comes from a more stable source than the river, it is fully optimized for corrosion control, and it is clear that residents of Flint have more confidence in this water source.

Will this solve Flint's water crisis?

In combination with the other short term, intermediate term and long-term steps outlined last week, this move represents a big step forward. Flint still has serious system maintenance challenges it must address.

If you're saying residents will still have lead because of their plumbing, does that mean every other city in this state has a lead problem?

Many areas of the state have lead in their infrastructure mix.

Where's the state getting the money to fund this?

We have submitted a formal request to lawmakers via the appropriations process.

Where's the city getting the money to fund this?

The city is contributing all it can, and is getting assistance for its match from the Mott Foundation.

How long will the switch take?

The switch will be completed by the City and Great lakes Water Authority, but our understanding is that it can be accomplished in the very near term once the arrangements are complete.

How long will it take before Detroit's corrosion controls provide protection for Flint?

It will take some time for the corrosion control additives to build on pipe walls throughout the system. Estimates vary. The state can assure we will commence monitoring of the system early 2016 and report results as we get them to keep the community updated.

Why do residents still need to use filters and bottled water?

The filters and bottled water are responsible precautions for any resident concerned about lead exposure.

Do the filters actually work? We've been hearing they don't protect for lead.

Yes, the filters work. They are all certified for lead removal by the National Sanitation Foundation.

The filters are only good for 100 gallons. What happens when they are used up?

They will need to be replaced. And residents can get a new filter.

What about restaurants?

What's going to be done about lead service lines?

Long term, this is the only permanent solution to lead exposure. The state has committed to helping the city accomplish this goal long term.

Do you wish you'd made this switch sooner?
We support the City's decision. We can't look backward. We feel the state has responded quickly and effectively as information has surfaced, been investigated and verified. While the City of Flint is, right now, in compliance with the federal Lead and
Copper Rule, we recognize there is a disparity between surveillance testing and other testing happening in the community that we need to better understand and we are working on developing our knowledge.

Schools testing

What do these results say?
The results say we need to further investigate Flint schools and help the schools find clearer causes for some the results we got.

Any theories about what's going on?
It is possible there are specific points in the plumbing that have lead components which need to be replaced, but we can't say anything definitively until we perform an investigation at each school.

Do the schools have lead service lines? If not, why are they getting such high results?
The schools we tested initially do not have lead service lines. There are a few possible reasons why lead is being detected at specific points in the buildings and not others. When we know things definitively, we will make the information public.

How long do the schools have to stay on bottled water? Just until the switch to Detroit, or longer term?
We are encouraging the schools to continue their current protective measures as a precaution until we can get into the buildings and get more answers.

Why did you only test 13 schools?
That was what the Flint Public Schools requested.

What happens to other schools?
We will test all the schools in Flint if they request it.

What about the schools that can't afford to update their entire plumbing systems?
This is why we are having plumbing assessments completed. There is no way to know yet what each building will require.

How confident are you in your testing? You've got results all over the map.
We are confident that our testing meets the requirements for the federal Lead and Copper Rule, which is surveillance monitoring. The bigger question is whether surveillance monitoring meets the public health protection standards that Lead Exposure Testing methods do. The EPA is working on that question now, and we are engaged in that dialogue.

What do you mean by "health exposure testing"? What are you doing next?

The 90th percentile of your results is still below 15 ppb. Does that make you more or less confident in your testing and in your protocols?

It makes us confident that the testing protocol delivers consistent results. But again, it does raise questions about whether this testing method shows what people think it does or what they really want to know, which is actual lead exposure from lead plumbing in a home.

Any idea how long kids have been exposed to lead? Was it before the move to the Flint River?
That is possible. We don't know.

How does the state bring this new information into the broader picture of kids' lead exposure across the state?

RICK SNYDER
GOVERNOR

STATE OF MICHIGAN
EXECUTIVE OFFICE
LANSING

BRIAN CALLEY
LT. GOVERNOR

CONTACTS:	FOR IMMEDIATE RELEASE
Sara Wurfel or Dave Murray Governor's Office: 517-335-6397 Brad Wurfel, 517-284-6713 Department of Environmental Quality Jennifer Eisner, 517-230-9804 Department of Health and Human Services	Thursday, Oct. 8, 2015

Gov. Rick Snyder: Move back to Detroit water provides best protection for public health in Flint

State, Mott Foundation and city form partnership to fund switch

FLINT, Mich. – Flint families and children will be better protected by reconnecting with the Great Lakes Water Authority as the source of the city's drinking water, Gov. Rick Snyder said.

Snyder said Thursday that he will request the state Legislature to provide half, or $6 million, of the $12 million needed to reconnect with the authority. The Flint city government will provide $2 million and the Charles Stewart Mott Foundation will donate $4 million.

"All Flint residents need clean, safe drinking water," Snyder said. "The technical experts helping the city on its water advisory all agree this move back to the Great Lakes Water Authority provides the best public health protection for children and families. This effort today is the result of people coming together to solve a problem. I appreciate Detroit's willingness to reconnect with Flint, the Mott Foundation's generous donation, and the dedication of all parties to come together to protect Flint families and children."

The Michigan Departments of Environmental Quality and Health and Human Services today also committed an additional $3.5 million for water filters, free lead testing through the state laboratory for Flint water customers, and hiring additional staff to conduct health exposure monitoring for lead in drinking water.

Flint city leaders requested the state's help to fund the reconnection after a Wednesday meeting of Flint's Technical Advisory Committee. Flint's move to the Great Lakes Water Authority is expected to cost about $1.3 million per month until the Karegnondi Water Authority is completed next summer.

INSERT MAYOR QUOTE HERE

The move to Detroit water, which is drawn from Lake Huron, carries many public health benefits. As large bodies of water, the Great Lakes are naturally prone to fewer problems from large rain events and other runoff issues that can be present in shallower rivers. Additionally, the Great Lakes Water Authority has already fully optimized its corrosion control, using phosphates to help coat the insides of pipes and prevent lead from leaching into the water.

However, reconnecting with the authority will not completely resolve the city's problem with lead service lines or aging infrastructure. It will take time for pipes in Flint to become coated with the phosphate corrosion control. Additionally, some households in the city could experience lead in their drinking water until all lead pipes and plumbing are replaced.

INSERT MOTT FOUNDATION QUOTE HERE

To best protect public health, Snyder said state and local authorities will continue to carry out steps outlined on Oct. 2 in a comprehensive action plan, including continued testing, the use of faucet filters and providing residents with accurate information about steps to eliminate lead exposure.

Free filters are available for current MDHHS clients at the 125 E. Union St. or 4809 Clio Road MDHHS office locations. For residents who are not currently enrolled in MDHHS assistance programs, free filters are available at the Genesee County Community Action Resource Department offices at 2727 Lippincott and 601 North Saginaw in Flint. Staff will be at all four locations from 9 a.m. to 4 p.m., Monday through Friday, to distribute filters and assist residents who have questions about proper installation. At the Lippincott location only, extended hours will be offered this weekend, including until 7 p.m. on Thursday and Friday and from 10 a.m. to 2 p.m. on Saturday.

Other good practices for residents concerned about lead include turning on the cold water tap and running the water until it's as cold as it will go. Additionally, only use cold water for cooking, drinking and especially mixing baby formula.

School test results released; more investigation planned

The state today also released the first results from its lead screening program in schools and homes. Of 37 total samples taken at 13 buildings, four samples spread over three buildings exceeded the federal action level of 15 parts per billion.

However, this sampling provides only an initial screen, and the state is committing to further testing water and inspecting plumbing at these schools. Until testing is complete, schools are advised to continue using bottled water and filtration as a precaution to protect children.

In addition, free testing is still available for any other Flint school, including daycares and Head Starts. Free testing is also available for any Flint resident.

Additional information, including more detailed lead screening results, is available at www.michigan.gov/flintwater.

On Sep 30, 2015, at 3:34 PM, Baird, Richard (GOV) <bairdr@michigan.gov<mailto:bairdr@michigan.gov>> wrote:

Frank:

We have a situation in Flint, Michigan that is beginning to get national attention and could be an opportunity for Home Depot. 18 months ago, Flint switched its water supply from Detroit Water (the distance and pumping costs of going uphill made it quite expensive) to the Flint River as a temporary answer, until they could finish the construction to get their water from Lake Huron (Karagondi Water System). The corrosive attributes of the River water have exacerbated the lead deposit leaching into homeowner pipes and there is concern around lead poisoning, especially for infants.

The corporate community is rallying to address the problem. Meijer donated 1500 water filters to low income residents and GM is about to announce a donation of between 5,000 and 10,000 filters. I do not yet know where GM is getting the filters from, but I was thinking that Home Depot might want to join the effort with a donation, supply chain discounting assistance, or some combination of activity that could help Flint residents. Harvey Hollins is our point person for this effort, since he is the Director of Urban Initiatives for Governor Snyder. I have copied him here.

If you could get this into the hands of the right people and see if there is interest in speaking with Harvey, I would be very appreciative. Thanks and take care.

Regards,

Rich

Hi Rich,

These are two documents that I think are helpful addressing the questions about lead and Flint water overall, prepared by DEQ and DHHS. These were intended for internal use, so please ask our partners to not share them beyond the people on their teams making the decisions.

Please let me know if you need anything else.

Frank,

Received your email from Craig. We would be glad to help.

Can you provide any additional information on filter sizes needed in the area and quantity you might be looking for?

We are also going to look to donate bottled water if that makes sense?

Subject: Flint Water Advisory Task Force Recommendation

Dear Governor Snyder:

We want to thank you for the recent conference call between members of the Flint Water Advisory Task Force (FWATF), yourself, and members of your administration. Attached is a follow-up letter to that conference call outlining an initial set of recommendations that we believe should be implemented in the very near future to focus the state's efforts to protect the public health in Flint.

We both acknowledge and appreciate your personal interest in this issue and your commitment, not only to assisting the Task Force in our review, but--most importantly--to ensuring that the full measure of state resources are brought forward to protect the public health in Flint and throughout the state.

Respectfully,

Ken Sikkema

ksikkema@pscinc.com

December 7, 2015

Dear Governor Snyder:

On Wednesday, November 18, 2015, the Flint Water Advisory Task Force met with representatives of the Michigan Department of Environmental Quality (MDEQ) and the Michigan Department of Health and Human Services (MDHHS) to discuss elements of the 10-point Action Plan designed to address various issues related to the ongoing public health protection challenges precipitated by lead in the Flint water supply. These discussions were held at our request as part of our task to make recommendations to prevent a similar occurrence in Flint or elsewhere, and also to monitor ongoing mitigation efforts.

Subsequent to those meetings, on Tuesday, November 24, 2015, members of the Task Force participated in a conference call with yourself, members of the Administration, and representatives of these agencies to discuss the progress to date on the 10-point Action Plan, as well as several other related issues.

We want to acknowledge the steps that have already been taken to implement the action plan, specifically in the areas of outreach efforts to facilitate blood lead testing for children, communication with health care providers in the Flint community about the importance of testing children for lead, and the training of additional public health nurses in the Genesee County Health Department. We do believe, however, that additional steps need to be taken to reach additional children for blood lead testing, assure proper follow-up with children found to have elevated blood lead levels, and to continue water testing. We will continue to assess state and local efforts and make recommendations regarding specific steps that we believe are warranted.

One primary concern we have at this point is that the current efforts appear to be taking place in the absence of a larger project coordination framework that measures results and clearly delineates responsibilities for continuing actions to protect public health. We believe the state is best positioned to facilitate this larger framework, which should address the following:

1. The need for MDHHS and MDEQ—and, possibly, other state agencies--to set **goals** for actions in collaboration with local and federal agencies and organizations.
2. The need for a set of corresponding **timelines** for the goals.
3. The need to establish **responsibility** for meeting the goals in a timely fashion and for **contingency plans** for the state if the goals are not being met.
4. The need for clear, regular **communication** with the Flint community and stakeholder groups regarding action steps and updates.

We also believe it important that a single person or entity—potentially independent of any one particular state agency and mutually agreeable to this Task Force and you, Governor—be established to provide effective coordination of ongoing activities and reporting on the status of mitigation measures. For this, we also believe a readily understood “dashboard” should be developed that reports on the goals, timelines and assignments. This will enable members of the Flint community, public health providers, and state agencies to know about the status of the Flint water crisis mitigation program, as well as promote coordination and accountability. The Task Force is prepared to assist in the development of that dashboard.

We believe it is vitally important that trusted members of the Flint community be engaged in communication on this issue, as well as the distribution of information conveyed by our suggested dashboard reporting. Accordingly, in advance of our final report, we would like to ensure the independent coordinator suggested above engage trusted community groups to begin rebuilding community trust in state actions.

We appreciate your personal interest in this issue, commitment to assisting the Task Force in our review, and—most importantly—commitment to ensuring that the full measure of state resources are brought forward to protect the public health in Flint and throughout the state.

Respectfully yours,

Flint Water Advisory Task Force:

Dr. Matt Davis

Chris Kolb

Dr. Larry Reynolds

Eric Rothstein

Good Afternoon,

Just double checking that you are attending Rich's meeting with Dr. Mona and Flint Water on **Monday, December 14th** at **11:00am** in the Governor's Conference Room, 2nd Floor Romney Building.

We will see you on Monday!

Thanks!

Virginia Manolakoudis

Executive Assistant to Richard Baird

Executive Office of Governor Rick Snyder

Subject: RE: Meeting with Dr. Mona Hanna-Attisha and Flint Water
Attachments: #flintwatercrisis Secondary Prevention Recommendations 121415.pdf

Mr. Baird and all the other guys,

It was a pleasure meeting everyone and a privilege to present to you all. As I said, we have an incredible and unique opportunity to mitigate the impact of this population-wide exposure. If we act now, proactively, we can buffer our kids from the life-altering impacts of lead poisoning.

Flint has many claims to fame (we put the world on wheels, we birthed Mr. Baird!, etc); and now, with your leadership, we can continue to build generations of strong, smart, and healthy children.

If I can be of any further assistance, please don't hesitate to contact me. Email or cell PPI

Thanks again, Mona

From: Baird, Richard (GOV) [bairdr@michigan.gov]
Sent: Thursday, December 10, 2015 2:27 PM
Required: Baird, Richard (GOV); Laurence Reynolds; Matthew M. Davis; Chris Kolb; Ken Sikkema; Chris De Witt; 'Eric Rothstein'; Lyon, Nick (DHHS); Grijalva, Nancy (DHHS); Mona Hanna-Attisha
Subject: Meeting with Dr. Mona Hanna-Attisha and Flint Water
When: Monday, December 14, 2015 11:00 AM-12:00 PM.
Where: Governor's Conference Room, 2nd Floor Romney Building, 111 S. Capitol Ave., Lansing, MI 48933

Good Morning,

This is to confirm the meeting with Rich Baird on **Monday, December 14** at **11:00 a.m.** in the Governor's Conference room, second floor Romney Building, 111 S. Capitol Ave. Lansing, MI 48933.

We are located at the George W. Romney Building, 111 S. Capitol Avenue, Lansing. The Romney Building is located directly across the street (Capitol Avenue) from the Capitol Building. There is some metered parking around the building. The closest parking facility is one block south at the corner of Capitol Avenue and Allegan Street (enter the parking facility from Capitol Avenue). https://www.parkme.com/lot/93032/tower-parking-ramp-lansing-mi

You will also want to have a picture I.D. handy for security in the Romney Building. Please let security know who you have a meeting with, they will call me and then send you up to the second floor.

Please let me know if you have any questions.

Thank you!

Virginia Manolakoudis

#flintwatercrisis

HURLEY CHILDREN'S HOSPITAL

Background & Secondary Prevention

Mona Hanna-Attisha MD MPH FAAP
Hurley Children's Hospital
Michigan State University College of Human Medicine

Agenda

HURLEY CHILDREN'S HOSPITAL

- Flint Water Timeline
- Lead Facts
- Hurley Research Findings
- Introduction to Toxic Stress
- Next steps – Secondary Prevention

Flint Drinking Water Crisis

HURLEY CHILDREN'S HOSPITAL

- Financial Emergency Managers
- Water switch to Flint River (April 2014)
- Fecal coliform and boil advisories *3 (Sept 2014)
- GM stopped using Flint water – corroding parts (Oct 2014)
- Disinfectant byproducts TTHM (Jan 2015-Sept 2015)

Flint Drinking Water Crisis

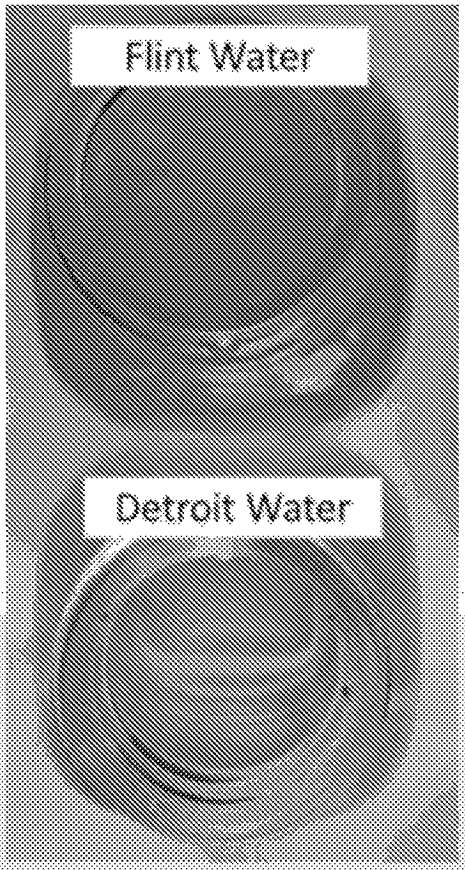
HURLEY CHILDREN'S HOSPITAL

- Perfect storm for lead leaching
  - Flint water more corrosive
  - Lack of corrosion control
  - Aging infrastructure (lead plumbing)
  - Decreased water use - population loss, high water rates

Flint Drinking Water Crisis

HURLEY CHILDREN'S HOSPITAL

- High lead levels detected, EPA contacted (February 2015)
- Leaked EPA memo (June 2015)
  - LeeAnn Walters WLL 13,200 ppb (toxic waste)
- Dr Marc Edwards, Virginia Tech Research (Aug 2015)
  - Flintwaterstudy.org
  - Corrosion & water lead
- Hurley Research (Sept 2015)



https://www.wsws.org/en/articles/2015/09/26/flin-s26.html

Why do we care about lead?

HURLEY CHILDREN'S HOSPITAL

- Lead is a potent neurotoxin with lifelong, multigenerational impacts
- Blood lead levels (BLL) 5 ug/dL or more considered elevated blood lead levels (EBLL)
- Just a few years ago (2012), 10 ug/dL was cutoff
- NO safe blood lead level
- Disproportionately impacts low income and minority children
- Primary prevention is most important

HURLEY MEDICAL CENTER

Primary Prevention

HURLEY CHILDREN'S HOSPITAL

- "Because no measurable level of blood lead is known to be without deleterious effects, and because once engendered, the effects appear to be irreversible in the absence of any other interventions, public health, environmental and housing policies should encourage PREVENTION of all exposure to lead."

"Low Level Lead Exposure Harms Children: A Renewed Call for Primary Prevention." 2012 CDC Advisory Committee on Childhood Lead Poisoning Prevention.

HURLEY MEDICAL CENTER

Impact on cognition

HURLEY CHILDREN'S HOSPITAL

- Vast evidence supports increased likelihood of:
  - Decrease in IQ
    - An increase in BLL from 1 to 4 ug/dL, drops mean IQ -3.7 points
  - Small change in mean IQ, shifts entire population IQ distribution
    - Reduces high achievers IQs (>130) and increases kids with low IQs (<70)
    - Implications for early intervention, special education services, employment, incarceration, life achievement, etc

Lanphear BP et al., Low-level environmental lead exposure and children's intellectual function: an international pooled analysis. Environ Health Perspect. 2005. 113:894-9.
Fewtrell LJ, Pruss-Ustun A, Landrigan P, and Ayuso-Mateos JL, Estimating the global burden of disease of mild mental retardation and cardiovascular diseases from environmental lead exposure. Environmental Research, 2004. 94:120-33.

Impact on behavior

HURLEY CHILDREN'S HOSPITAL

- Increased likelihood of :
  - ADHD behaviors
  - Delinquent behaviors and arrests
  - Total arrests and increased rates of arrests involving violent offenses
  - Other health effects: hematologic, cardiovascular, immunologic, endocrine, etc

Wright, JP, KN Dietrich, MD Ris, et al. 2008. Association of prenatal and childhood blood lead concentrations with criminal arrests in early adulthood. *PLoS Med* 5(5): e101
Chen, A, B Cai, KN Dietrich, et al. 2007. Lead exposure, IQ, and behavior in urban 5-7 year-olds: Does lead affect behavior only by lowering IQ? *Pediatrics* 119(3): e650-e658.
Needleman, HL, C McFarland, RB Ness, et al. 2002. Bone lead levels in adjudicated delinquents: A case control study. *Neurotoxicology and Teratology* 24(6):711-717.

HURLEY MEDICAL CENTER

Cost

HURLEY CHILDREN'S HOSPITAL

- "For childhood lead poisoning, $5.9 billion in medical care costs, as well as an additional **$50.9 billion** (sensitivity analysis: $44.8–$60.6 billion) per year in lost economic productivity resulting from reduced cognitive potential from preventable childhood lead exposure."

- "The present value of Michigan's economic losses attributable to lead exposure in the 2009 cohort of 5 year-olds ranges from $3.19 (using U.S. blood lead levels) to **$4.85 billion** (using Michigan blood lead levels) per year in loss of future lifetime earnings."

Leonardo Trasande and Yinghua Liu. Reducing The Staggering Costs Of Environmental Disease In Children, Estimated At $76.6 Billion In 2008. *Health Affairs*, 30, no.5 (2011):863-870

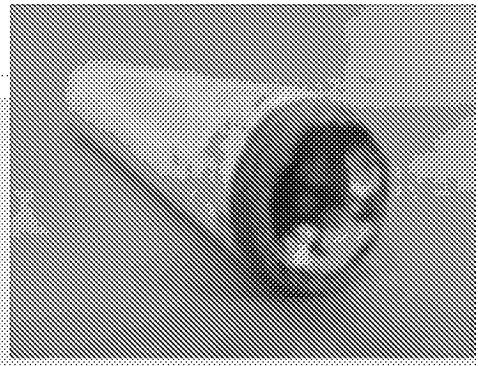
The Price of Pollution: Cost Estimates of Environment-Related Childhood Diseases in Michigan. 2010 Report by Michigan Network of Children's Environmental Health

HURLEY MEDICAL CENTER

Lead in Water

HURLEY CHILDREN'S HOSPITAL

- Not what medicine/public health used to
  - Lead paint obsessed
  - "drinking through a lead painted straw"
- Soluble metal – ingestion via particulate or dissolved in water
- Drinking and cooking risks



Lead in water

HURLEY CHILDREN'S HOSPITAL

- Disproportionally impacts developmentally-vulnerable formula-fed infants
  - For about 25% of infants drinking formula made from tap water at 10 ppb, blood lead would rise >= 5 ug/dL
- Significant risk to unborn babies
  - Increase in fetal deaths and reduced birth weights

Triantafyllidou, S., Gallagher. D. and Edwards, M. Assessing risk with increasingly stringent public health goals: the case of water lead and blood lead in children. Journal of Water and Health. doi: 10.2166/wh.2013.067 58-68 (2014).
Edwards, M. Fetal Death and Reduced Birth Rates Associated with Exposure to Lead-Contaminated Drinking Water. Env. Sci. and Tech. 2013 DOI: 10.1021/es4034952

HURLEY MEDICAL CENTER

HURLEY CHILDREN'S HOSPITAL

Hurley Children's RESEARCH FINDINGS

Sept 24

Medical Community Press Conference

HURLEY MEDICAL CENTER

Methods

HURLEY CHILDREN'S HOSPITAL

- HMC IRB approved
- Data from all blood lead levels processed at Hurley Medical Center
- ZIP code based
- Two periods of comparison (same seasons):
  - PRE-SWITCH: January 1, 2013 – September 15, 2013
    - WATER SWITCH APRIL 26, 2014
  - POST-SWITCH: January 1, 2015 – September 15, 2015
- Analyzed % Elevated Blood Lead (EBLL)
  - EBLL = Blood lead Levels >= 5 ug/dL

HURLEY MEDICAL CENTER

Initial Research Results

HURLEY CHILDREN'S HOSPITAL

- Zip code based (in media)

	ALL FLINT ZIPS (n=1746)	HIGH-WLL FLINT ZIPs (48503-48504) (n=742)	NON-FLINT ZIPS (n=1670)
PRE-SWITCH	2.1%	2.5%	0.6%
POST-SWITCH	4.0%	6.3%	1.0%

HURLEY MEDICAL CENTER

GEOcoded Analysis

HURLEY CHILDREN'S HOSPITAL

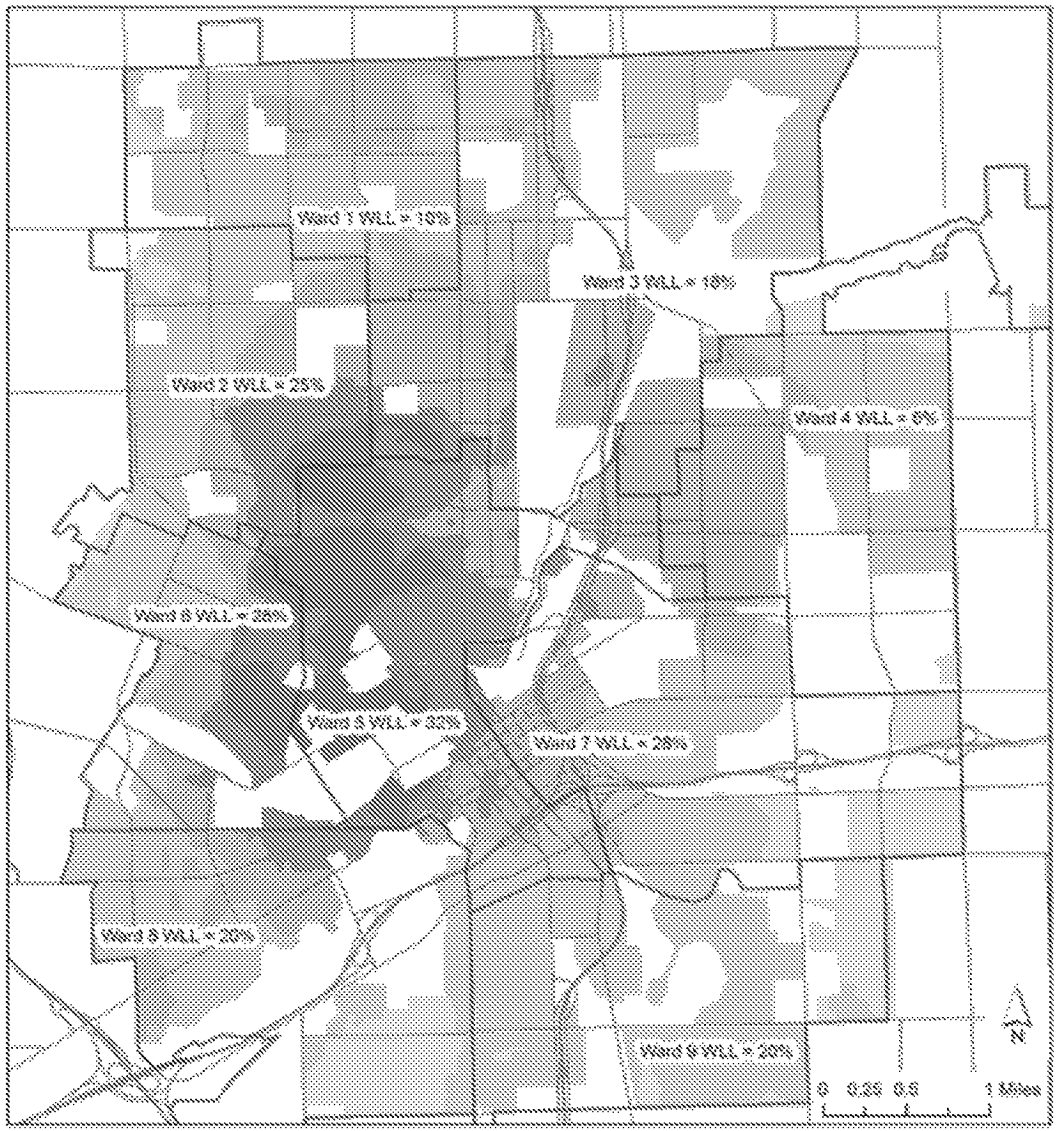
- N= 1473 for Flint water children (pre n=736, post n=737)
- N= 2202 for non-Flint water children (pre n=1210, post n=992)

Flint results for children 5 years and under:

- PRE-SWITCH % EBLL: **2.4%**
- POST-SWITCH % EBLL: **4.9%**
- **p < 0.05; STATISTICALLY SIGNIFICANT CHANGE**

HURLEY MEDICAL CENTER

HURLEY CHILDREN'S HOSPITAL



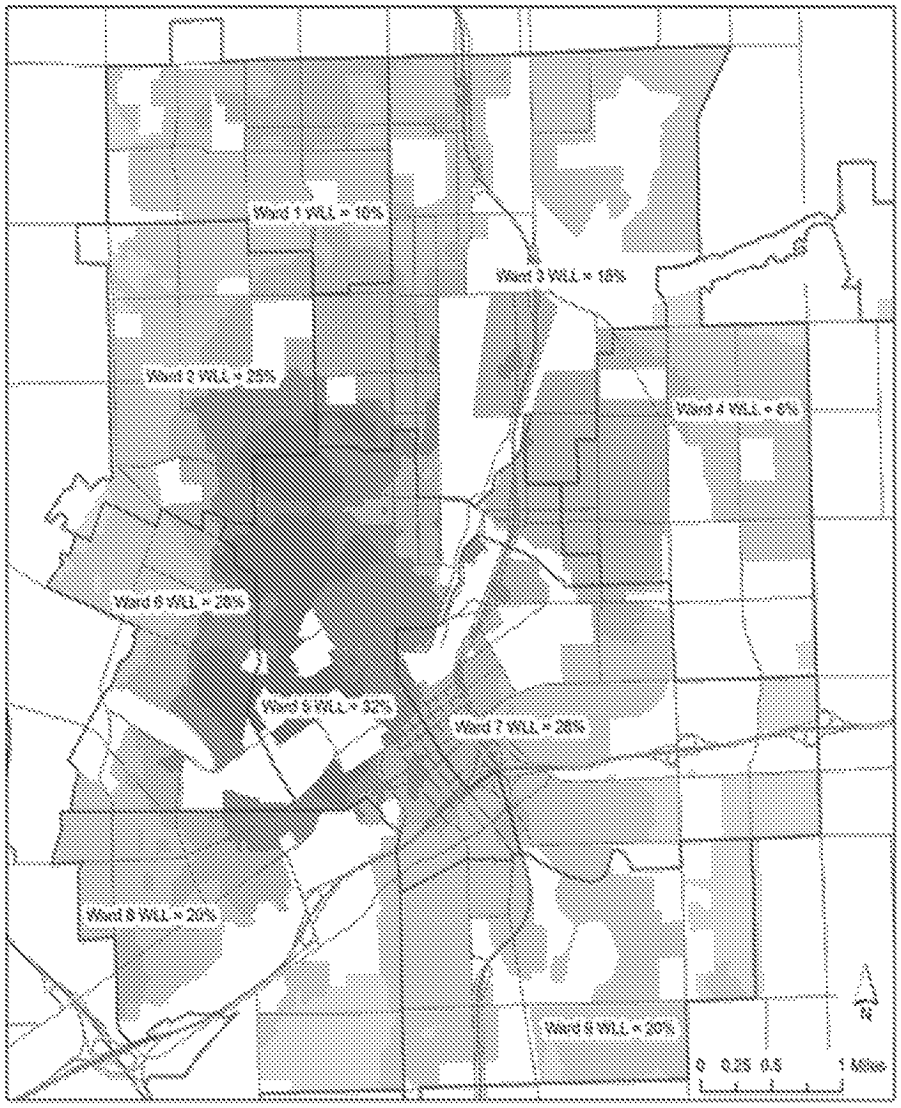
- Focus on high WLL wards (5, 6, 7); ie., those with high water lead levels

Results:

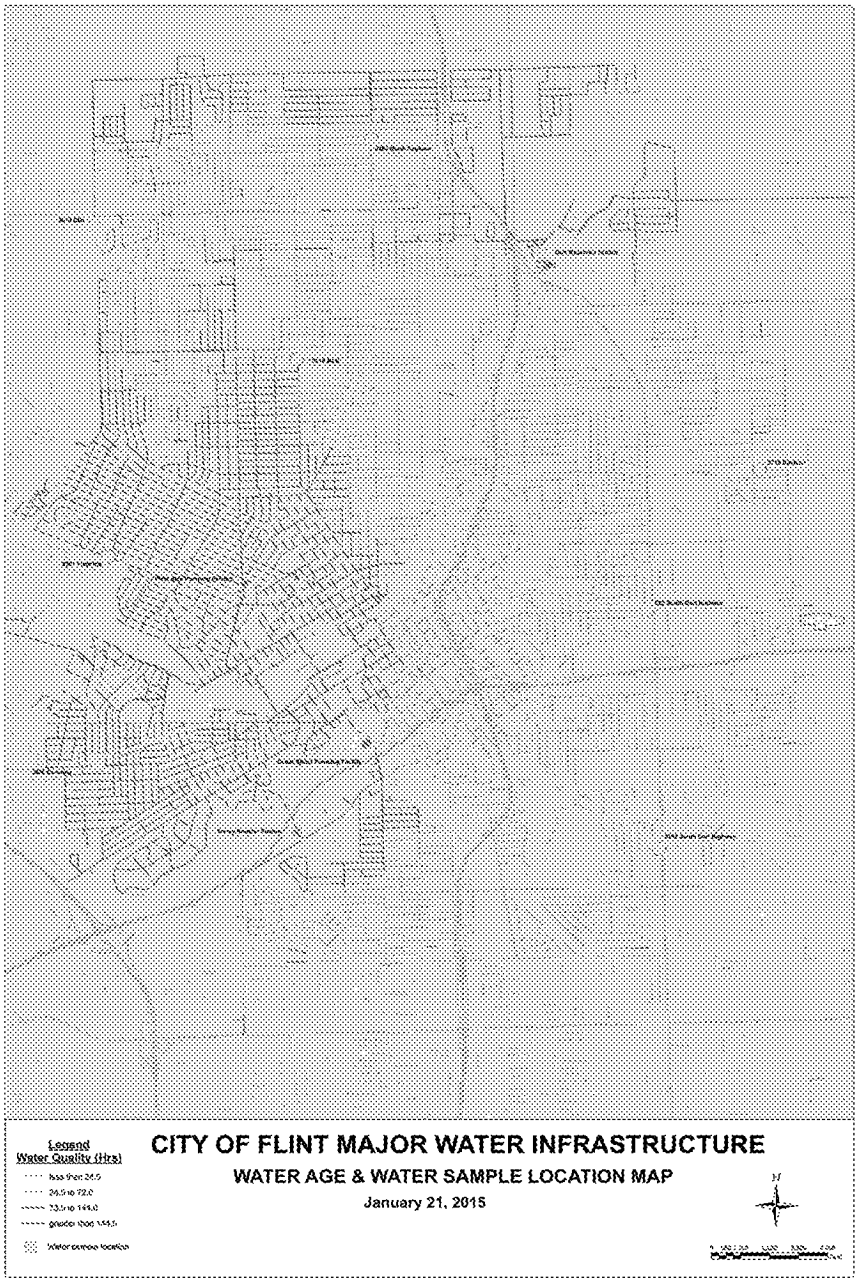
- PRE-SWITCH % EBLL: **4.0%**
- POST-SWITCH % EBLL: **10.6%**
- **$p < 0.05$; STATISTICALLY SIGNIFICANT CHANGE**

- Note: Hot spots between wards/zips

HURLEY MEDICAL CENTER



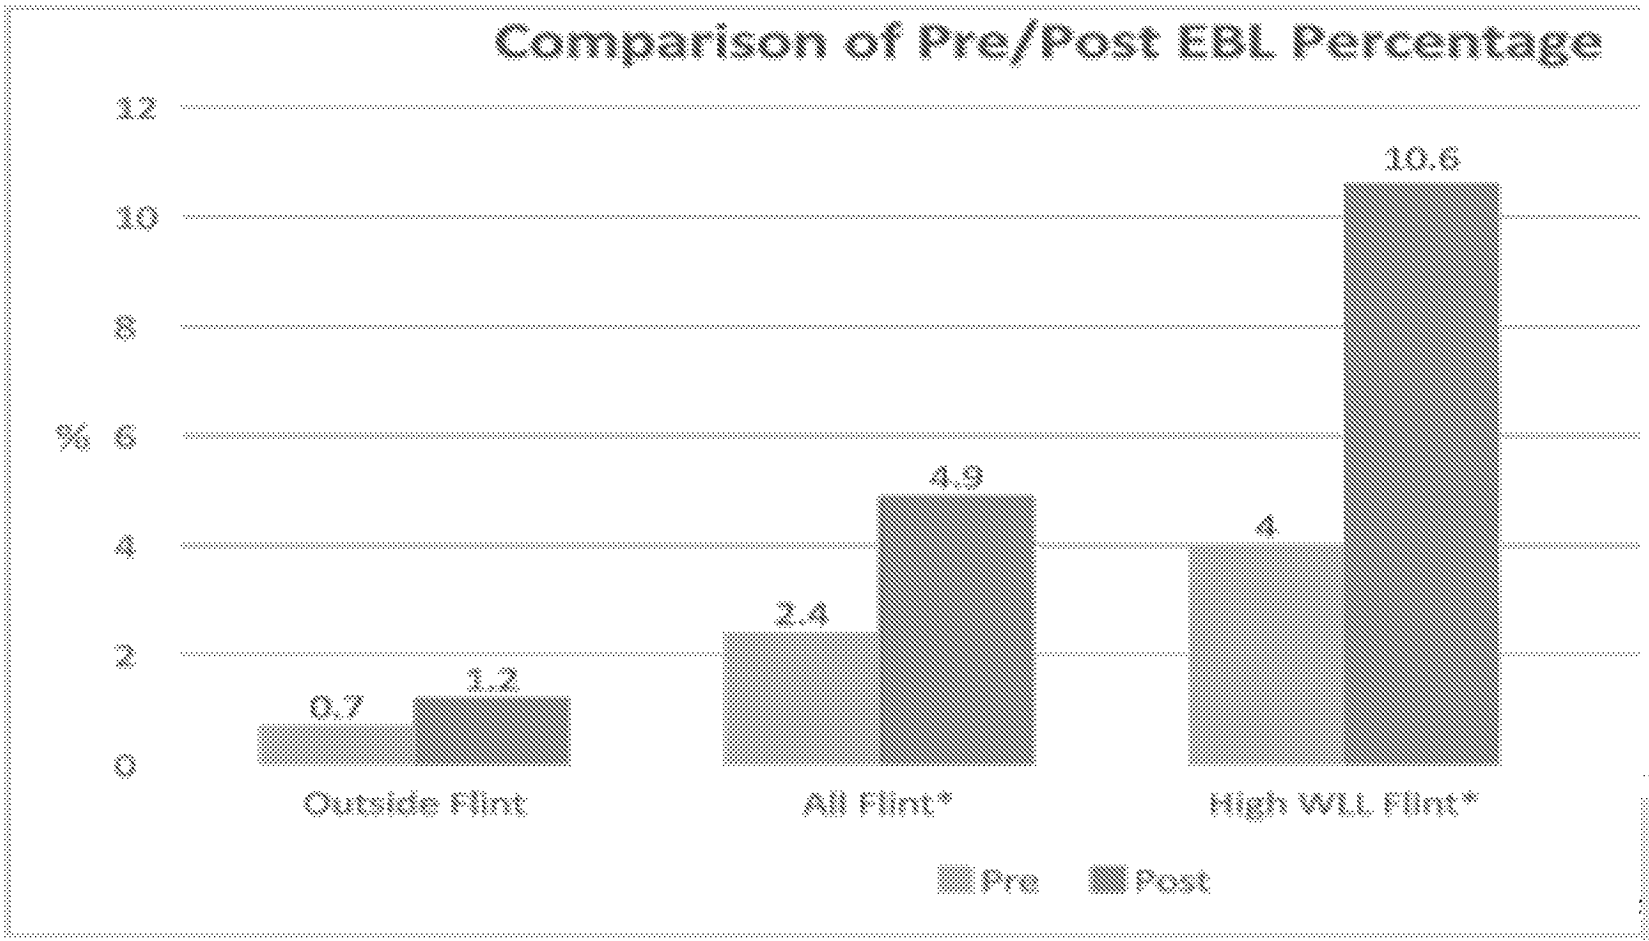
Ward 1 WLL = 16%
Ward 3 WLL = 18%
Ward 2 WLL = 25%
Ward 4 WLL = 6%
Ward 6 WLL = 26%
Ward 5 WLL = 32%
Ward 7 WLL = 28%
Ward 8 WLL = 20%
Ward 9 WLL = 30%
0 0.25 0.5 1 Miles
Flint City Wards
Major Streets
"Ward Y WLL = X.X%"
% of ward where any water sample exceeded 15 ppb
Predicted BLL based on Ordinary Kriging Geostatistical Analysis
0.7 - 0.75
0.76 - 1
1.01 - 1.25
1.26 - 1.5
1.51 - 1.75
1.76 - 2
2.01 - 2.25
2.26 - 2.5
2.51 - 2.75
2.76 - 3.36
*Non-residential zones screened from results



Legend
Water Quality (Hrs)
less than 24.0
24.0 to 72.0
72.0 to 144.0
greater than 144.0
Water service location
CITY OF FLINT MAJOR WATER INFRASTRUCTURE
WATER AGE & WATER SAMPLE LOCATION MAP
January 21, 2015

Pre/Post EBL

HURLEY CHILDREN'S HOSPITAL



*p<0.05

Research results

- % of children with EBLL in Flint zips increased
  - Most striking increase in areas with highest water lead levels
- **Results significantly underestimate exposure:**
  - Infants not screened for lead
  - BLL may have peaked before being measured (blood half life 20-30 days)
  - Kids exposed in different settings throughout city
- Widened disparities
- Failure of primary prevention

What happened next?

- Sept 25 City of Flint Lead Health Advisory
- Sept 29 GCHD Health Advisory
- Oct 1 GCHD Public Health Emergency
- Oct 2 State filter program, increased water testing, expedited corrosion control
  - Oct 3 First filter distribution
- Oct 8 Three schools toxic WLL, announced reconnection to DWSD
- Oct 16 Water switched back to DWSD

Epigenetics

HURLEY CHILDREN'S HOSPITAL

Wayne State Researchers Discover Evidence That Lead Exposure in Mothers Can Affect Future Generations

Released: 2-Oct-2015 3:05 PM EDT
Source Newsroom: Wayne State University Division of Research

"A team of researchers at Wayne State University have discovered that mothers with high levels of lead in their blood not only affect the fetal cells of their unborn children, but also their grandchildren. "

HURLEY MEDICAL CENTER

Now

- Preventable population-wide exposure
- Community traumatized
- Loss of trust in government and agencies
  - In 2015, in the middle of the great lakes, no guarantee of safe drinking water
- Ongoing public health emergency

Exposed Population

HURLEY CHILDREN'S HOSPITAL

- Currently identifying/labeling exposed population
- Cohort includes all children less than 6 years who at any time lived in Flint water limits (geocoded) from April 2014 to end date unknown (extend 9 months for fetal exposure).
- Per census data, approx. 8,000-9,000 children

HURLEY CHILDREN'S HOSPITAL

Quick Introduction to ACEs/Toxic Stress…

HURLEY MEDICAL CENTER

Adverse Childhood Experiences (ACEs)

HURLEY CHILDREN'S HOSPITAL

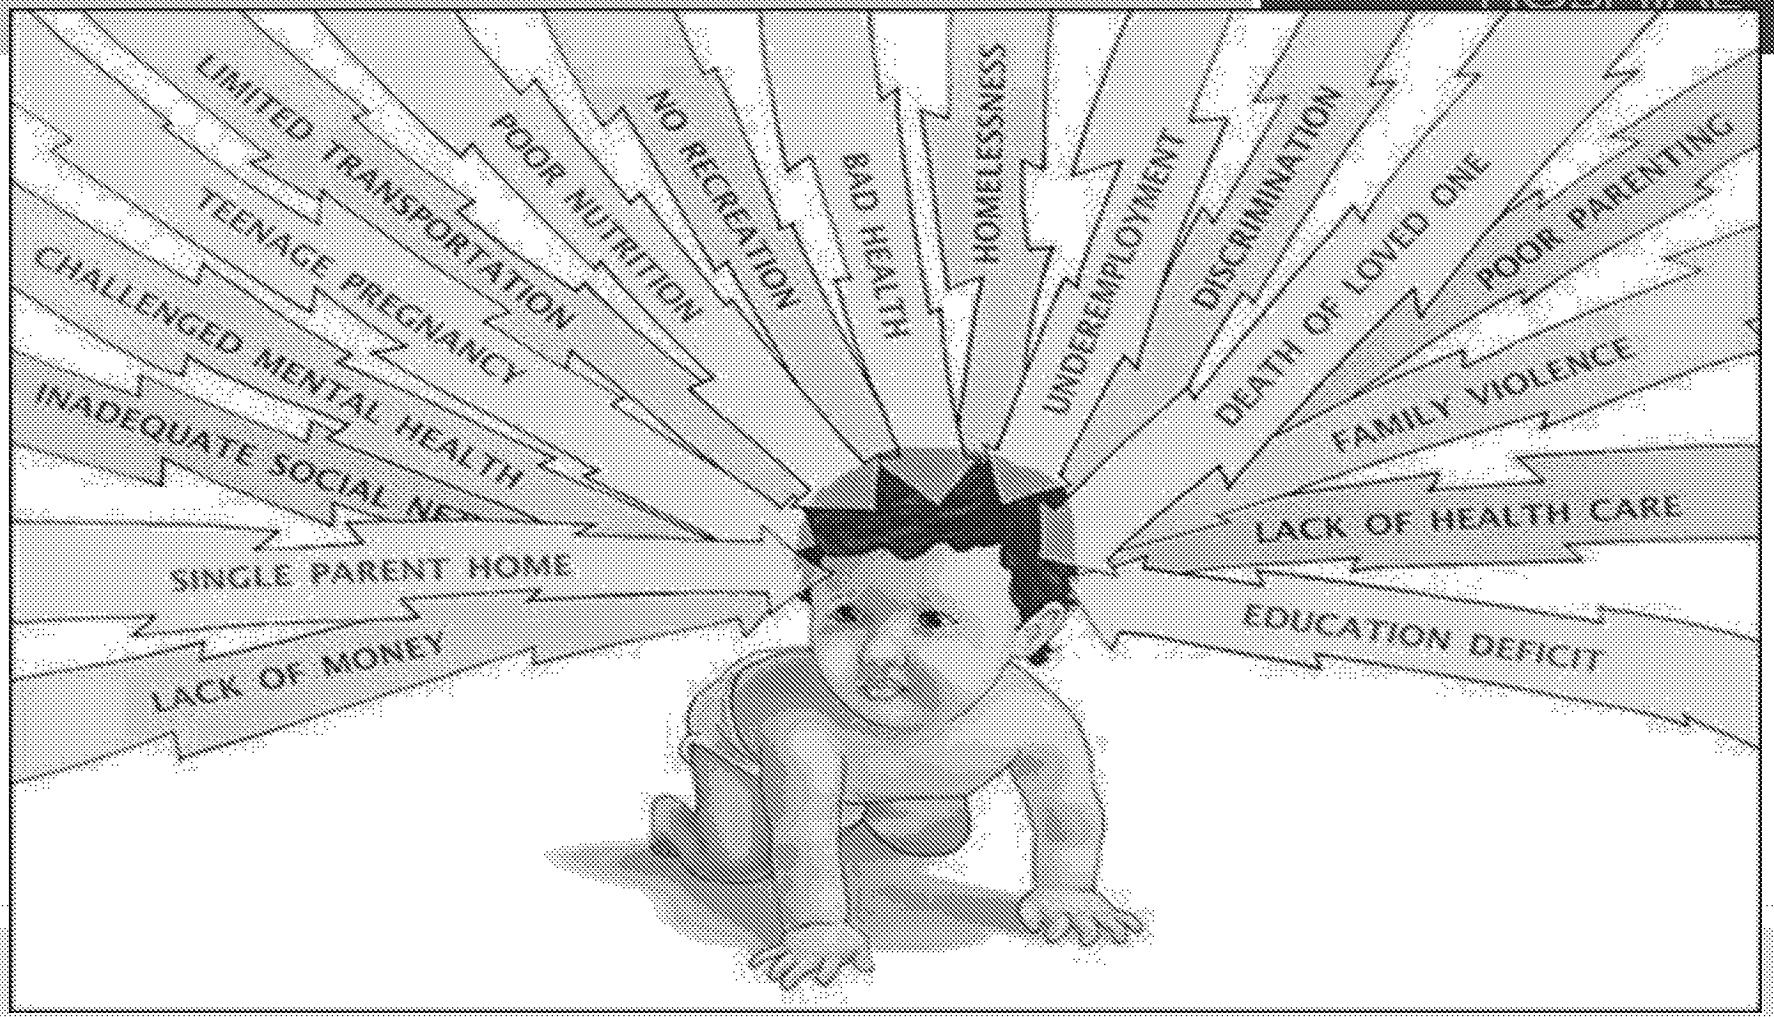
- ACEs are potentially traumatic events that can have negative, lasting effects on health and well-being.
- Also referred to as toxic stress or childhood trauma.
- As number of ACEs increase, the risk for health problems increase in a strong and graded fashion.
- An ACE score of 6 or more results in a 20 year decrease in life expectancy.

- CDC ACE study
  - Kaiser Permanente from 1995 to 1997 with more than 17,000 participants.

HURLEY MEDICAL CENTER

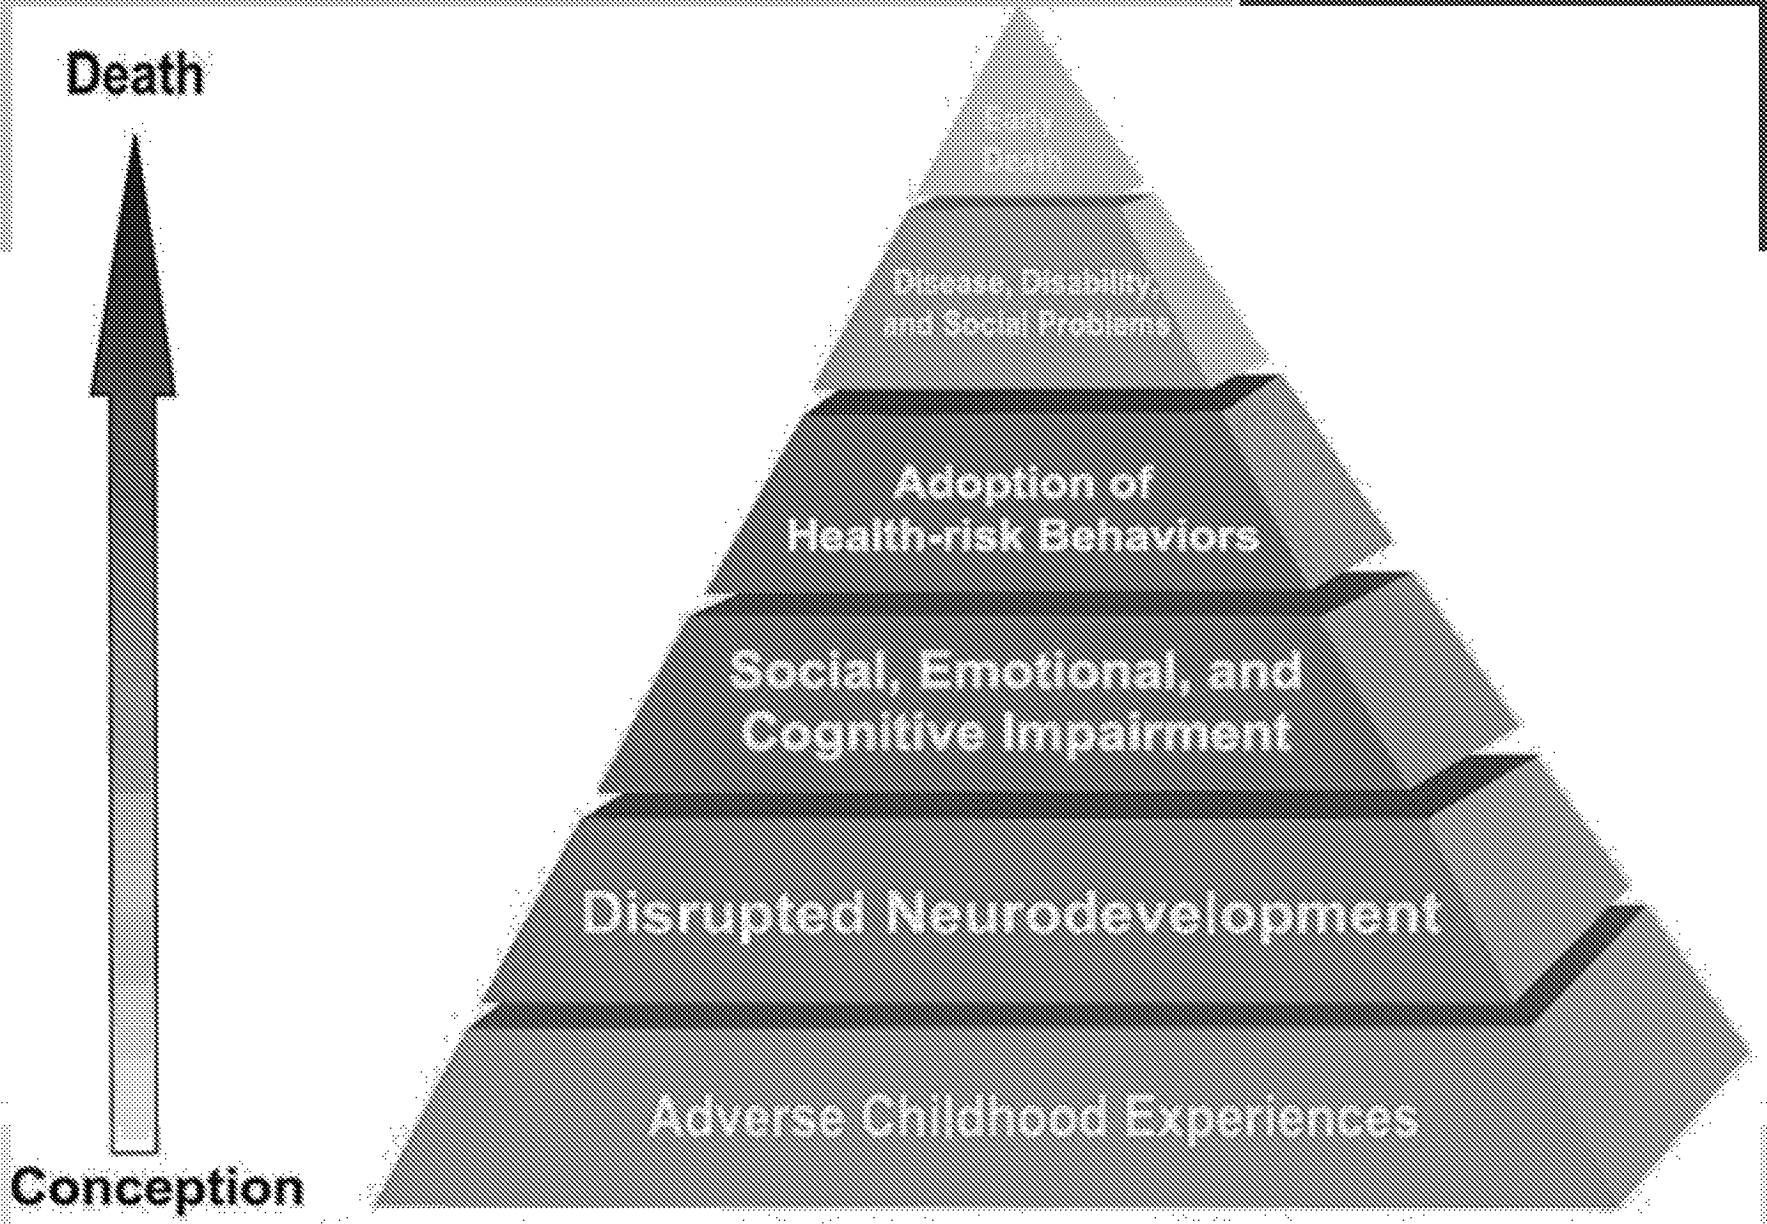
Toxic Stresses

HURLEY CHILDREN'S HOSPITAL



https://casaofsantacruz.wordpress.com/2014/10/08/continuing-education-webinar-how-toxic-stress-impacts-cas-children-families-communities-2/

HURLEY MEDICAL CENTER

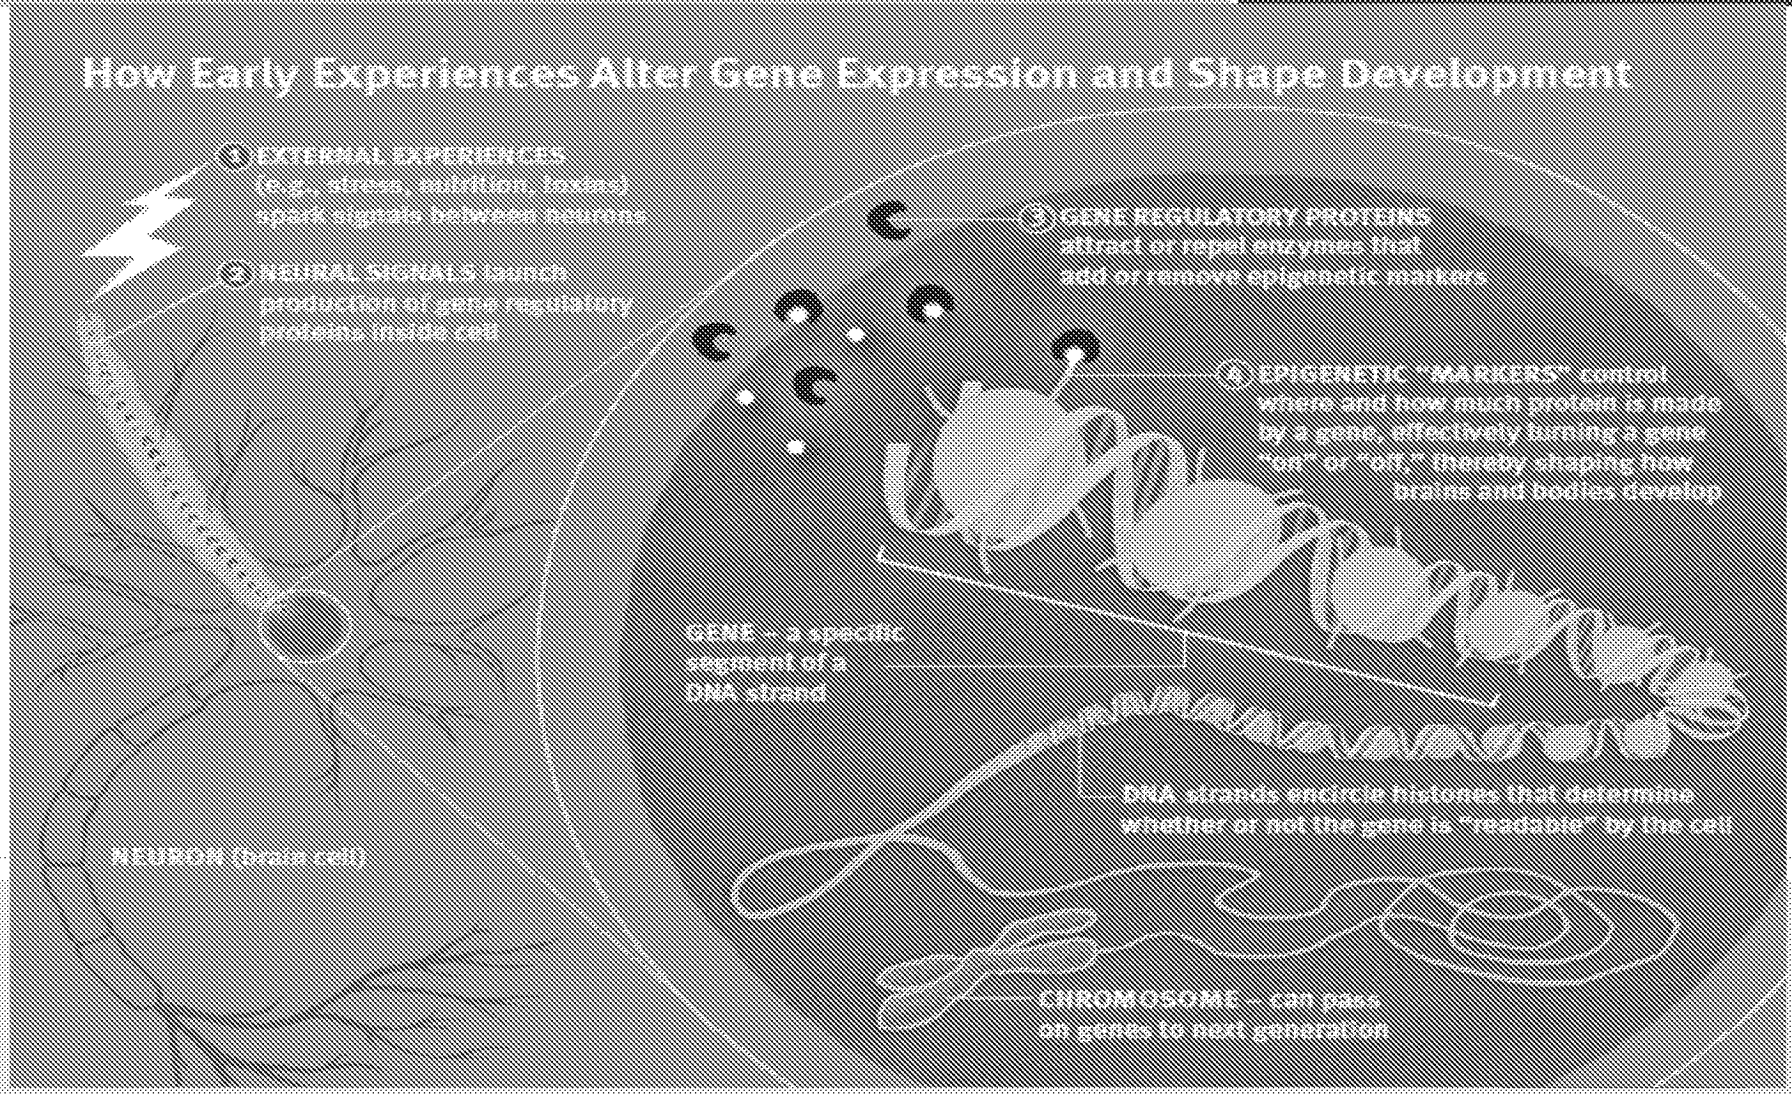


Mechanisms by Which Adverse Childhood Experiences Influence Health and Well-being Throughout the Lifespan

http://www.cdc.gov/violenceprevention/acestudy/

EPIGENETICS

HURLEY CHILDREN'S HOSPITAL



http://developingchild.harvard.edu/science/deep-dives/gene-environment-interaction/

ACE/Toxic Stress

HURLEY CHILDREN'S HOSPITAL

- Many chronic diseases/disparities in adults are determined decades earlier, by experiences in childhood (0-6 critical)
- Lead exposure is an ACE/toxic stress

Flint kids...

HURLEY CHILDREN'S HOSPITAL

HURLEY MEDICAL CENTER

- Now what can we do???

Research/Assessment

HURLEY CHILDREN'S HOSPITAL

- Assess the impact of the exposure
  - Health impact
    - BLL
    - Longitudinal neurodevelopmental f/u
    - Cord blood Pb, brain injury markers, epigenetics
    - Retrospective fetal deaths, IUGR
  - Nutrition impact
  - Psychosocial impact
  - Water quality/infrastructure impact
- Continued monitoring
  - Academic/public health collaborations

HURLEY MEDICAL CENTER

Secondary Prevention

HURLEY CHILDREN'S HOSPITAL

- Unique opportunity to be proactive, to regain public trust, and to **buffer** impact of exposure
  - Short Term
  - Long Term

HURLEY MEDICAL CENTER

Short-Term Secondary Prevention

HURLEY CHILDREN'S HOSPITAL

- Consistent, coordinated, multi-method, trusted messaging/education/risk communication/PSAs
  - Need for central command/hub/emergency response

Short-Term Secondary Prevention

HURLEY CHILDREN'S HOSPITAL

- Water still not safe (public health emergency)
  - Corrosion control optimization
  - Ongoing risk from scale disruption
  - Door to door filter/replacement distribution
    - # filters distributed approx 1/3 of homes
  - Public education re water precautions (filters, flushing, cold water, cooking, infants, etc)
  - Lead plumbing

HURLEY CHILDREN'S HOSPITAL

Secondary Prevention Evidence Based Interventions

#flintwatercrisis
Secondary Prevention

HURLEY CHILDREN'S HOSPITAL

- Medical/Health
- Nutrition
- Education
- Caregiver capacity
- Water quality

HURLEY MEDICAL CENTER

Secondary Prevention
Medical/Health

HURLEY CHILDREN'S HOSPITAL

- Support and education for primary care providers regarding aggressive long-term neurodevelopmental screening & testing
- Improve access to Developmental and Behavioral (DBP) specialists, pediatric psychologists, pediatric psychiatrists
  - Preemptive referral to mental health/toxic stress screening
  - Support capacity building and/or incentivize recruitment to allow Genesee Health System (CMH) to build this capacity which is currently needed and lacking
- Increase recognition and education regarding trauma informed care, social determinants of health (SDOH)
- Consider health fund/enrollment in Children's Special Health Care Services (CSHCS) for exposed kids to cover long-term needs

HURLEY MEDICAL CENTER

Secondary Prevention Medical/Health

HURLEY CHILDREN'S HOSPITAL

- Expand state-funded Genesee Health System (CMH) services
  - Infant Mental Health (30 capacity)
  - Child case management
  - Home-based services
  - Trauma informed care – trauma focused CBT

Secondary Prevention
Medical/Health

HURLEY CHILDREN'S HOSPITAL

- Role of Medicaid HMO plans:
  - Support to drive patients to medical home: enhanced transportation, case management, HEDIS monitoring, pt incentives, mental health access, etc
  - Reimbursement for integrated social work, registered dietician, mental health services, OT/PT services
  - Encourage collaboration/mandate support of Genesee Children's Healthcare Access Program (CHAP)

HURLEY MEDICAL CENTER

Hurley Children's Clinic

Thinking Outside The Box

HURLEY CHILDREN'S HOSPITAL

- Transportation
- Social work
- WIC RD/Nutrition
- Peds Psychology
- Training site

HURLEY MEDICAL CENTER

Secondary Prevention
Nutrition

HURLEY CHILDREN'S HOSPITAL

- Short-term mitigation/protection
  - Promotion/education of Iron, Calcium, Vit C diets
- Promote enrollment and participation in pre-existing nutrition resources (WIC, SNAP, DUFB, MTA)
- Expand WIC eligibility, access (co-locate with PMD), benefits

Secondary Prevention
Nutrition

HURLEY CHILDREN'S HOSPITAL

- Improve food access/security efforts
  - Subsidies, pilots – grocery stores, mobile groceries, urban farming, etc
- Invest in breastfeeding promotion, education, and support services

Secondary Prevention
Education

- Subsidize quality childcare options
- Automatic referral/assessment by Early Intervention (Early On)
- Enroll all in early head start, head start
  - Universal Pre-school/Flint Pre-Promise
- Strengthen special education capacity/trained personnel

Secondary Prevention
Education

HURLEY CHILDREN'S HOSPITAL

- Invest in school health/wellness/behavioral health
  - School nurse:student ratio – MI ranked worst in country
  - 1:750 recommended
  - 1:6,500 Flint
- Place MDHHS employee at every school
- Model lead safe school campaigns
  - Proactive water testing, lead plumbing investigations
  - Lead mitigating school nutrition

Investing in Children: Younger The Better

HURLEY CHILDREN'S HOSPITAL

Rates of Return to Human Capital Investment at Different Ages: Return to an Extra Dollar at Various Ages

HURLEY MEDICAL CENTER

Secondary Prevention
Caregiver capacity

HURLEY CHILDREN'S HOSPITAL

- Toxic stress and resilience
  - "Strong, frequent, and/or prolonged activation of the body's stress-response system in the absence of the **buffering protection of a supportive, adult relationship**."

Shonkoff, J & Garner, A. (2012) The lifelong effects of early childhood adversity and toxic stress. Pediatrics, 129(1). 232-246.

HURLEY MEDICAL CENTER

Secondary Prevention
Caregiver capacity

HURLEY CHILDREN'S HOSPITAL

- Need to support parents and programs to improve parenting skills
- Evidence-based parenting programs
  - Incredible Years (HCH AAP Grant)
  - Triple P
  - Everyday Parenting
  - Adventures in Parenting
  - Home visiting programs
  - Strengthening Families Framework
  - Maternal Infant Health Program (MIHP)
  - Healthy Start
  - Nurse Family Partnership (NFP)

HURLEY MEDICAL CENTER

Nurse Family Partnership

HURLEY CHILDREN'S HOSPITAL

- 56% reduction in emergency room visits for accidents and poisonings in the second year of the child's life
- 50% reduction in behavioral problems when the children enter school.
- 48% reduction in state-verified reports of child abuse and neglect by child age 15
- 39% fewer healthcare encounters for injuries or ingesions in the first two years of life
- Increase in language scores

"Nurse-Family Partnership", Early Childhood, Social Programs That Work, Coalition for Evidence-Based Policy
hVp://evidencebasedprograms.org/wordpress/?page_id=57

HURLEY MEDICAL CENTER

Secondary Prevention
Caregiver capacity

HURLEY CHILDREN'S HOSPITAL

- Increase support for state-funded NFP, Healthy Start and MIHP
  - Hurley-run NFP capacity for 100

HURLEY MEDICAL CENTER

Secondary Prevention
Water Safety/Infrastructure

HURLEY CHILDREN'S HOSPITAL

- Opportunity to model best practices for lead in water monitoring to protect public health rather than a focus on minimum compliance
  - EPA Flint Safe Drinking Water Taskforce
- Flint will change water source and treat water again once connected to KWA (2016), should not be rushed
- Full lead plumbing replacement (can be targeted)

HURLEY MEDICAL CENTER

Next Steps

HURLEY CHILDREN'S HOSPITAL

- Primary prevention failed
  - Preventable population-wide exposure
- Secondary prevention must be priority

- Invest and prioritize in evidence based interventions that mitigate exposure and build childhood resilience
  - Ages 0 to 6 years critical for life course trajectory

Top Five Interventions

HURLEY CHILDREN'S HOSPITAL

1. Support for emergency response
2. Increase funding/capacity for home visiting maternal-infant support programs
3. Guarantee Flint Pre-Promise (3-5 year quality early education)
4. Fund RN in every Flint school
5. Encourage innovative Medicaid HMO plan and medical home initiatives (ie: CHAP)

HURLEY MEDICAL CENTER

Subject: Fwd: Water Donation

FYI.

Are you hearing that the new Mayor wants to declare a local emergency on this water issue?

The below article is reference the water we were able to identify from FEMA.

Emergency Management/Preparedness Sector

FEMA Sends 28,000 Liters of Bottled Water to Flint amid Lead Troubles

(MLive)

Flint, Michigan: The federal government is helping to replenish the bottled water supply in Flint. Two trucks delivered about 28,000 liters of water from the Federal Emergency Management Agency to the Food Bank of Eastern Michigan today, Dec. 14. The water will then be donated to "partner agencies" in the city of Flint who will distribute the water to residents. Cassie Ringsdorf, a FEMA spokeswoman, said the agency maintains commodity stockpiles at warehouses around the country and makes them available. "These commodities are available for use, within hours, should an incident occur that requires support from FEMA," Ringsdorf said in an email to The Flint Journal-MLive. A news release from the Food Bank credited Michigan State Police Lt. Billie Jo Roach with having identified the availability of the water from FEMA. Flint remains in a public health emergency and officials have said residents should not drink unfiltered tap water because of rising lead levels while the city used the Flint River as its water source from April 2014 until October 2015. The Journal could not immediately reach a representative of the MSP Emergency Management and Homeland Security Division for further comment. FEMA said the Food Bank claimed two truckloads of water and agreed to pay all transportation costs associated with the donation.

Subject: RE: Meeting with Dr. Mona Hanna-Attisha and Flint Water

Dr. Mona:

It was a real pleasure meeting you and thank you for the incredible work you are doing on behalf of the children in my native city. We are committed to working with you on all fronts to make the way forward the best it could be. Also, I want to let you know that I did follow up on whether the former DEQ department leader was still working on water related issues. To my surprise you were correct. When additional schools needed to be tested she was added to help with the workload. I am told she did not supervise, conclude on testing, or anything of that nature but they needed help and the director of DEQ did approve a limited role for her. He is going to be meeting with the TF tomorrow to discuss actions underway. I apologize for asserting otherwise as I had not been aware.

Please call me if I can assist in any way.

Rich

Mr. Baird and all the other guys,

It was a pleasure meeting everyone and a privilege to present to you all. As I said, we have an incredible and unique opportunity to mitigate the impact of this population-wide exposure. If we act now, proactively, we can buffer our kids from the life-altering impacts of lead poisoning.

Flint has many claims to fame (we put the world on wheels, we birthed Mr. Baird!, etc); and now, with your leadership, we can continue to build generations of strong, smart, and healthy children.

If I can be of any further assistance, please don't hesitate to contact me. Email or cell PPI

Thanks again, Mona

Subject: Meeting with Dr. Mona Hanna-Attisha and Flint Water
When: Monday, December 14, 2015 11:00 AM-12:00 PM.
Where: Governor's Conference Room, 2nd Floor Romney Building, 111 S. Capitol Ave., Lansing, MI 48933

Good Morning,

This is to confirm the meeting with Rich Baird on **Monday, December 14** at **11:00 a.m.** in the Governor's Conference room, second floor Romney Building, 111 S. Capitol Ave. Lansing, MI 48933.

We are located at the George W. Romney Building, 111 S. Capitol Avenue, Lansing. The Romney Building is located directly across the street (Capitol Avenue) from the Capitol Building. There is some metered parking around the building. The closest parking facility is one block south at the corner of Capitol Avenue and Allegan Street (enter the parking facility from Capitol Avenue). https://www.parkme.com/lot/93032/tower-parking-ramp-lansing-mi

You will also want to have a picture I.D. handy for security in the Romney Building. Please let security know who you have a meeting with, they will call me and then send you up to the second floor.

Please let me know if you have any questions.

Thank you!

Flint Water Advisory Task Force Initial Recommendations

Lansing, MI--The Flint Water Advisory Task Force today released a letter recently sent to Governor Rick Snyder, and the Governor's response, regarding initial recommendations to address health protection challenges with the Flint water supply. Copies of the letters are attached.

"We felt it was imperative to make these initial recommendations to help address the water crisis in Flint instead of waiting until our final report is submitted," said FWATF Co-Chair Chris Kolb. "We appreciate the prompt acceptance of our request for action by the Governor and see it as a step forward."

"The Task Force has been holding a number of fact finding interviews with individuals and groups that have pertinent information about what happened in

Flint," FWATF Co-Chair Ken Sikkema stated. "While the Task Force is far from done with our work, the initial review has presented a very disturbing situation that will require many actions to help those that have suffered. We saw no reason to wait until the final report to make these initial recommendations. We also anticipate that we will made additional recommendations prior to the final report."

The FWATF letter included in part:

"One primary concern we have at this point is that the current efforts appear to be taking place in the absence of a larger project coordination framework that measures results and clearly delineates responsibilities for continuing actions to protect public health. We believe the state is best positioned to facilitate this larger framework, which should address the following:

1. The need for MDHHS and MDEQ—and, possibly, other state agencies--to set **goals** for actions in collaboration with local and federal agencies and organizations.
2. The need for a set of corresponding **timelines** for the goals.
3. The need to establish **responsibility** for meeting the goals in a timely fashion and for **contingency plans** for the state if the goals are not being met.
4. The need for clear, regular **communication** with the Flint community and stakeholder groups regarding action steps and updates.

We also believe it important that a single person or entity—potentially independent of any one particular state agency and mutually agreeable to this Task Force and you, Governor—be established to provide effective coordination of ongoing activities and reporting on the status of mitigation measures. For this, we also believe a readily understood "dashboard" should be developed that reports on the goals, timelines and assignments. This will enable members of the Flint community, public health providers, and state agencies to know about the status of the Flint water crisis mitigation program, as well as promote coordination and accountability. The Task Force is prepared to assist in the development of that dashboard."

The full FWATF report is expected to be completed in early 2016.

Members of the Task Force include:

Matthew Davis, M.D., M.A.P.P., is professor of pediatrics and internal medicine at the University of Michigan Health System and professor of public policy at the Gerald R. Ford School at the University of Michigan, having joined the faculty in 2000. Davis also is a professor of health management and policy at the School of Public Health. He previously served as the chief medical executive of the Michigan Department of Community Health/Department of Health and Human Services.

Chris Kolb is president of the Michigan Environmental Council, a statewide coalition of 70 environmental, public health and faith-based nonprofit groups. Before joining the MEC, Kolb represented Ann Arbor in the state House for six

years and served six years on the Ann Arbor City Council. He has been president of the MEC for six years.

Lawrence Reynolds, M.D., is a pediatrician in Flint who serves as president of the Mott Children's Health Center. He received his medical degree from Howard University College of Medicine and has been in practice for 36 years. He has served as president of the Genesee County Medical Society and the Michigan Chapter of the American Academy of Pediatrics. He has been honored for his humanitarian and advocacy efforts on behalf of children from the Community Foundation of Greater Flint.

Eric Rothstein is a national water issues consultant and principal at the Galardi Rothstein Group. He served as an independent advisor on the creation of the Great Lakes Water Authority. Rothstein also has served as Jefferson County, Alabama's rate consultant and municipal adviser for litigation related to the county's bankruptcy and issuance of $1.7 billion in sewer warrants and led strategic financial planning for the City of Atlanta's Department of Watershed Management. He has more than 30 years of experience in water, wastewater and stormwater utility finance and rate-making assessments.

Ken Sikkema is a senior policy fellow at Public Sector Consultants, where he specializes in public finance, environment, and energy policy. Prior to joining the firm, Sikkema served in both the Michigan House and Senate, culminating with four years as Senate majority leader. He has also served as both an adjunct and visiting professor at Grand Valley State University.

The FWATF was formed by Governor Snyder to review actions regarding the Flint water system and offer recommendations both for Flint and Michigan to protect the health and safety of state residents.

December 7, 2015

Dear Governor Snyder:

On Wednesday, November 18, 2015, the Flint Water Advisory Task Force met with representatives of the Michigan Department of Environmental Quality (MDEQ) and the Michigan Department of Health and Human Services (MDHHS) to discuss elements of the 10-point Action Plan designed to address various issues related to the ongoing public health protection challenges precipitated by lead in the Flint water supply. These discussions were held at our request as part of our task to make recommendations to prevent a similar occurrence in Flint or elsewhere, and also to monitor ongoing mitigation efforts.

Subsequent to those meetings, on Tuesday, November 24, 2015, members of the Task Force participated in a conference call with yourself, members of the Administration, and representatives of these agencies to discuss the progress to date on the 10-point Action Plan, as well as several other related issues.

We want to acknowledge the steps that have already been taken to implement the action plan, specifically in the areas of outreach efforts to facilitate blood lead testing for children, communication with health care providers in the Flint community about the importance of testing children for lead, and the training of additional public health nurses in the Genesee County Health Department. We do believe, however, that additional steps need to be taken to reach additional children for blood lead testing, assure proper follow-up with children found to have elevated blood lead levels, and to continue water testing. We will continue to assess state and local efforts and make recommendations regarding specific steps that we believe are warranted.

One primary concern we have at this point is that the current efforts appear to be taking place in the absence of a larger project coordination framework that measures results and clearly delineates responsibilities for continuing actions to protect public health. We believe the state is best positioned to facilitate this larger framework, which should address the following:

1. The need for MDHHS and MDEQ—and, possibly, other state agencies--to set **goals** for actions in collaboration with local and federal agencies and organizations.
2. The need for a set of corresponding **timelines** for the goals.
3. The need to establish **responsibility** for meeting the goals in a timely fashion and for **contingency plans** for the state if the goals are not being met.
4. The need for clear, regular **communication** with the Flint community and stakeholder groups regarding action steps and updates.

We also believe it important that a single person or entity—potentially independent of any one particular state agency and mutually agreeable to this Task Force and you, Governor—be established to provide effective coordination of ongoing activities and reporting on the status of mitigation measures. For this, we also believe a readily understood “dashboard” should be developed that reports on the goals, timelines and assignments. This will enable members of the Flint community, public health providers, and state agencies to know about the status of the Flint water crisis mitigation program, as

well as promote coordination and accountability. The Task Force is prepared to assist in the development of that dashboard.

We believe it is vitally important that trusted members of the Flint community be engaged in communication on this issue, as well as the distribution of information conveyed by our suggested dashboard reporting. Accordingly, in advance of our final report, we would like to ensure the independent coordinator suggested above engage trusted community groups to begin rebuilding community trust in state actions.

We appreciate your personal interest in this issue, commitment to assisting the Task Force in our review, and—most importantly—commitment to ensuring that the full measure of state resources are brought forward to protect the public health in Flint and throughout the state.

Respectfully yours,

Flint Water Advisory Task Force:

Dr. Matt Davis

Chris Kolb

Dr. Larry Reynolds

Eric Rothstein

Outline of Role and Responsibility—Harvey Hollins
Flint After Action Task Force and Local/County/State Coordination
Key Activities Draft

I. Confirm key stakeholders that should convene on a regular basis to do the following:

   a. Identify resources and support required to manage continued testing, cognitive assessment, updates on progress, impediments, community outreach, etc.

   b. Assess delivery of resources protocols and adjust (door to door, neighborhood centers, etc.)

   c. Agree a communications strategy within the stakeholder community and aggressively inform the residents of Flint of resources available and consequences of inaction.

II. Create a short/medium and long term plan to capture roles and responsibilities at the local, county, state (and federal if appropriate) levels which will be reviewed and approved by the key stakeholder body.

III. Be responsive to mayor, media, residents and all stakeholders about what currently is being done and how the way forward is being envisioned and agreed by stakeholder leadership.

IV. Work to eliminate duplication of effort and ensure that members of the science community engaged in assessing and protecting the public health have unfettered access to data, reports, etc. and establish a mutually agreeable process to surface and resolve conflicting interpretations of data when it occurs.

V. Coordinate with State departments (DHHS, DEQ, Executive Office) to secure funding needed and subject matter resources to ensure long term monitoring and remediation efforts.

VI. Ensure that the recommendations of the After Action Task Force are executed.

VII. Provide weekly status updates to Governor Snyder and members of his team charged with supporting the Chief Coordinator.

VIII. Determine how what is being done in Flint is relevant to other communities and needs to be shared as part of a state wide strategy. This may also impact future policy development to address long term infrastructure remediation.

Subject: Re: DRAFT DOCUMENTS: For Mayor Weaver

Rich,

Thanks for sharing this document with us. I agree with both of Ken's points and will add my two-cents as well.

One point you might want to consider, is that you have identified goals of the FWIACC that appear to be more near-term goals or action items. You may want to include an actual stated goal or goals that are more long-term or when achieved will determine when the work of the FWIACC is complete.

"Ensure safe drinking water for the residents of Flint, access to health and wrap-around services for all impacted children; ensure safe and reliable drinking water when the implementation of the switch to the KWA water source occurs; and, address long-term infrastructure needs, including replacement of lead service lines, for both the treatment and distribution of safe drinking water in Flint."

I think the Mayor will be interested in how this process will produce results; bring needed resources; correct the water situation in Flint; provided the necessary access to health services, et al., to mitigate the impact on children; and, move the City to self-governance.

It will be very important to listen to what the Mayor has to say and help to address her needs to provide resources and services to her community, and be more than willing to modify the plan based upon her input.

Thanks!

Chris

Rich:

This looks very good to me at first reading...a couple of thoughts:

(1) Key is convincing Mayor Weaver that this approach should be supported & embraced regardless of the fate of any federal declaration--I.e., this is the "bird in the hand" that is focused on the real on-going health needs, versus the federal "bird in the bush" that is not properly focused on long-term needs.

(2) EO is critical to the success of this....it establishes structure that is inclusive at the same time it can insure accountability--benchmarks & metrics need to be included. The EO can create a structure that has the potential to be more relevant, effective, and long-term than federal "declaration."

I like it.

Ken

Thank you both. This is helpful. While nearing final form, this is still a draft and subject to the Mayor's input and endorsement which I hope was clear. Agree on all points except the long term infrastructure issues will be a bit out of scope for this group. That is going to be more of a legislative/executive policy and funding effort that will need a lot of local input as well.

Regards,

Rich

Happy New Year!

We are having a brainstorming meeting this Thursday (2pm Flint) regarding the critical role of education in regards to the lead exposure. The small meeting (15ish people) will include pediatricians, Mott Foundation, Sen Peters staff, pastors, MSU, Flint superintendent, and county early education folks.

We would welcome anyone from Michigan Department of Education - I was thinking about reaching out to Susan Broman from the Office of Great Start. But let me know what you think may be best.

Secretary Burwell, Administrator McCarthy, Administrator Fugate and Director Frieden:

Recent developments regarding the level of lead in the water in one of the communities I represent, Flint, Mich., have raised significant concerns about the safety of its drinking water. For this reason, I am requesting immediate resources to provide safe drinking water to the residents of Flint until additional testing can be completed that confirms the water is safe, particularly for young children.

Although the city of Flint and the Michigan Department of Environmental Quality have conducted tests and taken the position that the lead level in the water is safe and below the action level, there are significant questions about the efficacy of their testing. In fact, Dr. Marc Edwards of Virginia Tech University, an established drinking water expert, conducted his own tests as part of a study that determined the water in Flint was above the lead action level.

Additionally, yesterday the Greater Flint Health Coalition, a group of health professionals in the community, released a report showing elevated blood lead levels in residents in Flint, particularly in young children. In response, the Coalition has requested that the Genesee County Health Department release a health advisory indicating that the water in Flint is unsafe to drink.

Thus, I am requesting resources from your agency to provide clean drinking water to the residents of Flint until additional testing can determine when the water will be safe to drink and a long-term solution can be implemented.

This is a serious health issue, particularly for young children, and until the water is demonstrated to be safe, immediate action must be taken to ensure Flint's residents have potable drinking water.

I look forward to working with you and thank you for your immediate attention.

Sincerely,

Dan Kildee
MEMBER OF CONGRESS

U.S. Department of Homeland Security

FEMA

September 28, 2015

The Honorable Dan Kildee
United States House of Representatives
227 Cannon House Office Building
Washington, D.C. 20515

Dear Representative Kildee:

This is in response to your letter of September 22, 2015, to Federal Emergency Management Agency (FEMA) Administrator Craig Fugate, as well as the U.S. Department of Health and Human Services, Centers for Disease Control and Prevention and the Environmental Protection Agency. You requested federal assistance to provide safe drinking water to residents of the City of Flint, Michigan, until additional testing confirms that the water is safe. Administrator Fugate requested that I respond to you because Michigan is within FEMA Region V.

As you may be aware, the Robert T. Stafford Disaster Relief and Emergency Assistance Act, Public Law 93-288, as amended, authorizes FEMA to provide federal assistance to a state after the governor requests that the president issue a disaster declaration and the president approves the request because it has been determined that the severity and magnitude of the incident exceeds local, tribal and state capabilities. If providing safe water to its residents is beyond the city's capability, the city, through Genesee County Emergency Management, should contact the Michigan State Police Division of Emergency Management and Homeland Security. However, in this situation, it may be more expedient and practical to pursue water sources from other local or private sector entities.

If you have questions or would like additional information, please contact me or have a member of your staff contact my Congressional Affairs Specialist, Dan Shulman, at (312) 408-4427.

Sincerely,

Andrew Velasquez III
Regional Administrator

cc: Capt. Chris Kelenske

Captain Kelenske joined us and we had a very good discussion about moving forward with the creation of the Flint Water Crisis Agency Coordinating Committee (FIACC). Tim Becker and Captain Kelenske provided me with a fair amount of input. I also read the City of Flint Incident Action Plan for a State of Emergency

which Chris received today (enclosed for those who wish to read it as well). I have distilled all of this into a two page plan that I want your edits and comments on and a one page organizational chart (now presented in the "governor's colors" according to our fine people in Communications). Spoiler alert—I made Captain Kelenske Vice Chair of the whole shebang (with the Colonel's blessing) so Harvey wouldn't get lonely.

Here is my ask of you:

1) Within 24 (sooner if you can) hours give me your comments and input

2) Tomorrow I will turn around a final document for Jarrod to review with the Governor either New Year's Day or Saturday

3) Ideally, Governor will approve Harvey sending it to Mayor Weaver Saturday (Sunday latest)

4) Mayor needs to know that this is what the Governor wishes to discuss at the meeting January 7 along with financial resources that we still need some estimates on cost from DHHS for

5) Meegan and Dave need to noodle how best to get out front with this and change the narrative focus on Monday's Genesee County declaration of emergency

I know we are all working way too hard for what should be a rest and recharge period but I do appreciate everyone's efforts and I know the Boss really does as well.

Regards,

Rich

To: weaverkaren@sbcglobal.net
Subject: Per Our Conversation
Attachments: DRAFT Coord Com Org Chart 233264.pptx; FWIACC document v2.docx

Mayor Weaver:

Per our conversation, Governor Snyder and several members of his team are committed to acting now, with the State, City and County in partnership, and not wait on any federal action or determination on an emergency declaration. If a federal emergency declaration is issued, this will be part of the combined response effort and will help marshal more resources towards resolving the issues facing Flint. Right now though, the Governor wishes to immediately implement an action plan with State and Local entities and bring together agencies and stakeholders.

Our working draft title is the Flint Water Inter-Agency Coordinating Committee (FWIACC), and it would immediately address ways to restore safe water and monitor/mitigate the effects of the lead.

In addition to Governor Snyder, the key officials working on this blueprint were MSP Capt. Chris Kelenske, DHHS Chief Deputy Tim Becker, DHHS Director Nick Lyon, the Governor's Transformation Advisor Rich Baird and myself. The need for engaged central coordination has also been recommended by the Governor's Flint Water After-Action Task Force, of which Dr. Larry Reynolds is a member. Governor Snyder has endorsed this approach and has asked me to provide you with a draft copy in advance of your meeting with him on January 7. If you agree, we will organize this committee immediately, and the Governor will issue an executive order authorizing FWIACC to work on the issue for the long term .

As you know, there is a significant amount of work to be done before the Federal government will approve an emergency declaration under the Stafford Act. FWIACC could begin its work immediately and would be in place to complement, not replace any action group ultimately formed by an emergency declaration. And we believe it would demonstrate how to best leverage essential support addressing manmade emergencies like this, since existing laws are more oriented toward natural disasters.

We brainstormed who should be included in this initial emergency response, with the idea that you and other stakeholders may have recommendations on others who need to be added.

Attached are two draft documents that defines the FWIACC. You will note the organization chart and the proposal description is not a normal hierarchical entity. This is a collaborative, stakeholder-driven partnership. Chris and I would facilitate it, but it is a partnership of city, county and state viewpoints, and would include outside experts like Marc Edwards and Dr. Mona Hanna-Attisha.

All parties will be required to be transparent about their ideas and findings, agreeing to accountability measures and reporting on them on a regular basis.

Please let me know your thoughts on this approach and also other agenda items you wish to see on January 7. If you agree, we would also invite the interim DEQ director, Keith Creagh, and the newly appointed spokesperson to meet you then.

DRAFT: A Proposal to Create the Flint Water Inter-Agency Coordinating Committee (FWIACC)

Statement of Need

To better coordinate resources and personnel and react with urgency, Harvey Hollins and MSP Capt. Chris Kelenske have been tasked with creating FWIACC, subject to the approval and endorsement by Flint Mayor Karen Weaver.

We are also recommending, by executive order, that Gov. Rick Snyder authorizes this committee to help restore safe water in Flint and coordinate efforts addressing health/behavioral consequences from lead ingestion.

This inter-agency group will fully engage with all stakeholders committed to solving Flint water issues. Equal partners. Equal leadership. Equal responsibility. Equal chance to be part of the solution to an important and not fully understood problem.

FWIACC will be facilitated by Hollins and Kelenske, who represent statewide resources and constituencies, with support from senior members of the Governor's office.

An overview of FWIACC's goals:

- Create a routine information process between all parties.
- Pursue other avenues of funding, including federal grants and legislative appropriations.
- Implement without delay any appropriate mechanisms that are called for in the Emergency Management Act or the Stafford Disaster Relief and Emergency Assistance Act. These may include local emergency operations plans and guides.

Action Plan

Immediately, FWIACC will:

1. Establish an interagency workgroup described in the attached organizational chart. It will be comprised of DHHS, MDEQ, MSP, Treasury, Genesee County, City of Flint, MDE, LARA and external subject matter experts (SMEs). Other entities may be added as needed. Personnel must be goal-oriented, transparent with findings, and able to accomplish FWIACC Incident Action Plan items created by the state in a timely manner. The FWIACC plan would be created with city, county, state and federal needs in mind.

2. Assemble staff with competencies in disaster/emergency planning, operations and finance as outlined under the National Incident Management System (NIMS). Staff will be accountable to the FWIACC leadership to track resource requests and document progress on the FWIACC incident action plan.

3. Utilize the National Incident Management System and Unified/Incident Command as appropriate.

4. Establish routine communications protocols at the operational, executive and legislative levels as determined appropriate.

5. Establish interagency workgroup objectives using the following as a starting point.

Interagency Workgroup Objectives

1. Determine and convey acceptable standards for potable water.
    - Identify needed remediation.
    - Convey the remediation plan objectives to all stakeholders and interested parties.
    - Create logistics for distributing water and filters, particularly to homebound citizens.
    - Implement the plan.
2. Determine health impacts for the impacted population.
    - Identify treatment methods, nutrition education and protocols for monitoring, neurodevelopmental screening, access to DBP specialists and psychologists/psychiatrists, expanded county services, etc.
    - Convey the treatment plan objectives to interested parties.
    - Implement the plan.
3. Establish a public information protocol to effectively inform the community.
    - Identify existing public information outlets within the city, county and state, including schools, churches and other formal and informal distribution networks.
    - Establish a Joint Information Center.
    - Provide for emergency alerts and updates.
    - Determine the process for approving official information before it's disseminated.
    - Convey to interested parties.
4. Assess the status of the infrastructure and determine feasible actions to upgrade the water system.
    - Determine current state of the infrastructure.
    - Develop priorities, costs and potential funding sources for infrastructure upgrades as part of a long term recovery plan.
    - Seek partners to assist (NGOs, Foundations, Business, etc.).
    - Implement the plan.

Subject: Per our conversation

Harvey,

I received your correspondence, and in reviewing it, my concern is that we only have me, yourself, MSP Capt. Chris Kelenske In deciding this important decision about the water problems here in the city of Flint. I would like to have more professional input, such as the Task Force that has been put in place.

In looking at the written plan of action, it seems to be a positive step in the right direction. I also want to make sure the transparency of whatever we do is included.

How soon do you need a definite answer to the proposed plan?

Thanks

Karen

Subject: RE: Per our conversation

Mayor,
I believe you are referring to the paragraph in the draft proposal that reads as follows: "To better coordinate resources and personnel and react with urgency, Harvey Hollins and MSP Capt. Chris Kelenske have been tasked with creating FWIACC, subject to the approval and endorsement by Flint Mayor Karen Weaver."

That paragraph simply asks if you believe that the creation of the FWIACC would be beneficial to the city. Actions addressing the water problems in Flint, through the FWIACC will be taken by various experts/professionals as outlined in the organizational chart.

Transparency is also a critical objective of the Governor, in saying that, we will need your advice on how to optimize that objective for the residents in the city.

Regarding a definite time for your response, why don't you take the next couple of days to really give the proposal a more thorough look over, and save your response for your meeting with the Governor.

If you have any other questions or concerns in the interim, please send them my was as this is still a work in progress.

Best,
Harvey

Mark,
Per our last conversation, I expressed that we were interested acquiring and distributing 1500 water filters to Flint residents to assist with the quality (perceived or real) of their drinking water until the KWA pipeline comes online.

A few weeks ago, you asked me to send you the product ID number so you could check with your suppliers regarding price. I apologize for taking long to send you product ID; a number of conversations needed to occur in Flint before we could proceed.

The product ID for a Brita Filter for kitchen faucets is:
Product ID 3176421
UPC 7-23987-0078

Thank you for taking the time to look into this.

>
> ***Stacie***
>
> March 25th 2013 **Flint council supports buying water from Lake Huron through KWA**
> http://www.mlive.com/news/flint/index.ssf/2013/03/flint_city_council_again_delay.html
> The Flint City Council voted 7-1 to get 16 million gallons per day from the Karegnondi Water Authority.
>
> 7th Ward councilperson Dale Weighill was absent
> 3rd Ward councilperson Bryant Nolden opposed

The rest were in favor.

March 25th, 2013 **Flint City Council approves resolution to buy water from Karegnondi, state approval still needed**

http://www.mlive.com/news/flint/index.ssf/2013/03/flint_city_council_approves_re.html

Under the proposal, Flint would get 16 million gallons per day of raw water from Lake Huron, pipe it to Flint for treatment and then sell it to customers throughout the City. Another 2 million gallons per day would come from the Flint River and will be treated in Flint. DEQ told the city it needed to get 18 million gallons per day or there would have to be additional work done at Flint's water plant. Flint's water plant and the Flint River is currently the backup for Flint and Genesee County, however, the plant only operates four times per year.

April 12th **State gives Flint OK to join Karegnondi Water Authority project, but Detroit gets to make final offer**

http://www.mlive.com/news/flint/index.ssf/2013/04/state_gives_flint_ok_t.html

The city of Flint has the state's blessing to join in construction of the planned Karegnondi Water Authority**pipeline project** once it reviews a final offer from the city of Detroit on Monday, April 15.

April 19th **Governor steps into water war; set to meet with Genesee, Flint, Detroit today**

http://www.mlive.com/news/flint/index.ssf/2013/04/governor_steps_into_water_war.html#incart_river_default

The meeting comes in the same week that the Flint and Genesee County rejected a final offer to continue buying water from Detroit and two days after Detroit gave Flint a notice of termination of its 1965 water contract.

April 19th **Detroit gives notice: It's terminating water contract covering Flint, Genesee County in one year**

http://www.mlive.com/news/flint/index.ssf/2013/04/detroit_gives_notice_its_termi.html

The city of Detroit has given notice that it's terminating a nearly 50-year-old contract for selling water to Flint and the county next year.

July 23rd **Flint River now an option for drinking water following Detroit's termination of contract**

http://www.mlive.com/news/flint/index.ssf/2013/07/city_readying_water_plant_to_t.html

The Flint River was not a viable option to provide drinking water to city residents when the water relationship between Flint and Detroit was stable. But river water might be used temporarily as the city's water supply now that Flint signed an agreement with the Karegnondi Water Authority and will get up to 18 million gallons per day of raw water in 2016 from Lake Huron. The Flint River hadn't been an option, city officials previously said, because upgrades to Flint's water plant would be too expensive, the river didn't provide enough capacity to serve Flint residents' water needs and the Michigan Department of Environmental Quality would not allow it.

Subject: Re: Update from Nick's calls

Thanks for the FYI Nick. Santana is looking for about 400 filters to get to Hispanic families from a distribution spot taking address information only for tracking purposes without having to disclose names. The solution for that population, who might be concerned about ICE, is to have them obtain the filters from alternative donors other than the state. I will follow up with Santana.

Not much more than what's in the news. I made a couple of

- City Council voted to approve their $2 million to use GLWA
- People are still upset, believing that DEQ is covering up their mistake.
- Most elected officials are pointing fingers at the state.
- Bottled water delivery has slowed a tad.
- Various groups are still delivering water filters, a big filter distribution occurred over the weekend.
- Mayor Walling and his challenger Weaver are debating tonight.

Hello Harvey,

Sara asked that I send this to you for notifications. Would you be able to reach out to the Mott Foundation, pastors group and Mayor Walling's Office? The plan is to issue between 2 and 2:30, with potential notifications around 2 p.m.

Thank you very much!

Dave

Gov. Rick Snyder announces Flint Water Task Force to review state, federal and municipal actions, offer recommendations

Experts in public health, water management, environmental protection to focus on steps to protect residents

LANSING, Mich. – Gov. Rick Snyder today announced the creation of an independent advisory task force charged with reviewing actions regarding water use and testing in Flint and offer recommendations for future guidelines to protect the health and safety of all state residents.

Task force members include experts in public health and medicine, water management, and environmental protection from both sides of the aisle, and will be co-chaired by Ken Sikkema of Public Sector Consultants and Chris Kolb, of the Michigan Environmental Council. Also serving will be Dr. Matthew Davis of the University of Michigan Health System, Eric Rothstein, of the Galardi Rothstein Group and Dr. Lawrence Reynolds of Mott Children's Health Center in Flint.

"Transitioning back to the Detroit Water and Sewerage Department-Great Lakes Water Authority is a good first step to protecting public health in Flint, but it's not the last step," Snyder said. "Bringing in outside experts to evaluate our actions and help monitor and advise on potential changes to law, procedures and practices will be key to continuing work on the comprehensive action plan and ensuring safe drinking water for all the residents in Flint and all of Michigan."

Snyder said the administration will fully cooperate with task force members, saying he wants an unbiased report focusing on steps taken in the past and recommendations that could improve practices to ensure all residents have access to safe, clean water.

Ken Sikkema is a senior policy fellow at Public Sector Consultants, where he specializes in public finance, environment, and energy policy. Prior to joining the firm, Sikkema served in both the Michigan House and

Senate, culminating with four years as Senate majority leader. He has also served as both an adjunct and visiting professor at Grand Valley State University.

Chris Kolb is president of the Michigan Environmental Council, a statewide coalition of 70 environmental, public health and faith-based nonprofit groups. Before joining the MEC, Kolb represented Ann Arbor in the state House for six years and served six years on the Ann Arbor City Council. He has been president of the MEC for six years.

Matthew Davis, M.D., M.A.P.P., is professor of pediatrics and internal medicine at the University of Michigan Health System and professor of public policy at the Gerald R. Ford School at the University of Michigan, having joined the faculty in 2000. Davis also is a professor of health management and policy at the School of Public Health. He previously served as the chief medical executive of the Michigan Department of Community Health/Department of Health and Human Services.

Eric Rothstein is a national water issues consultant and principal at the Galardi Rothstein Group. He served as an independent advisor on the creation of the Great Lakes Water Authority. Rothstein also has served as Jefferson County, Alabama's rate consultant and municipal adviser for litigation related to the county's bankruptcy and issuance of $1.7 billion in sewer warrants and led strategic financial planning for the City of Atlanta's Department of Watershed Management. He has more than 30 years of experience in water, wastewater and stormwater utility finance and rate-making assessments.

Lawrence Reynolds, M.D., is a pediatrician in Flint who serves as president of the Mott Children's Health Center. He received his medical degree from Howard University College of Medicine and has been in practice for 36 years. He has served as president of the Genesee County Medical Society and the Michigan Chapter of the American Academy of Pediatrics. He has been honored for his humanitarian and advocacy efforts on behalf of children from the Community Foundation of Greater Flint.

Snyder has said reconnecting with the authority is a critical step to resolving water quality issues and addressing related health concerns. It will not immediately resolve the city's problem with lead service lines or aging infrastructure. It will take time for pipes in Flint to become coated with the phosphate corrosion control.

To best protect public health, state and local authorities will continue to carry out steps outlined on Oct. 2 in a comprehensive action plan, including continued testing, the use of faucet filters and providing residents with accurate information about steps to eliminate lead exposure. The Michigan Departments of Environmental Quality and Health and Human Services are continuing to provide free water filters, free lead testing through the state laboratory for Flint water customers, and hiring additional staff to conduct health exposure monitoring for lead in drinking water.

Changes to Flint Water System Made By Local Leaders, Not Emergency Managers
Author: Darnell Earley, ICMA-CM, MPA

It is critically important that the record be set straight about the decision-making and approval processes that led to Flint joining the Karegnondi Water Authority (KWA) with the use of Flint River water as the interim water supply. The fact is, that the river has served and been used as the back-up supply for decades, and this was the rationale given to me by staff and Mayor Walling, who also serves as chairperson of the KWA board. Contrary to reports in the media and rhetoric being espoused by individuals, the decision was made at the local level, by local civic leaders.

The decision to separate from Detroit Water and Sewerage Department and go with the KWA, which included the decision to pump Flint River water in the interim, were both a part of a long-term plan that was approved by Flint's Mayor, and confirmed by a City Council vote of 7-1 on March 25, 2013. This plan was presented to me when I was appointed as Flint Emergency Manager in October 2013 - a full seven months after City Council's affirmative vote.

Genesee County Drain Commissioner Jeff Wright also made the affirmative vote by the City Council a necessary condition of joining the KWA, and applauded the decision in a March 26, 2013 news release, saying, "…I have said from the beginning that this decision must be made by Flint's City Council and Mayor…I am glad that the residents of Flint were able to have their voices heard via their elected officials."

The Mayor's approval of the plan, and the subsequent near unanimous vote by City Council were in no way coerced, forced or demanded by the State, nor any Emergency Manager. Council's affirmative vote was supported and officially signed into EM Executive Order by then Emergency Manager Edward Kurtz on March 29, 2013. A subsequent order Kurtz signed on June 26, 2013, speaks specifically to the, "… upgrading of the Flint Water Plant to ready it to treat water from the Flint River to serve as the primary drinking water source for approximately two years and then converting to KWA delivered lake water."

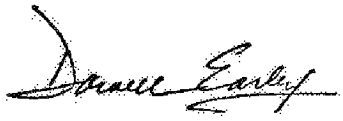
When I began my term as Emergency Manager, it fell to me to oversee the implementation of the previously accepted and approved plans, as the DWSD terminated the contract with Flint in April 2014. It did not fall to me to question, second guess or to invalidate the actions that were taken prior to my appointment.

At the time the decision was made there was no way to predict such an unfortunate outcome. I would also offer that had local leaders known then what they know now, parts of their decision may have been entirely different. What the City of Flint and the State of Michigan are now dealing with is the management of an unintended consequence resulting in a negative outcome from an otherwise sound public policy decision. There is no "blame" to affix on any Emergency Manager for that.

As the solutions are put into place to address the serious concerns at hand, I believe that everyone's attention should now turn toward another serious concern -- what is being done in the long-term to replace the aged and crumbling water distribution systems that exists throughout Flint and Genesee County, which was a major contributing factor to this serious issue in the first place.

I am a strong believer that the truth supported by fact, speaks for itself. This was a local decision that was made by local civic leaders. Anyone who says otherwise is being disingenuous for whatever reason.

Sincerely,



Darnell Earley, ICMA-CM, MPA

Dan,
Thanks for putting this draft together. I agree with Rich's edits, and the attached document has my recommendations. Also, I suggest we add the following departments to comment on this document as the issue in Flint now goes beyond water quality: Treasury, MSP and Dept. of Education. I've taken the liberty to solicit comments from the added directors through this reply.

Best,
Harvey

Subject: Comments on SoS

Dan:

I added Jarrod and Meegan since we were engaged with Harvey and with Governor Thursday morning last week. I may be advocating a higher degree of "aggression" than others deem proper and I will defer to Jarrod after having had my say.

My key points on the attached (with suggested language and which have been highlighted) are:

1). Apologize. It happened on our watch and it shouldn't have happened, no matter what the law says.

2). Invite those who were the biggest burrs under the saddle to come work with us. In fact, we should be articulating how they have already been invited to our labs to collaborate on the findings and conclusions.

3). Start framing the infrastructure problem. We have huge problems throughout the state with aged piping and plumbing. Ignoring it will be at the peril of future generations. We should put a number out there on what it is going to take to fix it or conclude it is safe for generations to come.

Thanks for taking the lead.

Regards,

Rich

I have put Comments/Questions/Suggestions in [ ]...

Draft –Not for Distribution 12/28/15

TAKING ACTION ON FLINT WATER

[I would start off with an apology..."Among the things our citizens have a right to expect from their government is clean, safe water. In Flint's case, government failed them on many levels. As the Chief Executive of the state, I apologize for these failures and am absolutely committed to making things right. I would ask that all of our leaders at the local, state and federal level, work with me to solve the immediate problems and put in place long term measures to monitor and address the consequences from exposure. I also want to thank Dr. Mona Attisha Hannah and Dr. Marc Edwards for their diligence in making sure I understood the severity of the problem before us.]

• Every municipality in Michigan deserves safe drinking water.

•

• As Governor, I am committed to addressing the issue.

• Lead exposure is a serious issue.

• I appreciate those who have brought attention to this issue.

• We are committed to safe drinking water and to working in partnership with the city of Flint, Genesee County, and the U.S. EPA.

• We must learn from what happened in Flint.

• In October, I announced a ten point action plan to address lead exposure in Flint.

• Today, I am outlining additional actions to make sure the public health is protected in Flint and elsewhere in the State of Michigan.

• I am asking for changes in order to see that the Michigan Drinking Water Program becomes a national leader in public health protection.

On October 2, 2015 the Flint Water Action Plan was announced. With the help of the Michigan Legislature and the Mott Foundation, we have taken significant action to address the issue. Actions include:

• Switching back to the Great Lakes Water Authority/DWSD water supply (October 16, 2015)

Deleted: Flint

Deleted: .

Comment [HH1]: The issue in Flint is the failure of Government to ensure safe drinking water. The aging infrastructure exacerbated that failure, and serves as the canary in the coal mine re the need for the legislature to address water and sewage infrastructure statewide.

Deleted: The issues around Flint's drinking water represent the challenges of aging infrastructure

Deleted: .

Comment [HH2]: It is important to note that this switch is temporary until KWA is online.

• Provided water filters to residents of Flint. (DHHS to provide update) [Distribution has been a problem--are we addressing it?]

• Testing all Flint schools, preschools and day cares. Summary of results to date.(George to provide)

• Expanded health exposure testing of individual residences. Summary of results to date. (Nick to provide)

• Offer water testing at no cost to Flint residents to assure safe water. Summary of results to date. (George to provide)

• Expedite optimizing corrosion control in the Flint drinking water system. Summary of date completed. (George to summarize)

• Utilize the "Safe Drinking Water Technical Advisory Committee." To ensure the best technology, practices and science are being utilized; national experts have been assembled to provide technical advice. [Will you include Dr. Mona? Larry Reynolds? Mark Edwards?]

• Accelerate water system improvement to address replacement of lead service lines. We are working with the city of Flint and our Congressional delegation on a lead service line replacement plan.

• Working to expedite the completion of the Karegnondi Water Authority. And to provide the expertise to upgrade the water treatment facility in Flint to ensure that the drinking water from KWA is at least the same quality as the water from GLWA/DWSD

• Expand a lead education program.
(DHHS to provide update)

• Dr. Eden Wells was named as the Flint Drinking Water Public Health Advisor to ensure safe drinking water.

[Flint's Head of Mott Children's Hospital, Dr. Larry Reynolds was named to the Flint After Action Task Force].

In addition to the announced Flint Action plan, I am calling for additional actions to be taken.

• Recently appointed Harvey Hollins to serve as my administration's point person to coordinate ongoing activities and partner with the city of Flint. [Harvey will be supported by senior members of my executive team to remove impediments and ensure efficient coordination at all levels.]

• Asking the DEQ to develop a statewide drinking water school testing program.

• Asking for changes in the Michigan Drinking Water Program in order for it to be recognized as a national leader in public health including:
o New administrative leadership.
o Creation of corrosion control expertise.
o Expanded statewide testing.
o Improved testing protocols.

• The creation of a health fund for children affected by lead exposure.

• Calling on the Legislature to work with my administration and stakeholders to develop a Strategic Water Fund to address Michigan's long term safe water and water quality infrastructure needs. [This can't get lost. Need more to educate people that our infrastructure is old, that the average city of 50,000 or more likely requires $$$ in remediation. At some point the anti corrosive treatment is not likely to be sufficient.]

• I will look to implement additional recommendations of the Flint Water Advisory Task Force, and I appreciate their leadership on this issue. [I would say more here—the TF was bi-partisan, independent, and staffed by incredible talent. It has done an incredible job].

• Ensure transparency for the public regarding actions taken in Flint to resolve this crisis
